Steinman, William G., New York, N. Y. Dress. 107,832; Jan. 4.
Sweet, Sam. (See Parness, R., and Sweet.)
Tauts, Herbert E., assignor to The Delta Manufacturing Company, Milwaukee, Wis. Belt sander. 107,805; Jan. 4.
Teamer, Clarence K. (See Farnum, L. M., and Teamer.)
Thamm, Rose M., Berkeley, Calif. Serviette holder. 107,806; Jan. 4.
Tissus Haute Couture, Inc. (See Donadieu, Jean G., assignor.)
Troy, Seymour, New York, N. Y. Shoe or similar article. 107,807; Jan. 4.
Troy, Seymour, New York, N. Y. Shoe or similar article. 107,808; Jan. 4.
United States Glass Company. (See Kelly, Robert A., assignor.)
Vassos, John, New Canaan, Conn., assignor to Radio Corporation of America. Control unit for electrical apparatus. 107,809; Jan. 4.
Vogel, Fenick A. (See Weidner, V., and Vogel.)
Waterfield, James, Philadelphia, Pa. Lace tablecloth. 107,833; Jan. 4.
Weidner, Victor, Port Washington, and F. A. Vogel, New York, N. Y. Lamp. 107,810; Jan. 4.
Weissenborn, Raymond A., Montclair, N. J. Pencil. 107,813; Jan. 4.
Welch, Irene, New York, N. Y. Dress. 107,811; Jan. 4.
Werthelm, Adolph, New York, N. Y. Shoe or similar article. 107,812; Jan. 4.
West Coast-Manchester Mills Inc. (See Fellegi, Margit, assignor.)
White, S. S., Dental Manufacturing Company, The. (See Farnum, L. M., and Teamer, assignors.)
Yale Fabrics Corp. (See Roberson, Willard D., assignor.)
Young, Curley. (See Milton, J. K., and Young.)
Zahn, Samuel, New York, N. Y. Dress. 107,834; Jan. 4.
Zellweger, Walter, Flushing, N. Y. Shoe or similar article. 107,814; Jan. 4.

LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 4TH DAY OF JANUARY, 1938

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Abbott, Frederick F. M., Edgware, assignor to N. P. Billing, London, England. Cinematograph camera and projector apparatus. 2,104,631; Jan. 4.
Abel, Walter L., Waterloo, Iowa. Coverall. 2,104,145; Jan. 4.
Abramson, Alexander, Prague, Czechoslovakia. Carburetor for combustion engines. 2,104,215; Jan. 4.
Ackerman, William, London, Ohio. Combined cultivator and weed cutter. 2,104,004; Jan. 4.
Adamczyk, Alois, Bethlehem, Pa. Ice cube crusher. 2,104,577; Jan. 4.
Adams, Basil A., and E. L. Holmes, Teddington, England. Manufacture and use of synthetic resins. 2,104,501; Jan. 4.
Adams, Daniel G., assignor to Adams Grease Gun Corporation, New York, N. Y. Lubricating apparatus. 2,104,146; Jan. 4.
Adams Grease Gun Corporation. (See Adams, Daniel G., assignor.)
Addressograph-Multigraph Corporation. (See Hagelin, William T., assignor.)
Adell, John A., Orange, assignor of one-half to A. L. Johnson, Worcester, Mass. Making threaded tubes. 2,104,688; Jan. 4.
Agfa Ansco Corporation. (See Zeh, Walter, assignor.)
Agnew, Norman F., Penn Township, Allegheny County, and B. Mishelevich, Pittsburgh, assignors to The Union Switch & Signal Company, Swissvale, Pa. Electrical relay. 2,104,603; Jan. 4.
Agnew, Norman F., Swissvale, and B. Mishelevich, Pittsburgh, assignors to The Union Switch & Signal Company, Swissvale, Pa. Electrical relay. 2,104,602; Jan. 4.
Agnew, Norman F., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Apparatus for charging storage batteries. 2,104,632; Jan. 4.
Agosta, Corrado, and F. Notarangelo, Bristol, Conn. Tap for tap-dancing shoes. 2,104,179; Jan. 4.
Air-Way Electric Appliance Corporation. (See Dow, Dewey M., assignor.)
Aktiebolaget Gerh. Arehns Mekaniska Verkstad. (See Johnson, Bror A. E., assignor.)
Aktiebolaget Rosenblads Patenter. (See Rosenblad, Curt F., assignor.)
Albrecht, George F., Saco, Maine. Bolster. 2,104,216; Jan. 4.
Alexander, Donald F. (See Candor, E. R., and Alexander.)
Alexander, Donald F. (See Hull, H. B., and Alexander.)
Alexander, Donald F., C. F. Heaney, and C. L. Paulus, assignors to General Motors Corporation, Dayton, Ohio. Refrigerating apparatus. 2,104,148; Jan. 4.
Alexander, Donald F., C. F. Heaney, and C. L. Paulus, assignors to General Motors Corporation, Dayton, Ohio. Refrigerating apparatus. 2,104,282; Jan. 4.
Alexander, Donald F., C. L. Paulus, and C. F. Heaney, assignors to General Motors Corporation, Dayton, Ohio. Refrigerating apparatus. 2,104,281; Jan. 4.
Alexanderson, Ernst F. W., Schenectady, N. Y., assignor to General Electric Company. Electric valve circuits. 2,104,633; Jan. 4.
Allegheny Steel Company. (See Scharschu, Charles A., assignor.)
Allen, Robert C., Wauwatosa, Wis., assignor to Murray Iron Works Company, Burlington, Iowa. Valve. 2,104,502; Jan. 4.
Aluminum Company of America. (See Decker, Henry, assignor.)
Aluminium Laboratories Limited. (See Ruthven, Frederick F., assignor.)
American Can Company. (See Hothersall, John M., assignor.)
American Can Company. (See Hull, Wilson R., assignor.)
American Cast Iron Pipe Company. (See Barr, C. D., and Holmes, assignors.)
American Foundry Equipment Company, The. (See Pelk, Louis D., assignor.)
American Hardware Corporation, The. (See Hurd, Norman B., assignor.)
American Optical Company. (See Baker, Nelson M., assignor.)
American Potash & Chemical Corporation. (See Burke, W. E., and de Ropp, assignors.)
American Sales Book Company. (See Janney, John B., assignor.)
American Steel and Wire Company of New Jersey, The. (See Gleason, George A., assignor.)
American Telephone and Telegraph Company. (See Honaman, R. K., and Swart, assignors.)
American Telephone and Telegraph Company. (See Swart, Leland K., assignor.)
Anaconda Copper Mining Company. (See Frick, F. F., and Cooper, assignors.)
Anaconda Lead Products Company. (See Stockdale, S. W., Weaver, and Tinnes, assignors.)
Anaconda Wire & Cable Company. (See Webb, John B., assignor.)
Anderson, David E., assignor to Bohn Aluminum and Brass Corporation, Detroit, Mich. Manifold construction. 2,104,175; Jan. 4.
Anderson, James K., Leeds, England. Actuating mechanism for doffing mechanism. 2,104,474; Jan. 4.
Anderson, Samuel M., Sharon, assignor to B. F. Sturtevant Company, Boston, Mass. Spray type conditioner for passenger vehicles. 2,104,475; Jan. 4.
Anderson, Vern E., Lansing, Mich. Grinding apparatus. 2,104,147; Jan. 4.
Andrews, E. J. (See Krag, Erik L., assignor.)
Animal Trap Company of America. (See Zahm, Joseph D., assignor.)
Ankretell, Edward N., assignor to The A. C. Gilbert Company, New Haven, Conn. Camera model. 2,104,476; Jan. 4.
Apple, Bessie D. (See Cotterman, Frederick W., assignor.)
Armstrong, Edwin H., New York, N. Y. Radio signaling system. 2,104,011; Jan. 4.
Armstrong, Edwin H., New York, N. Y. Multiplex radio signaling system. 2,104,012; Jan. 4.
Arnesen, Charolette A., Chicago, Ill. Container. 2,104,005; Jan. 5.
Arutunoff, Armais, Bartlesville, Okla. Gas separator for pumps. 2,104,339; Jan. 4.
Ashjean, A. Ted, et al. (See Wohlfarth, Walter W., assignor.)
Askania-Werke A. G. vormals Centralwerkstatt Dessau und Carl Bamberg-Friedenau. (See von Manteuffel, Gert Z., assignor.)
Automatic Instrument Company. (See Green, Clifford H., assignor.)
Ayars, Charles H., assignor to Ayars Machine Company, Salem, N. J. Can filling machine. 2,104,445; Jan. 4.
Ayars Machine Company. (See Ayars, Charles H., assignor.)
Babcock, Lillian. (See Schopbach, C. H., and Babcock.)
Babitch, Abraham M., and G. W. Harry, Flint, assignors to General Motors Corporation, Detroit, Mich. Fuel pump. 2,104,446; Jan. 4.
Babitch, Abraham M., and G. W. Harry, Flint, assignors to General Motors Corporation, Detroit, Mich. Vacuum pump. 2,104,447; Jan. 4.
Babitch, Abraham M., and G. W. Harry, Flint, assignors to General Motors Corporation, Detroit, Mich. Fuel pump. 2,104,448; Jan. 4.
Bailey, Frederick W., et al. (See Robinson, Frederick W., assignor.)
Bailey, Henry H., Riverside, Ill., assignor to The Barrett Company, New York, N. Y. Shingle. 2,104,067; Jan. 4.
Baird, William, Blackley, England, assignor to Imperial Chemical Industries Limited. Quaternary ammonium salts of mercaptoarylenethiazoles. 2,104,038; Jan. 4.
Baker, Arthur R., Indianapolis, Ind., assignor, by mesne assignments, to Columbia Carburetor Company. Forming a fuel charge for internal combustion engines. 2,104,013; Jan. 4.
Baker, Nelson M., assignor to American Optical Company, Southbridge, Mass. Forming connecting means for ophthalmic mountings. 2,104,503; Jan. 4.
Baker Perkins Company. (See Guggenheim, Max M., assignor.)
Baker-Raulang Company, The. (See Stahl, Edward J., assignor.)
Ball Brothers Company. (See Wadsworth, Frank L. O., assignor.)
Ballou, John McK., Los Angeles, Calif. Airplane. 2,104,006; Jan. 4.
Banker, Oscar H., assignor to New Products Corporation, Chicago, Ill. Clutch mechanism. 2,104,014; Jan. 4.
Barber, Howard M., Pawcatuck, Conn., assignor to C. B. Cottrell & Sons Company, Westerly, R. I. Flat sheet delivery for web printing rotary presses. 2,104,578; Jan. 4.
Barbieri, Cesare, New York, N. Y., assignor to Dixie-Vortex Company, Chicago, Ill. Forming paper cups. 2,104,535; Jan. 4.
Barends, William, New York, N. Y. Forced feed draft equaliser. 2,104,504; Jan. 4.
Barker, Ernest L., Houston, Tex. Tubing head or hanger. 2,104,180; Jan. 4.
Barker, John A., Roseboro, and R. L. Dew, Clinton, N. C. Automobile safety switch. 2,104,689; Jan. 4.

Barnes, Stuart C., Detroit, Mich. Handle assembly escutcheon. 2,104,217; Jan. 4.

Barnett, Arthur J., Buffalo, N. Y. Pocket shaper. 2,104,111; Jan. 4.

Barr, Clarence D., and D. O. Holmes, assignors to American Cast Iron Pipe Company, Birmingham, Ala. Hot blast cupola. 2,104,393; Jan. 4.

Barratt, Arthur C., York Township, York County, Ontario, Canada. Vehicle wheel. 2,104,212; Jan. 4.

Barrett Company, The. (See Bailey, Henry H., assignor.)

Barrett Company, The. (See Hamlin, Marston L., assignor.)

Barrett Company, The. (See Kenney, John A., assignor.)

Bartek, John S., assignor to Consolidated Machine Tool Corporation, Rochester, N. Y. Cutter clamping mechanism. 2,104,604; Jan. 4.

Barton, William K. (See Pattison, H. J., and Barton.)

Baskin, Charles M., Toronto, Ontario, Canada, assignor to Standard Oil Development Company. Production of hot mix cold laid bituminous pavements. 2,104,410; Jan. 4.

Baskin, Charles M., Toronto, Ontario, Canada, assignor to Standard Oil Development Company. Producing a hot mix, cold laid paving mixture. 2,104,411; Jan. 4.

Bates, Jesse H., Wauwatosa, assignor to Harnischfeger Corporation, Milwaukee, Wis. Panel fastener. 2,104,550; Jan. 4.

Bauer, Walter. (See Röhm, O., and Bauer.)

Baumann, Fritz, Leverkusen-I. G. Werk, Germany, assignor to General Aniline Works, Inc., New York, N. Y. Phosphorous acid esters of hydroxyalkylamino anthraquinones. 2,104,286; Jan. 4.

Baxter, John P., Widnes, T. N. Montgomery, Lancaster, and J. G. Moore, Runcorn, England, assignors to Imperial Chemical Industries Limited. Treatment of solutions of chlorinated rubber. 2,104,060; Jan. 4.

Bausch, Lewis J., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Shoe sole fitting machine. 2,104,113; Jan. 4.

Bean, Arthur G., and B. Holmberg, assignors to The Foxboro Company, Foxboro, Mass. Method of and apparatus for printing instrument charts or the like. 2,104,551; Jan. 4.

Beardsley, Orie L., Gary, Ind. Spade for a gun trail. 2,104,015; Jan. 4.

Beck, Harry P., Lake City, Minn. Trousers support. 2,104,287; Jan. 4.

Bedford, Burnice D., Schenectady, N. Y. Electric valve circuits. 2,104,690; Jan. 4.

Bell, Charles L., assignor to Lubbers & Bell Manufacturing Company, Clinton, Iowa. Fly swatter. 2,104,149; Jan. 4.

Bell Telephone Laboratories, Incorporated. (See Bowne, L. J., Lamberty, and Stokely, assignors.)

Bell Telephone Laboratories, Incorporated. (See Johnson, J. B., and Kammerer, assignors.)

Bell Telephone Laboratories, Incorporated. (See Kinkead, Fullerton S., assignor.)

Bell Telephone Laboratories, Incorporated. (See Kuntz, Frank A., assignor.)

Bell Telephone Laboratories, Incorporated. (See Marshall, Robert N., assignor.)

Bell Telephone Laboratories, Incorporated. (See McCormick, C. G., and Sheatsley, assignors.)

Ben-Bark, Inc. (See Kaplan, Jacob, assignor.)

Bendix Aviation Corporation. (See Heintz, Ralph M., assignor.)

Bendix Aviation Corporation. (See Spengler, Walter J., assignor.)

Bendix-Westinghouse Automotive Air Brake Company. (See Surdy, Charles J., assignor.)

Bennett, George L., Terre Haute, Ind. Method of and apparatus for mining coal and the like. 2,104,579; Jan. 4.

Berthold, Hermann, Leverkusen-I. G.-Werk, Germany, assignor to General Aniline Works, Inc., New York, N. Y. Dyestuffs on cellulosic fibers. 2,104,508; Jan. 4.

Bertsche, Harry A., Detroit, assignor of one-half to J. R. Weeks, Birmingham, Mich. Warm air furnace. 2,104,161; Jan. 4.

Bertram, Hugo A., Malden, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Wood heel making machine. 2,104,115; Jan. 4.

Best, Frank C., assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle. 2,104,182; Jan. 4.

Betsold, Max F., C. Rascher, and C. A. Torp, assignor to Rascher & Betsold, Inc., Chicago, Ill. Thermometer. 2,104,218; Jan. 4.

Beyer, Millard L. (See Royce, A. A., and Beyer.)

Bigan, William P., Washington, D. C. Respiratory device. 2,104,016; Jan. 4.

Bilek, Karel. (See Svoboda, Jaroslav, and L. and Bilek.)

Billing, Neal P. (See Abbott, Frederick F. M., assignor.)

Biro, Carl G., Marblehead, Ohio. Meat cutting and slicing machine. 2,104,360; Jan. 4.

Bischoff, Robert. (See Brisbane, E. C., and Bischoff.)

Blanck, Frederick C., Washington, D. C., T. L. Swenson, Chevy Chase, Md., H. H. Mottern, Pullman, Wash., and H. R. Goreslne, Silver Spring, and E. K. Nelson, Sligo Park Hills, Md., dedicated to the free use of the People of the United States of America. Preservation of liquids. 2,104,710; Jan. 4.

Blattner, Emil H., assignor to The Symington-Gould Corporation, Rochester, N. Y. Draft rigging. 2,104,114; Jan. 4.

Blau, Ludwig W. (See Statham, L., and Blau.)

Blee, Willis B., Rockville Centre, and B. W. Kelly, New York, N. Y. Optometric apparatus. 2,104,552; Jan. 4.

Blekstad, Walter S., et al. (See Sommer, Robert, assignor.)

Blood, Richard E., Amsterdam, N. Y. Raglan sleeve garment. 2,104,282; Jan. 4.

Bloom, Abraham, assignor to Newark Refrigeration and Appliance Co., Plainfield, N. J. Frost control. 2,104,219; Jan. 4.

Bodine Corporation, The. (See Noel, Alfred J., assignor.)

Bohme Fettchemih-Gesellschaft m. b. H. (See Grün, Adolf, assignor.)

Bohn Aluminum and Brass Corporation. (See Anderson, David E., assignor.)

Bohn Aluminum & Brass Company. (See Nelson, Adolph L., assignor.)

Boldt, Werner F., assignor to Wagner Electric Corporation, St. Louis, Mo. Power transmission control mechanism. 2,104,605; Jan. 4.

Bone, Herbert L., Forest Hills, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway braking apparatus. 2,104,607; Jan. 4.

Bone, Herbert L., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway braking apparatus. 2,104,606; Jan. 4.

Bonser, Joseph R., Addlescombe-Surrey, England, and G. Konsal, Hackensack, N. J. Composition for treatment of seeds. 2,104,316; Jan. 4.

Borberg, Adolf, Short Hills, N. J., assignor to Carnegie Steel Company. Piling section. 2,104,116; Jan. 4.

Borden Company, The, et al. (See Supplee, George C., assignor.)

Borg-Warner Corporation. (See Swennes, Benjamin A., assignor.)

Bowen, Herbert C., assignor to Hydraulic Brake Company, Detroit, Mich. Hydraulic brake system. 2,104,220; Jan. 4.

Bower, Raymond G., assignor to Burroughs Adding Machine Company, Detroit, Mich. Power operated typewriter. 2,104,007; Jan. 4.

Bowers, Charles O., and A. C. Williams, assignors of one-third to S. H. Davis, Lansing, Mich. Brake mechanism. 2,104,702; Jan. 4.

Bowman, James W., Bellingham, Wash. Detachable shoe heel plate device. 2,104,289; Jan. 4.

Bowne, Langford J., Howard Beach, F. R. Lamberty, Brooklyn, and E. L. Stokely, deceased, by G. M. Stokely, executrix, Floral Park, assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telephone system. 2,104,449; Jan. 4.

Boynton, Alexander, San Antonio, Tex. Method of and apparatus for lifting fluid. 2,104,006; Jan. 4.

Bradshaw, Hamilton, assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Stabilization of animal and vegetable fats and oils. 2,104,070; Jan. 4.

Bradshaw, Russell R., assignor to The Dow Chemical Company, Midland, Mich. Cellulose ether purification. 2,104,017; Jan. 4.

Bradwell, Robert H., assignor to Polly Prentiss, Inc., Sumter, S. C. Machine for producing spaced groups of tufts on fabric. 2,104,634; Jan. 4.

Bratten, Phillip M., Fort Worth, Tex., assignor to General Motors Corporation, Dayton, Ohio. Refrigerating apparatus. 2,104,711; Jan. 4.

Breedlove, Harry B., Memphis, Tenn. Suppressing interference in radio reception. 2,104,635; Jan. 4.

Bremser, Albert T., Westmont, N. J. Internal combustion engine. 2,104,150; Jan. 4.

Brennan, Joseph B., Fort Wayne, Ind. Electrolytic device and making same. 2,104,018; Jan. 4.

Brennan, Joseph B., Fort Wayne, Ind. Electrolytic condenser. 2,104,019; Jan. 4.

Brewer, Charles A., Noreton Heights, Conn., assignor of one-half to P. J. Kury, Arverne, N. Y. Motor vehicle control mechanism. 2,104,580; Jan. 4.

Briggs Manufacturing Company. (See Pattison, H. J., and Barton, assignors.)

Brisbane, Eugene C., and R. Bischoff, assignors to S. Morgan Smith Company, York, Pa. Valve. 2,104,151; Jan. 4.

Bristol Tramways & Carriage Company Limited, The. (See Redrup, Charles B., assignor.)

Brodersen, Karl, Dessau in Anhalt, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Treating fibrous materials with alkaline liquids of mercerising strength. 2,104,290; Jan. 4.

Brostrom, Charles G., Peabody, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for operating upon shoe-heels. 2,104,183; Jan. 4.

Browning, J. M., and M. S., Company. (See Browning, Val A., assignor.)

Browning, Val A., Liege, Belgium, assignor to J. M. and M. S. Browning Company, Ogden, Utah. Repeating firearm. 2,104,581; Jan. 4.

Bryant, Beatrice G., Oklahoma City, Okla. Envelope vanity. 2,104,361; Jan. 4.

Buc, Hyym E., Roselle, N. J., assignor to Standard Oil Development Company. Alkyl phenols. 2,104,412; Jan. 4.

Burcham, James R., Newcastle, Ind. Advertising device. 2,104,636; Jan. 4.

Burcky, Charles W., assignor to Teletype Corporation, Chicago, Ill. Printing telegraph apparatus. 2,104,071; Jan. 4.

Burke, William R., Troxa, Calif., and H. de Rogy, Charleston, W. Va., assignors to American Potash & Chemical Corporation, Troxa, Calif. Manufacture of boric acid. 2,104,009; Jan. 4.

Burroughs Adding Machine Company. (See Bower, Raymond G., assignor.)

Byford, George E. (See Rapisarda, Edward D., assignor.)

Cadman, Addi B., Beloit, Wis. Rheostat. 2,104,020; Jan. 4.

Cahoon, Brent F., Kew Gardens, assignor to Captive Closures, Inc., New York, N. Y. Closure for containers. 2,104,413; Jan. 4.

Callis, Conral C., Oakmont, Pa. Fuel. 2,104,621; Jan. 4.

Campbell, Melvin M., South St. Joseph, Mo., assignor to Industrial Patents Corporation, Chicago, Ill. Casing conveyor. 2,104,450; Jan. 4.

Candee, Alice H., assignor to Gleason Works, Rochester, N. Y. Method of and machine for producing gears. 2,104,184; Jan. 4.

Candor, Robert R., and D. F. Alexander, assignors to General Motors Corporation, Dayton, Ohio. Refrigerating apparatus. 2,104,383; Jan. 4.

Captive Closures, Inc. (See Cahoon, Brent F., assignor.)

Caraballo, Martin, and J. G. Zaudegui, Tampa, Fla. Device for perforating the ends of cigars. 2,104,291; Jan. 4.

Caraballo, Martin, and J. G. Zaudegui, Tampa, Fla. Cigar tip perforating machine. 2,104,292; Jan. 4.

Carbide and Carbon Chemicals Corporation. (See Chitwood, H. C., and Perkins, assignors.)

Carborundum Company, The. (See de Leeuw, Peter, assignor.)

Carborundum Company, The. (See Rickard, George B., assignor.)

Carey, Philip, Manufacturing Company, The. (See Jussen, H. C., and Malcolm, assignors.)

Carlisle, Piet M., assignor to Panama Brick & Tile Company, Panama City, Fla. Brick and tile machine. 2,104,293; Jan. 4.

Carlson, Bert G., Queens Village, assignor to Sperry Gyroscope Company, Inc., Brooklyn, N. Y. Airplane engine synchronizer. 2,104,583; Jan. 4.

Carmody, Thomas G., Providence, R. I. Signal umbrella. 2,104,340; Jan. 4.

Carnegie Steel Company. (See Borberg, Adolf, assignor.)

Carp's Handelsbureau voor Aviatiek en Scheepsaaken N. V. (See Hamel, Wilhelm, assignor.)

Carr, Sidney L., Palo Alto, assignor of one-half to J. Larson, San Francisco, Calif. Collapsible universal book support. 2,104,072; Jan. 4.

Carrier Corporation. (See Lyman, Samuel E., assignor.)

Cattanach, John. (See Odenbach, J. H., and Cattanach.)

Ceramic Machinery Distributors Limited. (See Shurley, Frederick, assignor.)

Chapman, Everett, Coatesville, Pa. Bridge construction. 2,103,022; Jan. 4.

Chitwood, Henry C., and G. A. Perkins, Charleston W. Va., assignors to Carbide and Carbon Chemicals Corporation. Production of oleine ethers. 2,104,717; Jan. 4.

Clarkson, William S., Ann Arbor, Mich. Liquid weight meter. 2,104,010; Jan. 4.

Clausen, Harold C. Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway braking apparatus. 2,104,185; Jan. 4.

Clausen, Harold C., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway braking apparatus. 2,104,186; Jan. 4.

Clausen, Harold C., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway braking apparatus. 2,104,187; Jan. 4.

Claybourn, Leslie W., Milwaukee, Wis., assignor to C. B. Cottrell & Sons Company, Westerly, R. I. Registering printing plates. 2,104,553; Jan. 4.

Clayton Manufacturing Company. (See Kerrick, Walter B., assignor.)

Clement, Louis B., Meudon, France, assignor, by mesne assignments, to Eastman Kodak Company, Jersey City, N. J. Manufacture of cellulose esters. 2,104,023; Jan. 4.

Cleveland Rock Drill Company, The. (See Curtis, John C., assignor.)

Cleveland Trust Company, The. (See Gauger, Frank A., assignor.)

Climax Rock Drill & Engineering Works Limited. (See Langdon, Alfred G., assignor.)

Coddington, Edwin D., Milwaukee, Wis., assignor to Reynolds Corporation, New York, N. Y. Stud. 2,104,506; Jan. 4.

Cohrs, Fred W., Calgary, Alberta, Canada. Gas burner. 2,104,317; Jan. 4.

Coldwell, John S., assignor, by mesne assignments, to Globe-Union Inc., Milwaukee, Wis. Roller skate. 2,104,536; Jan. 4.

Cole, Frank O., assignor to The Timken-Detroit Axle Company, Detroit, Mich. Liquid fuel burning apparatus. 2,104,691; Jan. 4.

Coleman, Gerald H., B. C. Hadler, and H. C. Suckermandel, assignors to The Dow Chemical Company, Midland, Mich. Manufacture of chloroform. 2,101,703; Jan. 4.

Colston, Robert, Chicago, Ill., assignor to J. M. Hopwood, Dormont, Pa. Control system for furnaces. 2,104,221; Jan. 4.

Columbia Carburetor Company. (See Baker, Arthur R., assignor.)

Compagnie Generale de Telegraphie sans Fil. (See Goudet, H., and Sénéchaux, assignors.)

Conklin, Joseph A., San Francisco, Calif. Air conditioned sleeping cabinet. 2,104,024; Jan. 4.

Conklin, James W., Rocky Point, N. Y., assignor to Radio Corporation of America. Line resonator. 2,104,554; Jan. 4.

Consolidated Car-Heating Company. (See Touceda, Enrique G., assignor.)

Consolidated Machine Tool Corporation. (See Bartek, John S., assignor.)

Consolidated Trimming Corporation. (See Klahre, Hugo A., assignor.)

Cooke, Giles B., and S. L. Wilbur, assignors to Crown Cork & Seal Company, Inc., Baltimore, Md. Cork composition and manufacture. 2,104,602; Jan. 4.

Cooper, John P. (See Frick, F. F., and Cooper.)

Copeland, L. T., et al., administrators. (See Hunter, P. E., and Nightingale.)

P., and Nightingale.)

Corbett, Alfred, Irwin, Pa., assignor to National Electric Products Corporation. Junction adapter. 2,104,451; Jan. 4.

Coryell, Charles N., Mamaroneck, N. Y. Holder for stick material. 2,104,344; Jan. 4.

Cosmelter, Bruno, et al. (See Sommer, Robert, assignor.)

Cotterman, Frederick W., assignor to B. D. Apple, Dayton, Ohio. Seal for ball bearing structure. 2,104,165; Jan. 4.

Cotterman, Frederick W., assignor to B. D. Apple, Dayton, Ohio. Molding thermoplastics. 2,104,189; Jan. 4.

Cottrell, C. B., & Sons Company. (See Barber, Howard M., assignor.)

Cottrell, C. B., & Sons Company. (See Claybourn, Leslie W., assignor.)

Coustaix, Blaise, Boulogne sur Seine, assignor to Societe Anonyme des Manufactures des Glaces & Produits Chimiques de Saint-Gobain, Chauny & Cirey, Paris, France. Electrical furnace. 2,104,555; Jan. 4.

Crafts, Curtis S., Oak Park, assignor to The Goss Printing Press Company, Chicago, Ill. Sheet cutting, stitching, and folding mechanism. 2,104,452; Jan. 4.

Crain, Manley L., and C. E. Smith, reor, S. C. Warp beam holder for yarn drying machines. 2,104,507; Jan. 4.

Crane Company of Minnesota. (See Hougland, Albert C., assignor.)

Cox, John C., and G. H. Thomas; said Cox assignor to Wagner Electric Corporation, St. Louis, Mo., and said Thomas assignor to P. M. Salerni, London, England. Change-speed transmission. 2,104,608; Jan. 4.

Criqui, Charles A. (See Larkin, Elwood T., assignor.)

Crockett, William P., and W. P. Crockett, Jr., assignors to Hospo, Inc., Chicago, Ill. Electric light fixture. 2,104,414; Jan. 4.

Crockett, William P., Jr. (See Crockett, William P., and W. P., Jr.)

Crooke, Kenneth E., Williamsport, Pa. Coating. 2,104,637; Jan. 4.

Crosby, Murray G., Riverhead, N. Y., assignor to Radio Corporation of America. Multiple phase modulation. 2,104,318; Jan. 4.

Crown Cork & Seal Company. (See Cooke, G. B., and Wilbur, assignors.)

Cullen, Katherine T., administratrix. (See Cullen, Roy G.)

Cullen, Roy G., deceased, by K. T. Cullen, administratrix, Houston, Tex. Washing wells. 2,104,294; Jan. 4.

Cummings, Williams F., assignor to Great Lakes Concrete Pipe Co. Inc., Buffalo, N. Y. Pipe rolling device. 2,104,362; Jan. 4.

Curtis, John C., Garfield Heights, assignor to The Cleveland Rock Drill Company, Cleveland, Ohio. Portable drilling rig. 2,104,341; Jan. 4.

Curtis, John C., Garfield Heights, assignor to The Cleveland Rock Drill Company, Cleveland, Ohio. Feeding mechanism for rock drills. 2,104,712; Jan. 4.

Curtis, Thomas J., Los Angeles, Calif. Electro-therapeutic device. 2,104,252; Jan. 4.

Cusi, Dante S. (See Martinez, J. J., and Cusi.)

Cuthbert, William R., assignor to W. A. Sheaffer Pen Company, Fort Madison, Iowa. Fountain pen. 2,104,638; Jan. 4.

Cutler-Hammer, Inc. (See Kuhn, Clarence W., assignor.)

Cutler-Hammer, Inc. (See Meuer, George J., assignor.)

Daimler-Benz Aktiengesellschaft. (See Hiecker, Walter, assignor.)

Dain Manufacturing Company of Iowa. (See Jones, Frank D., assignor.)

Dall, Edward D., Cleveland, assignor to W. F. Wright, Shaker Heights, Ohio. Door locking and window operating device for automobiles and the like. 2,104,639; Jan. 4.

Daly Bros. Shoe Company. (See Daly, Charles L., assignor.)

Daly, Charles L., Belmont, assignor to Daly Bros. Shoe Company, Inc., Boston, Mass. Rubber sole. 2,104,583; Jan. 4.

Dangelmajer, Charles. (See Magill, P. L. F., and Dangelmajer.)

Davidson, Nathan, Los Angeles, Calif. Building block and construction. 2,104,152; Jan. 4.

Davies, Austin M., Jamaica, N. Y. Preservation of fruit juices. 2,104,415; Jan 4.

Davis, Lewis, assignor to McLaurin-Jones Co., Brookfield, Mass. Decalcomania paper. 2,104,025; Jan. 4.

Davis, Samuel H. (See Bowers, C. O., and Williams, assignors.)

Dearborn, Frederick E., Washington, D. C., dedicated to the free use of the Public in the United States. Double salts of copper arsenite and a copper salt of a higher unsaturated fatty acid. 2,104,544; Jan. 4.

Decker, Henry, Bogota, N. J., assignor to Aluminum Company of America, Pittsburgh, Pa. Extruding metal containers. 2,104,222; Jan. 4.

De Golyer, Anthony G., New York, N. Y., assignor to Vulcan Alloy Corporation, Weirdod. 2,104,693; Jan. 4.

De Golyer, Anthony G., New York, N. Y., assignor to Vulcan Alloy Corporation, Weirdod. 2,104,694; Jan. 4.

De Leeuw, Peter, assignor, by mesne assignments, to The Carborundum Company, Niagara Falls, N. Y. Manufacture of ceramic articles. 2,104,609; Jan. 4.

Delpech, Gaston. (See George H., and Delpech.)

De Luxe Products Corporation. (See Horn, James E., assignee.)

De Martini, Paul G., Jr., San Francisco, Calif. Table accessory. 2,104,342; Jan. 4.

De Mont, Robert E., Cleveland, Ohio. Collapsible support for curtains. 2,104,416; Jan. 4.

Demeter, Ladislaus, Monor, Hungary. Fuse for hand grenades and projectiles. 2,104,508; Jan. 4.

Dentists' Supply Company of New York, The. (See Gysi, Alfred, assignor.)

De Ropp, Harald. (See Burke, W. E., and de Ropp.)

Detroit Dental Manufacturing Company. (See Jones, Clevee, assignor.)

Detroit Edison Company, The. (See Matthews, George A., assignor.)

Detroit Lubricator Company. (See Russel, Philip S., assignor.)

Dettar, Steve, Detroit, Mich. Circuit breaker. 2,104,190; Jan. 4.

De Varda, Giuseppe Serravalle Scria, Italy. Recovery of calcium phosphate, alumina and potassium values from their insoluble minerals. 2,104,295; Jan. 4.

Devaux, Frederic, Paris, France. Type casting and setting machine. 2,104,509; Jan. 4.

Devlin, James R., Worcester, Mass. Snow removal device. 2,104,368; Jan. 4.

Dew, Hebert L. (See Barker, J. A., and Dew.)

Dicke, Allen A., Montclair, N. J., assignor to Remington Arms Company, Inc. Manufacture of rifled tubes. 2,104,219; Jan. 4.

Dixie-Vortex Company. (See Bertieri, Cesare, assignor.)

Dodge, Sherwood O., Medford, assignor to Guaranteed Parts, Inc., Alleton, Mass. Shuttle. 2,104,153; Jan. 4.

Dolomite Marine Corporation. (See Odenbach, J. H., and Catzinach, assignors.)

Dolphi, James J., Cranston, and H. Hintze, West Warwick, R. I. Textile printing machine. 2,104,417; Jan. 4.

Dome, Robert B., Bridgeport, Conn., assignor to General Electric Company. Antenna and coupler system. 2,104,610; Jan. 4.

Derr Company, The, et al. (See Weinig, Arthur J., assignor.)

Dougherty, Pryor E., Morristown, N. J. Educational apparatus. 2,104,718; Jan. 4.

Dow, Alden B., and R. Goodall, Midland, Mich.; said Goodall assignor to said Dow. Construction block. 2,104,585; Jan. 4.

Dow Chemical Company, The. (See Bradshaw, Russell R., assignor.)

Dow Chemical Company, The. (See Coleman, G. H., Hadler, and Zuckermandel, assignors.)

Dow, Dewey M., assignor to Air-Way Electric Appliance Corporation, Toledo, Ohio. Vacuum cleaner. 2,104,483; Jan. 4.

Dowell, Arthur E., Washington, D. C., assignor to The Duplex Printing Press Company, Battle Creek, Mich. Rotary press unit. 2,104,036; Jan. 4.

Dragon, John J., New York, N. Y. Alarm clock. 2,104,611; Jan. 4.

Draugelis, John, Girardville, Pa. Concrete composition. 2,104,477; Jan. 4.

Duell, Henry R., Rowena, Tex. Supporting pin for eyeglasses and the like. 2,104,612; Jan. 4.

Druyvesteyn, Mari J., and N. Warmoltz, Eindhoven, Netherlands, assignors to General Electric Company. Gaseous electric discharge device. 2,104,073; Jan. 4.

Du Bois, Alfred, Paris, France. Sacking into valve bags. 2,104,154; Jan. 4.

Dubos, Peter A., New Orleans, La. Process of and apparatus for treating crustacea. 2,104,027; Jan. 4.

Duff-Norton Manufacturing Company, The, (See Bohrerin, Frank H., assignor.)

Dunmore, Francis W., Washington, D. C., assignor to Government of the United States of America, as represented by the Secretary of Commerce. Aircraft blind landing beam system. 2,104,028; Jan. 4.

Dupleix Printing Press Company, The. (See Dowell, Arthur E., assignor.)

Du Pont, E. I., de Nemours & Company. (See Bradshaw, Hamilton, assignor.)

Du Pont, E. I., de Nemours & Co. (See Gilbert, H. N., and Wernert, assignors.)

Du Pont, E. I., de Nemours & Company. (See Latham, George H., assignor.)

Du Pont, E. I., de Nemours & Company. (See Magill, P. L. F., and Dangelmajer, assignors.)

Du Pont, E. I., de Nemours & Company. (See Oplinger, Floyd F., assignor.)

Duro Metal Products Company. (See Hedgpeth, Theron L., assignee.)

Eames, William F., Edgewood, Pa., assignor to Westinghouse Electric Elevator Company, Chicago, Ill. Elevator control system. 2,104,478; Jan. 4.

Eastman Kodak Company. (See Clement, Louis R., assignor.)

Eclipse Aviation Corporation. (See McNeil, C. L., and Zwack, assignors.)

Efco Manufacturing Company. (See Friedman, Irving, assignor.)

Eglof, Gustav, assignor, by mesne assignments, to Universal Oil Products Company, Chicago, Ill. Treatment of hydrocarbon oils. 2,104,418; Jan. 4.

Einfalt, Georg, Nuremberg, Germany. Toy railway. 2,104,510; Jan. 4.

Electrolock Manufacturing Company. (See Hemingway, Wilson, Jr., assignor.)

Ellis, Ruell S., Vineland, N. J. Separating particles of solid material by flotation. 2,104,537; Jan. 4.

Engler, Otto, assignor to Schmidt'sche Heissdampf-Gesellschaft m. b. H., Cassel-Wilhelmshohe, Germany. Apparatus for generating steam. 2,104,613; Jan. 4.

Ensinger-Union-Werke A. G. (See Files, Hermann, assignor.)

Epley, Frederic L., assignor to The Superheater Company, New York, N. Y. Superheater. 2,104,155; Jan. 4.

Erbach, Fred R., assignor to General Refrigeration Corporation, Beloit, Wis. Automatic clutch for multiple V-belt drives. 2,104,074; Jan. 4.

Eshman, Louis A., Los Angeles, Calif. Hemostat. 2,104,029; Jan. 4.

Excel Auto Radiator Company. (See Sperry, Philmore F., assignor.)

Farnsworth, Philo T., San Francisco, Calif., assignor to Farnsworth Television Incorporated. Luminescent screen and use. 2,104,253; Jan. 4.

Farnsworth Television Incorporated. (See Farnsworth, Philo T., assignor.)

Farwell Ozmun Kirk & Co. (See Marsolf, George B., assignor.)

Faulhaber, Albert J. (See Wagener, C. R., and Faulhaber.)

Faulhaber, Roland W., assignor to The Lobdell-Emery Manufacturing Company, Alma, Mich. Saddle for cycles. 2,104,511; Jan. 4.

Feinberg, Herman, San Francisco, Calif. Utility cabinet. 2,104,223; Jan. 4.

Felt & Tarrant Mfg. Co. (See Niemann, Frederick A., assignee.)

Fergueson, Arthur P., assignor to Lyon Cover Company, Detroit, Mich. Tire cover. 2,104,166; Jan. 4.

Fidelity Trust Company et al., administrators. (See Hunter, P. E., and Nightingale.)

Filss, Hermann, assignor to Ensinger-Union-Werke A. G., Worms-on-the-Rhine, Germany. Filling device. 2,104,464; Jan. 4.

Fiedler, Stevenson, McKeesport, Pa., assignor to National Tube Company. Guide device. 2,104,117; Jan. 4.

Finfrock, John C., Kansas City, Mo. Self-shaking dust mop. 2,104,614; Jan. 4.

Fischer, Stefan, Prague, Czechoslovkia. Freewheeling clutch. 2,104,220; Jan. 4.

Fish, Charles T., Scituate, Mass. Attachment for lawn mowers. 2,104,343; Jan. 4.

Fisher, Adam J., Palisades Park, N. J., assignor to International Patents Development Company, Wilmington, Del. Can heading machine. 2,104,214; Jan. 4.

Fisher, Lloyd H., deceased, Wilmington, by A. B. Nixon, administrator, Holly Oak, assignor to Hercules Powder Company, Wilmington, Del. Blasting cap composition. 2,104,513; Jan. 4.

Fitch, Clyde J. (See Lemmon, W. S., and Fitch.)

Fitzgerald, Charles F., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Apparatus for attaching shoe soles. 2,104,115; Jan. 4.

Flynn, Joe M., Rutledge, Ala. Mixing apparatus. 2,104,191; Jan. 4.

Fogerty, Clifford W. (See Fogerty, Esther W., C. G., and C. W.)

Fogerty, Esther W., C. G., and C. W., Hialeah, Fla. Fireplace. 2,104,254; Jan. 4.

Food Machinery Corporation. (See Marsden, George P., assignee.)

Forbush, Augustus D., Pueblo, Colo. Air cooler. 2,104,119; Jan. 4.

Forcella, Pietro, Rome, Italy. Rail joint. 2,104,167; Jan. 4.

Ford, Henry, assignor to Ford Motor Company, Dearborn, Mich. Power operated clutch and brake mechanism. 2,104,455; Jan. 4.

Ford, James W., Chicago, Ill. Orthodontic appliance. 2,104,192; Jan. 4.

Ford Motor Company. (See Ford, Henry, assignor.)

Ford Motor Company. (See Gilamb, Joseph, assignee.)

Ford Motor Company. (See Groven, Fredrick J., assignor.)

Ford Motor Company. (See Hahn, Charles L., assignor.)

Ford Motor Company. (See Peters, William H., assignor.)

Ford Motor Company. (See Sorensen, C. E., and McCarroll, assignors.)

Foxboro Company, The. (See Beal, A. G., and Holmberg, assignors.)

Frankel, Jacob W. (See Safir, Jacob A., assignor.)

Frankenthal, Alex M., et al. (See Landau, Charles, assignor.)

Franklin, Charles S., Poldhu, near Mullion, England, assignor to Radio Corporation of America. Radio direction finder. 2,104,075; Jan. 4.

Freda, Angelo R., Orange, N. J. Window cleaning device. 2,104,615; Jan. 4.

Freudenheim, Mendel E., assignor to L. Rubin, New York, N. Y. Fingerguard. 2,104,596; Jan. 4.

Frey, Frederick E., assignor to Phillips Petroleum Company, Bartlesville, Okla. Converting hydrocarbons. 2,104,206; Jan. 4.

Frick, Frederick F., and J. P. Cooper, Anaconda, Mont., assignors to Anaconda Copper Mining Company, New York, N. Y. Lead recovery. 2,104,076; Jan. 4.

Friedman, Irving, assignor to Efco Manufacturing Company, Newark, N. J. Watch cleaning machine. 2,104,456; Jan. 4.

Friedman, John H., assignor to The National Machinery Co., Tiffin, Ohio. Double stroke cold header. 2,104,297; Jan. 4.

Fruhauf, Gerhard. (See Willheim, R., and Fruhauf.)

Frye, Charles F., Chicago, Ill. Valve seat structure. 2,104,419; Jan. 4.

Fuchs, Karl, Nuremberg, Germany. Steerable and reversible toy vehicle. 2,104,305; Jan. 4.

Fyler, George W., Stratford, Conn., assignor to General Electric Company. High frequency receiver. 2,104,616; Jan. 4.

Gagnier, George R. (See Place, Elmo C., assignor.)

Galamb, Joseph, Detroit, assignor to Ford Motor Company, Dearborn, Mich. Automobile body construction. 2,104,457; Jan. 4.

Gallagher, Daniel P., Hoboken, N. J. Incandescent lamp. 2,104,546; Jan. 4.

Galvin, Herbert D., Ewell, assignor to L. C. Engineering Supplies Limited, London, England. Cooling, heating, or like apparatus for treating tins of food or other articles. 2,104,514; Jan. 4.

Garbacchi, Lato J., North Bergen, N. J. Collapsible armchair. 2,104,265; Jan. 4.

Gas Fuel Corporation. (See Russell, Robert H., assignor.)

Gaugler, Frank A., Milwaukee, Wis., assignor, by mesne assignments, to The Cleveland Trust Company, Cleveland, Ohio. Automatic oven lighter. 2,104,269; Jan. 4.

Gaugler, Richard S., assignor to General Motors Corporation, Dayton, Ohio. Refrigerating apparatus. 2,104,457; Jan. 4.

Geisz, J. L., A. G. (See Treberu, Julst, assignee.)

General Aniline Works, Inc. (See Baumann, Fritz, assignor.)

General Aniline Works, Inc. (See Berthold, Hermann, assignor.)

General Aniline Works, Inc. (See Mihm, F., Keller, and Trichon, assignors.)

General Aniline Works, Inc. (See Schirm, Erik, assignor.)

General Chemical Company. (See Mullen, Edwin J., assignor.)

General Electric Company. (See Alexanderson, Ernst F. W., assignor.)

General Electric Company. (See Bedford, Barnaby D., assignor.)

General Electric Company. (See Doma, Robert B., assignee.)

General Electric Company. (See Druyvesteyn, M. J., and Warmoltz, assignors.)

General Electric Company. (See Fyler, George W., assignor.)

General Electric Company. (See Inman, George R., assignor.)

General Electric Company. (See Jones, Benjamin W., assignor.)

General Electric Company. (See Krejci, Robert J., assignor.)

General Electric Company. (See Metzger, Francis C., assignor.)

General Electric Company. (See Roberts, E. M., and Ellis, assignors.)

General Electric Company. (See Strickland, Royal F., assignor.)

General Electric Company. (See Willheim, R., and Fruhauf, assignors.)

General Motors Corporation. (See Alexander, D. F., Heaney, and Pealee, assignors.)

General Motors Corporation. (See Babitch, A. M., and Harry, assignors.)

General Motors Corporation. (See Candor, E. R., and Alexander, assignors.)

General Motors Corporation. (See Gaugler, Richard S., assignor.)

General Motors Corporation. (See Halbleib, Edward A., assignor.)

General Motors Corporation. (See Hull, Harry B., assignor.)

General Motors Corporation. (See Hull, H. B., and Alexander, assignors.)

General Motors Corporation. (See Murden, William T., assignor.)

General Motors Corporation. (See Schweller, Edmund F., assignor.)

General Radio Company. (See Tuttle, William N., assignor.)

General Refrigeration Corporation. (See Erbach, Fred R., assignor.)

General Ribbon Mills, Inc. (See Stark, Joseph W., assignor.)

George, Henri, Paris, and G. Delpech, Clamart, assignors to Societe Anonyme des Manufactures des Glaces & Produits Chimiques de Saint-Gobain, Chauny & Cirey, Paris, France. Electrical heating means. 2,104,551; Jan. 4.

George, Rose F., Seattle, Wash. Quick cleaning feeder for pens. 2,104,479; Jan. 4.

Gerstan, William, Brooklyn, N. Y. Cabinet. 2,104,231; Jan. 4.

Gerwig, Oscar L., Pittsburgh, Pa. Chain connecter. 2,104,182; Jan. 4.

Gesellschaft des Kohlen Naxos-Schmirgels Naxos-Union Schmirgel-Dampfwerk, Frankfurt a. M., Julius Pfungst. (See Grunedstein, Julius, assignor.)

Gifford, Whitney, assignor, by mesne assignments, to Nash-Kelvinator Corporation, Detroit, Mich. Refrigerating apparatus. 2,104,460; Jan. 4.

Gilbert, A. C., Company, The. (See Anketell, Edward N., assignor.)

Gilbert, Harvey N., and I. J. Wernert, Niagara Falls, N. Y., assignors to E. I. du Pont de Nemours & Co., Wilmington, Del. Bleaching composition. 2,104,130; Jan. 4.

Gilbert, Laura, Chicago, Ill. Heating cook stove. 2,104,617; Jan. 4.

Gilyea, Fred H., assignor to The Perfect Circle Company, Hagerstown, Ind. Piston ring expander. 2,104,220; Jan. 4.

Gleason, George A., Worcester, Mass., assignor to The American Steel and Wire Company of New Jersey. Manufacture of flexible conduit. 2,104,121; Jan. 4.

Gleason Works. (See Candee, Allan H., assignor.)

Gleave, Wilfrid W., Widnes, England, assignor to Imperial Chemical Industries Limited. Manufacture of halogenated derivatives of methane. 2,104,695; Jan. 4.

Globe-Union Inc. (See Caldwell, John T., assignor.)

Gleuten, Paul, Philadelphia, Pa. Micrometer gauge. 2,104,194; Jan. 4.

Goates, Lafayette T., Tulsa, Okla. Engine valve actuating device. 2,104,122; Jan. 4.

Goetz, Maurus T., assignor, by mesne assignments, to Teletypesetter Corporation, Chicago, Ill. Tape controlled apparatus. 2,104,030; Jan. 4.

Golden, Charles F., Denver, Ind. Blackboard instrument. 2,104,515; Jan. 4.

Goldsmith, Henry F., Longport, N. J. Knitted hair net construction. 2,104,533; Jan. 4.

Gommel, Dewey H. (See St. Clair, J. A., and Gommel.)

Gondolf, Nicholas J., New Orleans, La. Faucet. 2,104,640; Jan. 4.

Gonzalez, Miguel S., Mexico, D. F., Mexico. Gyro stabilizer. 2,104,220; Jan. 4.

Goodall, Robert. (See Dow, A. B., and Goodall.)

Goodman Manufacturing Company. (See Sloane, William W., assignor.)

Goreeline, Harry H. (See Blanck, F. C., Swanson, Mottern, Goreeline, and Nelson.)

Gorman, James C. (See Rapp, H. B., and Gorman.)

Goss Printing Press Company, The. (See Crafts, Curtis S., assignor.)

Gossett, Tolbert F., Birmingham, Ala. Bulletin board. 2,104,360; Jan. 4.

Gottschalk, Annie, administratrix. (See Gottschalk, J. W., and Grater.)

Gottschalk, John W., deceased, and A. W. Grater, Philadelphia, Pa.; said Grater assignor to said Gottschalk; A. Gottschalk administratrix of said J. W. Gottschalk. Making a coiled metallic strand. 2,104,713; Jan. 4.

Goudet, Hugo, and E. Schattaz, Paris, France, assignors to Compagnie Generale de Telegraphie sans Fil. Electric switch. 2,104,458; Jan. 4.

Government of the United States of America, as represented by the Secretary of Commerce. (See Dunmore, Francis W., assignor.)

Government of the United States of America, represented by the Secretary of War. (See Jolliffe, John P., assignor.)

Government of the United States of America, represented by the Secretary of the Treasury. (See Russell, Lyndon F., assignor.)

Graber, Christian L., Lakewood, Ohio. Carburetor. 2,104,031; Jan. 4.

Graber, Christian L., Lakewood, Ohio. Flask. 2,104,704; Jan. 4.

Graemacher, Charles. (See Haller, E., and Graemacher.)

Grahame, James H. (See Stryker, D., and Grahame.)

Grater, Sylvester W. (See Gottschalk, J. W., and Grater.)

Gray Telephone Pay Station Company, The. (See Long, George A., assignor.)

Gray Tool Company. (See Yancey, John R., assignor.)

Great Lakes Concrete Pipe Co. Inc. (See Cummings, William F., assignor.)

Green, Charles W., Ilion, N. Y., assignor, by mesne assignments, to The National Cash Register Company, Dayton, Ohio. Cash register. 2,104,598; Jan. 4.

Green, Clifford H., Grand Rapids, Mich., assignor to Automatic Instrument Company. Automatic phonograph. 2,104,022; Jan. 4.

Greenough F. York, England. Lubricating preparation. 2,104,641; Jan. 4.

Green, Samuel G., Gray, Ga. Bolt operating mechanism for machine guns. 2,104,033; Jan. 4.

Greene, Gertrude L., Corona, Calif. Measuring device. 2,104,642; Jan. 4.

Greensalade, Grover R., Scott Township, Allegheny County, Pa., assignor to Pittsburgh Dry Stencil Company. Testing and apparatus therefor. 2,104,643; Jan. 4.

Greensalade, Grover R., Scott Township, Allegheny County, Pa., assignor to Pittsburgh Dry Stencil Company. Methods of testing and apparatus therefor. 2,104,644; Jan. 4.

Greensalade, Grover R., Scott Township, Allegheny County, Pa., assignor to Pittsburgh Dry Stencil Company. Testing boiler staybolts. 2,104,645; Jan. 4.

Greensalade, Grover R., Scott Township, Allegheny County, Pa., assignor to Pittsburgh Dry Stencil Company. Testing. 2,104,646; Jan. 4.

Groeling, Charles, Chicago, Ill., assignor to Parke, Davis & Company, Detroit, Mich. Carton. 2,104,195; Jan. 4.

Grosse, William F., assignor to The R. K. Le Blond Machine Tool Company, Cincinnati, Ohio. Crankshaft chuck. 2,104,481; Jan. 4.

Grogan, Edgar N., Raleigh, N. C. Radiator siphon trap. 2,104,367; Jan. 4.

Groskopf, Edwin O., Rutherford, N. J., assignor to The Patent and Licensing Corporation, New York, N. Y. Aqueous emulsion of waterproofing material. 2,104,077; Jan. 4.

Grosse, Aristid V. (See Ipatieff, V., and Grosse.)

Grosser, Nelson O., Prince Albert, Saskatchewan, Canada. Automatic feed drill. 2,104,123; Jan. 4.

Groves, Frederick J., Highland Park, assignor to Ford Motor Company, Dearborn, Mich. Electric switch. 2,104,420; Jan. 4.

Grün, Adolf, Basel, Switzerland, assignor, by mesne assignments, to Bohme Fettchemie-Gesellschaft m. b. H., Chemnitz, Germany. Production of amines of high molecular weight. 2,104,421; Jan. 4.

Grundstein, Julius, assignor to Gesellschaft des Ichten Naxos-Schmirgels Naxos-Union Schmirgel-Dampfwerk, Frankfort a. M., Julius Pfungst, Frankfort-on-the-Main, Germany. Machine tool. 2,104,299; Jan. 4.

Guaranteed Parts, Inc. (See Dodge, Sherwood O., assignor.)

Guggenheim, Max M., assignor to Baker Perkins Company, Inc., Saginaw, Mich. Cooling drum. 2,104,558; Jan. 4.

Gulf Research & Development Company. (See Kennedy, H. T., and Wescott, assignors.)

Gutmann, Ferdinand, & Co. (See Gutmann, Jesse, assignor.)

Gutmann, Jesse, Babylon, assignor to Ferdinand Gutmann & Co., Brooklyn, N. Y. Container and making same. 2,104,322; Jan. 4.

Guyer, Harry C., Charleston, W. Va. Apparel supporting device. 2,104,368; Jan. 4.

Gysi, Alfred, Zurich, Switzerland, assignor to The Dentists' Supply Company of New York, New York, N. Y. Artificial teeth. 2,104,459; Jan. 4.

H & H Machine & Motor Parts Co. (See Holhut, M., and Vollmer, assignors.)

Haberstump, Alfred H., Detroit, Mich., assignor to The Murray Corporation of America. Door stop and check. 2,104,124; Jan. 4.

Hächer, Walter, Sindelfingen, near Stuttgart, assignor to Daimler-Benz Aktiengesellschaft, Stuttgart-Unterturkheim, Germany. Motor car. 2,104,539; Jan. 4.

Hadler, Bartholdt C. (See Coleman, G. H., Hadler, and Zuchermandel.)

Hage, Olof A., Goteborg, Sweden. Combination lock. 2,104,516; Jan. 4.

Hagelin, William T., assignor, by mesne assignments, to Addressograph-Multigraph Corporation, Cleveland, Ohio. Planographic printing plate and using same. 2,104,126; Jan. 4.

Hain, Clifford E., Omaha, Nebr. Electric vacuum sweeper nozzle attachment. 2,104,125; Jan. 4.

Halbach, Howard L., Clarksburg, W. Va., assignor to Pittsburgh Plate Glass Company, Allegheny County, Pa. Glass drawing apparatus. 2,104,460; Jan. 4.

Halbleib, Edward A., assignor to General Motors Corporation, Rochester, N. Y. Heating and ventilating of passenger cars. 2,104,394; Jan. 4.

Haller, Robert, Rieben, and C. Graenacher, assignors to the firm of Society of Chemical Industry in Basle, Basel, Switzerland. Obtaining colored discharge effects on dyeings. 2,104,300; Jan. 4.

Halliburton Oil Well Cementing Company. (See Owsley, William D., assignor.)

Hambeck, Joseph, New York, N. Y. Picture stand. 2,104,256; Jan. 4.

Hamel, Wilhelm, assignor to Carp's Handelsbureau voor Aviatiek en Scheepsmaken N. V., Amsterdam, Netherlands. Coin controlled vending apparatus for ice cream packages. 2,104,034; Jan. 4.

Hamlin, Marston L., Lynbrook, assignor to The Barrett Company, New York, N. Y. Interlocking flexible shingle. 2,104,078; Jan. 4.

Hanna, William T., Cincinnati, Ohio. Stoker for locomotives. 2,104,035; Jan. 4.

Hanson, Carl, Leer, assignor to The Lobdell-Emery Manufacturing Company, Alma, Mich. Saddle for cycles. 2,104,512; Jan. 4.

Hanson, Milton E., Collingswood, N. J., assignor to B. F. Sturtevant Company, Inc., Hyde Park, Boston, Mass. Refrigeration drive. 2,104,690; Jan. 4.

Harmon, Dewey E., Dallas Center, Iowa. Disposable duster brush. 2,104,196; Jan. 4.

Harnischfeger Corporation. (See Bates, Jesse H., assignor.)

Harris, Gordon D., Stamford, Conn., assignor, by mesne assignments, to Wurton Machine Company, Philadelphia, Pa. Continuous treatment of materials. 2,104,036; Jan. 4.

Harris, William A., Oreland, Pa., assignor to The Texas Company, New York, N. Y. Manufacturing roofing elements. 2,104,384; Jan. 4.

Harry, Gordon W. (See Babitch, A. M., and Harry.)

Hartman, Frank W., Detroit, Mich. Refrigerating apparatus. 2,104,589; Jan. 4.

Hasenfuss, William, Amsterdam, N. Y. Riot lock. 2,104,618; Jan. 4.

Haughey, Joshua A., Burlington, Colo. Glass cutting rule. 2,104,301; Jan. 4.

Hedgpeth, Theron L., Oak Park, assignor to Dure Metal Products Company, Chicago, Ill. Work guide for woodworking machines. 2,104,158; Jan. 4.

Heerde, Alfred, Breslau, Germany. Rotary engine with gyratory piston. 2,104,517; Jan. 4.

Helchert, Herman S., Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company. Plate glass transfer and turn-over apparatus. 2,104,422; Jan. 4.

Heintz, Ralph M., Palo Alto, Calif., assignor, by mesne assignments, to Bendix Aviation Corporation, South Bend, Ind. Valve cap. 2,104,257; Jan. 4.

Helmond, William F., West Hartford, Conn., assignor to Underwood Elliott Fisher Company, New York, N. Y. Typewriting machine. 2,104,482; Jan. 4.

Hemingway, Wilson, Jr., Chicago, Ill., assignor to Electrolock Manufacturing Company, Vicksburg, Miss. Starter switch control. 2,104,159; Jan. 4.

Hemphill Company. (See Lawson, Robert H., assignor.)

Hendrey, Walderee B., Beacon, assignor to The Texas Company, New York, N. Y. Radiator cleaning composition. 2,104,385; Jan. 4.

Hengel, Karl, Berlin, Germany. Adjusting device, in particular electrical condenser. 2,104,160; Jan. 4.

Henley, Harry F., Richmond, Ind. Grappling tongs. 2,104,302; Jan. 4.

Henney, Charles F. (See Alexander, D. F., Henney, and Paulus.)

Henry, George W., Jr., assignor to Scabar Company, Philadelphia, Pa. Ticket printing machine. 2,104,647; Jan. 4.

Hercules Powder Company. (See Fisher, Lloyd H., assignor.)

Hewitt, George W., Wilkinsburg, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Preservative and contact coat for light-sensitive devices. 2,104,483; Jan. 4.

Heymann, Roy D., Woodbridge, Conn., assignor, by mesne assignments, to Pulp Products Company, Inc., New York, N. Y. Closure for fiber containers. 2,104,344; Jan. 4.

Hickey, Lawrence, Coffeyville, Kans. Camp house. 2,104,648; Jan. 4.

Hickman, William B., Kansas City, Mo. Air draft and smoke consumer. 2,104,127; Jan. 4.

Hill, Henry C., Paterson, N. J., assignor to Wright Aeronautical Corporation. Fluid metering device. 2,104,590; Jan. 4.

Hillis, James L., Rochester, assignor to International Business Machines Corporation, New York, N. Y. Clutch mechanism for typewriting machines. 2,104,550; Jan. 4.

Hinckley-Myers Company. (See Osborn, John W., assignor.)

Hingeco Vanities Inc. (See Johnson, Frits R., assignor.)

Hinton, Edward M., Drexel Hill, Pa. Accelerator governor. 2,104,649; Jan. 4.

Hintze, Harry. (See Dolphi, J. J., and Hintze.)

Hirschberg, Charles A., Mountain Lakes, N. J., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Portable drilling rig. 2,104,823; Jan. 4.

Hirschberger, Willy. (See Pier, M., Hirschberger, and Lemme.)

Hoak, Clarence B., Steubenville, Ohio. Normalising furnace. 2,104,518; Jan. 4.

Hockensmith, Wilbur D., Jr., Irwin, Pa. Mine car. 2,104,395; Jan. 4.

Hoe, R., & Co. (See Zuckerman, Adolph M., assignor.)

Hoeseman, Henry W., Gibsonburg, Ohio. Dinner pail and egg crate. 2,104,650; Jan. 4.

Hoffman, Carl C., Jr., assignor to Carl C. Hoffman, Inc., St. Louis, Mo. Nail polish applicator. 2,104,651; Jan. 4.

Hoffman, Carl C., Inc. (See Hoffman, Carl C., Jr., assignor.)

Hoffman, John. (See Levy, Sid, assignor.)

Hoffman, Joseph C., Yonkers, N. Y. Closure for containers. 2,104,540; Jan. 4.

Holhut, Michael, and W. G. Vollmer, assignors to H & H Machine & Motor Parts Co., St. Louis, Mo. Valve-stem grinding and fitting device. 2,104,345; Jan. 4.

Hollingsworth, R. Lee, Riverhead, N. Y., assignor to Radio Corporation of America. System of compensating automatic volume control. 2,104,324; Jan. 4.

Hollmann, Hans E., assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Modulation system. 2,104,541; Jan. 4.

Holm, Charles L., assignor to Ford Motor Company, Dearborn, Mich. Automobile fuel tank. 2,104,461; Jan. 4.

Holmberg, Bernard. (See Beal, A. G., and Holmberg.)

Holmes, Dan O. (See Barr, C. D., and Holmes.)

Holmes, Eric L. (See Adams, B. A., and Holmes.)

Honaman, Richard K., Bloomfield, and L. K. Swart, Mountain Lakes, N. J., assignors to American Telephone and Telegraph Company. Gas discharge tube delay circuit. 2,104,128; Jan. 4.

Hone, Henry, et al. (See Robinson, Frederick W., assignor.)

Hopkan Rivet Company. (See Hoppenstand, David, assignor.)

Hoppenstand, David, assignor to Hopkan Rivet Company, Inc., Pittsburgh, Pa. Inking device. 2,104,396; Jan. 4.

Hopwood, John M. (See Colston, Robert, assignor.)

Horowitz, Lillian, New York, N. Y. Health belt. 2,104,560; Jan. 4.

Horowitz, Louis, Brooklyn, N. Y., assignor of one-half to Abraham Wilkow. Adjustable strap for leggings, gaiters and the like. 2,104,369; Jan. 4.

Hospo, Inc. (See Crockett, William P., and W. P., Jr., assignors.)

Hothersall, John M., Brooklyn, assignor to American Can Company, New York, N. Y. Preparing body blanks for tearing strip containers. 2,104,037; Jan. 4.

Houghland, Albert C., assignor to Crane Company of Minnesota, St. Paul, Minn. Churn. 2,104,462; Jan. 4.

Howard, Guy C., Company, et al. (See Sandborn, Lloyd T., assignor.)

Howard, Paul N., Seattle, Wash. Ladder construction. 2,104,303; Jan. 4.

Hughes, Grover A., assignor to Truscon Steel Company, Youngstown, Ohio. Supporting apparatus for welding operation. 2,104,561; Jan. 4.

Hughes, James L., Oklahoma City, Okla. Catamenial sack. 2,104,423; Jan. 4.

Hull, Harry B., assignor to General Motors Corporation, Dayton, Ohio. Refrigerating apparatus. 2,104,386; Jan. 4.

Hull, Harry B., and D. F. Alexander, assignors to General Motors Corporation, Dayton, Ohio. Refrigerating apparatus. 2,104,387; Jan. 4.

Hull, Wilson R., East Orange, N. J., assignor to American Can Company, New York, N. Y. Sheet gauging device. 2,104,038; Jan. 4.

Hunter, James, Machine Company, The. (See Morrill, Frank B., assignor.)

Hunter, Percy E., deceased, Pittsburgh, and E. Nightingale, Haysville; L. T. Copeland and Fidelty Trust Company, administrators, assignors to Hunter Steel Company, Pittsburgh, Pa. Sawing apparatus. 2,104,258; Jan. 4.

Hunter Steel Company. (See Hunter, P. E., and Nightingale, assignors.)

Hunter, William L., assignor to Northern Equipment Company, Erie, Pa. Valve. 2,104,039; Jan. 4.

Hurd, John C. H. (See Spiera, E., and Hurd.)

Hurd, Norman B., Newington, assignor to The American Hardware Corporation, New Britain, Conn. Cylinder lock. 2,104,397; Jan. 4.

Hurn, James E., La Porte, Ind., assignor to De Luxe Products Corporation. Oil shut-off. 2,104,519; Jan. 4.

Hurt, George F., New York, N. Y. Refuse incineration. 2,104,040; Jan. 4.

Hydraulic Brake Company. (See Bowen, Herbert C., assignor.)

I. G. Farbenindustrie Aktiengesellschaft. (See Brodersen, Karl, assignor.)

I. G. Farbenindustrie Aktiengesellschaft. (See Pier, M., Hirschberger, and Lemme, assignors.)

Ideal Electric and Manufacturing Company, The. (See Milliken, Frank H., assignor.)

Imperial Chemical Industries Limited. (See Baird, William, assignor.)

Imperial Chemical Industries Limited. (See Baxter, J. P., Montgomery, and Moore, assignors.)

Imperial Chemical Industries Limited. (See Gleave, Wilfrid W., assignor.)

Industrial Patents Corporation. (See Campbell, Melvin M., assignor.)

Inman, George E., East Cleveland, Ohio, assignor to General Electric Company. Electric discharge device. 2,104,652; Jan. 4.

International Business Machines Corporation. (See Hillis, James L., assignor.)

International Business Machines Corporation. (See Lake, Clair D., assignor.)

International Business Machines Corporation. (See Lemon, Walter S., assignor.)

International Business Machines Corporation. (See Lemon, W. S., and Fitch, assignors.)

International Business Machines Corporation. (See Nichols, Harry J., assignor.)

International Business Machines Corporation. (See Nichols, H. J., and Tholstrup, assignors.)

International Business Machines Corporation. (See Noll, Austin R., assignor.)

International Business Machines Corporation. (See Pennell, L. P., Stone, and Naylor, assignors.)

International Corset Company. (See Schopbach, C. H., and Babcock, assignors.)

International Patents Development Company. (See Fisher, Adam J., assignor.)

International Postal Supply Company, The. (See Persson, Ernst, assignor.)

International Postal Supply Company, The. (See Royce, A. A., and Beyer, assignors.)

International Postal Supply Company, The. (See Zahn, Lawrence J., assignor.)

Ipatieff, Vladimir, and A. V. Grosse, assignors to Universal Oil Products Company, Chicago, Ill. Manufacture of aromatic derivatives. 2,104,424; Jan. 4.

Jackson, David D., Providence, R. I., and E. W. Tefft, South Attleboro, Mass. Gauge. 2,104,521; Jan. 4.

Jackson, David D., Providence, R. I., and E. W. Tefft, South Attleboro, Mass., assignors to Tefft-Jackson, Incorporated, Pawtucket, R. I. Gauge. 2,104,520; Jan. 4.

Jacobsen Manufacturing Company. (See Pol, J. B., and Krenske, assignors.)

Janney, John B., Philadelphia, Pa., assignor, by mesne assignments, to American Sales Book Company, Inc. Paper web support. 2,104,484; Jan. 4.

Jenkins, N. Avery. (See O'Dell, Leonard R., assignor.)

Jester, Edward L. (See Pelton, G. E., and Jester.)

Johansen, Michal A., Oslo, Norway. Screw press. 2,104,197; Jan. 4.

Johansen, Rolf H., Olso, Norway. Carrying-fixture, especially for knapsacks. 2,104,486; Jan. 4.

Johansson, Erik H. E., Stockholm, Sweden. Soldering, welding and coating metals. 2,104,370; Jan. 4.

Kohnle, Frederick, assignor to The Monarch Marking System Company, Dayton, Ohio. Price tag. 2,104,698; Jan. 4.

Johnson, Alvin L. (See Adell, John A., assignor.)

Johnson, Bror A. E., Alsten, assignor to Aktiebolaget Gerh. Arehns Mekaniska Verkstad, Stockholm, Sweden. Method and apparatus for manufacturing collapsible tubes. 2,104,485; Jan. 4.

Johnson, Frits R., assignor to Hingeco Vanities Inc., Providence, R. I. Locking catch. 2,104,562; Jan. 4.

Johnson, Irene G., Brooklyn; N. Y., and W. N. Lurcott, Elizabeth, N. J.; said Lurcott assignor to said Johnson. Butter dispenser. 2,104,041; Jan. 4.

Johnson, John B., Millburn, N. J., and F. W. Kammerer, assignors to Bell Telephone Laboratories, Incoporated, New York, N. Y. Source of variable high direct potential. 2,104,463; Jan. 4.

Johnson, Nels, Chicago, Ill. Toilet seat. 2,104,653; Jan. 4.

Jolliffe, John P., Portland, Oreg., assignor to the Government of the United States of America, represented by the Secretary of War. Automatic control mechanism for fish lock drainage. 2,104,042; Jan. 4.

Jones, Benjamin W., Schenectady, N. Y., assignor to General Electric Company. Motor control system. 2,104,654; Jan. 4.

Jones, Clevoe, assignor to Detroit Dental Manufacturing Company, Detroit, Mich. Magnifying and illuminating device. 2,104,198; Jan. 4.

Jones, Frank D., assignor to Dain Manufacturing Company of Iowa, Ottumwa, Iowa. Baling press. 2,104,199; Jan. 4.

Jones, Louis B., Polo, Ill. Insect shield for automobiles. 2,104,655; Jan. 4.

Jones, Richard W., assignor to Westinghouse Electric Elevator Company, Chicago, Ill. Elevator control system. 2,104,522; Jan. 4.

Judd, Gene J., Indianapolis, Ind. Furnace. 2,104,227; Jan. 4.

Juffa, Wilhelm, Ilmenau, Germany. Mixing pipette. 2,104,325; Jan. 4.

Jungers, John, assignor to Jungers Stove and Range Company, Grafton, Wis. Heater. 2,104,592; Jan. 4.

Jungers Stove and Range Company. (See Jungers, John, assignor.)

Jussen, Herbert C., and V. V. Malcolm, Mariemont, Ohio, assignors to The Philip Carey Manufacturing Company. Expansion joint. 2,104,371; Jan. 4.

Kahn, Julian S., New York, N. Y. Fraud detector. 2,104,079; Jan. 4.

Kales, Josef, Stuttgart, Germany. Generator and/or starting motor for motor vehicles. 2,104,259; Jan. 4.

Kalish, Ralph, et al. (See Landau, Charles, assignor.)

Kallfels, George. (See Menapace, J. C., and Kallfels.)

Kamborian, Jacob S., West Newton, assignor to Northern Machine Co., Inc., Boston, Mass. Lasting footwear. 2,104,228; Jan. 4.

Kammerer, Fred W. (See Johnson, J. B., and Kammerer.)

Kaplan, Jacob, assignor to Ben-Burk, Inc., Boston, Mass. Manufacture of rock and rye. 2,104,304; Jan. 4.

Karageorgieff, Cristoph, Vienna, Austria. Tapping and refill-controlling device. 2,104,080; Jan. 4.

Karwat, Ernst. (See Lennings, W., and Karwat.)

Kassner, Ernst E. W., assignor to Universal Inventions Limited, London, England. Electric lamp. 2,104,697; Jan. 4.

Keller, Karl. (See Müns, F., Keller, and Tribelen.)
Kelly, Benjamin W. (See Bice, W. B., and Kelly.)
Kelly, Joseph F., assignor to Kelly Oil Sales Corporation, Arlington, Mass. Boiler. 2,104,229; Jan. 4.
Kelly Oil Sales Corporation. (See Kelly, Joseph F., assignor.)
Kemp, James P., Baltimore, Md. Refrigeration apparatus. 2,104,260; Jan. 4.
Kennedy, Harvey T., Forest Hills, and B. W. Wescott, Oakmont, Pa., assignors to Gulf Research & Development Company. Treatment of wells. 2,104,488; Jan. 4.
Kenney, John A., Plainfield, N. J., assignor to The Barrett Company, New York, N. Y. Laminated sheet and making same. 2,104,081; Jan. 4.
Kennison, Frank, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Safety device. 2,104,043; Jan. 4.
Kerrick, Walter B., Los Angeles, assignor, by mesne assignments, to Clayton Manufacturing Company, Alhambra, Calif. Apparatus and method for treatment of liquids. 2,104,705; Jan. 4.
Kessler, Frederick C., Rutherford, N. J. Garment. 2,104,437; Jan. 4.
Keystone Controls, Inc. (See Stedwell, George W., assignor.)
Kilman, Robert T., Nashville, Tenn. Can opener. 2,104,420; Jan. 4.
King, Orville D., Dayton, Ohio, assignor to Oxford Varnish Corporation, Detroit, Mich. Method and apparatus for the decoration of elongated surfaces. 2,104,044; Jan. 4.
Kinkead, Fullerton S., Ridgefield Park, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Impulse repeater. 2,104,426; Jan. 4.
Kirschbraun, Lester, assignor, by mesne assignments, to The Patent and Licensing Corporation, New York, N. Y. Building material and making same. 2,104,082; Jan. 4.
Kiss, John, Cleveland, Ohio. License plate carrier. 2,104,230; Jan. 4.
Klahre, Hugo A., Teaneck, N. J., assignor to Consolidated Trimming Corporation, New York, N. Y. Automatic loop feed for machines for applying ornamentation to header loops. 2,104,398; Jan. 4.
Klangfim G. m. b. H. (See Schwarz, Karl, assignor.)
Klassen, Harry G., Chicago, Ill. Rotary match lighter. 2,104,484; Jan. 4.
Knapp, Otto A., Oakland, Calif. Electric hot water range. 2,104,045; Jan. 4.
Knox, Elmer J., Rivera, Calif. Two cycle internal combustion motor. 2,104,326; Jan. 4.
Köhler, Willem C., Amsterdam, Netherlands, and A. Meesterer, Dortmund, Germany. Hollow pile for sheet pilings. 2,104,490; Jan. 4.
Kopp, Carl J., Wauwatosa, assignor to A. O. Smith Corporation, Milwaukee, Wis. Welding control apparatus. 2,104,300; Jan. 4.
Koppers Company. (See Koppers, Heinrich, assignor.)
Koppers, Heinrich, Essen, Germany, assignor, by mesne assignments, to Koppers Company, Pittsburgh, Pa. Heater for gaseous media. 2,104,201; Jan. 4.
Kossell, Gustav. (See Boser, J. E., and Kossel.)
Kotsebue, Meinhard H., Tulsa, Okla. Recovering earth components from wells. 2,104,327; Jan. 4.
Kotsebue, Meinhard H., Tulsa, Okla. Recovering earth components from wells. 2,104,328; Jan. 4.
Koukal, Louis, New York, N. Y. Window glass cleaning implement. 2,104,161; Jan. 4.
Kraeft, Herman L., assignor to The Murray-Ohio Manufacturing Company, Cleveland, Ohio. Juvenile vehicle. 2,104,246; Jan. 4.
Krag, Erik L., assignor of one-tenth to E. J. Andrews, Chicago, Ill. Loose leaf binder. 2,104,046; Jan. 4.
Krahl, Steve, Weimar, Tex. Trap for rodents. 2,104,063; Jan. 4.
Kratz, George, Jamaica, N. Y. Alarm. 2,104,202; Jan. 4.
Kreidl, Alexander, Vienna, Austria. Pretreating iron surfaces. 2,104,427; Jan. 4.
Krejci, Robert F., Cleveland Heights, Ohio, assignor to General Electric Company. Wire tension controlling device. 2,104,656; Jan. 4.
Krenske, William F. (See Pol, J. B., and Krenske.)
Kress, Claud W., New York, N. Y. Handgrip especially adapted for guns. 2,104,129; Jan. 4.
Krupp, Fried., Aktiengesellschaft. (See Rosenbaum, Kurt, assignor.)
Kuhn, Clarence W., assignor to Cutler-Hammer, Inc., Milwaukee, Wis. Circuit controlling device. 2,104,399; Jan. 4.
Kunze, Frank A. Woodhaven, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telephone booth. 2,104,425; Jan. 4.
Kurlbaum, Georg, assignor to Telefunken-Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Temperature regulation. 2,104,543; Jan. 4.
Kury, Philip J. (See Brewer, Charles A., assignor.)
L. C. Engineering Supplies Limited. (See Galvin, Herbert D., assignor.)
La Bombard, Leon E., assignor to Oswego Falls Corporation, Fulton, N. Y. Machine for arranging disks having peripheral projections in a predetermined order. 2,104,657; Jan. 4.
Lake, Clair D., Binghamton, assignor to International business Machines Corporation, New York, N. Y. Automatic punching machine. 2,104,542; Jan. 4.
Lamberty, Frederick R. (See Bowne, L. J., Lamberty, and Stokely.)
Lamson General Conveyors, Limited. (See Needham, John T., assignor.)
Landau, Charles, Cleveland, Ohio, assignor of one-tenth to R. Kalish, eight-tenths to M. Landau, and one-tenth to A. M. Frankenthal, St. Louis, Mo. Curtain support. 2,104,261; Jan. 4.
Landau, Morris, et al. (See Landau, Charles, assignor.)
Langdon, Alfred G., Northam, Southampton, assignor to The Climax Rock Drill & Engineering Works Limited, London, England. Clutch and reverse gear. 2,104,658; Jan. 4.
Lanyi, Stephen, Passaic Park, N. J. Dust suction device for cleaning fur clothing, etc. 2,104,400; Jan. 4.
Lapp, Grover W. (See Van Rosen, H., and Lapp.)
Larkin, Elwood T., Eggertsville, assignor to C. A. Criqui, Buffalo, N. Y. Piston. 2,104,247; Jan. 4.
Larson, Julia. (See Carr, Sidney L., assignor.)
Lassiter, Alwyn D., Philadelphia, Pa. Talking motion picture apparatus. 2,104,428; Jan. 4.
Latham, George H., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Stabilization of animal and vegetable fats and oils. 2,104,064; Jan. 4.
Lawson, Robert H., Pawtucket, assignor to Hemphill Company, Central Falls, R. I. Knitting machine. 2,104,231; Jan. 4.
Lawson, Robert H., Pawtucket, assignor to Hemphill Company, Central Falls, R. I. Knitting machine. 2,104,232; Jan. 4.
Le Blond, R. K., Machine Tool Company, The. (See Greene, William F., assignor.)
Lee, John, Zurich, Switzerland, assignor to E. R. Squibb & Sons, New York, N. Y. Indaselones 2,104,348; Jan. 4.
Lehmann, Rudolf, assignor to Pennsylvania Salt Manufacturing Company, Philadelphia, Pa. Nemcaking smoked salt and making the same. 2,104,619; Jan. 4.
Leigh Banana Case Company. (See Leigh, Carl G., assignor.)
Leigh, Carl G., assignor to Leigh Banana Case Company, Chicago, Ill. Basket cover. 2,104,262; Jan. 4.
Leinweber, William H., Chicago, Ill. Blower. 2,104,233; Jan. 4.
Leland, Ira S., Milwaukee, Wis. Mounting means for glass veneer. 2,104,085; Jan. 4.
Lemme, Heinz. (See Pier, M., Hirschberger, and Lemme.)
Lemmon, Walter B., assignor to International Business Machines Corporation, New York, N. Y. Signaling system. 2,104,543; Jan. 4.
Lemmon, Walter B., New York, N. Y., and C. J. Fitch, Jersey City, N. J., assignors to International Business Machines Corporation, New York, N. Y. Image transmission system. 2,104,544; Jan. 4.
Lenhart, Harold C., assignor to McMillan Book Company, Syracuse, N. Y. Loose leaf binder. 2,104,659; Jan. 4.
Leunings, Wilhelm, Oberhausen, and R. Karwat, Grosshesselohe, near Munich, Germany, assignors, by mesne assignments, to Union Carbide and Carbon Corporation. Simultaneous production of iron and Portland cement in a blast furnace. 2,104,564; Jan. 4.
Levy, Sid, assignor to J. Hoffman, San Francisco, Calif. Girdle. 2,104,203; Jan. 4.
Levy, Sidney H., Baltimore, Md. Tip for cigarettes. 2,104,329; Jan. 4.
Lewis, Elmer, Kansas City, Mo. Electric cooker. 2,104,465; Jan. 4.
Lewis, John D., Youngstown, Ohio. Tank holding cage. 2,104,130; Jan. 4.
Liberty Mirror Works. (See Ponce, Lucien G., assignor.)
Lichtenstein, Leo, Chicago, Ill. Package dispensing device. 2,104,523; Jan. 4.
Linen, Vance, Pasadena, Calif. Joint filling device. 2,104,086; Jan. 4.
Linne, August C., Indianapolis, Ind. Valve stem clearance check. 2,104,234; Jan. 4.
Linsell, Alfred A., Sydenham, London, England, assignor to Radio Corporation of America. Automatic volume control. 2,104,087; Jan. 4.
Lipsner, Benjamin B., Chicago, Ill. Massage device. 2,104,429; Jan. 4.
Lobdell-Emery Manufacturing Company, The. (See Faulhaber, Roland W., assignor.)
Lobdell-Emery Manufacturing Company, The. (See Hanson, Carl, assignor.)
Lockey, James, Great Burgh, Epsom, England, assignor to Standard Brands Incorporated, New York, N. Y. Aerating device. 2,104,330; Jan. 4.
Long, Alfred B., and L. R. Stagg, Jr., Beaumont, Tex. Oil and gas well protective device. 2,104,660; Jan. 4.
Long, Ernest K., Baltimore, Md. Apparatus for predicting air resistance of fibrous articles. 2,104,047; Jan. 4.
Long, George A., assignor to The Gray Telephone Pay Station Company, Hartford, Conn. Machine for forming coin cages. 2,104,420; Jan. 4.
Lower, Nathan M. Tuckahoe, assignor, by mesne assignments, to The Standard Stoker Company, Inc., (1922), New York, N. Y. Fuel distributing apparatus. 2,104,706; Jan. 4.
Lubbers & Bell Manufacturing Company. (See Bell, Charles L., assignor.)

Ludwick, Herbert V., Dearborn, Mich. Safety attachment for truck wheels. 2,104,506; Jan. 4.
Lummus Company, The. (See Owen, William L., assignor.)
Lunow, Arthur A., Silver Lake, Minn. Cup mouthpiece for brass instruments. 2,104,286; Jan. 4.
Lurcott, Winfred N. (See Johnson, I. G., and Lurcott.)
Lyman, Samuel E., Elizabeth, assignor, by mesne assignments, to Carrier Corporation, Newark, N. J. Time controlled means for distributing air. 2,104,068; Jan. 4.
Lyon Cover Company. (See Fergueson, Arthur P., assignor.)
Lyon, George A., assignor to Lyon Incorporated, Detroit, Mich. Tire cover. 2,104,228; Jan. 4.
Lyon Incorporated. (See Lyon, George A., assignor.)
Lyons, Clyde O., Des Moines, Iowa. Stud. 2,104,263; Jan. 4.
MacCamy, Harry J., assignor to Union Iron Works, Spokane, Wash. Ore separator. 2,104,249; Jan. 4.
MacElvoy, Warren J., Newark, N. J. Garage door mounting. 2,104,490; Jan. 4.
Macklind, William R., Chicago, Ill. Centrifugal separator. 2,104,162; Jan. 4.
Magill, Paul L. P., and C. Dangelmajer, Niagara Falls, N. Y., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Paint composition. 2,104,564; Jan. 4.
Malcolm, Vincent M. (See Jansen, H. C., and Malcolm.)
Maloff, Ioury G., Philadelphia, Pa., assignor to Radio Corporation of America. Electron tube. 2,104,566; Jan. 4.
Manchu Storage Battery Locomotive Company. (See Stolts, Charles E., assignor.)
Manley, Robert E., Port Arthur, Tex., assignor to The Texas Company, New York, N. Y. Treating hydrocarbon oil. 2,104,667; Jan. 4.
Manly, Howard P., to Manly Jail Works, Dalton, Ga. Safety locking and operating system for cell doors. 2,104,661; Jan. 4.
Manly Jail Works. (See Manly, Howard P., assignor.)
Maranso, Fred, assignor to Union Machinery Company, Joliet, Ill. Proofer tray. 2,104,481; Jan. 4.
Maranso, Fred, assignor to Union Machinery Company, Joliet, Ill. Dough divider. 2,104,432; Jan. 4.
Marathon Paper Mills Company, et al. (See Sandborn, Lloyd T., assignor.)
Marble, Louis M., Canton, Pa. Garment hanger. 2,104,305; Jan. 4.
Marks, Herbert E., Sewickley, Pa. Panel structure. 2,104,089; Jan. 4.
Marsden, George P., assignor to Food Machinery Corporation, San Jose, Calif. Clutch mechanism. 2,104,285; Jan. 4.
Marshall, James P., Auburn, N. Y. Shoe construction. 2,104,048; Jan. 4.
Marshall, Robert N., Newark, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Acoustic device. 2,104,423; Jan. 4.
Martin, Paul N., assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway track circuit apparatus. 2,104,691; Jan. 4.
Martinez, Juan J., and D. S. Cast, Mexico, D. F., Mexico. Security locking device. 2,104,204; Jan. 4.
Marsolf, George B., assignor to Farwell Ozmun Kirk & Co., St. Paul, Minn. Refrigerating dispenser for beverages. 2,104,466; Jan. 4.
Marsolf, George B., assignor to Farwell Ozmun Kirk & Co., St. Paul, Minn. Liquid refrigerating dispenser. 2,104,467; Jan. 4.
Matthews, George A., assignor to The Detroit Edison Company, Detroit, Mich. Alternating current system of distribution. 2,104,131; Jan. 4.
Matthies, August, Ilsenburg-Harz, Germany. Reclining couch for use in motor vehicles. 2,104,372; Jan. 4.
Mauterer, Arthur. (See Köhler, W. C., and Mauterer.)
Mayer, Hans. (See Straub, F., and Mayer.)
McCarroll, Russell H. (See Sorensen, C. H., and McCarroll.)
McClure, Arthur W., assignor to McMillan Book Company, Syracuse, N. Y. Loose leaf binder. 2,104,568; Jan. 4.
McCormick, Charles G., Queens Village, N. Y., and P. W. Shoutsley, Mountain Lakes, N. J., assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y. Connecting block and jack assembly 2,104,424; Jan. 4.
McCormick, William J., Toronto, Ontario, Canada. Production and inhalation of tobacco fumes. 2,104,266; Jan. 4.
McDonell, Rob R. (See Nibecker, P. B., and McDonell.)
McDonough, E. G., et al. (See Robinson, Frederick W., assignor.)
McGillicuddy, Frank E., and M. P. Mechler, Cleveland, Ohio. Antitheft device for gasoline tanks. 2,104,132; Jan. 4.
McJunkin, Paul, Wrightsville, Pa., assignor to The Texas Company, New York, N. Y. Grease testing machine. 2,104,163; Jan. 4.
McKinney, Robert S., Chevy Chase, Md., dedicated to the free use of the People of the United States of America. Adhesive. 2,104,491; Jan. 4.
McKinnon, Thomas J., Jr., Mission, Tex. Match book. 2,104,621; Jan. 4.
McLaurin-Jones Co. (See Davis, Lewis, assignor.)
McLeod, George H., Auckland, New Zealand. Screw propeller. 2,104,206; Jan. 4.
McMillan Book Company. (See Lenhart, Harold C., assignor.)
McMillan Book Company. (See McClure, Arthur W., assignor.)
McNeil, Charles I., Bloomfield, and R. T. Zwack, assignors to Eclipse Aviation Corporation, East Orange, N. J. Measuring apparatus. 2,104,373; Jan. 4.
Mechanical Development Co. (See Sabins, Rolland C., assignor.)
Meek, John M., New York, N. Y. Window construction. 2,104,369; Jan. 4.
Meeks, Anson J. and L. W., Hillsdale, Mich. Canopy for brooder stoves. 2,104,662; Jan. 4.
Meeks, Louie W. (See Meeks, Anson J. and L. W.)
Mees, Frank S., Lynn, Mass. Insole. 2,104,133; Jan. 4.
Melin, William, Detroit, Mich. Fixture for milling machines. 2,104,267; Jan. 4.
Mellebrand, Ferdinand, Detroit, Mich. Window latch. 2,104,124; Jan. 4.
Menapace, Joseph C., and G. Kallfels, Syracuse, N. Y. Dough divider. 2,104,205; Jan. 4.
Mendive, Anthony J., Houston, Tex. Clamp and scaffold for welding operations. 2,104,622; Jan. 4.
Menier, Mario T. (See Ronda, C. J., and Menier.)
Merkel, Erich, Wuppertal-Barmen, and C. Wiegand, Wuppertal-Elberfeld, Germany, assignors to Winthrop Chemical Company, Inc., New York, N. Y. Light filter. 2,104,493; Jan. 4.
Mermer, Irving L., Yonkers, N. Y. Indicating closure for bottles. 2,104,236; Jan. 4.
Metzger, Francis C., Cleveland Heights, Ohio, assignor to General Electric Company. Apparatus for pumping and mixing liquids. 2,104,085; Jan. 4.
Meuer, George J., assignor to Cutler-Hammer, Inc. Milwaukee, Wis. Electric snap switch. 2,104,206; Jan. 4.
Miles, Loren L., Los Angeles, Calif. Aircraft propeller. 2,104,207; Jan. 4.
Miller, Theodore H., Portland, Oreg. Forming end grain flooring. 2,104,307; Jan. 4.
Milliken, Frank H., assignor to The Ideal Electric and Manufacturing Company, Mansfield, Ohio. Slip frequency relay. 2,104,664; Jan. 4.
Mine & Smelter Supply Co., The, et al. (See Wetnig, Arthur J., assignor.)
Mishelevich, Benjamin. (See Agnew, N. F., and Mishelevich.)
Mockler, Martin P. (See McGillicuddy, F. E., and Mockler.)
Molke, Eric C., Montreal, Quebec, Canada. Sheet piling. 2,104,665; Jan. 4.
Molnár, Sándor, Budapest, Hungary. Easy chair or the like convertible into couch, divan, bed, or the like. 2,104,666; Jan. 4.
Monarch Manufacturing Works, Inc. (See Murphy, Thomas W., assignor.)
Monarch Marking System Company, The. (See Kohnle, Frederick, assignor.)
Montgomery, James A., assignor of one-half to H. Moss, Birmingham, Ala. Jig. 2,104,090; Jan. 4.
Montgomery, Terence N. (See Baxter, J. P., Montgomery, and Moore.)
Moore, Francis J., Minneapolis, Minn. Toilet seat. 2,104,714; Jan. 4.
Moore, Joseph G. (See Baxter, J. P., Montgomery, and Moore.)
Merrell, Jacque C., assignor to Universal Oil Products Company, Chicago, Ill. Treatment of motor fuel. 2,104,049; Jan. 4.
Merrill, Frank B., assignor to The James Hunter Machine Company, North Adams, Mass. Carbonizing drier. 2,104,136; Jan. 4.
Moss, Howard. (See Montgomery, James A., assignor.)
Mottern, Hugh H. (See Blanck, F. C., Swenson, Mottern, Goreseline, and Nelson.)
Mullen, Edwin J., New Rochelle, assignor to General Chemical Company, New York, N. Y. Roasting ore. 2,104,091; Jan. 4.
Muller, Jacques, La Garenne-Colombes, France. Device for emptying tanks. 2,104,493; Jan. 4.
Müns, Ferdinand, Frankfort-on-the-Main, and K. Keller and O. Tröeken, Frankfort-on-the-Main-Fechenheim, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Quaternary ammonium compounds. 2,104,092; Jan. 4.
Murden, William T., Bristol, Conn., assignor to General Motors Corporation, Detroit, Mich. Retarding mechanism. 2,104,136; Jan. 4.
Murphree, Eger V., and E. D. Reeves, Baton Rouge, La., assignors to Standard Oil Development Company. Solvent treating oils and recovering solvent. 2,104,401; Jan. 4.
Murphy, Thomas W., Bala-Cynwyd, assignor to Monarch Manufacturing Works, Inc., Philadelphia, Pa. Liquid pressure regulating valve. 2,104,300; Jan. 4.
Murray Corporation of America, The. (See Haberstump, Alfred H., assignor.)
Murray Iron Works Company. (See Allen, Robert C., assignor.)
Murray-Ohio Manufacturing Company, The. (See Kraeft, Herman L., assignor.)

Muth, Herbert, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Variable mechanical means for an oscillation circuit. 2,104,569; Jan. 4.
Nash-Kelvinator Corporation. (See Giffard, Whitney, assignor.)
Nassau Smelting and Refining Company. (See Willard, Frederic W., assignor.)
Nathe, Charles G., Jr., St. Cloud, Minn. Receptacle closure. 2,104,503; Jan. 4.
National Aluminate Corporation. (See Richardson, Homer H., assignor.)
National Carbon Company, et al. (See Supplee, George C., assignor.)
National Cash Register Company, The. (See Green, Charles W., assignor.)
National Electric Products Corporation. (See Corbett, Alfred, assignor.)
National Machinery Co., The. (See Friedman, John H., assignor.)
National Malleable and Steel Castings Company. (See Shafer, James A., assignor.)
National Tube Company. (See Findlater, Stevenson, assignor.)
Naylor, William E. (See Pennell, L. P., Stone, and Naylor.)
Needham, John T., North Plainfield, N. J., assignor to Lamson General Conveyors, Limited, Montreal, Quebec, Canada. Carrier for pneumatic dispatch tube apparatus. 2,104,093; Jan. 4.
Neidich, Samuel A., Burlington, N. J., assignor, by mesne assignments, to Underwood Elliott Fisher Company, New York, N. Y. Making typewriter ribbons. 2,104,237; Jan. 4.
Nelson, Adolph L., assignor to Bohn Aluminum & Brass Corporation, Detroit, Mich. Piston. 2,104,350; Jan. 4.
Nelson, Jonathan K. (See Blanck, F. C., Swenson, Mottern, Goresline, and Nelson.)
Nerwin, Hubert, Dresden-Blasewitz, assignor to Zeiss Ikon Aktiengesellschaft, Dresden, Germany. Photographic camera. 2,104,094; Jan. 4.
Newark Refrigeration and Appliance Co. (See Bloom, Abraham, assignor.)
New Products Corporation. (See Banker, Oscar H., assignor.)
Nibecker, Paul B., U. S. Navy, and R. R. McDonell, Oakland, Calif. Oil and water separator. 2,104,050; Jan. 4.
Nichols, Harry J., Dayton, Ohio, assignor to International Business Machines Corporation, New York, N. Y. Synchronous communication system. 2,104,570; Jan. 4.
Nichols, Harry J., Dayton, Ohio, assignor to International Business Machines Corporation, New York, N. Y. Communication system. 2,104,571 Jan. 4.
Nichols, Harry J. and H. L. Tholstrup, Dayton, Ohio, assignors to International Business Machines Corporation, New York, N. Y. Synchronous communication system. 2,104,572; Jan. 4.
Nichols, Kenneth N., Chicago, Ill. Lathe tool. 2,104,238; Jan. 4.
Nielsen, Emanuel, Racine, Wis., assignor to Scovill Manufacturing Company, Waterbury, Conn. Food mixer. 2,104,366; Jan. 4.
Niemann, Frederick A., Chicago, Ill., assignor to Felt & Tarrant Mfg. Co. Calculating machine. 2,104,061; Jan. 4.
Nightingale, Edward. (See Hunter, P. E., and Nightingale.)
Nixon, Anson B., administrator. (See Fisher, Lloyd H.)
Noel, Alfred J., Stratford, assignor to The Bodine Corporation, Bridgeport, Conn. Machine tool spindle. 2,104,435; Jan. 4.
Noll, Austin R., assignor to International Business Machines Corporation, New York, N. Y. Communication system. 2,104,545; Jan. 4.
Northern Equipment Company. (See Hunter, William L., assignor.)
Northern Machine Co. (See Kamborian, Jacob S., assignor.)
Notarangelo, Frank. (See Agosta, C., and Notarangelo.)
Novak, Isador J., assignor to Raybestos-Manhattan, Inc., Bridgeport, Conn. Apparatus for making saturated, sized, filled, or coated paper or fiberboard. 2,104,052; Jan. 4.
O'Brien, Francis M., Jr., Miami, Fla. Laminated fishing rod. 2,104,404; Jan. 4.
O'Brien, Francis M., Jr., Miami, Fla. Reel seat for fishing rods. 2,104,405; Jan. 4.
O'Dell, Leonard R., assignor to N. A. Jenkins, Adams Center, N. Y. Surgical appliance. 2,104,600; Jan. 4.
Odenbach, John H., and J. Cattanach, assignors to Dolomite Marine Corporation, Rochester, N. Y. Welded hull construction. 2,104,053; Jan. 4.
Oliver United Filters Incorporated. (See Watson, Lloyd W., assignor.)
Olsen, John, and M. O. Smaaladen, Aneta, N. Dak. Grain binder. 2,104,374; Jan. 4.
Oltrogge, Frederick C., assignor to Waterloo Register Company, Waterloo, Iowa. Register. 2,104,208; Jan. 4.
Oplinger, Floyd F., Niagara Falls, N. Y., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Metal plating. 2,104,269; Jan. 4.
Osborn, Alden E., New York, N. Y. Pipe joint. 2,104,351; Jan. 4.
Osborn, John W., assignor to Hinchley-Myers Company, Jackson, Mich. Pneumatic hammer. 2,104,468; Jan. 4.
Osborne, Frederick H., assignor to Rance Incorporated. Refrigerator door lamp switch. 2,104,164; Jan. 4.
Ostrofsky, James N., assignor, by mesne assignments, to Rustless Iron and Steel Corporation, Baltimore, Md. Treatment of rustless iron. 2,104,667; Jan. 4.
Oswego Falls Corporation. (See La Bombard, Leon H., assignor.)
Oswego Falls Corporation. (See Pierce, Lee D., assignor.)
Overly, Elmer G., Oakmont, Pa. Mailing container. 2,104,352; Jan. 4.
Owen, William L., Baton Rouge, La., assignor to The Lummus Company, New York, N. Y. Bacteria yeast process of bread manufacture. 2,104,054; Jan. 4.
Owsley, William D., assignor to Halliburton Oil Well Cementing Company, Duncan, Okla. Cementing equipment for wells. 2,104,270; Jan. 4.
Oxford Paper Company. (See Sorensen, Einar, assignor.)
Oxford Varnish Corporation. (See King, Orville D., assignor.)
Packard Motor Car Company. (See Best, Frank C., assignor.)
Pagheelan, Garabed, Waverley, Mass. Composition of matter for artificial stone. 2,104,353; Jan. 4.
Panama Brick & Tile Company. (See Carlisle, Pitt M., assignor.)
Papendick, Gustav C., University City, Mo. Baked Loaf fraction package and packaging. 2,104,095; Jan. 4.
Paradise, William F., Auburn, Nebr. Furnace. 2,104,096; Jan. 4.
Parisini, Primo, Corona, N. Y. Spraying device for evacuation. 2,104,271; Jan. 4.
Parke, Davis & Company. (See Groeling, Charles, assignor.)
Partridge, Arthur F., St. Paul, Minn. Washing machine for tumblers and similar tableware. 2,104,272; Jan. 4.
Patent and Licensing Corporation, The. (See Groskopf, Edwin O., assignor.)
Patent and Licensing Corporation, The. (See Kirchbraun, Lester, assignor.)
Pattison, Herbert J., Detroit, and W. K. Barton, Grosse Pointe Park, assignors to Briggs Manufacturing Company, Detroit, Mich. Portable grinding or filing machine. 2,104,426; Jan. 4.
Paulus, Charles L. (See Alexander, D. F., Henney, and Paulus.)
Peik, Louis D., assignor to The American Foundry Equipment Company, Mishawaka, Ind. Abrading apparatus. 2,104,055; Jan. 4.
Pelletier, Philippe, and P. Vaillancourt, Beaupre, Quebec, Canada. Rail joint. 2,104,165; Jan. 4.
Pelton, Edward A., Newark, N. J., assignor, by mesne assignments, to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Making a glass seal. 2,104,166; Jan. 4.
Pelton, George E., Alexandria, Va., and E. L. Jester, Washington, D. C.; said Jester assignor to said Pelton. Supplying ink to ink transfer members. 2,104,460; Jan. 4.
Pennell, Lawrence P., and W. F. Stone, Chicago, Ill., and W. E. Naylor, Binghamton, assignors to International Business Machines Corporation, New York, N. Y. Conveyer scale. 2,104,546; Jan. 4.
Pennsylvania Salt Manufacturing Company. (See Lehmann, Rudolph, assignor.)
People of the United States of America. (See Blanck, F. C., Swenson, Mottern, Goresline, and Nelson.)
People of the United States of America. (See McKinney, Robert S.)
Perfect Circle Company, The. (See Given, Fred H., assignor.)
Perkins, Granville A. (See Chitwood, H. C., and Perkins.)
Perry, James M., Lake Charles, La. Dice game accessory. 2,104,375; Jan. 4.
Perseguiti, Joseph G., New York, N. Y. Ornamentation work. 2,104,547; Jan. 4.
Persson, Ernst, assignor to The International Postal Supply Company, Brooklyn, N. Y. Postage printing and metering machine. 2,104,668; Jan. 4.
Peters, William H., Flat Rock, assignor to Ford Motor Company, Dearborn, Mich. Headlamp construction. 2,104,437; Jan. 4.
Peterson, Carl D., Toledo, Ohio. Flexible clutch shaft construction for automotive power plants. 2,104,660; Jan. 4.
Philadelphia Drying Machinery Company, The. (See Sibson, Walter W., assignor.)
Phillips Petroleum Company. (See Frey, Frederick E., assignor.)
Phillips Petroleum Company. (See Youker, Malcolm P., assignor.)
Pieper, Alphonse F., Rochester, N. Y. Dental syringe. 2,104,670; Jan. 4.
Piet, Mathias, Heidelberg, W. Hirschberger, and H. Lamm, Ludwigshafen-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Lubricating oils. 2,104,097; Jan. 4.
Pierce, Lee D., assignor to Oswego Falls Corporation, Fulton, N. Y. Capping head for applying closures to milk bottles and the like. 2,104,671; Jan. 4.
Pierson, Carl W., Rockford, Ill. Air conditioner. 2,104,209; Jan. 4.

Pittsburgh Dry Stencil Company. (See Greenslade, Grover R., assignor.)
Pittsburgh Plate Glass Company. (See Halbach, Howard L., assignor.)
Pittsburgh Plate Glass Company. (See Heichert, Herman S., assignor.)
Place, Blen C., assignor of one-half to G. H. Gagnier, Detroit, Mich. Spring fastener. 2,104,230; Jan. 4.
Plater, E. & Co. Inc. (See Procter, Edward, assignor.)
Porter, Edward, assignor to H. Porter & Co. Inc., Irvington, N. J. Handbag frame. 2,104,098; Jan. 4.
Pol, John B., La Porte, Ind., and W. F. Krenske, assignors to Jacobsen Manufacturing Company, Racine, Wis. Power lawn mower with side cutter units. 2,104,719; Jan. 4.
Ponce, Lucien G., Follansbee, W. Va., assignor to Liberty Mirror Works. Ball joint for a rear view mirror. 2,104,099; Jan. 4.
Poor & Company. (See Warr, Harold G., assignor.)
Porter, George J., Watrous, Pa. Combination book holder, writing and study board. 2,104,534; Jan. 4.
Potts, Louis M., Evanston, assignor to Teletype Corporation, Chicago, Ill. Start-stop regenerative repeater. 2,104,273; Jan. 4.
Powell, Herbert S., Utica, N. Y. Muffler. 2,104,376; Jan. 4.
Preisser, Edmund, New Britain, Conn. Mop holder. 2,104,331; Jan. 4.
Prentiss, Polly, Inc. (See Bradwell, Robert H., assignor.)
Pringle, William L., assignor to United States Gypsum Company, Chicago, Ill. Lacquer-undercoat protective coating. 2,104,240; Jan. 4.
Procter & Gamble Company, The. (See Richardson, Albert S., assignor.)
Proctor, B. A., Company. (See Proctor, Barton A., assignor.)
Proctor, Barton A., Larchmont, assignor to B. A. Proctor Company, Inc., New York, N. Y. Phonographic turntable. 2,104,241; Jan. 4.
Prosfourakoff, Avenir P., Lansdowne, Pa. Recording apparatus for blood sedimentation tests. 2,104,525; Jan. 4.
Prout, Herbert L., Villa Park, Ill. Line squaring device. 2,104,377; Jan. 4.
Public in the United States. (See Dearborn, Frederick E.)
Pulp Products Company. (See Haymann, Roy D., assignor.)
Putney, Philip F., Newport, N. Y. Caramel cutting machine. 2,104,623; Jan. 4.
Pychlau, Herbert, Freiberg, Germany. Output dose meter. 2,104,578; Jan. 4.
Pym, Arthur F., executor. (See Pym, Charles F.)
Pym, Charles F., deceased, Beverly, by A. F. Pym, executor, Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Operating on shoes. 2,104,137; Jan. 4.
Radio Corporation of America. (See Conklin, James W., assignor.)
Radio Corporation of America. (See Crosby, Murray G., assignor.)
Radio Corporation of America. (See Franklin, Charles S., assignor.)
Radio Corporation of America. (See Hollingsworth, R. Lee, assignor.)
Radio Corporation of America. (See Linsell, Alfred A., assignor.)
Radio Corporation of America. (See Maloff, Ioury G., assignor.)
Radio Corporation of America. (See Roberts, Walter van B., assignor.)
Radio Corporation of America. (See Tellegen, Bernardus D. H., assignor.)
Radio Corporation of America. (See van der Ven, Adrianus J. H., assignor.)
Radio Corporation of America. (See Young, Charles J., assignor.)
Radio Corporation of America. (See Zworykin, Vladimir K., assignor.)
Rainer, Osborne S., Montgomery, Ala. Automatic liquid feed for storage batteries. 2,104,672; Jan. 4.
Raisch, William, assignor to Underpinning & Foundation Co., Inc., New York, N. Y. Apparatus for treating material including solids and vaporizable material. 2,104,526; Jan. 4.
Ranco Incorporated. (See Osborne, Frederick H., assignor.)
Rapisarda, Edward D., Agawam, assignor of one-half to G. E. Byford, Winchester, Mass. Press mechanism. 2,104,308; Jan. 4.
Rascher & Betzold, Inc. (See Betzold, M. F., Rascher, and Torp, assignors.)
Rascher, Charles. (See Betzold, M. F., Rascher, and Torp.)
Rawlings, George W., Park Hill, Kenilworth, England. Electric generator. 2,104,707; Jan. 4.
Raybestos-Manhattan, Inc. (See Novak, Isador J., assignor.)
Redrup, Charles B., assignor to The Bristol Tramways & Carriage Company Limited, Bristol, England. Swash mechanism. 2,104,391; Jan. 4.
Reeves, Edward D. (See Murphree, E. V., and Reeves.)
Reinholdtsen, Hans, Copenhagen, Denmark. Apparatus for stamping of tickets and the like. 2,104,573; Jan. 4.
Remington Arms Company. (See Dicke, Allen A., assignor.)
Remington, Leonard F., assignor to Thompson-National Press Co., Franklin, Mass. Impression control for cutting and creasing presses. 2,104,527; Jan. 4.
Reynolds Corporation. (See Coddington, Edwin D., assignor.)
Reynolds, Michael, Ottumwa, Iowa. Control for automatic air brake apparatus. 2,104,392; Jan. 4.
Rich, Jack V., Chicago, Ill. Draftsman's instrument. 2,104,354; Jan. 4.
Richardson, Albert S., Wyoming, assignor to The Procter & Gamble Company, Cincinnati, Ohio. Composition of fatty matter and stabilising same. 2,104,242; Jan. 4.
Richardson Company, The. (See Rieser, Oliver O., assignor.)
Richardson, Dean R., New Kensington, Pa. Safety latch plate. 2,104,309; Jan. 4.
Richardson, Homer H., Western Springs, assignor to National Aluminate Corporation, Chicago, Ill. Protecting steam boilers against caustic embrittlement. 2,104,528; Jan. 4.
Richardson, James C., Brooklyn, assignor to Royal Switchboard Co., Inc., New York, N. Y. Electric switchbox. 2,104,167; Jan. 4.
Richeson, Sanford E., New York, N. Y. Can closure. 2,104,438; Jan. 4.
Rickard, George B., assignor to The Carborundum Company, Niagara Falls, N. Y. Segmental pulp wheel. 2,104,594; Jan. 4.
Rieffel, August, Philadelphia, Pa. Steaming and drying machine. 2,104,402; Jan. 4.
Rieser, Oliver O., Oak Park, Ill., assignor to The Richardson Company, Lockland, Ohio. Shrink fixture. 2,104,673; Jan. 4.
Ring, Frederick G., Newark, N. J., assignor to Semet-Solvay Engineering Corporation, New York, N. Y. Manufacture of spirituous liquors. 2,104,243; Jan. 4.
Ring, Frederick G., Newark, N. J., assignor to Semet-Solvay Engineering Corporation, New York, N. Y. Manufacture of spirituous liquors. 2,104,244; Jan. 4.
Roberts, Frederic M., Schenectady, and E. H. Sills, Scotia, N. Y., assignors to General Electric Company. Control system. 2,104,674; Jan. 4.
Roberts, Walter van B., Princeton, N. J., assignor to Radio Corporation of America. Superheterodyne converter network. 2,104,100; Jan. 4.
Robinson, Frederick W., Jenks, assignor of one-fourth to F. W. Bailey, one-tenth to H. Hose, and one-tenth to R. C. McDonough, Tulsa, Okla. Fluid packed plunger for pumps. 2,104,274; Jan. 4.
Rockola, David C., assignor to Rock-Ola Manufacturing Corporation, Chicago, Ill. Game apparatus. 2,104,574; Jan. 4.
Rock-Ola Manufacturing Corporation. (See Rockola, David C., assignor.)
Rodnick, Samuel, New York, N. Y. Cookie machine. 2,104,529; Jan. 4.
Roelfsema, Petrus J., Walnut Creek, assignor to Shell Development Company, San Francisco, Calif. Fractionation. 2,104,310; Jan. 4.
Roethel, John H., Detroit, Mich. Door handle assembly. 2,104,403; Jan. 4.
Rohde, Carlos J., and M. T. Menier, assignors of one-half to E. C. Rohde, New York, N. Y., and one-half to said Menier. Rotatable dispensing and measuring device. 2,104,332; Jan. 4.
Rohde, Rose C., et al. (See Rohde, C. J., and Menier, assignors.)
Röhm & Haas Company. (See Röhm, O., and Bauer, assignors.)
Röhm, Otto, and W. Bauer, Darmstadt, Germany, assignors, by mesne assignments, to Röhm & Haas Company, Philadelphia, Pa. Artificial substance. 2,104,168; Jan. 4.
Roland, Orville A., Quincy, Ill. Denture kit. 2,104,470; Jan. 4.
Rolls-Royce Limited. (See West, Harold E. W., assignor.)
Romeo, Salvatore A., Brooklyn, N. Y. Vehicle spring suspension. 2,104,245; Jan. 4.
Rosenbaum, Kurt, Rheinhausen/Lower Rhine, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Jointed coupling. 2,104,101; Jan. 4.
Rosenblad, Curt F., Sodertalje, assignor to Aktiebolaget Rosenblads Patenter, Stockholm, Sweden. Regulating the temperature of flowing media. 2,104,333; Jan. 4.
Royal Switchboard Co. (See Richardson, James C., assignor.)
Royce, Albert A., Hollis, and M. L. Beyer, assignors to The International Postal Supply Company, Brooklyn, N. Y. Postage meter machine. 2,104,624; Jan. 4.
Rubin, Louis. (See Freudenheim, Mendel E., assignor.)
Ruff, George, Kane, Wyo. Combined scraper and grader. 2,104,675; Jan. 4.
Rupp, Herbert E., Springfield Township, Richland County, and J. C. Gorman, Mansfield, Ohio. Shaft sealing means. 2,104,355; Jan. 4.
Russel, Philip S., assignor to Detroit Lubricator Company, Detroit, Mich. Pressure regulating device. 2,104,700; Jan. 4.
Russell, Robert H., Cleveland, Ohio, assignor, by mesne assignments, to Gas Fuel Corporation. Creating high temperatures. 2,104,311; Jan. 4.

Rustless Iron and Steel Corporation. (See Ostrofsky, James N., assignor.)

Ruthven, Frederick F., Toronto, Ontario, assignor, by mesne assignments, to Aluminium Laboratories Limited, Montreal, Quebec, Canada. Method for degreasing. 2,104,102; Jan. 4.

Ruthven, Frederick F., Toronto, Ontario, assignor, by mesne assignments, to Aluminium Laboratories Limited, Montreal, Quebec, Canada. Degreasing apparatus. 2,104,103; Jan. 4.

Sabins, Rolland C., assignor to Mechanical Development Co., St. Paul, Minn. Acetylene generator. 2,104,471; Jan. 4.

Saffir, Jacob A., Rockford, assignor to J. W. Frankel, Chicago, Ill. Dental X-ray film package. 2,104,715; Jan. 4.

St. Clair, John A., and D. E. Gommel, Indianapolis, Ind. Auxiliary chuck. 2,104,472; Jan. 4.

Salerni, Piero M. (See Cox, J. C., and Thomas, assignors.)

Salfeld, Ippolito, New York, N. Y. Safety system of water supply for bidets and the like. 2,104,210; Jan. 4.

Sandberg, Lloyd T., Wausau, assignor to Marathon Paper Mills Company, and Guy C. Howard Company, Rothschild, Wis., jointly. Making vanillin. 2,104,701; Jan. 4.

Sanford, Charles L., Meadville, Pa. Roof and floor block. 2,104,356; Jan. 4.

Schaefer, Justus J., Great Barrington, Mass. Fastening device. 2,104,496; Jan. 4.

Scharschu, Charles A., Brackenridge, Pa., assignor to Allegheny Steel Company. Nonaging flat silicon steel strip and producing the same. 2,104,160; Jan. 4.

Schein, Morris, Brooklyn, N. Y. Combination pocket kit. 2,104,420; Jan. 4.

Scheirm, Erik, Dessau-in-Anhalt, Germany, assignor, by mesne assignments, to General Aniline Works, Inc., New York, N. Y. Manufacture of substantive dyestuffs. 2,104,595; Jan. 4.

Schlegall, Theodore, New York, N. Y. Compact or the like. 2,104,104; Jan. 4.

Schleicher, Lawrence, Los Angeles, Calif. Pessary applicator. 2,104,275; Jan. 4.

Schmidt, Edward A., Ridgewood, N. Y. Furrier's knife. 2,104,276; Jan. 4.

Schmidt, Frank E., Tigard, Oreg. Advertising sign. 2,104,105; Jan. 4.

Schmidt'sche Heissdampf-Gesellschaft m. b. H. (See Engler, Otto, assignor.)

Schoepbach, Charles H., and L. Babcock, assignors to International Corset Company. Aurora, Ill. Corset. 2,104,277; Jan. 4.

Schrank, Max C., Bridgeton, N. J. Slip. 2,104,506; Jan. 4.

Schulze, Fritz, Berlin-Halensee, Germany. Automatic vending machine. 2,104,497; Jan. 4.

Schultz, Michael C., Green Bay, Wis. Bread slicer guide. 2,104,278; Jan. 4.

Schwartz, Morris A., Los Angeles, Calif. Centrifugal vacuum pump. 2,104,246; Jan. 4.

Schwarz, Karl, assignor to Klangfilm G. m. b. H., Berlin, Germany. Sound recording device. 2,104,170; Jan. 4.

Schweitzer, Frank J., assignor of one-half to W. D. Sheaffer, Brea, Calif. Lubricated, split ring, stopcock. 2,104,036; Jan. 4.

Schweller, Edmund F., assignor to General Motors Corporation, Dayton, Ohio. Refrigerating apparatus. 2,104,548; Jan. 4.

Schwerin, Frank H., Bellevue, assignor to The Duff-Norton Manufacturing Company, Pittsburgh, Pa. Range target. 2,104,171; Jan 4.

Scott, Clyde, Newark, N. J. Applying slime made from viscose to paper and the like. 2,104,057; Jan. 4.

Scovill Manufacturing Company. (See Nielsen, Manuel, assignor.)

Seer, Richard H., Danvers, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Trimming machine. 2,104,135; Jan. 4.

Sell, Gilbert H., Cynwyd, Pa. Electric furnace process. 2,104,530; Jan. 4.

Semet-Solvay Engineering Corporation. (See Ring, Frederick G., assignor.)

Sénaûme, Roger. (See Goudet, H., and Sénaûme.)

Senf, Oscar, assignor to W. A. Sheaffer Pen Company, Fort Madison, Iowa. Fountain pen desk stand. 2,104,670; Jan. 4.

Sheffer, James A., East Cleveland, assignor to National Malleable and Steel Castings Company, Cleveland, Ohio. Car truck. 2,104,404; Jan. 4.

Sheffer, James A., East Cleveland, assignor to National Malleable and Steel Castings Company, Cleveland, Ohio. Car truck. 2,104,405; Jan. 4.

Sheffer, William D. (See Schweitzer, Frank J., assignor.)

Sheaffer, W. A., Pen Company. (See Cuthbert, William R., assignor.)

Sheaffer, W. A., Pen Company. (See Senf, Oscar, assignor.)

Sheatsley, Paul W. (See McCormick, C. G., and Sheatsley.)

Shell Development Company. (See Roelfsema, Petrus J., assignor.)

Sherman, Sol, New York, N. Y. Bow necktie. 2,104,625; Jan. 4.

Sherwood, Frank D., Beaver Dam, Wis. Candle holder. 2,104,139; Jan. 4.

Shurley, Frederick, Salt Lake City, Utah, assignor to Ceramic Machinery Distributors Limited, Windsor, Ontario, Canada. Noncily vitreous enamel. 2,104,531; Jan. 4.

Sibley, Edwin J., Westbury, N. Y. Door stay and holder. 2,104,172; Jan. 4.

Sibson, Walter W., assignor to The Philadelphia Drying Machinery Company, Philadelphia, Pa. Baking machine for textile materials. 2,104,173; Jan. 4.

Sills, Earl H. (See Roberts, F. M., and Sills.)

Simons, John C., and H. S. Swope, Philadelphia, Pa. Clutch. 2,104,174; Jan. 4.

Slatinsky, John, Chicago, Ill. Closure operating device. 2,104,498; Jan. 4.

Sloane, William W., assignor to Goodman Manufacturing Company, Chicago, Ill. Loading machine. 2,104,247; Jan. 4.

Smaaladen, Martin O. (See Olson, J., and Smaaladen.)

Small, Lyndon F., Charlottesville, Va., assignor to the Government of the United States, represented by the Secretary of the Treasury. Ethers of morphine and dihydromorphine and their respective N-oxides. 2,104,068; Jan. 4.

Smit, J. K., & Sons, Inc. (See Taylor, Rutherford H., assignor.)

Smith, A. O., Corporation. (See Kopp, Carl J., assignor.)

Smith, Clarence E. (See Crain, M. L., and Smith.)

Smith, Oakley, Chicago, Ill. Apparatus for correlating dietary and digestive data. 2,104,334; Jan. 4.

Smith, S. Morgan, Company. (See Brisbane, E. C., and Bischoff, assignors.)

Snelling, Walter O., Allentown, Pa. Sealing expansion joints. 2,104,059; Jan. 4.

Soabar Company. (See Henry, George W., Jr., assignor.)

Société Anonyme des Manufactures des Glaces & Produits Chimiques de Saint-Gobain, Chauny & Cirey. (See Cousteix, Blaise, assignor.)

Société Anonyme des Manufactures des Glaces & Produits Chimiques de Saint-Gobain, Chauny & Cirey. (See George, E., and Delpech, assignors.)

Society of Chemical Industry in Basle. (See Haller, R., and Graenacher, assignors.)

Society of Chemical Industry in Basle. (See Straub, F., and Mayer, assignors.)

Soller, Walter, assignor of one-half to W. H. Woodin, Jr., Tucson, Ariz. Balanced electron tube circuits. 2,104,211; Jan. 4.

Sommer, Robert, Berlin, Germany, assignor of one-half to W. S. Bleistein, New York, N. Y., and one-fourth to Bruno Cossalter, Feltre (Belluno), Italy. Nonskid tire. 2,104,532; Jan. 4.

Sorensen, Charles E., Detroit, and R. H. McCarroll, assignors to Ford Motor Company, Dearborn, Mich. Apparatus for casting. 2,104,406; Jan. 4.

Sorensen, Einar, Rumford, Maine, assignor to Oxford Paper Company. Electrolytic cell. 2,104,677; Jan. 4.

Sorensen, Einar, Rumford, Maine, assignor to Oxford Paper Company. Electrolytic cell. 2,104,678; Jan. 4.

Sorensen, Einar, Rumford, Maine, assignor to Oxford Paper Company. Operating electrolytic cells. 2,104,679; Jan. 4.

Spafford, Allen L., assignor to Wood Conversion Company, Cloquet, Minn. Corrugated structure. 2,104,060; Jan. 4.

Spengler, Walter J., Sidney, N. Y., assignor to Bendix Aviation Corporation, South Bend, Ind. Magneto generator. 2,104,140; Jan. 4.

Sperry Gyroscope Company. (See Carlson, Bert G., assignor.)

Sperry Gyroscope Company. (See Zand, Stephen J., assignor.)

Sperry, Philmore F., assignor, by mesne assignments, to Excel Auto Radiator Company, Chicago, Ill. Air distributing means. 2,104,279; Jan. 4.

Spiers, Ernest, and J. C. H. Hurd, assignors to Wildt and Company Limited, Leicester, England. Circular knitting machine of the double axially opposed needle cylinder type. 2,104,626; Jan. 4.

Spratley, Arthur L. (See Spratley, Henry C., and A. L.)

Spratley, Henry C. and A. L., Providence, R. I. Sign. 2,104,280; Jan. 4.

Squibb, E. R., & Sons. (See Lee, John, assignor.)

Stagi, Louis R., Jr. (See Long, A. R., and Stagi.)

Stahl, Edward J., Lakewood, assignor to The Baker-Raulang Company, Cleveland, Ohio. Vehicle. 2,104,335; Jan. 4.

Standard Brands Incorporated. (See Lockey, James, assignor.)

Standard Oil Development Company. (See Baskin, Charles M., assignor.)

Standard Oil Development Company. (See Bue, Hyym E., assignor.)

Standard Oil Development Company. (See Murphree, E. V., and Reeves, assignors.)

Standard Oil Development Company. (See Statham, L., and Blau, assignors.)

Standard Oil Development Company. (See Wiesevich, Peter J., assignor.)

Stanley Stoker Company (1922), The. (See Lower, Nathan M., assignor.)

Stark, Joseph W., assignor to General Ribbon Mills, Inc., New York, N. Y. Ornament. 2,104,248; Jan. 4.

Statham, Louis, and L. W. Blau, Houston, Tex., assignors to Standard Oil Development Company. Geophysical prospecting by the comparison of steady state potentials. 2,104,440; Jan. 4.

Stearns-Roger Manufacturing Co., The, et al. (See Weinig, Arthur J., assignor.)

Stedwell, George W., Brooklyn, assignor to Keystone Controls, Inc., New York, N. Y. Liquid delivery apparatus. 2,104,597; Jan. 4.

Stevens, Brooks, Jr., Concord, Mass. Manufacturing commutators. 2,104,141; Jan. 4.

Stockdale, Stephen W., Hammond, Ind., and E. F. Weaver and S. P. Tinnes, Calumet City, Ill., assignors to Anaconda Lead Products Company. Manufacture of lead borate. 2,104,540; Jan. 4.

Stocker, John, Muscatine, Iowa. Clutch mechanism for automotive vehicle. 2,104,312; Jan. 4.

Stokely, Grace MacD., executrix. (See Bowne, L. J., Lamberty, and Stokely.)

Stokely, Ray L. (See Bowne, L. J., Lamberty, and Stokely.)

Stoltz, Charles E., assignor to Mancha Storage Battery Locomotive Company, Chicago, Ill. Mechanical shoveling machine. 2,104,575; Jan. 4.

Stone, Walter E. (See Pennell, L. P., Stone, and Naylor.)

Stratford, Frederick F., Glen Ridge, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Testing apparatus. 2,104,441; Jan. 4.

Straub, Fritz, and H. Mayer, assignors to the firm of Society of Chemical Industry in Basle, Basel, Switzerland. Conversion products of dyestuffs and making same. 2,104,357; Jan. 4.

Strickland, Royal F., Cleveland Heights, Ohio, assignor to General Electric Company. Enclosed arc device. 2,104,680; Jan. 4.

Stryker, Daniel, White Plains, and J. H. Grahame, Mount Vernon, assignors to The Texas Company, New York, N. Y. Solvent refining of mineral oil. 2,104,379; Jan 4.

Sturtevant, B. F., Company. (See Andersen, Samuel M., assignor.)

Sturtevant, B. F., Company. (See Hanson, Milton E., assignor.)

Superheater Company, The. (See Epley, Frederic L., assignor.)

Supplee, George C., Bainbridge, N. Y., assignor of one-half to The Borden Company and one-half to National Carbon Company, Inc. Irradiation. 2,104,681; Jan. 4.

Surdy, Charles J., Tuckahoe, N. Y., assignor to Bendix-Westinghouse Automotive Air Brake Company, Pittsburgh, Pa. Transmission control mechanism. 2,104,061; Jan. 4.

Svoboda, Jaroslav and L., and K. Bilek, Prague, Czechoslovakia. Resilient suspension means for motor vehicles. 2,104,499; Jan. 4.

Svoboda, Ladislav. (See Svoboda, Jaroslav and L., and Bilek.)

Swart, Leland K. (See Hemaman, R. K., and Swart.)

Swart, Leland K., Mountain Lakes, N. J., assignor to American Telephone and Telegraph Company. Gas-filled tube circuits. 2,104,142; Jan. 4.

Sweet, J. B., et al. (See Wohlfarth, Walter W., assignor.)

Swennes, Benjamin A., Rockford, assignor to Borg-Warner Corporation, Chicago, Ill. Friction clutch plate. 2,104,106; Jan. 4.

Swenson, Theodore L. (See Blanck, F. C., Swenson, Mottern, Geraaine, and Nelson.)

Swope, Harold S. (See Simons, J. C., and Swope.)

Symington-Gould Corporation, The. (See Blattner, Emil H., assignor.)

Szabo, Alexander, Linden, N. J. Twin rocker and rotating toy device. 2,104,443; Jan. 4.

Szegö, Stephan, Berlin-Johannisthal, Germany. Floor, roof, and like structure. 2,104,443; Jan. 4.

Taylor, Guy M., Houston, Tex. Heating stove. 2,104,312; Jan. 4.

Taylor, Rutherford H., Millburn, N. J., assignor to J. K. Smit & Sons, Inc., New York, N. Y. Forming diamond tools. 2,104,708; Jan. 4.

Tefft, Irving W. (See Jackson, D. D., and Tefft.)

Tefft-Jackson, Incorporated. (See Jackson, D. D., and Tefft, assignors.)

Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Hollmann, Hans E., assignor.)

Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Kurlbaum, Georg, assignor.)

Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Muth, Herbert, assignor.)

Teletype Corporation. (See Burcky, Charles W., assignor.)

Teletype Corporation. (See Potts, Louis M., assignor.)

Teletype Corporation. (See Zenner, Raymond H., assignor.)

Teletype Corporation. (See Zenner, Walter J., assignor.)

Teletypesetter Corporation. (See Goetz, Maurus T., assignor.)

Tellegen, Bernardus D. H., Eindhoven, Netherlands, assignor to Radio Corporation of America. Amplifier control circuits. 2,104,682; Jan. 4.

Temple, John C., New York, N. Y. Surfacing machine. 2,104,062; Jan. 4.

Texas Company, The. (See Harris, William A., assignor.)

Texas Company, The. (See Hendrey, Waldersee B., assignor.)

Texas Company, The. (See Manley, Robert E., assignor.)

Texas Company, The. (See McJunkin, Paul, assignor.)

Texas Company, The. (See Stryker, D., and Grahame, assignors.)

Tholstrup, Henry L. (See Nichols, H. J., and Tholstrup.)

Thomas, Charles L., assignor to Universal Oil Products Company, Chicago, Ill. Manufacture of aryl amines. 2,104,407; Jan. 4.

Thomas, George H. (See Cox, J. C., and Thomas.)

Thompson Manufacturing Company. (See Thompson, Walter V. E., assignor.)

Thompson-National Press Co. (See Remington, Leonard F., assignor.)

Thompson, Walter V. E., assignor to Thompson Manufacturing Company, Los Angeles, Calif. Sprinkler. 2,104,281; Jan. 4.

Timken-Detroit Axle Company, The. (See Cole, Frank O., assignor.)

Tinnes, Samuel P. (See Stockdale, S. W., Weaver, and Tinnes.)

Torp, Charles A. (See Betseld, M. F., Rascher, and Torp.)

Toscoda, Enrique G., assignor to Consolidated Car-Heating Company, Inc., Albany, N. Y. Centrifugal casting machine. 2,104,280; Jan. 4.

Treboux, Jules, assignor to firm J. R. Geigy A. G., Basel, Switzerland. Production of solutions of rubber and substances similar to rubber. 2,104,358; Jan. 4.

Trieber, Otto. (See Mias, F., Keller, and Trieber.)

Troy, Seymour, New York, N. Y. Footwear. 2,104,598; Jan. 4.

Truscon Steel Company. (See Hughes, Grover A., assignor.)

Turpan, James, Paterson, N. J. Inseam measuring device. 2,104,175; Jan. 4.

Tuttle, William N., assignor to General Radio Company, Cambridge, Mass. Electric system. 2,104,336; Jan. 4.

Umlauf, Karl, Berlin-Charlottenburg, assignor to J. M. Voith, Heidenheim-on-the-Brenz, Germany. Hydraulic forward and reverse drive. 2,104,213; Jan. 4.

Underhill, Joseph, Finchley, London, England. Method of and apparatus for photographically recording sound waves. 2,104,716; Jan. 4.

Underpinning & Foundation Co. (See Raisch, William, assignor.)

Underwood Elliott Fisher Company. (See Helmond, William F.)

Underwood Elliott Fisher Company. (See Neidich, Samuel A., assignor.)

Union Carbide and Carbon Corporation. (See Lennings, W., and Karwat, assignors.)

Union Iron Works. (See MacCamy, Harry J., assignor.)

Union Machinery Company. (See Marasso, Fred, assignor.)

Union Switch & Signal Company, The. (See Agnew, Norman F., assignor.)

Union Switch & Signal Company, The. (See Agnew, N. F., and Mishelevich, assignors.)

Union Switch & Signal Company, The. (See Bone, Herbert L., assignor.)

Union Switch & Signal Company, The. (See Clausen, Harold C., assignor.)

Union Switch & Signal Company, The. (See Martin, Paul N., assignor.)

Union Switch & Signal Company, The. (See Young, Henry S., assignor.)

United Shoe Machinery Corporation. (See Barsoni, Lewis J., assignor.)

United Shoe Machinery Corporation. (See Bertram, Hugo A., assignor.)

United Shoe Machinery Corporation. (See Brostom, Charles G., assignor.)

United Shoe Machinery Corporation. (See Fitzgerald, Charles F., assignor.)

United Shoe Machinery Corporation. (See Kennison, Frank, assignor.)

United Shoe Machinery Corporation. (See Pym, Charles F., assignor.)

United Shoe Machinery Corporation. (See Scer, Richard H., assignor.)

United Shoe Machinery Corporation, (See Winkley, Erastus E., assignor.)

United States Gypsum Company. (See Pringle, William L., assignor.)

United States Gypsum Company. (See Vass, Michael G., assignor.)

Universal Inventions Limited. (See Kassner, Ernst R. W., assignor.)

Universal Oil Products Company. (See Egloff, Gustav, assignor.)

Universal Oil Products Company. (See Ipatieff, V., and Grosse, assignors.)

Universal Oil Products Company. (See Morrell, Jacque C., assignor.)

Universal Oil Products Company. (See Thomas, Charles L., assignor.)

Vaillancourt, Philias. (See Pelletier, P., and Vaillencourt.)

Van Buren, Charles J., Detroit, Mich. Insulated building structure. 2,104,500; Jan. 4.

Van der Ven, Adrianus J. H., Eindhoven, Netherlands, assignor to Radio Corporation of America. Automatic gain control. 2,104,107; Jan. 4.
Van Roosen, Hugo. (See Van Rosen, H., and Lapp.)
Van Rosen, Hugo, Newton Center, Mass., and G. W. Lapp, Le Roy, N. Y.; said Lapp assignor to said Van Rosen, now by judicial change of name, Hugo Van Roosen. Dust separator. 2,104,683; Jan. 4.
Vass, Michael G., Maywood, assignor to United States Gypsum Company, Chicago, Ill. Manufacture of expanded metal. 2,104,249; Jan. 4.
Vesino, Raoul J., Springfield, Mass. Showcase. 2,104,214; Jan. 4.
Voith, J. M. (See Umlauff, Karl, assignor.)
Vollmer, Walter G. (See Holbut, M., and Vollmer.)
Von Krannolin, Leon L., Berlin-Wilmersdorf, Germany. Controlling gas-filled tubes. 2,104,533; Jan. 4.
Von Manteuffel, Gert Z., Berlin-Dahlem, Germany, assignor to Askania-Werke A. G. vormals Centralwerkstatt Dessau und Carl Bamberg-Friedenau. Steering device. 2,104,627; Jan. 4.
Vulcan Alloy Corporation. (See de Golyer, Anthony G., assignor.)
Wadsworth, Frank L. O., Pittsburgh, Pa., assignor to Ball Brothers Company, Muncie, Ind. Method and apparatus for feeding molten glass. 2,104,215; Jan. 4.
Wagner, Carnot R., and A. J. Faulhaber, Cincinnati, Ohio. Apparatus for treating dough. 2,104,282; Jan. 4.
Wagner Electric Corporation. (See Boldt, Werner F., assignor.)
Wagner Electric Corporation. (See Cox, J. C., assignor, and Thomas.)
Wanner, Charles J., Milwaukee, Wis. Illuminated sign. 2,104,237; Jan. 4.
Warmoltz, Nicolaas. (See Druyvesteyn, M. J., and Warmoltz.)
Warr, Harold G., Park Ridge, Ill., assignor, by mesne assignments, to Poor & Company. Rail and wheel flange lubricator. 2,104,176; Jan. 4.
Warren, Donald M., West Lafayette, Ind. Toy garage and the like. 2,104,628; Jan. 4.
Waterloo Register Company. (See Oltrogge, Frederick C., assignor.)
Watson, Lloyd W., Oakland, assignor to Oliver United Filters Incorporated, San Francisco, Calif. Filter. 2,104,473; Jan. 4.
Weaver, Elbert F. (See Stockdale, S. W., Weaver, and Tranel.)
Webb, John B., Dobbs Ferry, assignor to Anaconda Wire & Cable Company, New York, N. Y. Pothead fitting. 2,104,109; Jan. 4.
Webster, Robert A., Santa Monica, Calif. Agitating or mixing apparatus. 2,104,283; Jan. 4.
Weeks, James R. (See Bertsche, Harry A., assignor.)
Wehrle, Arthur J., Golden, assignor to The Mine & Smelter Supply Co., The Stearns-Roger Manufacturing Co., Denver, Colo., and The Dorr Company, Inc., New York, N. Y. Closed circuit grinding. 2,104,709; Jan. 4.
Weilenkamp, Paul G., Radburn, N. J., assignor to Wright Aeronautical Corporation. Geared connecting rod. 2,104,569; Jan. 4.
Wernert, Ignatius J. (See Gilbert, H. N., and Wernert.)
Wescott, Blaine B. (See Kennedy, H. T., and Wescott.)
West, Harold E. W., assignor to Rolls-Royce Limited, Derby, England. System of ignition for internal combustion engines for aircraft. 2,104,600; Jan. 4.
Western Electric Company. (See Stratford, Frederick F., assignor.)
Western Electric Company Incorporated. (See Lassiter, Alwyn D., assignor.)
Westinghouse Electric Elevator Company. (See Eames, William F., assignor.)
Westinghouse Electric Elevator Company. (See Jones, Richard W., assignor.)
Westinghouse Electric & Manufacturing Company. (See Hewitt, George W., assignor.)
Westinghouse Electric & Manufacturing Company. (See Pelton, Edward A., assignor.)
Whitney, Frederic, Los Angeles, Calif. Bifocal spectacle bridge. 2,104,063; Jan. 4.
Wick, John H., assignor to Wicks Pipe Organ Co., Highland, Ill. Combination stop action for organs. 2,104,238; Jan. 4.
Wicks Pipe Organ Co. (See Wick, John H., assignor.)
Wiegand, Christian. (See Merkel, E., and Wiegand.)
Wiesevich, Peter J., Elizabeth, N. J., assignor to Standard Oil Development Company. Lubricant. 2,104,408; Jan. 4.
Wiesevich, Peter J., Elizabeth, N. J., assignor to Standard Oil Development Company. Lubricant. 2,104,409; Jan. 4.
Wilbur, Scott I. (See Cooke, G. B., and Wilbur.)
Wildt and Company Limited. (See Spiers, E., and Hurd, assignors.)
Wilkow, Abraham. (See Horowitz, Louis, assignor.)
Willard, Frederick W., Summit, N. J., assignor to Nassau Smelting and Refining Company, New York, N. Y. Producing lead alloys. 2,104,444; Jan. 4.
Willheim, Raoul, and G. Frühauf, Berlin-Oberschoneweide, Germany, assignors to General Electric Company. Testing arrangement for circuit-interrupting devices. 2,104,629; Jan. 4.
Williams, Andrew C. (See Bowers, C. O., and Williams.)
Williams, John M., Harlem, Mont. Axe. 2,104,250; Jan. 4.
Wilson, John E., Jr., Smyrna, Del. Sanitary steel milk cooling cabinet. 2,104,684; Jan. 4.
Wilson, John E., Jr., Smyrna, Del. Storage milk cooler. 2,104,685; Jan. 4.
Wine, William E., Toledo, Ohio. Railway car. 2,104,359; Jan. 4.
Winkley, Erastus E., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Shaping the bottoms of shoes. 2,104,143; Jan. 4.
Winthrop Chemical Company Inc. (See Merkel, E., and Wiegand, assignors.)
Wohlfarth, Walter W., San Francisco, assignor to A. T. Ashjian and J. B. Sweet, Fresno, Calif. Truck suspension. 2,104,284; Jan. 4.
Wolff, Saul K., Long Beach, N. Y. Camp grill. 2,104,534; Jan. 4.
Wood, Anthony W., Upper Norwood, London, England. Apparatus for display or advertising purposes. 2,104,514; Jan. 4.
Wood Conversion Company. (See Spafford, Allen L., assignor.)
Wood, Elsie E., Whittier, Calif. Garbage can liner. 2,104,686; Jan. 4.
Wood, Henry A. W., assignor to Wood Newspaper Machinery Corporation, New York, N. Y. Casting apparatus for the registration of printing plates. 2,104,313; Jan. 4.
Wood Newspaper Machinery Corporation. (See Wood, Henry A. W., assignor.)
Woodin, William H., Jr. (See Soller, Walter, assignor.)
Worthington Pump and Machinery Corporation. (See Hirschberg, Charles A., assignor.)
Wright Aeronautical Corporation. (See Hill, Henry C., assignor.)
Wright Aeronautical Corporation. (See Wellenkamp, Paul O., assignor.)
Wright, Walter F. (See Dall, Edward D., assignor.)
Wurton Machine Company. (See Harris, Gordon D., assignor.)
Yancey, John R., assignor to Gray Tool Company, Houston, Tex. Pipe fitting. 2,104,177; Jan. 4.
Youker, Malcolm P., assignor to Phillips Petroleum Company, Bartlesville, Okla. Combining hydrocarbon gases with hydrocarbon liquids. 2,104,285; Jan. 4.
Young, Charles J., Haverford, Pa., assignor to Radio Corporation of America. Apparatus for facsimile recording. 2,104,109; Jan. 4.
Young, Henry S., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway traffic controlling apparatus. 2,104,601; Jan. 4.
Zagelmeyer Auto Camp Company. (See Zagelmeyer, Frank, assignor.)
Zagelmeyer, Frank, assignor to Zagelmeyer Auto Camp Company, Bay City, Mich. Trailer coupling. 2,104,576; Jan. 4.
Zahm, Joseph D., assignor to Animal Trap Company of America, Lititz, Pa. Animal trap. 2,104,687; Jan. 4.
Zahn, Lawrence J., Long Island City, assignor to The International Postal Supply Company, Brooklyn, N. Y. Separator for canceling machines. 2,104,630; Jan. 4.
Zand, Stephen J., Forest Hills, assignor to Sperry Gyroscope Company, Inc., Brooklyn, N. Y. Airplane door construction. 2,104,144; Jan. 4.
Zeh, Walter, Dessau in Anhalt, Germany, assignor to Agfa Ansco Corporation, Binghamton, N. Y. Sensitising of silver-halide emulsions. 2,104,044; Jan. 4.
Zeiss Ikon Aktiengesellschaft. (See Nerwin, Hubert, assignor.)
Zendegui, Joseph G. (See Caraballo, M., and Zendegui.)
Zenner, Raymond E., Brookfield, assignor to Teletype Corporation, Chicago, Ill. Printing telegraph apparatus. 2,104,110; Jan. 4.
Zenner, Walter J., Des Plaines, assignor to Teletype Corporation, Chicago, Ill. Start-stop regenerative repeater. 2,104,251; Jan. 4.
Zuckerman, Adolph M., assignor, by mesne assignments, to R. Hoe & Co., Inc., New York, N. Y. Multicolor press arrangement. 2,104,065; Jan. 4.
Zuckermandel, Edward C. (See Coleman, G. H., Hadler, and Zuckermandel.)
Zwack, Raymond T. (See McNeil, C. I., and Zwack.)
Zworykin, Vladimir K., Haddonfield, N. J., assignor to Radio Corporation of America. Television system. 2,104,066; Jan. 4.

LIST OF REISSUE INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 4TH DAY OF JANUARY, 1938

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Brake, Speed controlled. T. Tarisien. 20,613; Jan. 4.
Cabinet design. L. H. Derbyshire. 20,610; Jan. 4.
Control for automatic air brake apparatus. M. Reynolds. 20,612; Jan. 4.
Machine for spreading and surfacing road material. A. N. Nickerson. 20,611; Jan. 4.
Ores, Concentration of. G. H. Wigton. 20,614; Jan. 4.

LIST OF PLANT INVENTIONS

Rose. L. Burbank. 266; Jan. 4.
Rose. L. Burbank. 267; Jan. 4.

LIST OF DESIGN INVENTIONS

Badge. A. E. Berry. 107,740; Jan. 4.
Belt sander. H. E. Tuzo. 107,805; Jan. 4.
Block, Rubbing. L. J. Feild. 107,762; Jan. 4.
Blowpipe. L. M. Farnum and C. K. Tessner. 107,820; Jan. 4.
Bookend, humidor, and ashtray, Combination. H. O. Cornwall. 107,749; Jan. 4.
Bottle. A. B. Barnhart. 107,815; Jan. 4.
Bottle. S. D'Addario. 107,760; Jan. 4.
Box, Combination jewelry display. E. Parness and S. Sweet. 107,790; Jan. 4.
Box, Face powder. E. Schiaparelli. 107,796; Jan. 4.
Box or similar cosmetic container. A. B. Barnhart. 107,816; Jan. 4.
Box or similar article, Jewelry. M. L. Bathbun. 107,792–4; Jan. 4.
Bucket, Champagne. H. Robinson. 107,795; Jan. 4.
Cabinet, Air conditioning. A. W. Cauley. 107,747; Jan. 4.
Cabinet, Refrigerator. C. A. Frick. 107,767; Jan. 4.
Case, Cosmetic. A. B. Barnhart. 107,738; Jan. 4.
Case, Refrigerated display. G. J. Hopkins. 107,775; Jan. 4.
Chessmen. G. W. Slater. 107,800; Jan. 4.
Chime, Musical. E. G. Evans. 107,757–60; Jan. 4.
Clip or similar article. A. Katz. 107,776; Jan. 4.
Control unit for electrical apparatus. J. Vassos. 107,809; Jan. 4.
Desk or similar article. H. E. Buchheim. 107,743; Jan. 4.
Dress. S. Comelli. 107,746; Jan. 4.
Dress. E. Kronman. 107,828; Jan. 4.
Dress. E. Kronman. 107,846; Jan. 4.
Dress. J. Shane. 107,797; Jan. 4.
Dress. W. G. Steinman. 107,833; Jan. 4.
Dress. I. Welch. 107,811; Jan. 4.
Dress. S. Zahn. 107,834; Jan. 4.
Dress ensemble. A. Kaplan. 107,822; Jan. 4.
Dress ensemble. J. Kirschner. 107,841; Jan. 4.
Dress or similar article. A. H. Morris. 107,829–30; Jan. 4.
Dress ensemble or similar article. A. H. Morris. 107,831; Jan. 4.
Drip catcher for ice cream cones and the like. W. G. Fair. 107,761; Jan. 4.
Fabric, Textile. B. Borden. 107,817; Jan. 4.
Fabric, Textile. J. G. Donedieu. 107,837; Jan. 4.
Fabric, Textile. R. H. Fatherley. 107,835; Jan. 4.
Fabric, Textile. M. Felleti. 107,821; Jan. 4.
Fabric, Textile. W. Rooney. 107,844; Jan. 4.
Fabric, Textile. W. Rosa. 107,845; Jan. 4.
Fabric or similar article, Printed textile. M. R. Hamre. 107,838–40; Jan. 4.
Fabric or similar article, Textile. W. D. Roberson. 107,842–3; Jan. 4.
Fan and table, Combined circulator. W. L. Kisling. 107,777; Jan. 4.
File, Pocket. L. B. Miller. 107,783; Jan. 4.
Frame, Glider. A. S. Goldberg. 107,773; Jan. 4.
Freezing unit. M. E. Miller. 107,782; Jan. 4.
Game device. L. R. Canterbar. 107,744; Jan. 4.
Generator, Acetylene. M. P. De Motte. 107,751; Jan. 4.
Glass. E. W. Fuerst. 107,768; Jan. 4.
Glass. W. E. Mackelfresh, Jr. 107,781; Jan. 4.
Glider. A. S. Goldberg. 107,772; Jan. 4.
Glove measuring device. R. M. Eisendrath. 107,763; Jan. 4.
Goblet or similar article, Stemmed. E. Bell. 107,739; Jan. 4.
Goblet or similar article. R. A. Kelly. 107,823–4; Jan. 4.
Guard, Electric fan. L. D. Petee. 107,791; Jan. 4.
Handbag. H. Feimann. 107,764–5; Jan. 4.
Helmet, Beauty. R. Martin. 107,836; Jan. 4.
Holder, Serviette. R. M. Thamm. 107,806; Jan. 4.
Jar. D. E. Briner. 107,742; Jan. 4.
Jar, Packer. G. Smith, Jr. 107,801–2; Jan. 4.
Lace. G. M. Boysen. 107,818; Jan. 4.
Lace. G. M. King. 107,825–7; Jan. 4.
Lamp, V. Weidner and F. A. Vogel. 107,810; Jan. 4.
Lamp and smoking stand or the like, Combined, V. Stanzel. 107,804; Jan. 4.
Microphone control. A. L. Moore. 107,785; Jan. 4.
Negligee. M. M. Cohen. 107,819; Jan. 4.
Partition, Draped. M. Lange. 107,779; Jan. 4.
Pencil. R. A. Weissenborn. 107,813; Jan. 4.
Pencil tip. I. Chesler. 107,745; Jan. 4.
Plate for lighting fixtures, Light controlling. E. F. Guth. 107,774; Jan. 4.
Rack for bottled beverages or the like, Display. E. R. Erickson. 107,756; Jan. 4.
Rack for bread, pastry, or the like, Display. E. R. Erickson. 107,754; Jan. 4.
Rack for pastries or the like, Display. E. R. Erickson. 107,755; Jan. 4.
Reflector, Jeweled. L. A. Koch, Jr. 107,778; Jan. 4.
Seesaw apparatus. J. K. Milton and C. Young. 107,784; Jan. 4.
Shaker, Combination salt and pepper. J. Bissell. 107,741; Jan. 4.
Shoe. H. Geller. 107,769; Jan. 4.
Shoe or similar article. B. Feldman. 107,763; Jan. 4.
Shoe or similar article. J. C. Pape. 107,786–9; Jan. 4.
Shoe or similar article. L. Sholtz. 107,798–9; Jan. 4.
Shoe or similar article. S. Troy. 107,807–8; Jan. 4.
Shoe or similar article. A. Wertheim. 107,812; Jan. 4.
Shoe or similar article. W. Zellweger. 107,814; Jan. 4.
Sign, Illuminated. W. A. Lintern. 107,780; Jan. 4.
Stand, Display. C. H. Foster. 107,766; Jan. 4.
Stand for fruit or the like, Display. A. Smith. 107,803; Jan. 4.
Tablecloth, Lace. J. Waterfield. 107,833; Jan. 4.
Tank body, Vehicle. E. H. Gill. 107,771; Jan. 4.
Telephoto recorder. A. G. Cooley. 107,748; Jan. 4.
Truck, Tank. E. H. Gill. 107,770; Jan. 4.
Valve, Hand actuated control. C. Dom. 107,752; Jan. 4.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 4TH DAY OF JANUARY, 1938

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Abrading apparatus. L. D. Pelk. 2,104,055; Jan. 4.
Acetylene generator. R. C. Sabins. 2,104,471; Jan. 4.
Acid esters of hydroxyalkylamino anthraquinones, Phosphorous. F. Baumann. 2,104,256; Jan. 4.
Acid, Manufacture of boric. W. E. Burke and H. de Ropp. 2,104,009; Jan. 4.
Acoustic device. R. N. Marshall. 2,104,432; Jan. 4.
Actuating mechanism for doffing mechanism. J. K. Anderson. 2,104,474; Jan. 4.
Adhesive. R. S. McKinney. 2,104,491; Jan. 4.
Adjusting device, in particular electrical condenser. K. Hengel. 2,104,160; Jan. 4.
Advertising device. J. R. Burcham. 2,104,636; Jan. 4.
Advertising sign. F. E. Schmidt. 2,104,105; Jan. 4.
Aerating device. J. Lockey. 2,104,330; Jan. 4.
Agitating or mixing apparatus. R. A. Webster. 2,104,283; Jan. 4.
Air cooler. A. D. Forbush. 2,104,119; Jan. 4
Air conditioner. C. W. Pierson. 2,104,209; Jan. 4.
Air distributing means. P. F. Sperry. 2,104,279; Jan. 4.
Air draft and smoke consumer. W. B. Hickman. 2,104,127; Jan. 4.
Air resistance of fibrous articles, Apparatus for predicting. E. K. Long. 2,104,047; Jan. 4
Air, Time-controlled means for distributing. S. E. Lyman. 2,104,088; Jan. 4.
Aircraft blind landing beam system. F. W. Dunmore. 2,104,028; Jan 4.
Airplane. J. M. Ballou. 2,104,006; Jan. 4.
Alarm. G. Kratz. 2,104,202; Jan. 4.
Alkyl phenols. H. E. Buc. 2,104,412; Jan 4.
Alloys, Producing lead. F. W. Willard. 2,104,444; Jan. 4.
Alternating current system of distribution. G. A. Matthews. 2,104,131; Jan. 4.
Amines of high molecular weight, Production of. A. Grün. 2,104,421; Jan. 4.
Ammonium compounds, Quaternary. F. Müns, K. Keller, and O. Trösken. 2,104,092; Jan. 4.
Ammonium salts of mercapto-arylenethiazoles, Quaternary. W Baird. 2,104,068; Jan. 4.
Animal trap. J. D. Zahm. 2,104,687; Jan. 4.
Antenna and coupler system. R. B. Dome. 2,104,610; Jan. 4.
Antitheft device for gasoline tanks. F. E. McGillicuddy and M. P. Moeckler. 2,104,132; Jan. 4.
Apparatus for display or advertising purposes. A. W. Wood. 2,104,314; Jan. 4.
Apparatus for treating material including solids and vaporisable material. W. Raisch. 2,104,526; Jan. 4.
Apparel supporting device. H. C. Guyer. 2,104,368; Jan. 4.
Applicator, Nail polish. C. C. Hoffman, Jr. 2,104,651; Jan. 4.
Aqueous emulsion of waterproofing material. E. O. Groskopf. 2,104,077; Jan. 4.
Arc device, Enclosed. R. F. Strickland. 2,104,680; Jan. 4.
Armchair, Collapsible. L. J. Garbaccio. 2,104,255; Jan. 4
Aromatic derivatives, Manufacture of. V. Ipatieff and A. V. Grosse. 2,104,424; Jan. 4.
Artificial substance. O. Röhm and W. Bauer. 2,104,168; Jan. 4.
Aryl amines, Manufacture of. C. L. Thomas. 2,104,407; Jan. 4.
Automatic feed drill. N. O. Grosser. 2,104,123; Jan. 4.
Automobile body construction. J. Galamb. 2,104,457; Jan. 4.
Automobile fuel tank. C. L. Holm. 2,104,461; Jan. 4.
Automobile safety switch. J. A. Barker and R. L. Dew. 2,104,689; Jan. 4.
Axe. J. M. Williams. 2,104,250; Jan. 4.
Bacteria-yeast process of bread manufacture. W. L. Owen. 2,104,054; Jan. 4.
Baking machine for textile materials. W. W. Sibson. 2,104,173; Jan. 4.
Baling press. F. D. Jones. 2,104,199; Jan. 4.
Basket cover. C. G. Leigh. 2,104,262; Jan. 4.
Batteries, Apparatus for charging storage. N. F. Agnew. 2,104,632; Jan. 4.
Belt. Health. L. Horowitz. 2,104,560; Jan. 4.
Binder, Grain. J. Olson and M. O. Smaaladen. 2,104,374; Jan. 4.
Binder, Loose leaf. E. L. Krag. 2,104,046; Jan. 4.
Binder, Loose leaf. H. C. Lenhart. 2,104,659; Jan. 4.
Binder, Loose leaf. A. W. McClure. 2,104,568; Jan. 4.
Blackboard instrument. C. F. Golden. 2,104,515; Jan. 4.

Bleaching composition. H. N. Gilbert and I. J. Wernert. 2,104,120; Jan. 4.
Block: *See*—
Construction block. Roof and floor block.
Block and construction, Building. N. Davidson. 2,104,152; Jan. 4.
Block and jack assembly, Connecting. C. G. McCormick and P. W. Sheateley. 2,104,424; Jan. 4.
Blower. W. H. Leinweber. 2,104,233; Jan. 4.
Board: *See*—
Bulletin board.
Body blanks for tearing strip containers, Preparing. J. M. Hothersall. 2,104,037; Jan. 4.
Boiler. J. F. Kelly. 2,104,229; Jan. 4.
Boilers against caustic embrittlement, Protecting steam. H. H. Richardson. 2,104,528; Jan. 4.
Bolster. G. F. Albrecht. 2,104,216; Jan. 4.
Bolt operating mechanism for machine guns. S. G. Green. 2,104,033; Jan. 4.
Book support, Collapsible universal. S. L. Carr. 2,104,072; Jan. 4.
Booth, Telephone. F. A. Kuntz. 2,104,425; Jan. 4.
Box: *See*—
Electric switch box.
Braking apparatus, Railway. H. C. Clausen. 2,104,185–7; Jan. 4.
Brake mechanism. C. O. Bowers and A. C. Williams. 2,104,702; Jan. 4.
Brake system, Hydraulic. H. C. Bowen. 2,104,220; Jan. 4.
Braking apparatus, Railway. H. L. Bone. 2,104,606–7; Jan. 4.
Brick and tile machine. P. M. Carlisle. 2,104,293; Jan. 4.
Bridge construction. E. Chapman. 2,104,022; Jan. 4.
Brush, Disposable duster. D. E. Harmon. 2,104,196; Jan. 4.
Building material and making same. L. Kirschbraun. 2,104,062; Jan. 4.
Building structure, Insulated. C. J. Van Buren. 2,104,500; Jan. 4.
Bulletin board. T. F. Gossett. 2,104,366; Jan. 4.
Burner: *See*—
Gas burner.
Butter dispenser. I. G. Johnson and W. N. Lurcott. 2,104,041; Jan. 4.
Cabinet: *See*—
Milk cooling cabinet. Utility cabinet.
Sleeping cabinet.
Cabinet. W. Gersten. 2,104,321; Jan. 4.
Cage, Tank holding. J. D. Lewis. 2,104,130; Jan. 4.
Calcium phosphate, alumina and potassium values from their insoluble minerals, Recovery of. G. de Varda. 2,104,295; Jan. 4.
Calculating machine. F. A. Niemann. 2,104,051; Jan. 4.
Camera and projector apparatus, Cinematograph. F. F. M. Abbott. 2,104,631; Jan. 4.
Camera model. E. N. Anketell. 2,104,476; Jan. 4.
Camera, Photographic. H. Nerwin. 2,104,094; Jan. 4.
Cap: *See*—
Valve cap.
Can closure. S. E. Richeson. 2,104,438; Jan. 4.
Can filling machine. C. H. Ayars. 2,104,445; Jan. 4.
Can heading machine. A. J. Fisher. 2,104,224; Jan. 4.
Candle holder. F. D. Sherwood. 2,104,139; Jan. 4.
Canopy for brooder stoves. A. J. and L. W. Meeks. 2,104,662; Jan. 4.
Cap composition, Blasting. L. H. Fisher. 2,104,513; Jan. 4.
Capping head for applying closures to milk bottles and the like. L. D. Pierce. 2,104,671; Jan. 4.
Car: *See*—
Mine car. Railway car.
Motor car.
Caramel cutting machine. P. F. Putney. 2,104,623; Jan. 4.
Carbonising drier. F. B. Morrill. 2,104,135; Jan 4.
Carburetor for combustion engines. A. Abramson. 2,104,315; Jan. 4.
Carrier: *See*—
License plate carrier.
Carrier for pneumatic dispatch tube apparatus. J. T. Needham. 2,104,093; Jan. 4.
Carrying-fixture, especially for knapsacks. R. H. Johansen. 2,104,486; Jan. 4.
Carton. C. Groeling. 2,104,195; Jan. 4.
Casting, Apparatus for. C. E. Sorensen and R. H. McCarroll. 2,104,406; Jan. 4.
Casting apparatus for the registration of printing plates. H. A. W. Wood. 2,104,313; Jan. 4.

Casting machine, Centrifugal. E. G. Touceda. 2,104,380; Jan. 4.
Catamenial sack. J. L. Hughes. 2,104,423; Jan. 4.
Catch, Locking. F. R. Johnson. 2,104,542; Jan. 4.
Cell, Electrolytic. E. Sorensen. 2,104,677–8; Jan. 4.
Cells, Operating electrolytic. E. Sorensen. 2,104,679; Jan. 4.
Cellulose esters, Manufacture of. L. E. Clement. 2,104,023; Jan. 4.
Cellulose ether purification. E. R. Bradshaw. 2,104,017; Jan. 4.
Cementing equipment for wells. W. D. Owsley. 2,104,270; Jan. 4.
Centrifugal separator. W. R. Macklind. 2,104,162; Jan. 4.
Centrifugal vacuum pump. M. A. Schwartz, 2,104,246; Jan. 4.
Ceramic articles, Manufacture of. P. de Leeuw. 2,104,608; Jan. 4.
Chain connecter. O. L. Gerwig. 2,104,193; Jan. 4.
Chair or the like convertible into coach, divan, bed, or the like, Easy. S. Molnar. 2,104,666; Jan. 4.
Charts or the like, Method of and apparatus for printing instrument. A. G. Beal and B. Holmberg. 2,104,551; Jan. 4.
Chloroform. G. H. Coleman, E. C. Hadler, and E. C. Zuckermandel. 2,104,703; Jan. 4.
Chuck, Auxiliary. J. A. St. Clair and D. E. Gommel. 2,104,472; Jan. 4.
Chuck, Crankshaft. W. F. Groene. 2,104,481; Jan. 4.
Churn. A. C. Hougland. 2,104,462; Jan. 4.
Cigar-tip perforating machine. M. Caraballo and J. G. Zendegui. 2,104,292; Jan. 4.
Cigars, Device for perforating the ends of. M. Caraballo and J. G. Zendegui. 2,104,291; Jan. 4.
Circuit: *See*—
Electron tube circuit. Tube delay circuit.
Circuit apparatus, Railway track. P. N. Martin. 2,104,591; Jan. 4.
Circuit breaker. E. Dettar. 2,104,190; Jan. 4.
Circuit controlling device. C. W. Kuhn. 2,104,399; Jan. 4.
Circuit grinding, Closed. A. J. Weinig. 2,104,709; Jan. 4.
Circuit, Variable mechanical means for an oscillation. H. Muth. 2,104,569; Jan. 4.
Circuits, Amplifier control. B. D. H. Tellegen. 2,104,682; Jan. 4.
Circuits, Electric valve. E. F. W. Alexanderson. 2,104,633; Jan. 4.
Circuits, Electric valve. B. D. Bedford. 2,104,690; Jan. 4.
Circuits, Gas-filled tube. L. K. Swart. 2,104,142; Jan. 4.
Clamp and scaffold for welding operations. A. J. Mendive. 2,104,622; Jan. 4.
Cleaner: *See*—
Vacuum cleaner.
Clock, Alarm. J. J. Drabin. 2,104,611; Jan. 4.
Closure for bottles, Indicating. L. L. Mermer. 2,104,236; Jan. 4.
Closure for containers. B. F. Cahoon. 2,104,413; Jan. 4.
Closure for containers. J. C. Hoffman. 2,104,540; Jan. 4.
Closure for fiber containers. R. D. Heymann. 2,104,344; Jan. 4.

Locking and operating system for cell doors, Safety. H. P. Manly. 2,104,661; Jan. 4.
Locking device, Security. J. J. Martinez and D. S. Cusi. 2,104,204; Jan. 4.
Loop feed for machines for applying ornamentation to header loops, Automatic. H. A. Klahre. 2,104,398; Jan. 4.
Lubricant. P. J. Wieszevich. 2,104,408; Jan. 4.
Lubricant. P. J. Wieszevich. 2,104,409; Jan. 4.
Lubricating apparatus. D. G. Adams. 2,104,146; Jan. 4.
Lubricating preparation. H. F. Green. 2,104,641; Jan. 4.
Lubricator: *See*—
Rail and wheel flange lubricator.
Machine for arranging disks having peripheral projections in a predetermined order. L. E. La Bombard. 2,104,657; Jan. 4.
Machine for forming coin gauges. G. A. Long. 2,104,620; Jan. 4.
Machine for operating upon shoe-heels. C. G. Brostrom. 2,104,183; Jan. 4.
Machine for producing spaced groups of tufts on fabric. E. H. Bradwell. 2,104,634; Jan. 4.
Machine tool. J. Grundstein. 2,104,299; Jan. 4.
Magneto generator. W. J. Spengler. 2,104,140; Jan. 4.
Magnifying and illuminating device. C. Jones. 2,104,198; Jan. 4.
Mailing container. E. G. Overly. 2,104,352; Jan. 4.
Manifold construction. D. E. Anderson. 2,104,178; Jan. 4.
Massage device. B. B. Lipsner. 2,104,429; Jan. 4.
Match book. T. J. McKinnon, Jr. 2,104,621; Jan. 4.
Materials, Continuous treatment of. G. D. Harris. 2,104,036; Jan. 4.
Materials with alkaline liquids of mercerising strength, Treating fibrous. K. Brodersen. 2,104,290; Jan. 4.
Measuring apparatus. C. L. McNeil and R. T. Zwack. 2,104,373; Jan. 4.
Measuring device. G. L. Greene. 2,104,642; Jan. 4.
Meat cutting and slicing machine. C. G. Biro. 2,104,360; Jan. 4.
Metal, Manufacture of expanded. M. G. Vass. 2,104,249; Jan. 4.
Metal plating. F. F. Oplinger. 2,104,269; Jan. 4.
Metal, Soldering, welding and coating. E. H. E. Johansson. 2,104,370; Jan. 4.
Meter: *See*—
Liquid weight meter. Output dose meter.
Methane, Manufacture of halogenated derivatives of. W. W. Gleave. 2,104,695; Jan. 4.
Micrometer gauge. P. Glouton. 2,104,194; Jan. 4.
Milk cooler, Storage. J. E. Wilson, Jr. 2,104,685; Jan. 4.
Milk cooling cabinet, Sanitary steel. J. E. Wilson, Jr. 2,104,684; Jan. 4.
Mine car. W. D. Hockensmith, Jr. 2,104,395; Jan. 4.
Mixer: *See*—
Food mixer.
Mixing apparatus. J. M. Flynn. 2,104,191; Jan. 4.
Modulation system. H. E. Hollmann. 2,104,541; Jan. 4.
Mop holder. E. Preisser. 2,104,331; Jan. 4.
Mop, Self-shaking dust. J. C. Finfrock. 2,104,614; Jan. 4.
Motor: *See*—
Internal combustion motor.
Motor car. W. Hücker. 2,104,539; Jan. 4.
Motor control system. B. W. Jones. 2,104,654; Jan. 4.
Motor for motor vehicles, Generator and/or starting. J. Kales. 2,104,259; Jan. 4.
Motor vehicle. F. C. Best. 2,104,182; Jan. 4.
Mounting: *See*—
Garage door mounting.
Mounting means for glass veneer. I. S. Leland. 2,104,085; Jan. 4.
Mower with side cutter units, Power lawn. J. B. Pol and W. F. Krenecke. 2,104,719; Jan. 4.
Mowers, Attachment for lawn. C. T. Fish. 2,104,343; Jan. 4.
Muffler. H. S. Powell. 2,104,376; Jan. 4.
Necktie, Bow. S. Sherman. 2,104,625; Jan. 4.
Normalising furnace. C. B. Hoak. 2,104,518; Jan. 4.
Nozzle attachment, Electric vacuum sweeper. C. E. Hain. 2,104,125; Jan. 4.
Oil and water separator. P. B. Nibecker and R. R. McDonell. 2,104,050; Jan. 4.
Oil, Solvent refining of mineral. D. Stryker and J. H. Grahame. 2,104,379; Jan. 4.
Oil, Treating hydrocarbon. R. E. Manley. 2,104,567; Jan. 4.
Oils and recovering solvent, Process for solvent treating. E. V. Murphree and E. D. Reeves. 2,104,401; Jan. 4.
Oils, Lubricating. M. Pier, W. Hirschberger, and H. Lemme. 2,104,097; Jan. 4.
Oils, Treatment of hydrocarbon. G. Egloff. 2,104,418; Jan. 4.
Olefine ethers, Production of. H. C. Chitwood and G. A. Perkins. 2,104,717; Jan. 4.
Opener, Can. R. T. Killman. 2,104,489; Jan. 4.
Optometric apparatus. W. B. Bice and B. W. Kelly. 2,104,552; Jan. 4.
Ore, Roasting. E. J. Mullen. 2,104,091; Jan. 4.
Ore separator. H. J. MacCamy. 2,104,349; Jan. 4.
Ornament. J. W. Stark. 2,104,248; Jan. 4.
Ornamentation work. J. G. Perseguiti. 2,104,547; Jan. 4.
Orthodontic appliance. J. W. Ford. 2,104,192; Jan. 4.
Output dose meter. H. Pychlau. 2,104,378; Jan. 4.
Package and packaging, Baked loaf fraction. G. C. Papendick. 2,104,095; Jan. 4.

Package dispensing device. L. Lichtenstein. 2,104,523; Jan. 4.
Pail and egg crate, Dinner. H. W. Hoessman. 2,104,650; Jan. 4.
Paint composition. P. L. F. Magill and C. Dangelmajer. 2,104,264; Jan. 4.
Panel fastener. J. H. Bates. 2,104,550; Jan. 4.
Panel structure. H. E. Marks. 2,104,089; Jan. 4.
Paper, Decalcomania. L. Davis. 2,104,025; Jan. 4.
Paper or fiberboard. Apparatus for making saturated, oiled, filled, or coated. I. J. Novak. 2,104,052; Jan. 4.
Paper web support. J. B. Janney. 2,104,494; Jan. 4.
Pavements, Production of hot mix cold laid bituminous. C. M. Baskin. 2,104,410; Jan. 4.
Paving mixture, Producing a hot mix, cold laid. C. M. Baskin. 2,104,411; Jan. 4.
Pen, Fountain. W. R. Cuthbert. 2,104,638; Jan. 4.
Pessary applicator. L. Schleicher. 2,104,275; Jan. 4.
Phase modulation, Multiple. M. G. Crosby. 2,104,318; Jan. 4.
Phonograph, Automatic. C. H. Green. 2,104,032; Jan. 4.
Picture apparatus, Talking motion. A. D. Lasseiter. 2,104,428; Jan. 4.
Picture stand. J. Hambeck. 2,104,256; Jan. 4.
Pile for sheet pilings, Hollow. W. C. Köhler and A. Mauterer. 2,104,490; Jan. 4.
Piling section. A. Borberg. 2,104,116; Jan. 4.
Piling, Sheet. E. C. Molke. 2,104,665; Jan. 4.
Pin for eyeglasses and the like, Supporting. H. E. Droll. 2,104,612; Jan. 4.
Pipe fitting. J. R. Yancey. 2,104,177; Jan. 4.
Pipe joint. A. E. Osborn. 2,104,351; Jan. 4.
Pipe rolling device. W. F. Cummings. 2,104,362; Jan. 4.
Pipette, Mixing. W. Jaffa. 2,104,325; Jan. 4.
Piston. E. T. Larkin. 2,104,347; Jan. 4.
Piston. A. L. Nelson. 2,104,350; Jan. 4.
Piston ring expander. F. H. Given. 2,104,225; Jan. 4.
Plate and using same, Planographic printing. W. T. Hagelin. 2,104,126; Jan. 4.
Plates, Registering printing. L. W. Claybourn. 2,104,553; Jan. 4.
Plunger for pumps, Fluid packed. F. W. Robinson. 2,104,274; Jan. 4.
Pocket shaper. A. J. Barnett. 2,104,111; Jan. 4.
Postage meter machine. A. A. Royce and M. L. Beyer. 2,104,624; Jan. 4.
Postage printing and metering machine. E. Persson. 2,104,668; Jan. 4.
Potential, Source of variable high direct. J. B. Johnson and F. W. Kammerer. 2,104,463; Jan. 4.
Preservative and contact coat for light-sensitive devices. G. W. Hewitt. 2,104,483; Jan. 4.
Press: *See*—
Baling press. Screw press.
Press arrangement, Multicolor. A. M. Zuckerman. 2,104,065; Jan. 4.

Window cleaning device. A. R. Freda. 2,104,615; Jan. 4.
Window construction. J. M. Meck. 2,104,389; Jan. 4.
Window latch. F. Mellebrand. 2,104,134; Jan. 4.
Wire tension controlling device. R. F. Krejci. 2,104,656; Jan. 4.

CLASSIFICATION OF PATENTS

ISSUED JANUARY 4, 1938

In view of the fact that the issue is being checked weekly by the Classification Division, the class and subclass in this list are correct as of this date. Where there is a discrepancy between the classification given in the patent head and the classification in this list, the classification of this list governs.

NOTE.—First number—class, second number—subclass, third number—patent number

CLASSIFIED LIST OF TRADE-MARKS REGISTERED

CLASS 1

Fiber, Synthetic staple. Tennessee Eastman Corporation. 353,668; Jan. 11; Serial No. 397,008; published Nov. 2, 1937.

Fibrene, Artificial textile. Commerciale Italiana Societá Anonima, per il Rayon Cisa-Rayon. 353,517; Jan. 11; Serial No. 394,697; published Nov. 2, 1937.

Fur, Hudson seal. A. G. Clums. 353,660; Jan. 11; Serial No. 397,021; published Nov. 2, 1937.

Hides, Raw. Garden State Tanning Co. 353,570; Jan. 11; Serial No. 396,034; published Nov. 2, 1937.

Kindling blocks. Ez-Fire Company. 353,606; Jan. 11; Serial No. 396,457; published Nov. 2, 1937.

Leather. Willard Helburn, Inc. 353,680; Jan. 11; Serial No. 397,250; published Nov. 2, 1937.

Leathers. Partly-prepared and finished. Verna Tanning Co. 353,667; Jan. 11; Serial No. 397,093; published Nov. 2, 1937.

Leathers. Partly-prepared and finished. Verna Tanning Co. 353,683; Jan. 11; Serial No. 397,394; published Nov. 2, 1937.

Quartz, quartzite, digester, etc. Minnesota Mining & Manufacturing Company. 353,500; Jan. 11; Serial No. 393,866; published Nov. 2, 1937.

CLASS 2

Cartons, packages, boxes, etc. Lamcote, Incorporated. 353,482; Jan. 11; Serial No. 391,490; published Nov. 2, 1937.

Containers, Odorproof. Electro-Cosmic, Inc. 353,668; Jan. 11; Serial No. 397,111; published Nov. 2, 1937.

Portfolios, Salesmen's. L. C. Zander. 353,506; Jan. 11; Serial No. 394,155; published Nov. 2, 1937.

CLASS 5

Cement, Linoleum. I. Beck & Sons Inc. 353,496; Jan. 11; Serial No. 395,162; published Nov. 2, 1937.

Non-slip composition for pulleys. Manhattan Lubricants Co. 353,556; Jan. 11; Serial No. 396,872; published Nov. 2, 1937.

CLASS 6

Alcoholic solvents, methanol, and radiator anti-freeze solutions. Commercial Solvents Corporation. 353,720; Jan. 11.

Aluminum hydroxide, Colloidal cream of. Cleveland Chemical Associates, Incorporated. 353,596; Jan. 11; Serial No. 396,351; published Nov. 2, 1937.

Anesthetic and antiseptic preparations, Local. W. Neumann. 353,646; Jan. 11; Serial No. 396,690; published Oct. 26, 1937.

Anesthetic material, Local. Novocol Chemical Mfg. Co. 353,563; Jan. 11; Serial No. 395,960; published Oct. 26, 1937.

Anesthetic material, Local. Novocol Chemical Mfg. Co. 353,564; Jan. 11; Serial No. 395,961; published Nov. 2, 1937.

Anesthetic, Surface. Novocol Chemical Mfg. Co. 353,565; Jan. 11; Serial No. 395,963; published Nov. 2, 1937.

Antiseptic and germicidal compound, Bleaching. New Products Corporation. 353,623; Jan. 11; Serial No. 396,609; published Nov. 2, 1937.

Antiseptic counterirritant, Liquid. A. Wangeman. 353,459; Jan. 11; Serial No. 394,826; published Nov. 2, 1937.

Antiseptic, Organic mercurial. Norwich Pharmacal Company. 353,603; Jan. 11; Serial No. 396,421; published Nov. 2, 1937.

Antiseptic tissue, Liquid. L. H. Cooper. 353,584; Jan. 11; Serial No. 396,235; published Oct. 26, 1937.

Astringents, astringent cerates, bleach creams, etc. Maison Jeunelle-Seventeen, Inc. 353,448; Jan. 11; Serial No. 387,068; published Nov. 2, 1937.

Balms, liniment, nose and throat drops, etc. Howell Company. 353,545; Jan. 11; Serial No. 395,578; published Oct. 26, 1937.

Beauty products. F. R. Dudgeon. 353,473; Jan. 11; Serial No. 388,832; published Nov. 2, 1937.

Bile tablets. C. F. Van Dam. 353,529; Jan. 11; Serial No. 396,286; published Nov. 2, 1937.

Carbolic acid, oxalic acid, salicylic acid, etc. Eljay Corporation. 353,535; Jan. 11; Serial No. 395,288; published Oct. 26, 1937.

Chemical ingredient, Active. Hercules Powder Company. 353,536; Jan. 11; Serial No. 396,298; published Nov. 2, 1937.

Chemical Supplies for photo-engraving. Varniah Products Company. 353,590; Jan. 11; Serial No. 396,210; published Nov. 2, 1937.

Chemicals, Photo-engraving and photographic. Chemco Photoproducts Company. 353,510; Jan. 11; Serial No. 394,397; published Oct. 26, 1937.

Compound for the treatment of neuritis, arthritis, and muscular rheumatism. R. L. Goslaw. 353,498; Jan. 11; Serial No. 393,906; published Nov. 2, 1937.

Compound to regulate the urine. M. P. Mossy. 353,516; Jan. 11; Serial No. 394,676; published Nov. 2, 1937.

Cosmetic creams, hair salves, milk lotions, etc. G. Bristol. 353,712; Jan. 11.

Cosmetic preparations. Walgreen Co. 353,718; Jan. 11.

Cosmetics. Marton Freres, Inc. 353,544; Jan. 11; Serial No. 395,573; published Nov. 2, 1937.

Cosmetics. H. L. Rothchild. 353,496; Jan. 11; Serial No. 362,631; published Aug. 13, 1935.

Cosmetics, perfumes, creams, etc. J. Karbe. 353,457; Jan. 11; Serial No. 384,798; published Nov. 2, 1937.

Cream, lipstick, face powder, etc., Cleansing. H. Einhorn. 353,455; Jan. 11; Serial No. 388,769; published Nov. 2, 1937.

Deodorant. Walgreen Co. 353,557; Jan. 11; Serial No. 395,889; published Nov. 2, 1937.

Deodorant, Mouth. P. Beam. 353,600; Jan. 11; Serial No. 396,478; published Nov. 2, 1937.

Dye for oils. Standard Oil Development Company. 353,554; Jan. 11; Serial No. 395,843; published Nov. 2, 1937.

Emulsion of creosote carbonate. W. B. Guffey. 353,597; Jan. 11; Serial No. 396,343; published Oct. 26, 1937.

Germicides and disinfectants. E. Parent. 353,484; Jan. 11; Serial No. 391,940; published Oct. 26, 1937.

Gout and rheumatic medicine. F. J. Hellmann. 353,561; Jan. 11; Serial No. 396,016; published Nov. 2, 1937.

Granular preparation. Wolin-Sater Company. 353,642; Jan. 11; Serial No. 396,555; published Oct. 26, 1937.

Gum used to relieve acidosis, Chewing. J. H. Karp. 353,665; Jan. 11; Serial No. 397,080; published Nov. 2, 1937.

Hair and scalp conditioner, rouge, nail polish, etc. Los Angeles Soap Company. 353,661–3; Jan. 11; Serial Nos. 397,034–5; published Nov. 2, 1937.

Hair preparation. H. L. Rothchild. 353,633; Jan. 11; Serial No. 396,956; published Oct. 26, 1937.

Herbicides and insecticides. California Spray-Chemical Corporation. 353,639; Jan. 11; Serial No. 396,669; published Oct. 26, 1937.

Herbicides and insecticides. California Spray-Chemical Corporation. 353,631; Jan. 11; Serial No. 396,672; published Oct. 26, 1937.

Insecticide and moth-proofing composition. Zonite Products Corporation. 353,625; Jan. 11; Serial No. 396,654; published Nov. 2, 1937.

Insecticides. Lewy Chemical Co. 343,443–5; Jan. 11; Serial Nos. 380,112–14; published Nov. 2, 1937.

Insecticides and compounds having an odor repulsive to animals. Midway Chemical Co. 353,474; Jan. 11; Serial No. 388,952; published Nov. 2, 1937.

Insecticides, fungicides, and germicides. California Spray-Chemical Corporation. 353,626–7; Jan. 11; Serial Nos. 396,665–6; published Oct. 26, 1937.

Insecticides, fungicides, and germicides. California Spray-Chemical Corporation. 353,628; Jan. 11; Serial No. 396,668; published Oct. 26, 1937.

Insecticides, fungicides, and germicides. California Spray-Chemical Corporation. 353,630; Jan. 11; Serial No. 396,670; published Oct. 26, 1937.

Isotonic aqueous solutions. Abbott Laboratories. 353,676; Jan. 11; Serial No. 397,166; published Nov. 2, 1937.

Laxative preparation. F. J. Hellmann. 353,562; Jan. 11; Serial No. 395,917; published Nov. 2, 1937.

Laxative preparation. L. J. Shaw. 353,647; Jan. 11; Serial No. 396,903; published Oct. 26, 1937.

Liniment, Therapeutic. McKay Brothers. 353,471; Jan. 11; Serial No. 388,400; published Oct. 26, 1937.

Lotion. Suntan. Kilgore Development Corporation. 353,650; Jan. 11; Serial No. 396,922; published Nov. 2, 1937.

Lotions, Skin. Jaymar's Inc. 353,573; Jan. 11; Serial No. 396,056; published Nov. 2, 1937.

Medical compound or preparation. Aristopharm A.-G. (Aristopharm S. A.), (Aristopharm Ltd.). 353,468; Jan. 11; Serial No. 392,837; published Nov. 2, 1937.

Medicaments, Orally administered. Abbott Laboratories. 353,674; Jan. 11; Serial No. 397,164; published Nov. 2, 1937.

Medicated cigarettes. York Drug Co. 353,672; Jan. 11; Serial No. 397,160; published Nov. 2, 1937.

Medicinal compounds. Maltine Company. 353,568; Jan. 11; Serial No. 395,999; published Nov. 2, 1937.

Medicinal compounds. M. Wolf. 353,532; Jan. 11; Serial No. 395,251; published Oct. 26, 1937.

Medicinal preparation. J. Di Mauro. 353,591; Jan. 11; Serial No. 396,301; published Nov. 2, 1937.

Medicinal preparation. Eli Lilly and Company. 353,670; Jan. 11; Serial No. 397,136; published Nov. 2, 1937.

Medicinal preparation. Eli Lilly and Company. 353,671; Jan. 11; Serial No. 397,138; published Nov. 2, 1937.

Medicinal preparation. J. R. Watkins Company. 353,663; Jan. 11; Serial No. 397,060; published Oct. 26, 1937.

Medicinal preparations. W. Neumann. 353,581; Jan. 11; Serial No. 396,198; published Oct. 26, 1937.

Mineral concentrate, Livestock. R. W. Noland. 353,441; Jan. 11; Serial No. 376,974; published Nov. 2, 1937.

Mineral water, Compounded. Kane & Company. 353,470; Jan. 11; Serial No. 387,872; published Nov. 2, 1937.

Monocalcium phosphate. American Agricultural Chemical Company. 353,703; Jan. 11.

Ointments and salves. Hewett & Eckel. 353,505; Jan. 11; Serial No. 394,040; published Nov. 2, 1937.

Pancreatic extract. Sharp & Dohme, Incorporated. 353,553; Jan. 11; Serial No. 395,723; published Nov. 2, 1937.

Perfume. Harriet Hubbard Ayer, Inc. 353,551; Jan. 11; Serial No. 395,695; published Oct. 26, 1937.

Perfume, toilet water, face powder, etc. Faberge Inc. 353,522; Jan. 11; Serial No. 394,832; published Nov. 2, 1937.

Perfume, vanishing cream, hair dressing, etc. Abbé Wallace Cosmetics, Inc. 353,547; Jan. 11; Serial No. 395,603; published Nov. 2, 1937.

Pharmaceutical acidophilus compound. Florex Laboratory. 353,460; Jan. 11; Serial No. 385,274; published Nov. 2, 1937.

Pharmaceutical preparation. Charles C. Haskell & Co. 353,588; Jan. 11; Serial No. 396,267; published Oct. 26, 1937.

Preparation for feminine hygiene. S. M. Laboratories, Inc. 353,477; Jan. 11; Serial No. 389,754; published May 11, 1937.

Preparation for removal of dandruff, hair tonic, preparation for prevention of falling hair, etc. S. Coochicos. 353,534; Jan. 11; Serial No. 395,285; published Nov. 2, 1937.

Preparation for the treatment of neoplasms. B. S. Cornell. 353,575; Jan. 11; Serial No. 396,119; published Nov. 2, 1937.

Preparation for use in the grafting and dressing of trees and plants. Ever-Plastic Corporation. 353,614; Jan. 11; Serial No. 396,532; published Nov. 2, 1937.

Preparation to be used on cigarette or pipe tobacco. H. Dutchman. 353,466; Jan. 11; Serial No. 386,416; published Nov. 2, 1937.

Preparations designed to stimulate the growth of hair, pressing oil, hair dressing, etc. Fuller Products Co. 353,716; Jan. 11.

Preservative and vermicide, Wood. Tennessee Eastman Corporation. 353,478; Jan. 11; Serial No. 390,333; published Nov. 2, 1937.

Product for oral administration in the treatment of anemia. Abbott Laboratories. 353,675; Jan. 11; Serial No. 397,165; published Nov. 2, 1937.
Remedy for hyperacidity and digestive disorders. Battle Creek Food Company. 352,664; Jan. 11; Serial No. 397,066; published Nov. 2, 1937.
Rouges, face powders, body powders, etc., Dry. C. W. Davenport. 352,442; Jan. 11; Serial No. 378,481; published Nov. 2, 1937.
Shampoo and disinfectant. R. A. Farron. 353,490; Jan. 11; Serial No. 392,969; published Oct. 26, 1937.
Soot destroyer and fuel saver. Acme Chemical Company. 353,439; Jan. 11; Serial No. 375,918; published June 16, 1936.
Suppositories, Rectal. J. C. Benson. 352,695; Jan. 11.
Toilet preparations. Rourjois, Inc. 352,719; Jan. 11.
Tonic, expectorant, diuretic, etc. J. H. Ott, Jr. 353,602; Jan. 11; Serial No. 396,420; published Oct. 26, 1937.
Tonic, gray hair tonic, etc., Dandruff removing. Nourishine Sales Co. 353,636; Jan. 11; Serial No. 396,829; published Nov. 2, 1937.
Tonic, Nerve. Viver Chemical Company. 353,540; Jan. 11; Serial No. 395,437; published Nov. 2, 1937.
Tonics, Nerve and digestive. R. Parent. 353,492; Jan. 11; Serial No. 393,184; published Nov. 2, 1937.
Toxine, Snake. Osterreichische Serum-Gesellschaft m. b. H. 353,529; Jan. 11; Serial No. 395,179; published Nov. 2, 1937.
Vaso-constricting substance. D. Curtis. 353,461; Jan. 11; Serial No. 385,725; published Oct. 26, 1937.
Viosterol. General Mills, Inc. 353,592; Jan. 11; Serial No. 396,306; published Oct. 26, 1937.
Wood preservative. S. Kamesan. 353,479; Jan. 11; Serial No. 390,920; published Oct. 26, 1937.
Worm expellers for animals and fowl. Moorman Manufacturing Company. 353,501; Jan. 11; Serial No. 393,580; published Nov. 2, 1937.

CLASS 8

Pipes. Kaufmann Bros. & Bondy, Inc. 353,607; Jan. 11; Serial No. 396,463; published Nov. 2, 1937.

CLASS 9

Pistol hammers, Asymmetrical. D. W. King. 353,691; Jan. 11; Serial No. 397,068; published Nov. 2, 1937.

CLASS 11

Oils for printing inks, Drying. Woburn Degreasing Company of New Jersey. 353,613; Jan. 11; Serial No. 396,525; published Nov. 2, 1937.

CLASS 12

Brick. Victor Cushwa & Sons. 353,725; Jan. 11.
Doors, Garage. Tilt-A-Door Corporation. 353,640; Jan. 11; Serial No. 396,846; published Oct. 26, 1937.
Gutters. A. C. Long. 353,686; Jan. 11; Serial No. 397,476; published Nov. 2, 1937.
Houses and buildings, Portable and prefabricated. E. F. Hodgson Co. 353,499; Jan. 11; Serial No. 393,853; published Oct. 26, 1937.
Joints for concrete roads and the like. American Concrete Expansion Joint Co. 353,476; Jan. 11; Serial No. 389,595; published Nov. 2, 1937.
Plastic compounds for setting glass etc. Ever-Plastics Corporation. 353,687; Jan. 11; Serial No. 397,505; published Nov. 2, 1937.
Roofing granules. Minnesota Mining & Manufacturing Company. 353,711; Jan. 11.
Sash and store front constructions, etc. Libbey-Owens-Ford Glass Company. 353,491; Jan. 11; Serial No. 392,990; published Nov. 2, 1937.

Anderson, Carl E., Hackensack, N. J., assignor to Bausch & Lomb Optical Company, Rochester, N. Y. Abrading lenses. 2,105,175; Jan. 11.
Anderson, Edwin G., San Diego, Calif. Electric door chime. 2,104,963; Jan. 11.
Anderson, Edwin J., Snyder, Tex. Refrigerator. 2,104,845; Jan. 11.
Anderson, Harry A., Oelwein, Iowa. Device for removing piston rods from cross heads. 2,105,292; Jan. 11.
Anderson, Ian B. (See Thomson, R. F., Anderson, and Thornley.)
Anderson, Peter A., Portland, Maine. Gas installation housing. 2,105,135; Jan. 11.
Andre, Gustaf E., Richmond, Ind., assignor to Belden Manufacturing Company, Chicago, Ill. Electrical connecter. 2,104,786; Jan. 11.
Andrews Steel Company, The. (See Little, Howard J., assignor.)
Apex Electrical Manufacturing Company, The, as trustee. (See Kirby, James E., assignor.)
Archibald, Frederick R. (See Hubler, W. G., and Archibald.)
Arenberg, Albert L., Highland Park, assignor to Patent License Corporation, Chicago, Ill. Lighting fixture. 2,105,447; Jan. 11.
Arnold, Max, New York, N. Y. Permanent waving appliance. 2,105,069; Jan. 11.
Aronson, Louis V., Newark, N. J., assignor to Art Metal Works, Inc. Pyrophoric lighting mechanism. 2,104,964; Jan. 11.
Aronson, Louis V., Newark, N. J. Flame producing mechanism. 2,104,965; Jan. 11.
Arrow-Hart & Hegeman Electric Company, The. (See Guett, M., and Bentley, assignors.)
Artcraft Silk Hosiery Mills, Inc. (See Richter, E. F., and Garrett, assignors.)
Art Metal Works, Inc. (See Aronson, Louis V., assignor.)
Ash, Charles S., Milford, assignor to Kelsey-Hayes Wheel Company, Detroit, Mich. Brake construction. 2,105,178; Jan. 11.
Askania-Werke A. G. vormals Centralwerkstatt-Dessau und Carl Bamberg-Friedenau. (See Haalck, Hans, assignor.)
Associated Electric Laboratories, Inc. (See Saunders, Norman H., assignor.)
Associated Electric Laboratories, Inc. (See Smith, Howard H, assignor.)
Automatic Telephone & Electric Company. (See Renshaw, Alfred P. B., assignor.)
Auto Research Corporation. (See Bitur, Joseph, assignor.)
Auto Union A. G. (See Slaby, Rudolf, assignor.)
Autographic Register Company. (See Brenn, Carl W., assignor.)
Avery, Alfred H., Malden, Mass., assignor, by mesne assignments, of one-half to North American Holding Corporation, and one-half to Parshall Holding Corporation, Syracuse, N. Y. Knife lubricating device. 2,105,293; Jan. 11.
Bass, Edmund J., Rochester, N. Y. Boot tree. 2,105,295; Jan. 11.
Bachtold, Edmond, Whitewood, Saskatchewan, Canada. Tool handle. 2,105,239; Jan. 11.
Backstay Welt Company. (See Barr, G. G., and Kirchner, assignors.)
Baker, Oswell A., San Gabriel, Calif. Parachute. 2,104,966; Jan. 11.
Bakke, Hans A., Swampscott, Mass., assignor to General Electric Company. Electric meter mounting. 2,105,296; Jan. 11.
Baldwin, George T., London, England. Means for use in feeding sheets to printing and other like machines. 2,104,720; Jan. 11.
Baldwin-Southwark Corporation. (See Steinfeld, H. K., Gelson, and Locke, assignors.)
Baldwin-Southwark Corporation. (See Dinzl, Richard W., assignor.)
Ballet, A. H., Corporation. (See Neely, Frank R., assignors.)
Balsam, Maurice M., and W. L. Lawson, New York, N. Y., said Balsam assignor to said Lawson. Method of and apparatus for folding sheet material. 2,104,727; Jan. 11.
Bandur, Adolph F., Berwyn, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Magnetic core. 2,105,070; Jan. 11.
Bank, Albert M., assignor to Sylvia Bank, Jersey City, N. J. Mattress for beds. 2,104,921; Jan. 11.
Bank, Sylvia. (See Bank, Albert M., assignor.)
Barlow, Edward H. (See Duncan, J. F., and Barlow.)
Barr, Glen G., Union City, Ind., and A. H. Kirchner, Washington, D. C., assignors to Backstay Welt Company, Union City, Ind. Fender welt. 2,105,297; Jan. 11.
Barrett, Adolph, and L. Hirschhorn, New York, N. Y. Reenforced porcelain tooth crown. 2,105,298; Jan. 11.
Barthélemy, René, Fontenay aux Roses, assignor to Compagnie pour la Fabrication des Compteurs et Materiel d'Usines a Gaz, Montrouge, France. Device for controlling cathode beams. 2,105,177; Jan. 11.
Bass, John M., Lubbock, Tex. Reinforcement. 2,105,280; Jan. 11.
Battelle Memorial Institute, The. (See Lorig, Clarence H., assignor.)
Bausch & Lomb Optical Company. (See Anderson, Carl E., assignor.)
Baynton, Harold H., and J. W. Foster, Freehold, N. J., assignors to A. & M. Karagheusian, Inc., New York, N. Y. Rug and carpet. 2,104,941; Jan. 11.
Beck, Adolf, Bitterfeld, Germany, assignor, by mesne assignments, to Magnesium Development Corporation. Refining magnesium. 2,105,342; Jan. 11.
Belden Manufacturing Company. (See Andre, Gustaf E., assignor.)
Belloc, Maurice, assignor to Societe Nobel Francaise, Paris, France. Manufacture of vinyl resins. 2,105,206; Jan. 11.

Bendix Aviation Corporation. (See Carroll, E. G., and Taylor, assignors.)

Bendix Aviation Corporation. (See Hunt, George H., assignor.)

Bendix Products Corporation. (See Akerman, John, assignor.)

Bendix Products Corporation. (See Cunningham, Marion M., assignor.)

Bendix Products Corporation. (See Fleming, Herbert J., assignor.)

Bendix Products Corporation. (See Frank, Frederick C., assignor.)

Bendix Products Corporation. (See La Brie, Ludger E., assignor.)

Bendix Products Corporation. (See Roberts, Glyn P., assignor.)

Benner, Roland G. (See Henke, C. O., and Benner.)

Bennett, Ray A., and M. A. Bland, Long Beach, Calif. Advertising sign. 2,105,209; Jan. 11.

Bentley, Robert H. (See Gnett, M., and Bentley.)

Berg, William A., Yakima, Wash. Warehouse truck. 2,105,210; Jan. 11.

Berger, Clarence E., assignor to Hansen-Van Winkle-Munning Company, Matawan, N. J. Brush holder assembly and brush. 2,104,721; Jan. 11.

Bergert, Henry A., assignor to The Timken Roller Bearing Company, Canton, Ohio. Apparatus for mounting raceway members on locomotive crankpins and the like. 2,104,907; Jan. 11.

Bergman, Gus E. (See Reece, Mac G. and A. D., and Bergman.)

Berloth, Nelson E. (See Scott, F. L., and Berloth.)

Berndt, Arthur A., assignor to Electroline Company, Chicago, Ill. Connecter. 2,104,179; Jan. 11.

Bertram, Simon H. The Hague, Netherlands. Preparing purified glycyrrhizine. 2,104,968; Jan. 11.

Bertsch, Heinrich, Chemnitz, Germany, assignor, by mesne assignments, to American Hyalsol Corporation, Wilmington, Del. Production of artificial milk and the like. 2,104,722; Jan. 11.

Bertsch, Heinrich, and H. Stober, assignors, by mesne assignments, to Böhme Fettchemie-Gesellschaft mit beschrankter Haftung, Chemnitz, Germany. Wetting and dispersing agents and making the same. 2,104,728; Jan. 11.

Bessemtin, Marshall O., Medford, Oreg. Hamburger patty forming apparatus. 2,105,211; Jan. 11.

Best, Frank C., assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle. 2,104,723; Jan. 11.

Best, Wilson F., and W. Kremer, assignors to Grand Rapids Sample Case Company, Grand Rapids, Mich. Box or receptacle. 2,105,179; Jan. 11.

Bijur, Joseph, New York, N. Y., assignor to Auto Research Corporation. Automatic centralized lubricating installation. 2,104,729; Jan. 11.

Bjerkman, Carl G., Chicago, Ill. Process and apparatus for making gut string. 2,104,730; Jan. 11.

Blackley, James L. (See Dean, E. W., and Blackley.)

Blecken, Siegfried E., Summit, assignor to The National Lock Washer Company, Newark, N. J. Car window structure. 2,105,180; Jan. 11.

Blettner, George H., assignor to Benette Company, Chicago, Ill. Internal combustion engine construction. 2,104,896; Jan. 11.

Blettner, George H., assignor to Benette Company, Chicago, Ill. Piston. 2,104,898; Jan. 11.

Blomberg, Martin P., Hinsdale, Ill., assignor to General Motors Corporation, Detroit, Mich. Brake slack adjuster. 2,104,787; Jan. 11.

Bloom, Joseph, New York, N. Y. Glove and making same from strip material. 2,104,724; Jan. 11.

Boeing Aircraft Company. (See Sanders, John C., assignor.)

Boese, Albert B. (See Major, R. T., and Boese.)

Böhme Fettchemie-Gesellschaft mit beschrankter Haftung. (See Bertsch, H., and Stober, assignors.)

Booth, George W., assignor to Crown Cork & Seal Company, Inc., Baltimore, Md. Printing apparatus. 2,105,399; Jan. 11.

Booth, George W., assignor to Crown Cork & Seal Company, Inc., Baltimore, Md. Printing apparatus. 2,105,400; Jan. 11.

Boothroyd, Hubert. (See Woodcock, R. B., and Boothroyd.)

Borg-Warner Corporation. (See Anderson, Arthur W., assignor.)

Borla, Pauline, Chicago, Ill. Breast support. 2,104,725; Jan. 11.

Bower, Jerome G., New York, N. Y., assignor to The Buckeye Steel Castings Company, Columbus, Ohio. Locomotive pilot coupler. 2,104,846; Jan. 11.

Bowers, Frederick M., Chester, Pa. Filter glass holder. 2,105,071; Jan. 11.

Bowes, David P., Montreal, Quebec, Canada. Powder dispenser. 2,105,281; Jan. 11.

Box Blank Corporation. (See Scheffey, George B., assignor.)

Boyer, Earl W., Pottsville, Pa. Nut lock. 2,105,401; Jan. 11.

Boyle, A. S., Company, The. (See Esselen, Gustavus J., assignor.)

Brace, Kemper P., and R. B. P. Crawford, Washington, D. C. Jet refrigerating system with osmotic pump. 2,104,847; Jan. 11.

Braden, Rene A., Collingswood, N. J., assignor to Radio Corporation of America. Automatic fidelity control circuit. 2,104,769; Jan. 11.

Bradford, Clyde, and O. T. Scollon, Saint Benedict, assignors to E. Peale, Clearfield, Pa., W. S. Davies, New York, N. Y., and W. B. Oakes, Rutherford, N. J., as trustees. Mechanism for separating intermixed divided materials. 2,104,922; Jan. 11.

Bragg, Caleb S., Palm Beach, Fla., assignor to Bragg-Kliesrath Corporation, South Bend, Ind. Clutch controlling mechanism. 2,104,731; Jan. 11.

Bragg-Kliesrath Corporation. (See Bragg, Caleb S., assignor.)

Brem, Carl W., Montclair, assignor to Autographic Register Company, Hoboken, N. J. Manifolding pile. 2,105,448; Jan. 11.

Brem, Carl W., Montclair, assignor to Autographic Register Company, Hoboken, N. J. Manifolding pile. 2,105,449; Jan. 11.

Brennan, Joseph B., Fort Wayne, Ind. Electrolyte. 2,104,732; Jan. 11.

Brennan, Joseph B., and M. L. Marsh, Fort Wayne, Ind.; said Marsh assignor to said Brennan. Electrolyte and making same. 2,104,733; Jan. 11.

Brickner, Robert N., New York, N. Y. Momentum actuated sled brake. 2,104,908; Jan. 11.

Bridgman, Charles T., Des Moines, and H. Giese, assignors to Iowa State College Alumni Association, Incorporated, Ames, Iowa. Precast reinforced tile beam and span tile floor structure. 2,105,106; Jan. 11.

Briggs Manufacturing Company. (See Tjaarda, John, assignor.)

Briggs, Southwick W., Glenmont, Md. Oil clarifier and filter. 2,105,136; Jan. 11.

Briggs, Stephen F., Detroit, Mich., assignor to Briggs & Stratton Corporation, Milwaukee, Wis. Butterfly valve. 2,105,343; Jan. 11.

Briggs & Stratton Corporation. (See Briggs, Stephen F., assignor.)

Briggs & Stratton Corporation. (See Fitz Gerald, John W., assignor.)

Brinkman, Albin J. (See Cohn, L. I., and Brinkman.)

Brinkworth, Clarence J. (See Lauenstein, C. F., and Brinkworth.)

Brinnon, Richard B., Wichita, Kans. Shoe box. 2,104,828; Jan. 11.

Brophy, Oscar, Philadelphia, Pa. Electric control device for block printing machines. 2,104,894; Jan. 11.

Brown, Carl D., assignor to Draper Corporation, Hopedale, Mass. Loom. 2,105,050; Jan. 11.

Brown & Root, Inc. (See Dunham, Robert M., assignor.)

Brown & Sharpe Manufacturing Company. (See Meglott, George F., assignor.)

Brownlee, Robert L., assignor to Dreis & Krump Mfg. Company, Chicago, Ill. Hydraulic hold-down for squaring shears. 2,105,402; Jan. 11.

Bruce, Albert W., Ottumwa, Iowa. Apparatus for treating poultry. 2,105,107; Jan. 11.

Bruner, Donald L., Coral Gables, Fla. Retractable landing light. 2,105,137; Jan. 11.

Brush Development Company, The. (See Sawyer, Charles B., assignor.)

Brush Development Company, The. (See Williams, Alfred L. W., assignor.)

Buckeye Steel Castings Company, The. (See Bower, Jerome G., assignor.)

Buckeye Steel Castings Company. (See Einwaechter, Frederick H., Jr., assignor.)

Buckeye Steel Castings Company, The. (See Johnson, G. T., and Wolfe, assignors.)

Buckle, Francis W., Glanford Township, Ontario, Canada. Poultry feeder and waterer. 2,105,403; Jan. 11.

Buescher, Andrew E., assignor, by mesne assignments, to Consolidated Carton, Inc., Chicago, Ill. Egg carton. 2,105,161; Jan. 11.

Bullock, Giles E., Rochester, N. Y. Pressure tank. 2,105,451; Jan. 11.

Bundy Tubing Company. (See Quarnstrom, Bert L., assignor.)

Burger, Martin, Morris, assignor to Self-Locking Carton Co., Chicago, Ill. Carton. 2,104,969; Jan. 11.

Buses, Harry F., and J. N. Huser, Indianapolis, Ind. Enunciator. 2,104,895; Jan. 11.

Busk, Anthony S., assignor to New Era Manufacturing Company, Paterson, N. J. Plate clamp. 2,105,452; Jan. 11.

Byron Jackson Co. (See Gray, Herbert E., assignor.)

Byron-Jackson C. (See Hertel, Richard K., assignor.)

Campbell, Donald A., assignor to G. W. McKee, Rockford, Ill. Gaseous fuel burner. 2,105,244; Jan. 11.

Candee, Allan H. (See Wildhaber, E., and Candee.)

Cannon, James A. (See Sanders, C. E., Cannon, and Howell.)

Capstan Glass Company. (See McNamara, William L., assignor.)

Carborundum Company, The. (See Whitacre, M. L., and de Leeuw, assignors.)

Card, Charles W., Aurora, Ill. Clamp. 2,105,345; Jan. 11.

Card, Frederic M., Bridgeport, Conn., assignor to The Singer Manufacturing Company, Elizabeth, N. J. Sewing and trimming machine. 2,105,346; Jan. 11.

Card, Frederic M., Bridgeport, Conn., assignor to The Singer Manufacturing Company, Elizabeth, N. J. Trimming mechanism. 2,105,347; Jan. 11.

Carleton, Hugh E., Carteret, N. J., assignor to Foster Wheeler Corporation, New York, N. Y. Furnace. 2,105,369; Jan. 11.

Carmody, William H., Pittsburgh, Pa. Tinted resins. 2,104,629; Jan. 11.

Carothers, Wallace H., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Haloges substituted butadienes and preparing them. 2,104,760; Jan. 11.

Carpenter, Arley D., Los Angeles, Calif., assignor to Comet Trailer Corporation. Trailer. 2,104,734; Jan. 11.

Carpenter, Frank W., Minneapolis, assignor of one-half to M. H. Graham, St. Louis Park, Minn. Automatic temperature controller for electric flatirons, etc. 2,104,970; Jan. 11.

Carpenter, Oliver L., and B. F. Mees, assignors to The General Electric Company Limited, Coventry, England. Telephone system. 2,104,971; Jan. 11.

Carroll, Eugene G., and C. H. Taylor, assignors to Bendix Aviation Corporation, South Bend, Ind. Brake. 2,104,735; Jan. 11.

Carton, Paul O., Cleveland Heights, Ohio, assignor to General Electric Company. Incandescent lamp and similar device. 2,105,404; Jan. 11.

Casto, Lloyd V., Detroit, Mich. System of deriving decorative emblems on articles of manufacture. 2,104,790; Jan. 11.

Celanese Corporation of America. (See O'Dowd, Leslie J., assignor.)

Celanese Corporation of America. (See Tayler, Harry and W., assignors.)

Chase Bag Company, The. (See Scott, Douglas E., assignor.)

Chase Companies, The. (See Gasay, William J., assignor.)

Chase Companies, The. (See Shoemaker, Richard W., assignor.)

Chase, Frederic L., Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation. Soldered joint. 2,105,405; Jan. 11.

Chase-Shawmut Company, The. (See Condit, Sears B., assignor.)

Cherkasoff, Nicholas. (See Heddon, C. L., and Cherkasoff.)

Chesler, Isidor, New York, N. Y., assignor to Eagle Pencil Company, Application. 2,105,210; Jan. 11.

Chesnut, Guy E., Jr., St. Joseph, Mo. Rapid focusing binocular. 2,105,349; Jan. 11.

Church, Lewis H., Westfield, assignor to The Thomas & Betts Co., Elizabeth, N. J. Wire connector. 2,105,152; Jan. 11.

Clark, Frank G., Minneapolis, assignor to Crane Co., of Minnesota, St. Paul, Minn. Cleats. 2,105,212; Jan. 11.

Clark, Frank M., Pittsfield, Mass., assignor to General Electric Company. Liquid insulating composition. 2,105,406; Jan. 11.

Clark, Frank M., Pittsfield, Mass., assignor to General Electric Company. Liquid insulating composition. 2,105,407; Jan. 11.

Clark, Gordon H., Pottstown, Pa., assignor to Hoffman Gas & Electric Heater Company, Louisville, Ky. Electric switch. 2,104,848; Jan. 11.

Clark, Mabel V., Los Angeles, Calif. Slide fastener. 2,105,213; Jan. 11.

Classon, Jan C., assignor to Aktiebolaget Asmoga Agenturer, Stockholm, Sweden. Speed indicator for watercraft. 2,105,311; Jan. 11.

Clemens, Frederick R., Indianapolis, Ind. Independent wheel suspension. 2,104,736; Jan. 11.

Clever, Alexander, assignor of fifty-one one-hundredths to MacDonald Engineering Company, Chicago, Ill. Bin bottom for concrete structures. 2,104,896; Jan. 11.

Cochrane-Bly Company. (See Welch, William H., assignor.)

Cohn, Louis I., and A. J. Brinkman, assignors to Spiers Bedding Corporation, Philadelphia, Pa. Convertible article of furniture. 2,105,408; Jan. 11.

Cohn, Sidney, assignor to Sigmund Cohn, New York, N. Y. Palladium nickel ruthenium alloy. 2,105,212; Jan. 11.

Cohn, Sigmund. (See Cohn, Sidney, assignor.)

Collard, Baby G., Coon Rapids, Iowa. Obstetrical chair. 2,104,930; Jan. 11.

Colt's Patent Fire Arms Manufacturing Co. (See Webb, George, assignor.)

Comet Trailer Corporation. (See Carpenter, Arley D., assignor.)

Compagnie pour la Fabrication des Compteurs et Materiel d'Usines a Gaz. (See Batchelder, Rene, assignor.)

Conaway, Rollin P., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Cellulose process. 2,104,849; Jan. 11.

Condenser Corporation of America. (See Di Giacomo, Adolfo, assignor.)

Condit, Sears B., Boston, assignor to The Chase-Shawmut Company, Newburyport, Mass. Glass top plug fuse. 2,104,950; Jan. 11.

Condra, Elmo L., Long Beach, Calif. Pressure bailer. 2,104,942; Jan. 11.

Conner, Kirke W., Detroit, Mich., assignor to Micromatic Hone Corporation. Honing tool and arm. 2,105,024; Jan. 11.

Consolidated Carton, Inc. (See Buescher, Andrew E., assignor.)

Continental-Diamond Fibre Company, The. (See Ritter, Ellwood, assignor.)

Cover, Harvey E., South Bend, Ind. Valve. 2,105,163; Jan. 11.

Cox, James L., Danvers, assignor to Hygrade Sylvania Corporation, Salem, Mass. Gaseous electric discharge lamp. 2,105,138; Jan. 11.

Craig, Wallace A., assignor to Vapor Treating Processes, Inc., Los Angeles, Calif. Treating hydrocarbon oils. 2,104,701; Jan. 11.

Cramerton Mills. (See Hinson, O. C., and Dawson, assignors.)

Crane Co., of Minnesota. (See Clark, Frank G., assignor.)

Crawford, Robert B. P. (See Brace, K. P., and Crawford.)

Crawford, Robert B. P., New York, N. Y., assignor to Frick Company, Waynesboro, Pa. Air conditioning system. 2,104,851; Jan. 11.

Crawford, Wilbur F., Waco, Tex. Awning. 2,105,409; Jan. 11.

Crewdson, Sarah M., assignor of one-third to R. H. Goodhart, Chicago, Ill. Attachment for sewing machines. 2,105,184; Jan. 11.

Crombie, John B., and R. H. Manning, said Crombie assignor to Mildred Crombie, Chicago, Ill. Liquid flow control device for combustion engines. 2,104,862; Jan. 11.

Crombie, Mildred. (See Crombie, J. B., assignor, and Manning.)

Crosley, Powel, Jr., assignor to The Crosley Radio Corporation, Cincinnati, Ohio. Device for conditioning and cooling air. 2,105,108; Jan. 11.

Crosley Radio Corporation, The. (See Crosley, Powel, Jr., assignor.)

Crowley, Alfred, and H. E. Mcinerney, assignors to Johnson Laboratories, Inc., Chicago, Ill. High-frequency resonant system. 2,104,792; Jan. 11.

Crown Cork & Seal Company. (See Booth, George W., assignor.)

Crown Cork & Seal Company. (See Eskur, E. M., and Greenholtz, assignors.)

Crown Cork & Seal Company. (See Randall, William S., assignor.)

Culwell, Don. (See Wiese, G. E., and Culwell.)

Cunningham, Lewis L., assignor to Minneapolis-Honeywell Regulator Company, Minneapolis, Minn. Motor control system. 2,104,973; Jan. 11.

Cunningham, Marion M., assignor to Bendix Products Corporation, South Bend, Ind. Container. 2,105,313; Jan. 11.

Curtis, Jesse R., Cleveland, Ohio. Box and box blank. 2,105,025; Jan. 11.

Csernia, Wolfgang. (See Hüttmann, E., and Csernia.)

D'Achesa, Simoces, assignor to La Société à Responsabilité limité dite "Irmesse", Paris, France. Bathing suit. 2,104,943; Jan. 11.

Dake, Charles W., Grand Haven, Mich. Brake drum. 2,104,928; Jan. 11.

Dillenbach, Walter, Berlin-Charlottenburg, Germany, assignor to N. V. Machinerieenen Apparaten Fabrieken "Mea", Urecht, Netherlands. Electron tube. 2,105,026; Jan. 11.

Daniels, Virgil L., assignor to Webster Electric Company, Racine, Wis. Overload indicator. 2,105,410; Jan. 11.

Dassler, Adolf, Hagen, Germany. Galvanic battery. 2,104,978; Jan. 11.

Daubenmeyer, Homer, assignor of one-half to H. A. Miller, Detroit, Mich. Homogenizing nozzle device. 2,104,858; Jan. 11.

Danskardt, Martin, Cleveland, Ohio. Shelf bracket. 2,104,831; Jan. 11.

Davies, Arnold. (See Dewsbury, W. G., and Davies.)

Davies, W. Sanders, trustee, et al. (See Bradford, C., and Scollon, assignors.)

Davis, George C., Chicago, Ill. Cover for tops of cans and the like. 2,105,027; Jan. 11.

Dawes, Bailey P., Detroit, Mich. Fuel heater for internal combustion engines. 2,104,974; Jan. 11.

Dawson, Council G. (See Hinson, O. C., and Dawson.)

Dawson, Vernon B., Wilmington, Del. Battery carrier. 2,105,349; Jan. 11.

Dean, Edmund W., assignor to Duplex Printing Press Company, Battle Creek, Mich. Newspaper printing press. 2,104,737; Jan. 11.

Dean, Edmund W., and J. L. Blackley, assignors to Duplex Printing Press Company, Battle Creek, Mich. Plate clamp operating device for printing presses. 2,104,854; Jan. 11.

De Baufre, William L., Lincoln, Nebr. Method and apparatus for cooling and rectifying gaseous mixtures. 2,105,214; Jan. 11.

Decker, George, Cincinnati, assignor to The Philad Company, Cleveland, Ohio. Waving hair. 2,104,897; Jan. 11.

Degea Aktiengesellschaft (Auergesellschaft). (See Geldschie, W., and Guertler, assignors.)

De Giers, Clarence A., Forest Hills, N. Y. Electrically controlled liquid level indicator. 2,104,898; Jan. 11.

De Giuli, Clementine. (See Wagner, William, assignor.)

Degnan, James, Corona, assignor to Speedry Gravure Corporation, New York, N. Y. Web registering mechanism. 2,105,185; Jan. 11.

De Groote, Melvin, St. Louis, assignor to The Tret-O-Lite Company, Webster Groves, Mo. Breaking petroleum emulsions. 2,104,793; Jan. 11.

De Groote, Melvin, St. Louis, assignor to The Tret-O-Lite Company, Webster Groves, Mo. Breaking petroleum emulsions. 2,104,794; Jan. 11.

De Groote, Melvin, St. Louis, assignor to The Tret-O-Lite Company, Webster Groves, Mo. Breaking petroleum emulsions. 2,104,795; Jan. 11.

De la Barre de Nanteuil, Christian, Versailles, France. Variable speed power-transmitting device. 2,105,186; Jan. 11.

De Leeuw, Peter. (See Whitmere, M. L., and de Leeuw.)

Dellea, Gayton, Detroit, Mich. Shoe heel. 2,104,924; Jan. 11.

Dembecki, Leo, and J. Kay, assignors to The Ohio Nut & Bolt Company, Berea, Ohio. Welding nut. 2,105,139; Jan. 11.

Denault, Clinton L. (See Strom, A. P., Denault, and McCulloch.)

Dernen, Heinrich, assignor to Maschinenfabrik Carl Zangs A.-G. (Herm. Schroers Nachf.) Crefeld, Germany. Cross winding machine. 2,105,140; Jan. 11.

Detroit Lubricator Company. (See Eggleston, Lewis W., assignor.)

Deutsche Celluloid-Fabrik. (See Thinius, Kurt, assignor.)

De Walt, Kenneth C., Schenectady, N. Y., assignor to General Electric Company. Spark plug. 2,105,411; Jan. 11.

Dewsbury, Wilfred G., and A. Davies, London, England. Treatment of improved materials containing collagen. 2,105,413; Jan. 11.

Dickhoff, Robert, New York, N. Y. Safety headgear. 2,105,028; Jan. 11.

Dieterle, Walter, Dessau-Ziebigk in Anhalt, and K. Horst, Hoechst/Taunus, Germany, assignors to Agfa Ansco Corporation, Binghamton, N. Y. Polymethine dyes. 2,104,866; Jan. 11.

Dietrich, Melvin A., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Lubricating oil and improving same. 2,104,796; Jan. 11.

Di Ghezzo, Aniello, New York, N. Y., assignor to Condenser Corporation of America, Jersey City, N. J. Electrical condenser and spacing strip therefor. 2,104,797; Jan. 11.

Dinel, Richard W., Narberth, Pa., assignor to Baldwin-Southwark Corporation. Rubber shear. 2,105,216; Jan. 11.

Dion, Isaie, Fall River, Mass. Expansion joint for rails. 2,104,856; Jan. 11.

Ditto, Incorporated. (See Marchev, A., and Leach, assignors.)

Dixie-Vortex Company. (See Krein, Frederick T., assignor.)

Dixon, Reginald G., Eltham Park, London, assignor to Siemens Brothers & Company Limited, London, England. Telephone system. 2,104,975; Jan. 11.

Doane, Harry C. (See Grandy, L. R., and Doane.)

Dodenhoff, William D., Greenville, S. C. Picker for looms. 2,104,832; Jan. 11.

Dolby, Charles M., Lawrenceville, Ill. Valve. 2,105,282; Jan. 11.

Dolley, Paul T., Bartlett, assignor to Pacific Alkali Company, Los Angeles, Calif. Production of borax. 2,105,109; Jan. 11.

Doran Brothers. (See Schultze, Paul, assignor.)

Doran, John C. (See Schultze, Paul, assignor.)

Doty, Myrle M., Sycamore, Ill. Bib. 2,105,029; Jan. 11.

Dow-Weld Company. (See Johnson, Louis B., assignor.)

Draper Corporation. (See Brown, Carl D., assignor.)

Dreis & Krump Mfg. Company. (See Brownlee, Robert L., assignor.)

Dresden-Leipziger Schnellpressen-Fabrik A. G. (See Lang, Karl T., assignor.)

Dreyfus, Camille, New York, N. Y. Spun yarn from artificial staple fibers and making same. 2,104,798; Jan. 11.

Driscoll, John H. (See Driscoll, Richard J. and J. H.)

Driscoll, Richard J., White Plains, N. Y., and J. H. Driscoll, Edgewater, N. J. Ring buoy and making the same. 2,105,110; Jan. 11.

Dubsky, Arthur, Vienna, Austria. Pyrophoric igniter. 2,105,072; Jan. 11.

Duncan, James F., and E. H. Barlow, Waterbury, Conn. Ballcock. 2,105,314; Jan. 11.

Dunham, Robert M., assignor to Brown & Root, Inc., Houston, Tex. Saw. 2,105,030; Jan. 11.

Duplex Printing Press Company. (See Dean, Edmund W., assignor.)

Duplex Printing Press Company. (See Dean, E. W., and Blackley, assignors.)

Du Pont, E. I., de Nemours & Company. (See Carothers, Wallace H., assignor.)

Du Pont, E. I., de Nemours & Company. (See Conaway, Rollin F., assignor.)

Du Pont, E. I., de Nemours & Company. (See Dietrich, Melvin A., assignor.)

Du Pont, E. I., de Nemours & Company. (See Henke, C. O., and Benner, assignors.)

Du Pont, E. I., de Nemours & Company. (See Henke, C. O., and Parmelee, assignors.)

Du Pont, E. I., de Nemours & Company. (See Wernts, James H., assignor.)

Eagle Pencil Company. (See Chesler, Isidor, assignor.)

Eagle Pencil Company. (See Hanle, Benjamin W., assignor.)

Eames, William F., Edgewood, Pa., assignor to Westinghouse Electric Elevator Company, Chicago, Ill. Signal system for elevators. 2,105,073; Jan. 11.

Earle, Ralph H., Wauwatosa, assignor to Line Material Company, South Milwaukee, Wis. Fuse link construction. 2,104,899; Jan. 11.

Eastman, Harold B., Philadelphia, Pa. Safety cover for match books. 2,105,141; Jan. 11.

Eastman Kodak Company. (See Lyman, D. F., and Stolber, assignors.)

Eastman Kodak Company. (See Malm, Carl J., assignor.)

Eastman Kodak Company. (See Martin, Lawrence R., assignor.)

Eastman Kodak Company. (See Mihalyi, Joseph, assignor.)

Eastman Kodak Company. (See Mihalyi, J., and Green, assignors.)

Eastman Kodak Company. (See Riddell, William A., assignor.)

Eastman Kodak Company. (See Wittel, Otto, assignor.)

Edwards, William F. M., assignor to Filter Tips Limited, London, England. Manufacture of cigarettes. 2,105,412; Jan. 11.

Eggleston, Lewis W., assignor to Detroit Lubricator Company, Detroit, Mich. Valve for heating apparatus. 2,105,453; Jan. 11.

Einwaechter, Frederick H., Jr., West Halethorpe, Md., assignor to The Buckeye Steel Castings Company, Columbus, Ohio. Pilot and coupler structure. 2,104,887; Jan. 11.

Electric Arc Cutting & Welding Company. (See Holslag, Claude J., assignor.)

Electric & Musical Industries Limited. (See White, Eric L. C., assignor.)

Electroline Company. (See Berndt, Arthur A., assignor.)

Electronic Television Company. (See Henroteau, François C. P., assignor.)

Eliel, Leon T., Pasadena, Calif. Apparatus for aerial photography. 2,104,976; Jan. 11.

Emerson Electric Mfg. Co., The. (See Finch, Herbert L., assignor.)

Engels, William H., Rahway, and G. A. Stein, Elisabeth, assignors to Merck & Co. Inc., Rahway, N. J. Bismuth allantoinate and making it. 2,104,738; Jan. 11.

Enkur, Edward M., and B. H. Greenholts, assignors to Crown, Cork & Seal Company, Inc., Baltimore, Md. Container closure. 2,105,031; Jan. 11.

Eppens, Ernest G., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Fluid actuated hammer. 2,106,074; Jan. 11.

Eppler, Andrew, deceased, by E. P. Eppler, executrix, Lynn, and J. P. Frederickson, Wollaston, Mass., assignors to United Shoe Machinery Corporation, Paterson, N. J. Machine for pressing the bottoms of shoes. 2,104,729; Jan. 11.

Eppler, Ella P., executrix. (See Eppler, A., and Frederickson.)

Equitable Paper Bag Co. Inc. (See Poppe, George W., assignor.)

Esselen, Gustavus J., Swampscott, Mass., assignor to The A. S. Boyle Company, Cincinnati, Ohio. Nonshrinking woodlike plastic composition. 2,105,111; Jan. 11.

Evans Case Company. (See Reilly, Alfred F., assignor.)

Evans, Clifford F., assignor to Gordon Novelty Company, Los Angeles, Calif. Game apparatus. 2,104,740; Jan. 11.

Evans, Edwin J., Venice, Calif., assignor to E. B. McCabe, Salt Lake City, Utah. Can opener and cover. 2,104,978; Jan. 11.

Evans, John, Collingswood, N. J., assignor to Radio Corporation of America. Constant radio frequency generator. 2,104,916; Jan. 11.

Evans, Seth, Houston, Tex. Packing for pipe joints. 2,104,790; Jan. 11.

Evulich, Anton, San Francisco, Calif. Door stop. 2,105,216; Jan. 11.

Excelsior Accordion Manufacturing Co. Inc. (See Pancotti, Roberto, assignor.)

Exline, Katharine H. (See Exline, Marcus P. and K. H.)

Exline, Marcus P. and K. H., Dallas, Tex. Cravat or necktie. 2,104,977; Jan. 11.

Falk, Bernard S., Leominster, assignor to Independent Lock Company, Fitchburg, Mass. Lock. 2,104,961; Jan. 11.

Farnsworth Television Incorporated. (See Gardner, Bernard C., assignor.)

Fell, Morris, New York, N. Y. Trimming attachment for sewing machines. 2,105,032; Jan. 11.

Ferguson, Robert B., Plainfield, N. J., assignor to General Chemical Company, New York, N. Y. Manufacture of sulphuric acid. 2,104,858; Jan. 11.

Ferris, Walter, assignor to The Oilgear Company, Milwaukee, Wis. Pump or motor. 2,105,464; Jan. 11.

Filter Tips Limited. (See Edwards, William F. M., assignor.)

Finch, Herbert L., assignor to The Emerson Electric Mfg. Co., St. Louis, Mo. Circulating fan. 2,105,315; Jan. 11.

Fink, Colin G., New York, N. Y. Halogenation of materials. 2,104,741; Jan. 11.

Finkl, A., & Sons Company. (See Finkl, William F., assignor.)

Finkl, William F., assignor to A. Finkl & Sons Company, Chicago, Ill. Die block. 2,104,979; Jan. 11.

Finkl, William F., assignor to A. Finkl & Sons Company, Chicago, Ill. Steel alloy. 2,104,980; Jan. 11.

Fitchett, Thomas S., assignor to F. X. Hooper Company, Inc., Glen Arm, Md. Blotter head. 2,105,033; Jan. 11.

Fitz Gerald, John W., assignor to Briggs & Stratton Corporation, Milwaukee, Wis. Device for preventing unintentional locking of automobile doors. 2,105,350; Jan. 11.

Flagler, Harold G., Chicago, Ill. Method of and machine for bending sheet metal. 2,105,240; Jan. 11.

Flatto, George, assignor to The Ribbon Mills Corporation, New York, N. Y. Bow. 2,105,436; Jan. 11.

Fleischer, Curt H., Wethersfield, Conn. Toy. 2,104,742; Jan. 11.

Fleming, Herbert J., assignor to Bendix Products Corporation, South Bend, Ind. Tire cutting machine. 2,105,316; Jan. 11.

Flower, Archibald T., Jenkintown, Pa. Insulator bracket. 2,105,112; Jan. 11.

Flynn, Benjamin H., Alexandria, La. Level indicating device. 2,105,034; Jan. 11.

Forester, Arthur E., Cincinnati, Ohio. Seat structure. 2,104,982; Jan. 11.

Forstner Chain Corporation. (See Forstner, Walter, assignor.)

Forstner, Walter, Irvington, N. J., assignor to Forstner Chain Corporation. Belt ornament and connection. 2,104,833; Jan. 11.

Forsythe, John W., Wilkinsburg, Pa. Conveyer. 2,105,142; Jan. 11.

Foedick Machine Tool Company, The. (See Linden, C. E., and McClellan, assignors.)

Foster, James W. (See Baynton, H. H., and Foster.)

Foster Wheeler Corporation. (See Carleton, Hugh H., assignor.)

Fox Film Corporation. (See Laube, G., Stevens, and Miller.)

Fox Film Corporation. (See Stevens, Robert C., assignor.)

Francescon, Ello V., Boston, Mass. Antirattler device for windows and the like. 2,105,414; Jan. 11.

Frank, Frederick C., assignor to Bendix Products Corporation, South Bend, Ind. Wheel. 2,105,317; Jan. 11.

Fredericksen, James P. (See Eppler, A., and Fredericksen.)

Freudenberg, Carl, G. m. b. H. (See Freudenberg, R., and Lange, assignors.)

Freudenberg, Carl, G. m. b. H. (See Freudenberg, Richard and H., Runkel, and Lange, assignors.)

Freudenberg, Hans. (See Freudenberg, Richard and H., Runkel, and Lange.)

Freudenberg, Richard, H. Freudenberg, R. Runkel, and G. Lange, Weinheim, assignors to the firm Carl Freudenberg G. m. b. H., Weinheim, (Bedenstr), Germany. Manufacture of spun goods, fabrics and the like. 2,105,035; Jan. 11.

Freudenberg, Richard, and G. Lange, assignors to firm Carl Freudenberg G. m. b. H. Weinheim, Germany. Manufacture of spun goods, fabrics, and other textiles. 2,105,036; Jan. 11.

Frick Company. (See Crawford, Robert B. P., assignor.)

Friedman, John H., assignor to The National Machinery Company, Tiffin, Ohio. Machine for making bolts. 2,104,944; Jan. 11.

Fritsch, Rudolph E., assignor to Tube-Turns, Incorporated, Louisville, Ky. Method and apparatus for making pipe bends. 2,105,075; Jan. 11.

Frolander, Frank C., Elizabeth, N. J., assignor to Mergenthaler Linotype Company. Slug casting machine. 2,104,859; Jan. 11.

Frye, Robert, Chicago, Ill., assignor to The Sherwin-Williams Company, Cleveland, Ohio. Ammonolysis of halogeno-aromatic compounds to produce amines. 2,104,983; Jan. 11.

Fuchsman, Jacob, Brooklyn, N. Y. Sash construction. 2,104,860; Jan. 11.

Galson, Henry L. (See Steinfeld, H. K., Galson, and Locke.)

Gannett, Danforth K., Jackson Heights, N. Y., assignor to American Telephone and Telegraph Company. Vacuum tube circuits. 2,104,861; Jan. 11.

Gardner, Bernard C., Philadelphia, Pa., assignor to Farnsworth Television Incorporated. Cathode ray oscillator. 2,104,834; Jan. 11.

Garrett, Joseph E. (See Richter, E. F., and Garrett.)

Gaugler, Richard S., assignor to General Motors Corporation, Dayton, Ohio. Refrigerating apparatus. 2,105,460; Jan. 11.

Gasey, William J., assignor to The Chase Companies, Incorporated, Waterbury, Conn. Header and making the same. 2,105,241; Jan. 11.

General Aniline Works, Inc. (See Zerweck, W., and Kunze, assignors.)

General Chemical Company. (See Ferguson, Robert B., assignor.)

General Electric Company. (See Bakke, Hans A., assignor.)

General Electric Company. (See Cartun, Paul O., assignor.)

General Electric Company. (See Clark, Frank M., assignor.)

General Electric Company. (See De Walt, Kenneth C., assignor.)

General Electric Company. (See Honing, Wilhelm, assignor.)

General Electric Company. (See Metcalf, Herbert E., assignor.)

General Electric Company. (See Mohler, F., and Umansky, assignor.)

General Electric Company. (See Nowak, Paul, assignor.)

General Electric Company. (See Nowak, P., and Hofmeier, assignors.)

General Electric Company. (See Whiting, Max A., assignor.)

General Electric Company Limited, The. (See Carpenter, O. I., and Moss, assignors.)

General Motors Corporation. (See Blomberg, Martin P., assignor.)

General Motors Corporation. (See Chase, Frederick L., assignor.)

General Motors Corporation. (See Gaugler, Richard S., assignor.)

General Motors Corporation. (See Grandy, L. R., and Doane, assignors.)

General Motors Corporation. (See Midgley, T., Henne, and McNary, assignors.)

General Motors Corporation. (See Pearce, George C., assignor.)

General Motors Corporation. (See Phillips, William M., assignor.)

General Motors Corporation. (See Schjolin, Eric O., assignor.)

George, Ruth M. (See Masino, R., and Koep, assignors.)

Gibson, Florian G., Palo Alto, assignor of one-third to R. Matheny, Oakland, Calif. Electric alarm switch. 2,105,113; Jan. 11.

Giese, Henry. (See Bridgman, C. T., and Giese.)

Giger, Walter, Wauwatosa, and C. Peter, assignors to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Switching device. 2,105,455; Jan. 11.

Gilkey, George L., Merrill, Wis. Veneered door. 2,105,187; Jan. 11.

Gill, James P., assignor to Vanadium-Alloys Steel Company, Latrobe, Pa. Alloy steel tool. 2,105,114; Jan. 11.

Gillis, Randall. (See Kaul, W. W., and Gillis.)

Gleason, William W., assignor to Nachman Spring-Filled Corporation, Chicago, Ill. Upholstery spring assembly. 2,105,115; Jan. 11.

Gleason Works. (See Wildhaber, E., and Candee, assignors.)

Glover, John L. R., et al. (See Sinitsin-White, Nicholas, assignor.)

Gödecke, Willi, Witten-Ruhr, and W. Guertler, Berlin-Dahlem, assignors to Degea Aktiengesellschaft (Auergesellschaft), Berlin, Germany. Heat resistant alloys. 2,105,283; Jan. 11.

Goldsmith, Alfred N., New York, N. Y. Synthetic reverberation system. 2,105,318; Jan. 11.

Goodhart, Robert H. (See Crewdson, Sarah M., assignor.)

Goodrich, B. F., Company, The. (See Smiley, Pearl Y., assignor.)

Gordon, Hiram, and A. C. Rogge, Columbus, Ohio, assignors to Lock-On Heel Company, Chicago, Ill. Apparatus for securing metallic heel fasteners to shoes. 2,105,119; Jan. 11.

Gordon Novelty Company. (See Evans, Clifford F., assignor.)

Goetz, Emil, et al. (See Jacobs, George, assignor.)

Goodman, Russell A., Cleveland, Ohio. Buffing wheel and making same. 2,104,925; Jan. 11.

Graham, Maurice H. (See Carpenter, Frank W., assignor.)

Graham, William S., Canton, Ill., assignor to International Harvester Company. Implement attachment for tractors. 2,105,117; Jan. 11.

Grand Rapids Sample Case Company. (See Best, W. F., and Kremer, assignors.)

Grandy, Levi R., and H. C. Doane, Flint, assignors to General Motors Corporation, Detroit, Mich. Radio static eliminator. 2,104,809; Jan. 11.

Grant, Joseph, et al. (See Jacobs, George, assignor.)

Gran, Herbert E., Los Angeles, assignor to Byron Jackson Co., Huntington Park, Calif. Balance stop for door type elevators. 2,105,076; Jan. 11.

Gray, Bertram P., Birmingham, England. Pad for use with horseshoes. 2,105,242; Jan. 11.

Green, Newton B. (See Mihalyi, J., and Green.)

Greenberg, Charles B., New York, N. Y. Fastener for wrist watch straps. 2,105,143; Jan. 11.

Greenholts, Ralph E. (See Enkur, E. M., and Greenholts.)

Greenstein, George, Long Island, N. Y. Safety razor. 2,105,351; Jan. 11.

Grinham, Edward C., assignor of one-half to The Standard Motor Company Limited, Coventry, England. Chassis-frame for motor-vehicles. 2,105,144; Jan. 11.

Groll, Herbert P. A., and G. Hearne, Berkeley, assignors to Shell Development Company, San Francisco, Calif. Stabilization of unsaturated carbonylic compounds. 2,105,284; Jan. 11.

Grondahl, Alfred G., Chicago, Ill. Vertical drop water power. 2,104,984; Jan. 11.

Grossman, Max, et al. (See Le Fevre, Ralph A., assignor.)

Gruber, Clarence E. and W. F., French Lick, Ind. Box. 2,105,243; Jan. 11.

Gruber, William F. (See Gruber, Clarence E. and W. F.)
Guedon, Emile C. (See Sinnett, C. M., and Guedon.)
Guertler, William. (See Gödecke, W., and Guertler.)
Guett, Monroe, and R. H. Bentley, assignors to The Arrow-Hart & Hegeman Electric Company, Hartford, Conn. Electric switch construction. 2,105,415; Jan. 11.
Guinn, James G., Vivian, La. Electric plug lock. 2,104,945; Jan. 11.
Gurney, William W., Winona, Minn., assignor to Madison Silo Company, Madison, Wis. Silo chute. 2,105,145; Jan. 11.
Gurwick, Irving, assignor to Shellmar Products Company, Mount Vernon, Ohio. Intaglio printing device. 2,104,945; Jan. 11.
Guy and Murton, Incorporated. (See Guy, Frederick M., assignor.)
Guy, Frederick M., assignor to Guy and Murton, Incorporated, Detroit, Mich. Clutch. 2,105,188; Jan. 11.
H & H Machine & Motor Parts Co. (See Holbut, Michael, assignor.)
Haagenson, Helmer M., Excelsior, Minn. Water softener and softening water. 2,104,956; Jan. 11.
Haalck, Hans, Potsdam, Germany, assignor to Askania-Werke A. G. vormals Centralwerkstatt-Dessau und Carl Bamberg-Friedenau. Gravitation measuring instrument. 2,104,149; Jan. 11.
Hagbo, Lars E., Bremerton, Wash. Wrench. 2,105,244; Jan. 11.
Hanle, Benjamin W., Elizabeth, N. J., assignor to Eagle Pencil Company. Fountain pen. 2,105,189; Jan. 11.
Hansell, Clarence W., Port Jefferson, N. Y., assignor to Radio Corporation of America. Frequency control. 2,104,931; Jan. 11.
Hansen, Aage C. C., Lindenau, N. J., assignor to Mack Manufacturing Corporation. Bevel pinion mounting for transmissions. 2,105,437; Jan. 11.
Hansen, Elmar H., Chicago, Ill. Pneumatic differential piston for internal combustion engines. 2,104,802; Jan. 11.
Hansen, Jack A., Matanuska, Alaska. Ice scraper for track motor cars. 2,105,416; Jan. 11.
Hansen-Van Winkle-Munning Company. (See Berger, Clarence E., assignor.)
Harding, Simon J., West Baldwin, Maine. Platform bracket for ladders. 2,104,887; Jan. 11.
Hardwicke-Etter Company. (See Streun, John A., assignor.)
Harris, Henry H., Boston, Mass. Metal surface. 2,105,253; Jan. 11.
Harrison, Charles F. B., Selley Oak, Birmingham, and A. B. Wallis, Clydach, England, assignors to The International Nickel Company Inc., New York, N. Y. Manufacture of nickel carbonyl. 2,105,037; Jan. 11.
Hartman, Hermanns, Roermond, assignor to Naamloose Vennootschap Industrielle Maatschappij Voorheen Noury & Van Der Lande, Deventer, Netherlands. Process and apparatus for producing percompounds. 2,105,438; Jan. 11.
Hat Corporation of America. (See Smith, John C., assignor.)
Haultain, Herbert E. T., Toronto, Ontario, Canada. Classifier. 2,104,926; Jan. 11.
Hearne, George. (See Grgll, H. P. A., and Hearne.)
Heddon, Charles L., Newark, N. J., and N. Cherkasoff, New York, N. Y. Bag. 2,105,319; Jan. 11.
Heidbrink, Jay A., Minneapolis, Minn. Anesthetizing machine. 2,104,988; Jan. 11.
Heil Co., The. (See Heil, Julius P., assignor.)
Heil Co., The. (See Thwaits, Frederick G., assignor.)
Heil, Julius P., assignor to The Heil Co., Milwaukee, Wis. Scraper. 2,105,320; Jan. 11.
Helwig, Walter O., Milwaukee, Wis. Brush for dynamo-electric machines. 2,105,038; Jan. 11.
Henderson, Douglas, Toronto, Ontario, Canada. Closure for tubes or containers. 2,105,118; Jan. 11.
Henke, Clyde O., Wilmington, Del., and H. M. Parmelee, Salem, N. J., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Separating higher aliphatic alcohols from aqueous emulsions. 2,104,803; Jan. 11.
Henke, Clyde O., Wilmington, Del., and R. G. Benner, Carneys Point, N. J., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Hydrogenation of alpha-nitronaphthalene. 2,105,321; Jan. 11.
Henkel & Cie. Gesellschaft mit beschränkter Haftung. (See Pape, L. F. W., and Umbach, assignors.)
Henne, Albert L. (See Midgley, T., Jr., Henne, and McNary.)
Henroteau, François C. P., assignor to Electronic Television Company, Limited, Ottawa, Ontario, Canada. Television method and apparatus. 2,104,862; Jan. 11.
Heraeus-Vacuumschmelze Aktiengesellschaft. (See Hessenbruch, Werner, assignor.)
Heraeus-Vacuumschmelze Aktiengesellschaft. (See Rohn, Wilhelm, assignor.)
Hercules Powder Company. (See Moore, Malcolm C., assignor.)
Herrick, Henry N. (See Lynton, E. D., and Herrick.)
Herrick, Henry N., Berkeley, assignor to Standard Oil Company of California, San Francisco, Calif. Correlating subsurface strata. 2,104,743; Jan. 11.
Herrle, Henry, New Orleans, La. Waistband fastener for undergarments. 2,105,417; Jan. 11.
Hertel, Richard K., Vernon, assignor to Byron-Jackson Co., Los Angeles, Calif. Elevator latch. 2,105,077; Jan. 11.
Hessenbruch, Werner, assignor to firm Heraeus-Vacuumschmelze Aktiengesellschaft, Hanau-on-the-Main, Germany. Heat-resisting implement. 2,104,835; Jan. 11.
Hessenbruch, Werner, assignor to firm Heraeus-Vacuumschmelze Aktiengesellschaft, Hanau-on-the-Main, Germany. Heat-resisting implement. 2,104,836; Jan. 11.
Hethcote, Edward, Holyoke, Colo. Adjustable rope halter. 2,105,285; Jan. 11.
Hicks, Earl M., Lebanon, Ind. Box body. 2,104,989; Jan. 11.
Hill Brothers Chemical Co. (See Hill, Charles B., assignor.)
Hill, Charles B., El Monte, assignor to Hill Brothers Chemical Co., Inc., Los Angeles, Calif. Proportioning device. 2,104,976; Jan. 11.
Hill, Frank M., Walpole, Mass. Heat conserver and humidifier. 2,104,804; Jan. 11.
Hinds, Howard W., assignor to The Washburn Company, Worcester, Mass. Ferrule for handles and attaching same. 2,105,119; Jan. 11.
Hinson, Odee C., and C. C. Dawson, assignors to Cramerton Mills, Cramerton, N. C. Pattern testing attachment for cobby looms. 2,104,946; Jan. 11.
Hirschhorn, Leo. (See Barrett, A., and Hirschhorn.)
Hoefer, Dudley D., San Leandro, Calif. Dispenser. 2,104,980; Jan. 11.
Hoerle, William F., assignor to Union Hardware Company, Torrington, Conn. Ball bearing skate wheel. 2,105,354; Jan. 11.
Hoest, Werner. (See Stern, G., and Hoest.)
Hoffman Gas & Electric Heater Company. (See Clark, Gordon H., assignor.)
Hoffstetter, Carl H. and R. F., Erie Pa. Broiler drawer for gas ranges and the like. 2,105,418; Jan. 11.
Hoffstetter, Robert F. (See Hoffstetter, Carl H. and R. F.)
Hofmeier, Hermann. (See Nowak, P., and Hofmeier.)
Hohl, Russell L., Shaker Heights, Ohio. Sheathing. 2,105,245; Jan. 11.
Holbut, Michael, Jennings, assignor to H & H Machine & Motor Parts Co., St. Louis, Mo. Carbon removing tool. 2,104,900; Jan. 11.
Höllerer, Hanns, assignor to Dr. Alexander Wacker Gesellschaft für Elektrochemische Industrie G. m. b. H., Munich, Bavaria, Germany. Apparatus for cleaning and degreasing articles. 2,104,901; Jan. 11.
Höllerer, Hanns, assignor to Dr. Alexander Wacker Gesellschaft für Elektrochemische Industrie, G. m. b. H., Munich, Bavaria, Germany. Machine for cleaning and degreasing articles. 2,104,902; Jan. 11.
Holmes, Henry S. (See Boehner, J. D., and Holmes.)
Holmes, Minot K. (See Zimmerman, W. F., and Holmes.)
Helsing, Claude J., South Orange, assignor to Electric Arc Cutting & Welding Company, Newark, N. J. Arc welding system. 2,105,079; Jan. 11.
Holub, Charles J., Columbus, Ohio, assignor to Wheeling Steel Corporation, Wheeling, W. Va. Apparatus for forming sheet metal elbows. 2,104,903; Jan. 11.
Honing, Wilhelm, Eindhoven, Netherlands, assignor to General Electric Company. Vehicle headlamp. 2,105,419; Jan. 11.
Hooper, F. X., Company. (See Fitchett, Thomas S., assignor.)
Horstead, George, assignor to Warrum Trailer Parts Manufacturing Company, Inc., Warren, Pa. Trailer. 2,105,204; Jan. 11.
Horst, Karl. (See Dieterle, W., and Horst.)
Hort, Florence F., New York, N. Y. Apron. 2,105,322; Jan. 11.
Hothersall, John M., Brooklyn, assignor to American Can Company, New York, N. Y. Pouring spout container. 2,104,744; Jan. 11.
Howell, Harry H. (See Sanders, C. E., Cannon, and Howell.)
Howell, Harry H., R. B. Rutledge, and C. E. Sanders, Kansas City, Mo., assignors to C. Leavenwood, trustee, Kansas City, Kans. Rocking hospital bed. 2,104,745; Jan. 11.
Hoyt, Herbert L. (See Wilcox, R. L., and Hoyt.)
Hubler, William G., and F. R. Archibald, Duparquet, Quebec, assignors to Ventures Limited, Toronto, Ontario, Canada. Treating lateritic ores. 2,105,456; Jan. 11.
Hueber, Carl J., Cleveland Heights, assignor by mesne assignments, to Addressograph-Multigraph Corporation, Cleveland, Ohio. Device for anchoring inking ribbons to spools. 2,104,746; Jan. 11.
Hueber, Carl J., Cleveland Heights, assignor, by mesne assignments, to Addressograph-Multigraph Corporation, Cleveland, Ohio. Listing mechanism for addressing machines. 2,104,747; Jan. 11.
Hueber, Carl J., Cleveland Heights, assignor, by mesne assignments, to Addressograph-Multigraph Corporation, Cleveland, Ohio. Platen mechanism for printing machines. 2,104,863; Jan. 11.
Huey, Harold L., Sayleeville, and W. W. Russell, East Providence, assignors to Sayles Finishing Plants, Inc., Sayleeville, R. I. Crisp sheer fabrics and making same. 2,104,748; Jan. 11.

Hughes, Frederick E., Port Loring, Ontario, Canada. Stove. 2,104,904; Jan. 11.
Hughes Tool Company. (See Neuhaus, R., Smith, and Payne, assignors.)
Hughes Tool Company. (See Schlumpf, R. W., and Sherman, assignors.)
Hughes Tool Company. (See Scott, Floyd L., assignor.)
Hughes Tool Company. (See Sherman, Ralph P., assignor.)
Hulme, Richard E., assignor to Kendall Refining Company Bradford, Pa. Method and apparatus for dispensing steam, air and the like, and use therefor. 2,105,039; Jan. 11.
Hunkeler, Walter F., Kansas City, Mo. Lens mounting. 2,105,420; Jan. 11.
Hunt, George H., Detroit, Mich., assignor to Bendix Aviation Corporation, South Bend, Ind. Brake. 2,105,223; Jan. 11.
Hunt, Joseph A., Shelby, N. C. Rifle attachment. 2,104,837; Jan. 11.
Hurst, Albert L., Winston-Salem, N. C. Hospital or invalid bed. 2,105,040; Jan. 11.
Hurst, Joseph N. (See Hurst, W. F., and Hurst.)
Hussmann, Harry L., Los Angeles, Calif. Brazier. 2,104,837; Jan. 11.
Hutchesson, William J., Russell, Ontario, assignor of one-half to H. J. Macpherson, Ottawa, Ontario, Canada. Combined peg-lock and guard for musical instruments. 2,104,906; Jan. 11.
Hüttenhain, Erik, Berlin-Wilmersdorf, and W. Czerny, Berlin-Friedenau, Germany, assignors to F. C. Anderson, Forest Hills Boro, Pa. Producing lightweight design. 2,105,324; Jan. 11.
Hydraulic Brake Company. (See McCallum, Andrew O., assignor.)
Hydraulic Press Corporation, The. (See MacMillin, Howard F., assignor.)
Hydraulic Press Corporation, The. (See Patrick, Isaac, assignor.)
Hygrade Sylvania Corporation. (See Cox, James L., assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Stern, G., and Hoest, assignors.)
Ichter, John H., Ashley, Pa., assignor, by mesne assignments to The Standard Stoker Company, Inc., New York, N. Y. Fuel distributing mechanism. 2,105,457; Jan. 11.
Imperial Chemical Industries Limited. (See Renfrew, Archibald, assignor.)
Imperial Chemical Industries Limited. (See Thomson, T. P., Anderson, and Thornley, assignors.)
Independent Lock Company. (See Falk, Bernard S., assignor.)
Ingersoll Milling Machine Company, The. (See Overbeke, Alexander, assignor.)
Ingersoll-Rand Company. (See Rygaard, Ernest G., assignor.)
Inglis, Henry B., Flint, Mich. Bomb sight and pilot director. 2,105,147; Jan. 11.
Inglis, Henry B., Fenton, Mich. Pilot director. 2,105,148; Jan. 11.
International Harvester Company. (See Graham, William S., assignor.)
International Harvester Company. (See Johnson, Arnold E. W., assignor.)
International Nickel Company Inc., The. (See Harrison, C. F. B., and Wallis, assignors.)
International Patents Development Company. (See Kelling, Alfred H., assignor.)
International Patents Development Company. (See McCoy, Bush O., assignor.)
Interstate Metal Products Co. (See Shobel, Louis W., assignor.)
Iowa State College Alumni Association, Incorporated. (See Bridgman, C. T., and Gross, assignors.)
Irish, Charles F. Bratenahl, Ohio. Tree loading and unloading mechanism. 2,105,253; Jan. 11.
Isberg, Johan E., Uttran, Sweden. Support for books and the like. 2,104,964; Jan. 11.
Ives, Charles Q., Reading, assignor to Sherman Paper Products Corporation, Newton, Mass. Manufacture of corrugated paper. 2,104,908; Jan. 11.
Jackson, Howard B., assignor to Nadder Mills, Inc., Kings Mountain, N. C. Woven fabric. 2,105,190; Jan. 11.
Jackson, John G., and R. H. Kingdon, assignors to Square D Company, Detroit, Mich. Mounting means for enclosed electric devices. 2,105,421; Jan. 11.
Jacobs Bros. Co. Inc., The. (See Kircher, Paul J., assignor.)
Jacobs, George, assignor of one-third to E. Goetz and one-third to J. Grant, Detroit, Mich. Excavating machine. 2,104,929; Jan. 11.
Jagschitz, Konrad, Mainz, Germany. Erecting collapsible gasholders. 2,105,040; Jan. 11.
Jakosky, John J., Los Angeles, Calif. Method and apparatus for electrical exploration of the subsurface. 2,105,247; Jan. 11.
Janiszewski, Stephen. (See Zenner, W. J., and Janiszewski.)
Jebeles, G. J. (See Sutherlin, Walter F., assignor.)
Jennings, Burton F., Belleville, Ontario, Canada. Circuit breaker. 2,105,286; Jan. 11.
Jobst, Gunther, and E. Kloth, assignors to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Amplifying tube and circuit. 2,105,061; Jan. 11.
Johnson, Arnold E. W., Chicago, Ill., assignor to International Harvester Company. Furrow opener for grain drills. 2,105,120; Jan. 11.
Johnson, Endre O., assignor of one-third to H. T. Quanbeck, McVille, N. Dak. Attachment for elevating graders. 2,105,422; Jan. 11.
Johnson, George F., and H. H. Wolfe, assignors to The Buckeye Steel Castings Company, Columbus, Ohio. Pilot and pilot coupler. 2,104,965; Jan. 11.
Johnson, George W., Cincinnati, assignor to The American Laundry Machinery Company, Norwood, Ohio. Chamber construction for washing machines. 2,105,249; Jan. 11.
Johnson, Joseph H., Easton, Mass. Venetian blind. 2,105,062; Jan. 11.
Johnson Laboratories, Inc. (See Crossley, A., and Johnson, assignors.)
Johnson, Le Baron B., Pennsville, N. Y., assignor to Delkin Products Inc. Apparatus for cleaning containers. 2,105,458; Jan. 11.
Johnson, Louis B., Baltimore, Md., assignor to Dow-Wahl Company, Inc. Load transfer device for roadways. 2,104,846; Jan. 11.
Jones, James L., Washington, D. C. Welding apparatus. 2,104,748; Jan. 11.
Jones, James L., Washington, D. C. Welding apparatus. 2,104,750; Jan. 11.
Jongsma, Leo B., Grand Rapids, Mich. Sanitary device. 2,104,947; Jan. 11.
Junghans, Helmut, Schramberg-Sulgen, Germany, Detonator. 2,105,423; Jan. 11.
Kaasa, Orin G. (See Kimball, T. B., and Kaasa.)
Kafka, Melvin T., New York, N. Y. Book cover. 2,105,041; Jan. 11.
Kagi, Walter W., La Grange, and R. Gillis, Hinsdale, Ill., assignors to Western Electric Company, Incorporated, New York, N. Y. Temperature control means for extrusion apparatus. 2,105,063; Jan. 11.
Kahn, David, Inc. (See Kahn, David, assignor.)
Kahn, David, Woodcliff, assignor to David Kahn, Inc., North Bergen, N. J. Pencil-mail container. 2,105,424; Jan. 11.
Kaplan, Julius, et al. (See Saffian, Samuel, assignor.)
Kaplan, Selig, et al. (See Saffian, Samuel, assignor.)
Karlbo, Edmond C. (See Pearce, R. S., and Karlbo.)
Karmazin, John, Huntington, Ind., assignor to Karmazin Engineering Company. Refrigerating apparatus. 2,105,121; Jan. 11.
Karmazin Engineering Company. (See Karmazin, John, assignor.)
Kay, John. (See Dembouki, L., and Kay.)
Keep, Oliver H. (See Masino, R., and Keep.)
Kegresse, Adolphe, Paris, France. Motor vehicle with variable propulsion. 2,105,042; Jan. 11.
Kelling, Alfred H., Oak Park, Ill., assignor to International Patents Development Company, Wilmington, Del. Manufacture of starch. 2,105,217; Jan. 11.
Kelsey-Hayes Wheel Company. (See Ash, Charles S., assignor.)
Kemp, Vivian F., London, England. Bust support. 2,104,857; Jan. 11.
Kendall Refining Company. (See Hulme, Richard E., assignor.)
Kendall, William J., Lansing, Ontario, Canada. Shaving device. 2,104,929; Jan. 11.
Kenney, Thomas, Robinson, assignor of one-fourth to S. S. Lee, Kenilworth, and L. J. Wilson, Winnetka, Ill. Cracking petroleum, etc. 2,105,791; Jan. 11.
Kent, James W., Brooklyn, and E. P. Peters, Richmond Hill, N. Y., assignors to Kent Machine Works, Inc. Roller mill. 2,105,192; Jan. 11.
Kent Machine Works, Inc. (See Kent, J. W., and Peters, assignors.)
Kessler, Paul P., Chicago, Ill. Sewing machine frame structure. 2,105,355; Jan. 11.
Kessler, Paul P., Chicago, Ill. Sewing machine. 2,105,356; Jan. 11.
Kessler, Paul P., Chicago, Ill. Sewing machine. 2,105,357; Jan. 11.
Keuffel, Adolf W., Montclair, assignor to Keuffel & Esser Company, Hoboken, N. J. Measuring tape. 2,105,149; Jan. 11.
Keuffel & Esser Company. (See Keuffel, Adolf W., assignor.)
Kilborn, Francis O. (See Root, L. P., and Kilborn.)
Kimball, Thomas B., Hammond, and O. G. Kaasa, Munster, Ind., assignors to Sinclair Refining Company, New York, N. Y. Cracking hydrocarbons. 2,105,122; Jan. 11.
Kingdon, Ralph H. (See Jackson, J. G., and Kingdon.)
Kinsie, Charles J., and E. Walner, Niagara Falls, assignors to The Titanium Alloy Manufacturing Company, New York, N. Y. Hydrated titanium-iron arsenates and making same. 2,105,459; Jan. 11.
Kirby, James B., West Richfield, assignor, by mesne assignments, to The Apex Electrical Manufacturing Company, Cleveland, Ohio, as trustee. Laundry machine. 2,105,218; Jan. 11.
Kircher, Paul J., assignor to The Jacobs Bros. Co. Inc., Brooklyn, N. Y. Scale. 2,105,219; Jan. 11.

Kirchner, Albert H. (See Barr, C. G., and Kirchner.)
Kitchen, John G. A., Bowness-on-Windermere, Westmoreland, England. Reciprocating engine. 2,105,043; Jan. 11.
Kivley, Ray C., Oak Park, and G. Stuhlfauth, Chicago, Ill., assignors to Western Electric Company, Incorporated, New York, N. Y. Article handling apparatus. 2,105,064; Jan. 11.
Klotz, Ernst. (See Jobst, G., and Klotz.)
Kocour, Emil J., assignor to Sloan Valve Company, Chicago, Ill. Vacuum breaking device for preventing back siphonage in water systems. 2,105,044; Jan. 11.
Korbuly, Károly, Csepel, Hungary, assignor to the firm Tube Industrial Participation Limited, Bregamona-Lugano. Tube push bench. 2,105,150; Jan. 11.
Kornblatt, Max, assignor of one-half to P. Kornblatt, Bronx, N. Y. Smoke baffling device. 2,105,151; Jan. 11.
Kornblatt, Philip. (See Kornblatt, Max, assignor.)
Kraft, Karl, Chicago, Ill. Bowling pin. 2,105,045; Jan. 11.
Krasnov, Samuel, Philadelphia, Pa. Making slip covers and the like. 2,105,123; Jan. 11.
Kraus, Clarence W., Buffalo, N. Y. Shingle staining machine. 2,104,868; Jan. 11.
Krein, Frederick T., Park Ridge, assignor to Dixie-Vortex Company, Chicago, Ill. Sundae package. 2,104,805; Jan. 11.
Kremer, William. (See Best, W. F., and Kremer.)
Kudrna, Benedikt. (See Lill, F., and Kudrna.)
Kunze, Wilhelm. (See Zerweck, W., and Kunze.)
Kyser, Walter A., Cadillac, Mich. Engine cooling and heating means for motor vehicles. 2,105,193; Jan. 11.
Laberda, Richard, Brooklyn, N. Y. Vehicle. 2,105,065; Jan. 11.
La Brie, Ludger E., assignor to Bendix Products Corporation, South Bend, Ind. Brake. 2,105,046; Jan. 11.
Lafamme, Herbert J. (See Hutcheson, William F., assignor.)
Lahr, Robert H., Takoma Park, Md. Stretcher for uniform cap covers. 2,105,047; Jan. 11.
Lang, Karl T., Coswig-Dresden, assignor to Dresden-Leipziger Schnellpressen-Fabrik-A. G., Coswig, Germany. Copper plate printing machine. 2,105,240; Jan. 11.
Lang, Walter S. (See Scully, E. T., and Lang.)
Lange, Gustav. (See Freudenberg, R., and Lange.)
Lange, Gustav. (See Freudenberg, Richard and H., Runbal, and Lange.)
Larsson-Latsén, Einar W., Malmo, Sweden. Card playing apparatus. 2,105,258; Jan. 11.
La Société à Responsabilité limitée dite "Irmone". (See d'Achon, Simone, assignor.)
Lattorf, Richard, Hanover, Germany, assignor to The United Limmer and Vorwohle Rock Asphalte Company Limited, London, England. Artificial slab. 2,105,152; Jan. 11.
Lauke, Grover, Los Angeles, R. C. Stevens, Beverly Hills, and C. M. Miller, assignors to Fox Film Corporation, Los Angeles, Calif. Motion picture camera. 2,104,948; Jan. 11.
Lauenstein, Carl F., and C. J. Brinkworth, Indianapolis, Ind., assignors to Link-Belt Company, Chicago, Ill. Composite article. 2,105,048; Jan. 11.
Lauenstein, Carl F., and C. J. Brinkworth, Indianapolis, Ind., assignors to Link-Belt Company, Chicago, Ill. Ferrous metal. 2,105,220; Jan. 11.
Lava Crucible Company of Pittsburgh. (See White, Harold E., assignor.)
Lawrence, Anna A., San Francisco, Calif. Nurse's cap. 2,104,997; Jan. 11.
Lawson, William L. (See Balsam, M. M., and Lawson.)
Leach, Verlin M. (See Marchev, A., and Leach.)
Leavengood, Clyde, Trustee. (See Howell, H. H., Rutledge, and Sanders, assignors.)
Leavengood, Clyde, Trustee. (See Sanders, C. E., Cannon, and Howell, assignors.)
Ledwinka, Hans, Koprivnice, Czechoslovakia. Motor vehicle chassis. 2,105,153; Jan. 11.
Lee, Gerhard M., Aurora, Ill. Match book case. 2,105,425; Jan. 11.
Lee, Sylvia S., et al. (See Kenney, Thomas, assignor.)
Le Fevre, Ralph A., Rochester, N. Y., assignor of one-fourth to P. E. Treat, one-fourth to M. Grassman, and one-fourth to C. D. Rouch. Puttee. 2,104,751; Jan. 11.
Leonard, Albert J., La Canada, Calif. Automobile door lock. 2,104,838; Jan. 11.
Levy, Austin T., Harrisville, R. I. Prefabricated building. 2,104,869; Jan. 11.
Levy, Austin T., Harrisville, R. I. Building. 2,104,870; Jan. 11.
Levy, Austin T., Harrisville, R. I. Building. 2,104,871; Jan. 11.
Levy, Austin T., Harrisville, R. I. Building. 2,104,872; Jan. 11.
Levy, Austin T., Harrisville, R. I. Building. 2,104,873; Jan. 11.
Levy, Austin T., Harrisville, R. I. Building. 2,104,874; Jan. 11.
Levy, Austin T., Harrisville, R. I. Prefabricated building. 2,104,875; Jan. 11.
Levy, Austin T., Harrisville, R. I. Prefabricated building. 2,104,877; Jan. 11.
Levy, Austin T. (See Magnuson, John H., assignor.)
Levy, Austin T. (See Wetherbee, John A., assignor.)
Lewis, Charles H. (See Urbain, Oliver M., assignor.)
Lewy, Hermann, Berlin-Charlottenburg, Germany. Collar stud to be sewn. 2,105,287; Jan. 11.
Liberty Can and Sign Company. (See Raeger, Herman W., assignor.)
Lill, Friedrich, and B. Kudrna, Vienna, Austria, assignors to Siemens & Halske Aktiengesellschaft, Wernerwerk, Siemensstadt, near Berlin, Germany. Impulse sender. 2,104,998; Jan. 11.
Linden, Carl E., Norwood, and R. H. McClellan, Hamilton, assignors to The Foedick Machine Tool Company, Cincinnati, Ohio. Spindle driving transmission. 2,105,288; Jan. 11.
Linderman Devices, Incorporated. (See Shaw, William C., assignor.)
Lindsey, Guy, Hawthorne, Fla. Refrigerating device. 2,104,879; Jan. 11.
Line Material Company. (See Earle, Ralph H., assignor.)
Line Material Company. (See Schultz, W. O., and Steinmayer, assignors.)
Link-Belt Company. (See Lauenstein, C. F., and Brinkworth, assignors.)
Lintner, Edwin J., Pittsburgh, Pa. Safetypin. 2,104,880; Jan. 11.
Liskin, Joseph, Brooklyn, and S. Stimmel, New York, assignors to Standard Corrugated Case Corporation, Long Island City, N. Y. Shipping case. 2,105,066; Jan. 11.
Little, Howard J., Fort Thomas, Ky., assignor, by mesne assignments, to The Andrews Steel Company. Protected tubing. 2,105,124; Jan. 11.
Lobdell, Edward J., Jr., assignor to The Lobdell-Emery Manufacturing Company, Alma, Mich. Press. 2,105,289; Jan. 11.
Lobdell-Emery Manufacturing Company, The. (See Lobdell, Edward J., Jr., assignor.)
Locke, Albert R., Oak Park, Ill. System for transmitting electrical energy. 2,105,194; Jan. 11.
Locke, Arthur S. (See Steinfeld, H. K., Galeen, and Locke.)
Lock-On Heel Company. (See Gordon, H., and Rogge, assignors.)
Lorig, Clarence H., assignor to The Battelle Memorial Institute, Columbus, Ohio. Cleaning the surface of solid metals. 2,105,439; Jan. 11.
Lummus Cotton Gin Co. (See McLemore, Robert E., assignor.)
Lungren, Arthur N., Evanston, assignor to The Wahl Company, Chicago, Ill. Pen. 2,105,049; Jan. 11.
Luts, Raymond P., Oak Park, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Condenser potting composition. 2,105,067; Jan. 11.
Lydon, Patrick J. (See Lydon, Timothy and P. J.)
Lydon, Timothy, Tenafly, and P. J. Lydon, Jersey City, N. J. Apparatus for humidifying textile yarns. 2,105,082; Jan. 11.
Lyman, Donald F., and J. Stolber, Rochester, N. Y., assignors, by mesne assignments, to Eastman Kodak Company, Jersey City, N. J. Warning signal for dissolving shutters. 2,105,250; Jan. 11.
Lynton, Edward D., Glendale, and H. N. Herrick, Berkeley, assignors to Standard Oil Company of California, San Francisco, Calif. Determining magnetic polarity. 2,104,752; Jan. 11.
MacDonald Engineering Company. (See Clever, Alexander, assignor.)
MacDonald, Clifford K., Brockton, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Method and apparatus for operating on shoes. 2,105,427; Jan. 11.
Mack Manufacturing Corporation. (See Hansen, Aage C. C., assignor.)
MacKay, Charles W., Tulsa, Okla. Well drilling rig. 2,105,091; Jan. 11.
Mackintosh, Charles, deceased, by E. Mackintosh, executrix, Ukiah, assignor of one-half to F. A. McDonald, San Francisco, Calif. Plant dusting machine. 2,104,930; Jan. 11.
Mackintosh, Effie, executrix. (See Mackintosh, Charles.)
MacMillan, Howard F., Mount Gilead, Ohio, assignor, by mesne assignments, to The Hydraulic Press Corporation, Inc., Wilmington, Del. Hydromechanical motor. 2,105,251; Jan. 11.
Madison Silo Company. (See Gurney, William W., assignor.)
Maglott, George F., Cranston, R. I., assignor to Brown & Sharpe Manufacturing Company. Gear pump seal. 2,105,428; Jan. 11.
Magnesium Development Corporation. (See Beck, Adolf, assignor.)
Magnuson, John H., assignor to A. T. Levy, Harrisville, R. I. Prefabricated building. 2,104,878; Jan. 11.
Maher, Maxine, Los Angeles, Calif. Breastplate cover pad. 2,105,290; Jan. 11.
Major, Randolph T. (See Addinall, C. R., and Major.)
Major, Randolph T., Plainfield, N. J., and A. B. Boese, Pittsburgh, Pa., assignors to Merck & Co., Inc., Rahway, N. J. Local anesthetic. 2,104,753; Jan. 11.
Malm, Carl J., Rochester, N. Y., assignor, by mesne assignments, to Eastman Kodak Company, Jersey City, N. J. Hydrolysis of cellulose esters. 2,105,252; Jan. 11.

Malott, Clifton S., Jr., assignor to The American Laundry Machinery Company, Norwood, Ohio. Fluid control for fluid-operated presses. 2,105,253; Jan. 11.
Mandell, Irving F., North Quincy, Mass., assignor to Reinforced Paper Bottle Corporation, New York, N. Y. Cap form feeding attachment for paper bottle capping machines. 2,104,931; Jan. 11.
Manning, Bruce H. (See Crombie, J. B., and Manning.)
Marchant, Guy O., et al. (See Walker, Jay P., assignor.)
Marchev, Alfred, La Grange, Ill., and V. M. Leach, Bushville, Ind., assignors to Ditto, Incorporated, Chicago, Ill. Duplicating apparatus. 2,105,195; Jan. 11.
Marden, Oscar W., Drexel Hill, Pa. Stocking. 2,104,901; Jan. 11.
Markowitz, Oscar, New York, N. Y. Inspection wrapper for necktie nets. 2,104,999; Jan. 11.
Marks, Alvin M., Whitestone, N. Y. Crystalline formation. 2,104,949; Jan. 11.
Markush, Eugene A., Jersey City, and J. Miller, Newark, N. J., assignors to Pharma Chemical Corporation, New York, N. Y. Dye solution. 2,105,326; Jan. 11.
Marsh, Benjamin H. (See Marsh, Daniel W. and B. H.)
Marsh, Daniel W. and B. H., Oakland, Calif. Manufacture of complex metallic salt. 2,104,784; Jan. 11.
Marsh, Emma L. (See Brennan, J. B., and Marsh.)
Marshall, James K. (See Soref, H. E., and Marshall.)
Martin, Charles H., et al. (See Meinholt, Charles L., assignor.)
Martin, Erle, West Hartford, assignor to United Aircraft Corporation, East Hartford, Conn. Mechanical synchronizing device. 2,105,095; Jan. 11.
Martin, Fred P., et al. (See Meinholt, Charles L., assignor.)
Martin, Lawrence R., Rochester, N. Y., assignor, by mesne assignments, to Eastman Kodak Company, Jersey City, N. J. Film guide for film magazines. 2,105,254; Jan. 11.
Maschinenfabrik Carl Zange A.-G. (Herm Schroers Nachf.). (See Derner, Heinrich, assignor.)
Masino, Ruth, and O. H. Kemp, deceased, by R. Masino, executrix, Memphis, Tenn., assignors to R. M. George, Vicksburg, Miss. Combination cotton tie buckle and identification tag. 2,104,765; Jan. 11.
Master Lock Company. (See Soref, H. E., and Marshall, assignors.)
Master Safe Co., The. (See Murtaugh, John J., Jr., assignor.)
Matheny, Roy. (See Gibson, Florian G., assignor.)
Mathieson Alkali Works, Inc., The. (See Petroe, Gregory A., assignor.)
Maul, Michael, Berlin-Biesdorf, Germany. Record card controlled machine. 2,105,201; Jan. 11.
Maxon, Norman G., Ladysmith, Wis. Spray nozzle. 2,105,154; Jan. 11.
Maybach, Karl, assignor to Maybach-Motorenbau G. m. b. H., Friedrichshafen, Germany. Clutch operating means on motor vehicles. 2,105,429; Jan. 11.
Maybach-Motorenbau G. m. b. H. (See Maybach, Karl, assignor.)
McBrady, John A., Valley City, N. Dak. Grain scouring machine. 2,105,325; Jan. 11.
McCabe, E. B. (See Evans, Edwin J., assignor.)
McCann, Paul S., La Grange, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Reel. 2,105,060; Jan. 11.
McCauley, Ernest G., Pittsburgh, Pa. Brake operating mechanism. 2,105,196; Jan. 11.
McClellan, Raymond H. (See Linden, C. E., and McClellan.)
McCollum, Andrew O., assignor to Hydraulic Brake Company, Detroit, Mich. Ironing machine. 2,104,950; Jan. 11.
McCoy, Rush O., Berwyn, Ill., assignor to International Patents Development Company, Wilmington, Del. Starch conversion. 2,105,221; Jan. 11.
McCrea, Adelia, assignee to Parke, Davis & Company, Detroit, Mich. Medicament. 2,105,197; Jan. 11.
McCulloch, Leon. (See Strom, A. P., Dennalt, and McCulloch.)
McDonald, Frank A. (See Mackintosh, Charles, assignor.)
McKee, Garnet W. (See Campbell, Donald A., assignor.)
McLemore, Robert E., assignor to Lummus Cotton Gin Co., Columbus, Ga. Vacuum wheel. 2,104,881; Jan. 11.
McManus, Charles B., Spring Lake, N. J. Processing metal. 2,105,426; Jan. 11.
McNamara, Denis, New York, N. Y. Wall and ceiling partition tie. 2,105,327; Jan. 11.
McNamara, William L., assignor to Capstan Glass Company, Connellsville, Pa. Heat control mechanism. 2,105,198; Jan. 11.
McNary, Robert R. (See Midgley, T., Henne, and McNary.)
McNeil, James W., Tampa, Fla. Adjustable double closure for containers. 2,104,806; Jan. 11.
Mead Johnson & Company. (See Winkler, Joseph C., assignor.)
Meinema, Herbert E. (See Crossley, A., and Meinema.)
Meinholdt, Charles L., assignor of one-fourth to F. P. Martin and one-fourth to C. H. Martin, Topeka, Kans. Mower. 2,105,125; Jan. 11.
Merck & Co. (See Addinall, C. R., and Major, assignors.)
Merck & Co. (See Major, R. T., and Boese, assignors.)
Mergenthaler Linotype Company. (See Frolander, Frank C., assignor.)
Metcalf, Herbert E., Oakland, Calif., assignor, by mesne assignments, to General Electric Company, Cleveland, Ohio. Electric lamp. 2,105,430; Jan. 11.
Metropolitan Engineering Company. (See Soehner, J. D., and Holmes, assignors.)
Meyer, Adolph F., Minneapolis, Minn. Manometer. 2,105,000; Jan. 11.
Meyer, Wilfried. (See Wiegand, E., Meyer, and Pulfrich.)
Merck & Co. Inc. (See Engels, W. H., and Stein, assignors.)
Michaelis, Walter, assignor to Siemens & Halske Aktiengesellschaft, Wernerwerk Siemensstadt near Berlin, Germany. Telephone system. 2,105,001; Jan. 11.
Micromatic Hone Corporation. (See Connor, Kirke W., assignor.)
Micro-Westco, Inc. (See Petskeyes, Charles H., assignor.)
Midgley, Thomas, Jr., Worthington, A. L. Henne, Columbus, and R. R. McNary, assignors to General Motors Corporation, Dayton, Ohio. Heat transfer and refrigeration. 2,104,882; Jan. 11.
Midland Steel Products Company, The. (See Almdale, Einar, assignor.)
Mihalyi, Joseph, Rochester, N. Y., assignor, by mesne assignments, to Eastman Kodak Company, Jersey City, N. J. Camera. 2,105,256; Jan. 11.
Mihalyi, Joseph, and N. B. Green, Rochester, N. Y., assignors, by mesne assignments, to Eastman Kodak Company, Jersey City, N. J. Exposure meter. 2,105,255; Jan. 11.
Miller, Bert C., Inc. (See Miller, Bert C., assignor.)
Miller, Bert C., Montclair, N. J., assignor to Bert C. Miller, Inc., New York, N. Y. Manufacture of metal coated paper. 2,105,440; Jan. 11.
Miller, Charles A., assignor to The Yale & Towne Manufacturing Company, Stamford, Conn. Timelock. 2,105,441; Jan. 11.
Miller, Charles M. (See Laube, G., Stevens, and Miller.)
Miller, Howard A. (See Dahlenmeyer, Homer, assignor.)
Miller, Julius. (See Markush, E. A., and Miller.)
Miller, Marguerite, Great Neck, N. Y. Hat. 2,105,002; Jan. 11.
Minneapolis-Honeywell Regulator Company. (See Cunningham, Lewis L., assignor.)
Mladinich, Thomas C., New York, N. Y. Sewing machine for fur and the like. 2,104,807; Jan. 11.
Mohler, Francis, and L. A. Umansky, Schenectady, N. Y., assignors to General Electric Company. Control system. 2,105,431; Jan. 11.
Molitor, Frederick R., New York, N. Y. Reciprocating bed motion for flat bed presses. 2,105,328; Jan. 11.
Môme, Marcel, Paris, France. Electrical clock device. 2,105,050; Jan. 11.
Monsanto Chemical Company. (See Udy, Marvin J., assignor.)
Monsanto Chemical Company. (See Wilson, John A., assignor.)
Moore Fabric Company. (See Moore, John V., assignor.)
Moore, John V., assignor to Moore Fabric Company, Pawtucket, R. I. Stiffening rib for supporting garments. 2,105,257; Jan. 11.
Moore, Malcolm C., Newark, assignor to Hercules Powder Company, Wilmington, Del. Nitrocellulose emulsions. 2,105,159; Jan. 11.
Morch, Jacob J., Toronto, Ontario, Canada. Ore crushing machine. 2,105,003; Jan. 11.
Moreau, Celestin. (See Saelens, E., and Moreau.)
Morgan Construction Company. (See O'Malley, Joseph M., assignor.)
Morgan, John S., near Wingate, England. Apparatus for heating coal. 2,105,156; Jan. 11.
Morrison, Simon, New York, N. Y. Lipstick holder or the like. 2,104,902; Jan. 11.
Morrow, John C., assignor to Morrow Lubricator Company, Chicago, Ill. Lubricator valve construction. 2,104,903; Jan. 11.
Morrow, John C., assignor to Morrow Lubricator Company, Chicago, Ill. Tip. 2,104,904; Jan. 11.
Morrow, John C., assignor to Morrow Lubricator Company, Chicago, Ill. Lubricator construction. 2,104,905; Jan. 11.
Morrow Lubricator Company. (See Morrow, John C., assignor.)
Mortenson, John, Canton, Ohio. Furnace. 2,105,004; Jan. 11.
Morton, Harold S., St. Paul, Minn. Method and apparatus for controlling fuel beds. 2,104,883; Jan. 11.
Moss, Benjamin F. (See Carpenter, O. L., and Moss.)
Moss, Thomas E., Dyersburg, Tenn. Ashtray and coaster. 2,105,157; Jan. 11.
Motor City Tool Co. (See Amico, Joseph, assignor.)
Mueller, Henry, and H. E. Walters, assignors to United Engineering & Foundry Company, Pittsburgh, Pa. Means for casting rolls. 2,104,906; Jan. 11.
Murray, John, Mimbridge, Chobham, England. Bookbinding. 2,105,222; Jan. 11.
Murtaugh, John J., Jr., Floral Park, N. Y., assignor to The Mosler Safe Co., Hamilton, Ohio. Cash receiver. 2,105,442; Jan. 11.
Myers, George W., Bushnell, Fla. Dispensing attachment for beverage containers. 2,105,051; Jan. 11.
N. V. Machinerieen-en Apparaten Fabrieken "Mea". (See Dillenbach, Walter, assignor.)

Naamloose Vennootschap Industrielle Maatschappij Voorheen Noury & Van Der Lande. (See Hartman, Hermanus, assignor.)

Nachman Spring-Filled Corporation. (See Gleason, William W., assignor.)

Nachman Spring-Filled Corporation. (See Zimmerman, Fred R., assignor.)

Nash-Kelvinator Corporation. (See Weymouth, Lawrence R., assignor.)

National Blank Book Company. (See Schade, Frank S., assignor.)

National Blank Book Company. (See Schade, John, assignor.)

National Lock Washer Company, The. (See Blessin, Siegfried E., assignor.)

National Machinery Company, The. (See Friedman, John H., assignor.)

National Traffic Signal Company. (See Olafson, Alvin O., assignor.)

Neely, Frank R., assignor to A. H. Balllet Corporation, Allentown, Pa. Composite box and manufacture thereof. 2,105,359; Jan. 11.

Neighbors, Charles C., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Magnetic material. 2,105,092; Jan. 11.

Neisler Mills, Inc. (See Jackson, Howard B., assignor.)

Neuhaus, Ralph, and F. S. Smith, Jr., Houston, and L. L. Payne, Midland, assignors to Hughes Tool Company, Houston, Tex. Flow head. 2,104,808; Jan. 11.

Neumann, David, Chicago, Ill. Venetian blind. 2,104,907; Jan. 11.

New Era Manufacturing Company. (See Busk, Anthony S., assignor.)

New Jersey Zinc Company, The. (See Pellett, Jackson S., assignor.)

Newman, Albert H., Chicago, Ill. Display container. 2,105,199; Jan. 11.

Nicholides, Emmanuel C. (See Pearson, H. A., and Nicholides.)

Nicholl, Inc. (See Nicholl, Lyle C., assignor.)

Nicholl, Lyle C., assignor to Nicholl, Inc., Los Angeles, Calif. Hair clipper. 2,105,223; Jan. 11.

Nier, Bruno, Beierfeld, Germany. Hurricane lantern. 2,105,292; Jan. 11.

Nier, Bruno, Beierfeld, Germany. Storm lantern. 2,105,432; Jan. 11.

Noble, Percy W., Unadilla, N. Y. Device for conditioning the intake air to carburetors. 2,105,433; Jan. 11.

Noble, Warren, Michigan City, Ind., assignor to Sullivan Machinery Company. Pumping device. 2,105,093; Jan. 11.

Nodland, Henry, Starbuck, Minn. Ice pushmobile. 2,105,360; Jan. 11.

North American Holding Corporation et al. (See Avery, Alfred H., assignor.)

Nowak, Paul, Berlin-Charlottenburg, Germany, assignor to General Electric Company, Schenectady, N. Y. Compounds of polymerized acrylic acid or its esters with sulphur or selenium and making the same. 2,105,361; Jan. 11.

Nowak, Paul, and H. Hofmeier, Berlin-Charlottenburg, Germany, assignors to General Electric Company, Schenectady, N. Y. Insulated electrical conductor. 2,105,362; Jan. 11.

Nowak, Paul, and H. Hofmeier, Berlin-Charlottenburg, Germany, assignors to General Electric Company. Synthetic compound and its production. 2,105,363; Jan. 11.

Nowak, Paul, Charlottenburg, Germany, assignor to General Electric Company. Resinous thermoplastic materials. 2,105,364; Jan. 11.

Oakes, William R., trustee, et al. (See Bradford, C., and Scollon, assignors.)

Oakite Products, Inc. (See Johnson, Le Baron B., assignor.)

Oberhoffken, Alexander, assignor to The Ingersoll Milling Machine Company, Rockford, Ill. Metal removing machine. 2,104,756; Jan. 11.

O'Dowd, Leslie J., Drummondville, Quebec, Canada, assignor to Celanese Corporation of America. Device for twisting yarn. 2,104,809; Jan. 11.

O'Dowd, Leslie J., Drummondville, Quebec, Canada, assignor to Celanese Corporation of America. Twisting yarn. 2,104,810; Jan. 11.

Ohio Nut & Bolt Company, The. (See Dembecki, L., and Kay, assignors.)

Oilgear Company, The. (See Ferris, Walter, assignor.)

O'Kase, Walter C., Durham, N. H. Insecticide spray. 2,104,787; Jan. 11.

Olafson, Alvin O., assignor to National Traffic Signal Company, St. Paul, Minn. Signal. 2,104,932; Jan. 11.

Olsen, Gilbert, assignor to Sanitary Mattress Company, Minneapolis, Minn. Mattress and making. 2,105,224; Jan. 11.

Oltmans, Johan, Groningen, Netherlands. Manufacturing paper. 2,105,082; Jan. 11.

O'Malley, Joseph M., assignor to Morgan Construction Company, Worcester, Mass. Method of and apparatus for rolling rounds. 2,105,258; Jan. 11.

Orlowsky, Wassyl, New York, N. Y. Mechanical loader and unloader. 2,105,329; Jan. 11.

Oshel, Charles H., Detroit, Mich. Accessory air pump for motor vehicles. 2,105,269; Jan. 11.

Owens-Illinois Glass Company. (See Zimmerman, W. P., and Holmes, assignors.)

Pacific Alkali Company. (See Dolley, Paul T., assignor.)

Packard Motor Car Company. (See Best, Frank C., assignor.)

Packard Motor Car Company. (See Paten, Clyde R., assignor.)

Pagenkopf, Walter H., La Grange, assignor to Teletype Corporation, Chicago, Ill. Tool holder. 2,105,230; Jan. 11.

Panaretti, Roberto, Nutley, N. J., assignor to Excelsior Accordion Manufacturing Co. Inc., New York, N. Y. Accordion. 2,105,365; Jan. 11.

Panos, Apostole, Long Beach, Calif. Shoe stretcher. 2,104,839; Jan. 11.

Pape, Louis F. W., and H. Umbach, Duesseldorf-Benrath, assignors to the firm Henkel & Cie. Gesellschaft mit beschränkter Haftung, Duesseldorf, Germany. Manufacture of nondepositing liquid soaps. 2,105,366; Jan. 11.

Parke, Davis & Company. (See McCrea, Adelia, assignor.)

Parker, Arthur H. (See Sebell, Harry, assignor.)

Parmelee, Howard M. (See Hoake, C. O., and Parmelee.)

Parshad Holding Corporation, et al. (See Avery, Alfred H., assignor.)

Parsons, Philip D., Swarthmore, assignor to Scott Paper Company, Chester, Pa. Wrapper or label for toilet packages. 2,105,367; Jan. 11.

Parsons, Philip D., Swarthmore, assignor to Scott Paper Company, Chester, Pa. Toilet roll package. 2,105,368; Jan. 11.

Patent License Corporation. (See Arenberg, Albert L., assignor.)

Paten, Clyde R., Birmingham, assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle. 2,105,369; Jan. 11.

Patrick, Isaac, Mount Gilead, Ohio, assignor, by mesne assignments, to The Hydraulic Press Corporation, Inc., Wilmington, Del. Four-point hydraulically operated press. 2,105,053; Jan. 11.

Paul, Lawrence A., Los Angeles, Calif. Dispenser. 2,105,370; Jan. 11.

Paulin, Georges A., Malakoff, France. Convertible body for vehicles, and particularly for motor vehicles. 2,105,293; Jan. 11.

Payne, Lyle L. (See Neuhaus, R., Smith, and Payne.)

Peale, Richard, trustee, et al. (See Bradford, C., and Scollon, assignors.)

Pearce, Edwin S., assignor to Railway Service & Supply Corporation, Indianapolis, Ind. Apparatus for and treating fibrous waste for journal box use. 2,105,094; Jan. 11.

Pearce, Edwin S., and E. C. Karibo, assignors to Transportation Devices Corporation, Indianapolis, Ind. Speedometer. 2,105,158; Jan. 11.

Pearce, George C., Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation. Motor control. 2,105,005; Jan. 11.

Pearson, Harry A., Brooklyn, and E. C. Nicholides, Bronx, assignors to Sonotone Corporation, New York, N. Y. Hearing aid. 2,105,296; Jan. 11.

Peddle, Mary L., Pawtucket, R. I. Hair curler and waver. 2,105,371; Jan. 11.

Pellett, Jackson S., Franklin, N. J., assignor to The New Jersey Zinc Company, New York, N. Y. Classification. 2,105,126; Jan. 11.

Pennant Knitting Mills. (See Saftlas, Samuel, assignor.)

Peter, Charles. (See Giger, W., and Peter.)

Peters, Elmer P. (See Kent, J. W., and Peters.)

Peterson, Alfred G., Milton, Mass. Portable partition. 2,105,095; Jan. 11.

Peterson, Harold O., Riverhead, N. Y., assignor to Radio Corporation of America. Frequency compensator for an oscillation generator. 2,105,096; Jan. 11.

Petroe, Gregory A., Niagara Falls, assignor to The Mathieson Alkali Works, Inc., New York, N. Y. Fluid meter. 2,105,127; Jan. 11.

Petskeyes, Charles H., Davenport, assignor to Micro-Westco, Inc., Bettendorf, Iowa. Wrapping machine. 2,105,159; Jan. 11.

Pfister, Arthur, Woodside, N. Y., assignor to Radio Corporation of America. Variable acoustical reverberation system. 2,104,811; Jan. 11.

Pfisterer, George R., assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway signaling. 2,105,260; Jan. 11.

Pharma Chemical Corporation. (See Martoub, E. A., and Miller, assignors.)

Phelps Dodge Copper Products Corporation. (See Staples, Horace A., assignor.)

Phelps, High C., Milwaukee, Wis. Surgical pump. 2,105,300; Jan. 11.

Philad Company, The. (See Decker, George, assignor.)

Phillips, Cleopatra L. E. O. H. T. and E. B., Walmer, England. Machine for closing and sealing cartons. 2,104,906; Jan. 11.

Phillips, Eileen B. (See Phillips, Cleopatra L. E. O. H. T. and E. B.)

Phillips, William B., Birmingham, Mich., assignor to General Motors Corporation, Detroit, Mich. Nickel anode and container. 2,104,812; Jan. 11.

Pickard, Joseph, Chicago, Ill. Burglar alarm switch. 2,105,006; Jan. 11.

Pieper, Chester R., La Crosse, Wis. Heat exchanger. 2,104,813; Jan. 11.

Piquerez, Emile, St. Cloud, France. Apparatus for emptying drums or containing very thick lubricants or other viscous materials. 2,105,140; Jan. 11.

Plane, John F., Long Beach, Calif. Kite string rider. 2,105,128; Jan. 11.

Platt, Stephen A., assignor to U. S. Manufacturing Corporation, Decatur, Ill. Handle for implements, utensils, and the like. 2,105,161; Jan. 11.

Pöhler, Bruno, Kassel, Hohenzollernstr., Germany. Cylinder machine. 2,105,221; Jan. 11.

Pollack, Adolph H., New York, N. Y. Umbrella. 2,105,225; Jan. 11.

Poole, Jesse V., Abington, assignor to Puritan Manufacturing Company, Boston, Mass. Sewing machine with roller feed. 2,105,077; Jan. 11.

Poppe, George W., assignor to Equitable Paper Bag Co. Inc., Brooklyn, N. Y. Process and machine for making window bags. 2,104,814; Jan. 11.

Poppen, John R., U. S. Navy. Method and apparatus for controlling the distribution and pressure of certain human body fluids and contents. 2,104,758; Jan. 11.

Posthuma, Meindert, Worcester, Mass. Gauge for measuring angles. 2,105,054; Jan. 11.

Potash Company of America. (See Weinig, Arthur J., assignor.)

Pratt, Francis G., Seattle, Wash. Group test strip. 2,105,220; Jan. 11.

Pratt, William A., Watford, England, assignor to The F. P. Rosback Company, Benton Harbor, Mich. Wire stitching machine. 2,105,372; Jan. 11.

Prentiss-Wabers Products Co. (See Yeager, Anton J., assignor.)

Press, Carl, South Bend, Ind. Brake. 2,105,297; Jan. 11.

Price, Bailey E., Dallas, Tex. Fluid meter. 2,105,262; Jan. 11.

Pulfrich, Hans. (See Wiegand, E., Meyer, and Pulfrich.)

Puritan Manufacturing Company. (See Poole, Jesse V., assignor.)

Puritan Manufacturing Company. (See Valentine, Percy W., assignor.)

Quanbeck, Henry T. (See Johnson, Rodes O., assignor.)

Quarnstrom, Bert L., assignor to Bundy Tubing Company, Detroit, Mich. High pressure tube and making same. 2,104,884; Jan. 11.

Radio Corporation of America. (See Braden, Rene A., assignor.)

Radio Corporation of America. (See Evans, John, assignor.)

Radio Corporation of America. (See Hansell, Clarence W., assignor.)

Radio Corporation of America. (See Peterson, Harold O., assignor.)

Radio Corporation of America. (See Pfister, Arthur, assignor.)

Radio Corporation of America. (See Shrader, Terry M., assignor.)

Radio Corporation of America. (See Sinnett, C. M., and Guedon, assignors.)

Radio Corporation of America. (See Thompson, Browder J., assignor.)

Radio Corporation of America. (See van Geel, William C., assignor.)

Railway Service & Supply Corporation. (See Pearce, Edwin S., assignor.)

Randel, Bo F., San Diego, Calif. removing gases from liquids. 2,104,759; Jan. 11.

Rasmussen, Hans J. M., Chicago, Ill. Faucet. 2,105,331; Jan. 11.

Raub, Frederic H., South Orange, assignor to J. Wise & Sons Co., Newark, N. J. Bumper for hedge shears. 2,105,332; Jan. 11.

Ready, William A., Brookline, Mass., assignor to Ames Baldwin Wyoming Co., Parkersburg, W. Va. Shovel or like tool. 2,105,007; Jan. 11.

Reece, Alfa D. (See Reece, Mae G. and A. D., and Bergman.)

Reece, Mae G. and A. D., and G. E. Bergman, assignors to Reece Wooden Sole Shoe Company, Inc., Columbus, Nebr. Industrial shoe. 2,105,263; Jan. 11.

Reece Wooden Sole Shoe Company. (See Reece, Mae G. and A. D., and Bergman, assignors.)

Read, Herbert V., London, England. Apparatus for the generation of foam for fire extinction. 2,105,264; Jan. 11.

Reilly, Alfred F., assignor to Evans Case Company, North Attleboro, Mass. Ornamentation. 2,105,265; Jan. 11.

Reinforced Paper Bottle Corporation. (See Mandell, Irving F., assignor.)

Rendall, William S., assignor to Crown Cork & Seal Company, Inc., Baltimore, Md. Method of and apparatus for proportioning and blending glass batch materials and the like. 2,105,266; Jan. 11.

Renette Company. (See Bleiman, George H., assignor.)

Renfrew, Archibald, Norton-on-Tees, England, assignor to Imperial Chemical Industries, Limited. Plastic materials. 2,104,760; Jan. 11.

Renshaw, Alfred P. R., Kingston Hill, assignor, by mesne assignments, to Automatic Telephone & Electric Company, Limited, London, England. Traffic control system. 2,105,443; Jan. 11.

Reverman, George H., Miami, Fla. Display device. 2,104,951; Jan. 11.

Reynolds Wire Co. (See Thompson, Herbert L., assignor.)

Ribbon Mills Corporation, The. (See Flatto, George, assignor.)

Richheimer, Isaac D., New York, N. Y. Locking cover for pots. 2,105,201; Jan. 11.

Richter, Carl E., Schenectady, N. Y. Welding and cutting torch. 2,104,761; Jan. 11.

Richter, Emil F. and J. E. Garrett, assignors to Airtcraft Silk Hosiery Mills, Inc., Philadelphia, Pa. Thread carrier device. 2,104,815; Jan. 11.

Richter, Richard E., Montgomery, Minn. Finger ring and making the same. 2,105,227; Jan. 11.

Riddell, William A., assignor to Eastman Kodak Company, Rochester, N. Y. Shutter trigger latch. 2,105,236; Jan. 11.

Ridgers, Frederick G., assignor to N. Slater Company Limited, Hamilton, Ontario, Canada. Wire counselor. 2,105,120; Jan. 11.

Ridley, William. (See Wilson, P. H., and Ridley.)

Riley, Henry M., Manhasset, N. Y. Device having decorated transparencies. 2,105,005; Jan. 11.

Rinear, William B., Cincinnati, Ohio. Safety water light. 2,104,762; Jan. 11.

Ritter, Ellwood, Norristown, Pa., assignor to The Continental-Diamond Fibre Company, Newark, Del. Combination cornerpiece and shoe clamp for boxes. 2,105,373; Jan. 11.

Robbins, George A., Hilliar Township, Knox County, Ohio. Button fastener. 2,104,885; Jan. 11.

Roberts, Glyn P., Birmingham, England, assignor to Bendix Products Corporation, South Bend, Ind. Brake. 2,105,298; Jan. 11.

Roberts, Glyn P., Birmingham, England, assignor to Bendix Products Corporation, South Bend, Ind. Brake. 2,105,299; Jan. 11.

Robertson, John H., London, England. Charge cooler. 2,105,267; Jan. 11.

Robinson, Adrian A., Chicago, Ill., assignor to Wilson & Co., Inc. Molding powder and product. 2,105,269; Jan. 11.

Robinson, Adrian A., Chicago, Ill., assignor to Wilson & Co., Inc. Laminated product. 2,105,268; Jan. 11.

Roebling's, John A., Sons, Company. (See Sunderland, Charles C., assignor.)

Roebuck, Alvah C., Evanston, Ill. Convertible material working machine. 2,105,009; Jan. 11.

Roehm, William A., Ingabrook, N. Y. Spraying device and refill for same. 2,104,763; Jan. 11.

Rogge, Albert C. (See Gordon, H., and Rogge.)

Rohn, Wilhelm, assignor to the firm Heraeus-Vacuumschmelze Aktiengesellschaft, Hanau-on-the-Main, Germany. Electrically heated annealing furnace. 2,104,883; Jan. 11.

Root, Le Roy P., Brooklyn, N. Y., and F. O'L. Killorin, Watertown, Conn., assignors to Scovill Manufacturing Company, Waterbury, Conn. Combined bottle closure and liquid dispenser. 2,105,202; Jan. 11.

Roshack, F. P., Company, The. (See Pratt, William A., assignor.)

Rossman, Lee, Newark, N. J. Duplex separable fastener. 2,105,223; Jan. 11.

Rothe, Horst, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Electron discharge device. 2,104,816; Jan. 11.

Rouch, Clayton D., et al. (See Le Fevre, Ralph A., assignor.)

Rubin, Samuel, New Rochelle, N. Y. Photoelectric relay. 2,104,817; Jan. 11.

Ruegg, Herman W., assignor to Liberty Can and Sign Company, Lancaster, Pa. Dispenser or container. 2,104,887; Jan. 11.

Runkel, Roland. (See Freudenberg, Richard and H., Runkel, and Lange.)

Russell, Frank N., Oakland, Calif. Carburetor. 2,105,300; Jan. 11.

Russell, William W. (See Huey, H. L., and Russell.)

Rutledge, Richard B. (See Howell, H. H., Rutledge, and Sanders.)

Rykaczewski, John A., Braddock, Pa. Brake operating mechanism. 2,104,900; Jan. 11.

Saelens, Edmond, St. Boniface, and C. Moreau, Notre Dame des Lourdes, Manitoba, Canada. Switch for fire prevention devices for motion picture machines. 2,104,952; Jan. 11.

Saftlas, Samuel, New York, assignor to J. Kaplan and S. Kaplan, co-partners doing business as Pennant Knitting Mills, Brooklyn, N. Y. Fabric. 2,105,301; Jan. 11.

Sager, Felix & Dr. Gessler Gesellschaft mit beschränkter Haftung. (See Steigmann, Albert, assignor.)

Samson-United Corporation. (See Samuels, Abe O., assignor.)

Samuels, Abe O., assignor to Samson-United Corporation, Rochester, N. Y. Round heel iron. 2,105,329; Jan. 11.

Sanders, Clarence E. (See Howell, H. H., and Rutledge, and Sanders.)

Sanders, Clarence E., J. A. Cannon, and H. H. Howell, Kansas City, Mo., assignors to Clyde Leavengood, trustee, Kansas City, Kans. Rocking platform for therapeutic treatments. 2,104,764; Jan. 11.

Sanders, John C., assignor to Boeing Aircraft Company, Seattle, Wash. Retractable gun mount. 2,105,053; Jan. 11.

Sanitary Mattress Company. (See Olson, Gilbert, assignor.)

Santman, Jan E., Overum, Sweden. Plow. 2,105,162; Jan. 11.

Sartell, Page M., Farmingdale, N. Y. Fuel-gas and air carburetor. 2,105,056; Jan. 11.

Saulnier, Raymond, Paris, France. Tail device for airplanes. 2,105,374; Jan. 11.

Saunders, Norman H., assignor to Associated Electric Laboratories, Inc., Chicago, Ill. Telephone system. 2,105,012; Jan. 11.

Saunders, Walter S., assignor to The American Forging and Socket Company, Pontiac, Mich. Battery installation. 2,104,765; Jan. 11.

Saunders, Walter S., assignor to The American Forging and Socket Company, Pontiac, Mich. Storage battery installation. 2,104,766; Jan. 11.

Saunders, Walter S., assignor to The American Forging and Socket Company, Pontiac, Mich. Storage battery installation. 2,104,767; Jan. 11.

Saunders, Walter S., assignor to The American Forging and Socket Company, Pontiac, Mich. Storage battery installation. 2,104,768; Jan. 11.

Saunders, Walter S., assignor to The American Forging and Socket Company, Pontiac, Mich. Storage battery installation. 2,104,769; Jan. 11.

Saunders, Walter S., assignor to The American Forging and Socket Company, Pontiac, Mich. Storage battery installation. 2,104,770; Jan. 11.

Saunders, Walter S., assignor to The American Forging and Socket Company, Pontiac, Mich. Storage battery installation. 2,104,771; Jan. 11.

Saunders, Walter S., assignor to The American Forging and Socket Company, Pontiac, Mich. Storage battery installation. 2,104,772; Jan. 11.

Saunders, Walter S., assignor to The American Forging and Socket Company, Pontiac, Mich. Storage battery installation. 2,104,773; Jan. 11.

Sawyer, Charles B., assignor to The Brush Development Company, Cleveland, Ohio. Piezoelectric device. 2,105,015; Jan. 11.

Sayles Finishing Plants, Inc. (See Huey, H. I., and Russell, assignors.)

Scandore, Nicholas, Brooklyn, N. Y. Scholar's companion. 2,105,163; Jan. 11.

Schade, Frank S., assignor to National Blank Book Company, Holyoke, Mass. Desk blotter holder and making same. 2,105,230; Jan. 11.

Schade, Frank S., assignor to National Blank Book Company, Holyoke, Mass. Loose leaf binding post construction. 2,105,231; Jan. 11.

Schade, Frank S., assignor to National Blank Book Company, Holyoke, Mass. Book binder casing and making same. 2,105,232; Jan. 11.

Schade, John, assignor to National Blank Book Company, Holyoke, Mass. Perforating device for loose-leaf sheets. 2,105,233; Jan. 11.

Schade, John, assignor to National Blank Book Company, Holyoke, Mass. Loose-leaf binder. 2,105,234; Jan. 11.

Schade, John, assignor to National Blank Book Company, Holyoke, Mass. Ring binder mechanism. 2,105,235; Jan. 11.

Scheffey, George B., Riverside, N. J., assignor, by mesne assignments, to Box Blank Corporation, New York, N. Y. Making boxes. 2,105,270; Jan. 11.

Scheffey, George B., Riverside, N. J., assignor to J. D. Tennant, Philadelphia, Pa. Box making machine. 2,105,375; Jan. 11.

Schjolin, Eric O., Pontiac, assignor to General Motors Corporation, Detroit, Mich. Vehicle seat. 2,104,818; Jan. 11.

Schlegel, Norman C., assignor to The Schlegel Manufacturing Company, Rochester, N. Y. Weather stripping. 2,105,164; Jan. 11.

Schlegel Manufacturing Company, The. (See Schlegel, Norman C., assignor.)

Schleifer, Carlo, Novara, Italy. Wharve for spindles for spinning, twisting, winding, and similar machines. 2,105,271; Jan. 11.

Schlumbohm, Peter, Berlin, Germany. Refrigerating process. 2,105,098; Jan. 11.

Schlumpf, Robert W., and R. P. Sherman, assignors to Hughes Tool Company, Houston, Tex. Roller boring drill. 2,104,819; Jan. 11.

Schmid, Ernst, Annecy, Haute-Savoie, France. Sleeve valve for a four stroke opposed piston engine. 2,105,272; Jan. 11.

Schmidt, Paul, assignor to Textile Machine Works, Wyomissing, Pa. Actuating means for knitting mechanism. 2,105,444; Jan. 11.

Schnebly, Frederick C., Detroit, Mich. Device for washing photographic prints. 2,105,165; Jan. 11.

Schultz, William O., South Milwaukee, and A. G. Steinmayer, Milwaukee, assignors to Line Material Company, South Milwaukee, Wis. Cut-out. 2,104,933; Jan. 11.

Schultze, Paul, assignor to J. C. Doran, doing business as Doran Brothers, Danbury, Conn. Pouncing machine. 2,105,130; Jan. 11.

Schuyler, Andrew L., La Grange, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Manufacturing keys. 2,105,099; Jan. 11.

Schwarzkopf, Paul, Reutte, Austria. Electrical heating element. 2,105,166; Jan. 11.

Scollon, Oliver T. (See Bradford, C., and Scollon.)

Scott, David J., executor. (See Scott, Walter J.)

Scott, David J., assignor to D. J. Scott, executor of the estate of W. Scott, doing business as Walter Scott & Company, Plainfield, N. J. Paper roll and splicing to expiring web. 2,104,774; Jan. 11.

Scott, Douglas M., Chagrin Falls, assignor to The Chase Bag Company, Cleveland, Ohio. Valve bag. 2,105,376; Jan. 11.

Scott, Floyd L., Houston, Tex. Three-cutter drill. 2,104,820; Jan. 11.

Scott, Floyd L., and N. B. Berleth, Houston, Tex. Cross roller bit. 2,104,821; Jan. 11.

Scott, Floyd L., assignor to Hughes Tool Company, Houston, Tex. Drill cutter. 2,104,822; Jan. 11.

Scott Paper Company. (See Parsons, Philip D., assignor.)

Scott, Walter & Company. (See Scott, David J.)

Scovill Manufacturing Company. (See Root, L. P., and Killorin, assignors.)

Scribner, William L., assignor to The Timken Roller Bearing Company, Canton, Ohio. Roller bearing cage. 2,105,013; Jan. 11.

Scrivener, Samuel, Jr. (See Troendly, Harry P., assignor.)

Scully, Rees T., and W. S. Lang, Pittsburgh, Pa. Brush forming apparatus. 2,105,324; Jan. 11.

Seat, Jay L., Fairfield, Conn. Fire extinguishing liquid. 2,104,776; Jan. 11.

Sebell, Harry, Boston, assignor of one-half to A. H. Parker, Lexington, Mass. Can. 2,105,445; Jan. 11.

Sealy, Thomas H., Melrose, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Fastening-inverting mechanism. 2,105,277; Jan. 11.

Segel, John H., Glendale, Calif. Ship repair equipment. 2,105,014; Jan. 11.

Self-Locking Carton Co. (See Burger, Martin, assignor.)

Sharpe, Gordon R., Vancouver, British Columbia, Canada. Container. 2,105,057; Jan. 11.

Shaw, William C., Woodstock, Ontario, Canada, assignor, by mesne assignments, to Linderman Devices, Incorporated, Wilmington, Del. Diaphragm and making same. 2,104,776; Jan. 11.

Shell Development Company. (See Groll, H. P. A., and Hearne, assignors.)

Shell Development Company. (See van der Minne, Johan L., assignor.)

Shell Development Company. (See von Stiets, George E. G., assignor.)

Shell Development Company. (See Whitney, Gary M., assignor.)

Shellmar Products Company. (See Gurwick, Irving, assignor.)

Sherman Paper Products Corporation. (See Ives, Charles Q., assignor.)

Sherman, Ralph P. (See Schlumpf, R. W., and Sherman.)

Sherman, Ralph P., assignor to Hughes Tool Company, Houston, Tex. Cutter flushing device. 2,104,823; Jan. 11.

Sherwin-Williams Company, The. (See Frye, Robert, assignor.)

Shoemaker, Richard W., assignor to The Chase Companies, Incorporated, Waterbury, Conn. Composite bus-bar. 2,104,824; Jan. 11.

Shrader, Terry M., West Summit, N. J., assignor to Radio Corporation of America. Photoelectric relay. 2,104,825; Jan. 11.

Siemens Brothers & Company Limited. (See Dixon, Reginald G., assignor.)

Siemens & Halske Aktiengesellschaft, Wernerwerk. (See Lill, F., and Kudrna, assignors.)

Siemens & Halske Aktiengesellschaft, Wernerwerk. (See Michaelis, Walter, assignor.)

Sikora, Joseph. (See Tischler, Thomas A., assignor.)

Silverthorne, Frank H., New York, N. Y. Smoking pipe. 2,104,777; Jan. 11.

Simonski, Samuel C., Philadelphia, Pa. Rug marker. 2,104,910; Jan. 11.

Simpson, Thornton J., Chula Vista, Calif. Highway signal. 2,105,203; Jan. 11.

Sinclair Refining Company. (See Kimball, T. B., and Kaasa, assignors.)

Singer, Fritz, Nuremberg, Germany, assignor to Tubus A. G., Zurich, Switzerland. Mechanically working metal articles. 2,105,015; Jan. 11.

Singer Manufacturing Company, The. (See Card, Frederic M., assignor.)

Sinitzin-White, Nicholas, Westport, assignor of one-third to J. L. R. Glover, Fairfield, and one-third to N. N. Soloviof, Milford, Conn. Navigation instrument. 2,105,103; Jan. 11.

Sinnett, Chester M., Westmont, and E. C. Guedon, Audubon, N. J., assignors to Radio Corporation of America. Sound recording and reproducing apparatus. 2,105,167; Jan. 11.

Skobel, Louis W., assignor to Interstate Metal Products Co., Chicago, Ill. Portable folding bed and cabinet. 2,105,236; Jan. 11.

Slaby, Rudolf, Berlin-Charlottenburg, assignor to Auto Union A. G., Chemnitz, Germany. Motor vehicle. 2,105,434; Jan. 11.

Slater, N., Company Limited. (See Ridgers, Frederick G., assignor.)

Sloan Valve Company. (See Kocour, Emil J., assignor.)

Smiley, Pearl Y., Kitchener, Ontario, Canada, assignor to The B. F. Goodrich Company, New York, N. Y. Footwear. 2,105,335; Jan. 11.

Smiley, Wilbert S. (See Smith, F. T., and Smiley.)

Smith, Arthur G., assignor to S. Morgan Smith Company, York, Pa. Relief valve. 2,104,934; Jan. 11.

Smith, Dorothy S., New York, N. Y. Back rest. 2,105,336; Jan. 11.

Smith, Fred C., Jr. (See Neuhaus, R., Smith, and Payne.)

Smith, Frederick T., and W. S. Smiley, Woodville, Pa. Nest. 2,105,058; Jan. 11.

Smith, Howard H., assignor to Associated Electric Laboratories, Inc., Chicago, Ill. Telephone transmission system. 2,105,016; Jan. 11.

Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Elliott Fisher Company, New York, N. Y. Manifolding device. 2,104,953; Jan. 11.

Smith, John C., assignor to Hat Corporation of America, Norwalk, Conn. Trimming apparatus. 2,105,131; Jan. 11.

Smith, John C., Beaver, Pa., assignor to Solar Laboratories. Method of and apparatus for decorating spherical and other articles having curved surfaces by a stenciling process. 2,105,378; Jan. 11.

Smith, John P., assignor to The Visking Corporation, Chicago, Ill. Apparatus for manufacturing cellulose coated and impregnated fibrous tubes. 2,105,273; Jan. 11.

Smith, Luther H., Murrells Inlet, S. C. Amusement device. 2,105,379; Jan. 11.

Smith, S. Morgan, Company. (See Smith, Arthur G., assignor.)

Sneed, Marion A. (See Bennett, R. A., and Sneed.)

Snyder, Robert E., Pasadena, Calif. Changeable color spotlight. 2,104,911; Jan. 11.

Societa Italiana Pirelli. (See Allavena, Riccardo, assignor.)

Societe Nobel Francaise. (See Belloc, Maurice, assignor.)

Soderholm, Joel, Minneapolis, Minn. Barrier wicket. 2,105,204; Jan. 11.

Soehner, John D., Valley Stream, and H. S. Holmes, assignors to Metropolitan Engineering Company, Brooklyn, N. Y. Torque arm and similar structural member. 2,105,132; Jan. 11.

Solar Laboratories. (See Smith, John C., assignor.)

Solomon, Samuel, New York, N. Y. Brief case or the like. 2,104,935; Jan. 11.

Soloviof, Nicholas M., et al. (See Sinitzin-White, Nicholas, assignor.)

Sonotone Corporation. (See Pearson, H. A., and Nicholides, assignors.)

Soref, Harry E., and J. K. Marshall, assignors to Master Lock Company, Milwaukee, Wis. Permutation padlock. 2,105,337; Jan. 11.

Southern Steel Company. (See White, Loyd J., assignor.)

Spahr, Otto, Philadelphia, Pa. Electrical connecting device. 2,104,888; Jan. 11.

Speedry Gravure Corporation. (See Degnan, James, assignor.)

Speijer, Joseph, Amsterdam, Netherlands. Manufacture of artificial sponges. 2,105,380; Jan. 11.

Spiers Bedding Corporation. (See Cohn, L. I., and Brinkman, assignors.)

Spray Engineering Company. (See Thompson, Wayne B., assignor.)

Square D Company. (See Jackson, J. G., and Kingdon, assignors.)

Standard Corrugated Case Corporation. (See Liskin, J., and Stimmel, assignors.)

Standard Motor Company Limited, The. (See Grinham, Edward G., assignor.)

Standard Oil Company of California. (See Herrick, Henry N., assignor.)

Standard Oil Company of California. (See Lynton, E. D., and Herrick, assignors.)

Standard Stoker Company, The. (See Ichter, John H., assignor.)

Stanton, Clinton, Toledo, Ohio. Device for expressing contents from collapsible tubes. 2,104,954; Jan. 11.

Stanton Ironworks Company Limited, The. (See Wilson, P. H., and Ridley, assignors.)

Staples, Horace A., Plainfield, N. J., assignor to Phelps Dodge Copper Products Corporation, New York, N. Y. Electric cable. 2,105,168; Jan. 11.

Stark, Ludwig, North Bergen, N. J. Garment clasp. 2,104,955; Jan. 11.

Starr, Allan M., assignor, by mesne assignments, to Starr & Sweetland, Piedmont, Calif. Fuel metering system and housing for same. 2,105,100; Jan. 11.

Starr & Sweetland. (See Starr, Allan M., assignor.)

Steigmann, Albert, Luxemburg-Ville, Luxemburg, assignor to Felix Bager & Dr. Gossler Gesellschaft mit beschrankter Haftung, Heidelberg, Germany. Preventing yellow stain in photographic preparations and regulation of the halogen content thereof. 2,105,274; Jan. 11.

Stein, Gustav A. (See Engels, W. H., and Stein.)

Steiner, Eugen, Oradea, Rumania. Insole arch support. 2,105,381; Jan. 11.

Steinfeld, Hans K., H. L. Galson, and A. S. Locke, Philadelphia, Pa., assignors to Baldwin-Southwark Corporation. Air conditioning apparatus. 2,105,205; Jan. 11.

Steinmayer, Alvin G. (See Schultz, W. O., and Steinmayer.)

Stelley, Harry A., Buffalo, N. Y. Apparatus for washing and grading sand and like materials. 2,105,101; Jan. 11.

Steps, Robert A., Los Angeles, Calif. Automatic centrifugal apparatus. 2,105,059; Jan. 11.

Stern, Georg, Neckargemund, and W. Hoess, Ludwigshafen-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Purification of hydrocarbons. 2,104,956; Jan. 11.

Stevens, Robert C., Beverly Hills, assignor to Fox Film Corporation, Los Angeles, Calif. Focusing device for motion picture cameras. 2,104,936; Jan. 11.

Stimmel, Samuel. (See Liskin, J., and Stimmel.)

Stober, Hans. (See Bertsch, H., and Stober.)

Stoiber, Joseph. (See Lyman, D. F., and Stoiber.)

Stophlet, Robert T., assignor to The Toledo Porcelain Enamel Products Company, Toledo, Ohio. Metal shelving and making the same. 2,105,206; Jan. 11.

Stramiello, Domenick, Brooklyn, N. Y. Detachable sleeve for garments. 2,104,826; Jan. 11.

Streeter, Charles J., Jersey City, N. J. Filing and stacking equipment. 2,104,912; Jan. 11.

Streeter, Charles J., Jersey City, N. J. Filing equipment. 2,104,913; Jan. 11.

Streun, John A., Sherman, Tex., assignor to Hardwicke-Etter Company, Huller rib. 2,104,880; Jan. 11.

Strom, Albert P., Wilkinsburg, C. L. Denault, Forest Hills, and L. McCulloch, Pittsburgh, Pa., assignors to Westinghouse Electric and Manufacturing Company. Network cable. 2,105,060; Jan. 11.

Stucki, Arnold, Pittsburgh, Pa. Resilient side bearing assembly. 2,104,840; Jan. 11.

Stuhlfauth, George. (See Kirley, R. C., and Stuhlfauth.)

Suffron, Fay O., Cleveland, Ohio, assignor to American Gas Association, Incorporated, New York, N. Y. Metering fluid flow. 2,105,017; Jan. 11.

Sullivan Machinery Company. (See Noble, Warren, assignor.)

Sunderland, Charles C., assignor to John A. Roebling's Sons Company, Trenton, N. J. Rope making machine. 2,105,338; Jan. 11.

Sutherlin, Walter F., assignor of one-half to G. J. Jebeles, Birmingham, Ala. Safety switch box. 2,105,169; Jan. 11.

Sweitzer, Charles W., Shawnee, Okla. Portable dispenser for beverages. 2,105,339; Jan. 11.

Swingspout Measure Company. (See Wiswell, Osro N., assignor.)

Talley, Benjamin B., Fairfield, Ohio. Plotting device. 2,104,778; Jan. 11.

Tanner, Charles H., and E. Watkins, St. Cloud, Minn., J. M. Tanner administrator of said C. H. Tanner, deceased. Method of and apparatus for frost elimination. 2,105,435; Jan. 11.

Tanner, Jessie M., administrator. (See Tanner, C. H., and Watkins.)

Tarrant, Robert C., Port Washington, N. Y. Nursing bottle and nipple therefor. 2,105,170; Jan. 11.

Tate, Christopher. (See Tate, Edward H., F. E. B., and C.)

Tate, Edward H., F. E. B., and C., Malden, assignors to E. H. Tate Company, Boston, Mass. Wall hook. 2,105,061; Jan. 11.

Tate, Edward H., F. E. B., and C., Malden, assignors to E. H. Tate Company, Boston, Mass. Wall hook. 2,105,062; Jan. 11.

Tate, E. H., Company. (See Tate, Edward H., F. E. B., and C., assignors.)

Tate, Frank E. B. (See Tate, Edward H., F. E. B., and C.)

Tatter, Louis G., Chicago, Ill. Welding shield. 2,105,018; Jan. 11.

Taylor, Cecil H. (See Carroll, E. G., and Taylor.)

Taylor, Harry and W. I., Spondon, near Derby, England, assignors to Celanese Corporation of America. Operation for the production of staple fiber yarns from continuous filaments. 2,104,827; Jan. 11.

Taylor, William I. (See Taylor, Harry and W. I.)

Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Jobst, G., and Klotz, assignors.)

Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Rothe, Horst, assignor.)

Teletype Corporation. (See Pagenkopf, Walter H., assignor.)

Teletype Corporation. (See Zenner, W. J., and Janiszewski, assignors.)

Temple, Robert, Jr., Brooklyn, N. Y. Circuit breaker. 2,104,914; Jan. 11.

Tennant, John D. (See Scheffey, George B., assignor.)

Terwilliger, Ivan M., Altadena, Calif. Cinematography to produce stereoscopic solid effects. 2,104,779; Jan. 11.

Textile Machine Works. (See Schmidt, Paul, assignor.)

Thinius, Kurt, assignor to Deutsche Celluloid-Fabrik, Eilenburg, Germany. Reducing the viscosity of cellulose derivatives. 2,104,957; Jan. 11.
Thomas & Betts Co., The. (See Church, Lewis H., assignor.)
Thompson, Browder J., Summit, N. J., assignor to Radio Corporation of America. Tuned oscillator circuit. 2,104,915; Jan. 11.
Thompson, Herbert L., Elgin, assignor to Reynolds Wire Co., Dixon, Ill. Warp feed for wire weaving looms. 2,105,102; Jan. 11.
Thompson, Wayne, B., Winchester, assignor to Spray Engineering Company, Somerville, Mass. Flock applying apparatus. 2,105,275; Jan. 11.
Thompson, Le Roy, Blakely, Ga. Smoke box structure. 2,104,958; Jan. 11.
Thomson, Robert F., I. B. Anderson, and S. Thornley, Grangemouth, Scotland, assignors to Imperial Chemical Industries Limited. Manufacture of dihydroxy isodibenzanthrone. 2,104,960; Jan. 11.
Thornley, Sidney. (See Thomson, R. F., Anderson, and Thornley.)
Thwaits, Frederick G., Wauwatosa, assignor to The Heil Co., Milwaukee, Wis. Portable tank. 2,105,302; Jan. 11.
Timken Roller Bearing Company, The. (See Bergert, Henry A., assignor.)
Timken Roller Bearing Company, The. (See Scribner, William L., assignor.)
Tischler, Thomas A., assignor to J. Sikora, Detroit, Mich. Hammock. 2,104,917; Jan. 11.
Titanium Alloy Manufacturing Company, The. (See Kinzie, C. J., and Wainer, assignors.)
Tjaarda, John, Birmingham, assignor to Briggs Manufacturing Company, Detroit, Mich. Vehicle wheel and spring suspension. 2,105,171; Jan. 11.
Toledo Porcelain Enamel Products Company, The. (See Stophlet, Robert T., assignor.)
Transportation Devices Corporation. (See Pearce, E. S., and Karibo, assignors.)
Treat, Parker E., et al. (See Le Vesconte, Ralph A., assignee.)
Tret-O-Lite Company, The. (See De Groote, Melvin, assignor.)
Tridendly, Harry P., New York, N. Y., assignor, by mesne assignments, to Samuel Scrivener, Jr., Washington, D. C. Support for lawn sprinklers. 2,105,276; Jan. 11.
Trojan Powder Company. (See Wyler, Joseph A., assignor.)
Tube Industrial Participation Limited. (See Korbuly, Károly, assignor.)
Tube-Turns, Incorporated. (See Fritsch, Rudolph E., assignor.)
Tubus A. G. (See Singer, Fritz, assignor.)
Turner, Charles S., Detroit, Mich. Boiler superheater. 2,104,937; Jan. 11.
Turner, Kenneth F., London, England. Reciprocating engine, pump, or compressor of the swash or wobble plate type. 2,105,030; Jan. 11.
Udy, Marvin J., Niagara Falls, N. Y., assignor, by mesne assignments, to Electro Metallurgical Company. Manufacture of iron. 2,105,029; Jan. 11.
Ulin, Carl G., Seattle, Wash. Fish cleaning and filleting machine. 2,105,207; Jan. 11.
Umansky, Leonid A. (See Mahler, F., and Umansky.)
Umbach, Haas. (See Pape, H. W., and Umbach.)
Underwood Elliott Fisher Company. (See Smith, Jesse A. B., assignor.)
Union Hardware Company. (See Steele, William F., assignor.)
Union Switch & Signal Company, The. (See Pflasterer, George P., assignor.)
United Aircraft Corporation. (See Martin, Erle, assignor.)
United Engineering & Foundry Company. (See Mueller, Charles F., and Gallagher.)
United Gilsonite Laboratories, Inc. (See Asphalte Company [illegible], assignor.)
United [illegible] (See Eppler, A., and [illegible])
United [illegible] (See MacDonald, [illegible])
United [illegible] (See Seely, Thomas [illegible])
United [illegible] (See Woodcock, R. [illegible])
U. S. [illegible] (See Platt, Stephen [illegible])
Urban, Oliver M., [illegible] to C. H. Lewis, [illegible], Ohio. 2,105,277; Jan. 11.
Valentine, Percy W., [illegible] signor to Puritan Manufacturing Company, [illegible], Rib setting and trimming machine. 2,105,031; Jan. 11.
Vanadium Alloys Steel Company, [illegible] il, James P., assignor.)
Van der Minne, Johan L., [illegible] Netherlands, assignor to Shell Development Company, San Francisco, Calif. Wave-stilling oil. 2,105,172; Jan. 11.
Van Geel, Willem C., Eindhoven, [illegible], assignor to Radio Corporation of America, [illegible] tric device. 2,105,203; Jan. 11.
Van Horn, Frank, Pittsburgh, Pa. [illegible] 2,105,382; Jan. 11.
Vapor Treating Processes, Inc. (See [illegible], Wallace A., assignor.)
Ventures Limited. (See Hubler, W. G., and Archibald, assignors.)
Vickers, Harry F., Detroit, Mich. Hydraulic hoisting unit and control system therefor. 2,104,780; Jan. 11.
Visking Corporation, The. (See Smith, John P., assignor.)
Voelker, Fred, Astoria, N. Y. Umbrella cover. 2,105,172; Jan. 11.
Von Stitzi, George E. G., Berkeley, assignor to Shell Development Company, San Francisco, Calif. Purification of sugar juices. 2,104,950; Jan. 11.
Wackler, Dr., Alexander, Gesellschaft für Elektrochemische Industrie, G. m. b. H. (See Hollerer, Hanns, assignor.)
Wacker, Dr., Alexander, Wacker, Gesellschaft für Elektrochemische Industrie, G. m. b. H. (See Hollerer, Hanns, assignor.)
Wagner, William, assignor of one-fifth to C. De Giull, Brooklyn, N. Y. Electric lock. 2,105,304; Jan. 11.
Wahl Company, The. (See Langren, Arthur N., assignor.)
Wainer, Eugene. (See Kinzie, C. J., and Wainer.)
Walker, Jay P., assignor of forty per cent to G. O. Merchant, and six per cent to C. G. Wells, Tulsa, Okla. Wooden tank. 2,104,961; Jan. 11.
Wallis, Albert E. (See Harrison, C. F. R., and Wallis.)
Walters, Harry E. (See Mueller, E., and Walters.)
Walton, Thomas R., Birmingham, Mich. Windshield wiper blade. 2,105,021; Jan. 11.
Wark, Nicolaas, Soureth-Heerlen, Netherlands. Separating from pig-iron the vanadium contained therein. 2,104,890; Jan. 11.
Warren Trailer Parts Manufacturing Company. (See Horsfield, George, assignor.)
Warwood, William E., Toronto, Ontario, Canada. Gas producing and smoke consuming firebox and down draft kiln. 2,104,781; Jan. 11.
Washburn Company, The. (See Hindes, Howard W., assignor.)
Waterbury Farrel Foundry and Machine Company, The. (See Wilcox, Richard L., assignor.)
Waterbury Farrel Foundry and Machine Company, The. (See Wilcox, R. L., and Hoyt, assignors.)
Watkins, Ernest. (See Tanner, C. H., and Watkins.)
Webb, George, West Hartford, assignor to Colt's Patent Fire Arms Manufacturing Co., Hartford, Conn. Framework and casing for dishwashing machines. 2,104,938; Jan. 11.
Weber, Joseph J., Chicago, Ill. Multiple duplicating apparatus for typewriters. 2,105,279; Jan. 11.
Webster Electric Company. (See Daniels, Virgil L., assignor.)
Weinig, Arthur J., Golden, assignor to Potash Company of America, Denver, Colo. Temperature control in a flotation process. 2,105,294; Jan. 11.
Weinig, Arthur J., Golden, assignor to Potash Company of America, Denver, Colo. Flotation process. 2,105,295; Jan. 11.
Welch, William H., assignor to Cochrane-Bly Company, Rochester, N. Y. Metal cutting machine. 2,105,237; Jan. 11.
Wells, C. G., et al. (See Walker, Jay P., assignor.)
Werntz, James H., Marshallton, assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Sulphated esters of polycarboxylic acids. 2,104,782; Jan. 11.
Weston Electric Company. (See Bandur, Adolph F., assignor.)
Weston Electric Company. (See Kagi, W. W., and Gillis, [illegible])
Western Electric Company. (See Kivley, R. C., and Stuhlfauth, assignors.)
Western Electric Company. (See Luts, Raymond P., assignor.)
Western Electric Company. (See McCann, Paul S., assignor.)
Western Electric Company. (See Neighbors, Charles C., assignor.)
Western Electric Company. (See Schuyler, Andrew L., assignor.)
Westinghouse Electric Elevator Company. (See Eames, William F., assignor.)
Westinghouse Electric and Manufacturing Company. (See Strom, A. P., Denault, and McCulloch, assignors.)
Wetherbee, John A., assignor to A. T. Levy, Harrisville, R. I. Prefabricated building. 2,104,676; Jan. 11.
Weymouth, Lawrence B., assignor, by mesne assignments, to Nash-Kelvinator Corporation, Detroit, Mich. Water heater. 2,104,918; Jan. 11.
Whalen, John T., New York, N. Y. Refrigerator shelf. 2,104,939; Jan. 11.
Wheeling Steel Corporation. (See Holub, Charles J., assignor.)
Whitacre, Maxwell L., and P. de Leeuw, assignors, by mesne assignments, to The Carborundum Company, Niagara Falls, N. Y. Manufacture of porous bodies. 2,104,783; Jan. 11.
White, Eric L. C., Hillingdon, assignor to Electric & Musical Industries Limited, Middlesex, England. High-frequency electrical transmission system. 2,105,305; Jan. 11.
White, Harold E., Zelienople, assignor to Lava Crucible Company of Pittsburgh, Pittsburgh, Pa. Refractory articles. 2,104,841; Jan. 11.
White, Loyd J., San Antonio, Tex., assignor to Southern Steel Company. Evaporiser. 2,105,383; Jan. 11.
Whiting, Max A., Schenectady, N. Y., assignor to General Electric Company. Control system. 2,105,384; Jan. 11.

Whitney, Gary M., Compton, assignor to Shell Development Company, San Francisco, Calif. Stabilized fuel oil. 2,104,919; Jan. 11.
Wiegand, Erich, Berlin-Waldmannslust, W. Meyer, Birkenwerder, near Berlin, and H. Pulfrich, Berlin-Wilmersdorf, assignors to Allgemeine Elektricitats Gesellschaft, Berlin, Germany. Electron discharge device. 2,104,784; Jan. 11.
Wiese, George E., and D. Culwell, Spokane, Wash. Milk pail supporter. 2,104,842; Jan. 11.
Wiltsie, Arvin E., Ashtabula, Ohio. Sanitary seat cover and dispensing cabinet therefor. 2,105,133; Jan. 11.
Wilcox, Richard L., assignor to The Waterbury Farrel Foundry and Machine Company, Waterbury, Conn. Cut-off mechanism. 2,105385; Jan. 11.
Wilcox, Richard L., assignor to The Waterbury Farrel Foundry and Machine Company, Waterbury, Conn. Cut-off and transfer mechanism. 2,105,387; Jan. 11.
Wilcox, Richard L., and H. L. Hoyt, assignors to The Waterbury Farrel Foundry and Machine Company, Waterbury, Conn. Cut-off mechanism. 2,105,386; Jan. 11.
Wildhaber, Ernest, Irondequoit, and A. H. Candee, assignors to Cleason Works, Rochester, N. Y. Gear. 2,105,104; Jan. 11.
Williams, Alfred L. W., assignor to The Brush Development Company, Cleveland, Ohio. Piezo-electric apparatus. 2,105,011; Jan. 11.
Wilson & Co. (See Robinson, Adrian A., assignor.)
Wilson, Ira J., et al. (See Kenney, Thomas, assignor.)
Wilson, James R., Ramseur, N. C. Lap stick. 2,105,064; Jan. 11.
Wilson, John A., Milwaukee, Wis., assignor, by mesne assignments, to Monsanto Chemical Company. Treatment of leather. 2,105,446; Jan. 11.
Wilson, Percy H., Sherwood, Nottingham, and W. Ridley, Beeston, assignors of one-third to The Stanton Ironworks Company Limited, Stanton-by-Dale, near Nottingham, England. Pipe joint. 2,105,022; Jan. 11.
Windhiel, Joseph C., assignor to Mead Johnson & Company, Evansville, Ind. Bottle closure and dispensing device. 2,105,023; Jan. 11.
Wintsch, Max T., Lancaster, Pa. Current transmission system. 2,105,134; Jan. 11.
Wiss J., & Sons, Co. (See Rauh, Frederic H., assignor.)
Wiswell, Ozro N., assignor to Swingspout Measure Company, Los Angeles, Calif. Dispenser. 2,104,843; Jan. 11.
Witte, Otto, Rochester, N. Y., assignor, by mesne assignments, to Eastman Kodak Company, Jersey City, N. J. Film strip. 2,105,238; Jan. 11.
Wolfe, Harry H. (See Johnson, G. T., and Wolfe.)
Wolfson, Isadore D., Woodmere, N. Y. Four-in-hand tie. 2,105,306; Jan. 11.
Woodcock, Reginald B., and H. Boothroyd, Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J. Finishing machine. 2,105,388; Jan. 11.
Woolery, Horace E., St. Paul, Minn. Oil burner. 2,104,940; Jan. 11.
Wyler, Joseph A., assignor to Trojan Powder Company, Allentown, Pa. Purification of sucrose octanitrate. 2,105,290; Jan. 11.
Wyler, Joseph A., Allentown, Pa., assignor to Trojan Powder Company. Nitration of organic carbohydrates. 2,105,289; Jan. 11.
Yale & Towne Manufacturing Company, The. (See Miller, Charles A., assignor.)
Yeager, Anton J., assignor to Prentiss-Wabers Products Co., Wisconsin Rapids, Wis. Portable stove. 2,105,340; Jan. 11.
Yuskis, Herman, Newark, N. J. Coupling. 2,104,920; Jan. 11.
Zell, David H., Brooklyn, N. Y. Indicator container. 2,105,065; Jan. 11.
Zell, David H., Brooklyn, N. Y. Indicator container. 2,105,066; Jan. 11.
Zimmerman, Fred R., assignor to Nachman Spring-Filled Corporation, Chicago, Ill. Machine for electrically heating springs. 2,105,105; Jan. 11.
Zenner, Walter J., Des Plaines, and S. Janiszewski, assignors to Teletype Corporation, Chicago, Ill. Start-stop regenerative repeater. 2,105,173; Jan. 11.
Zerweck, Werner, and W. Kunze, Frankfort-on-the-Main-Fechenheim, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Vat dyestuffs of the acylaminoanthraquinone series containing a thiazolic radical and making same. 2,104,891; Jan. 11.
Zimmerman, Willard P., and M. K. Holmes, Muncie, Ind., assignors to Owens-Illinois Glass Company. Manufacturing multipart glass articles. 2,105,174; Jan. 11.

LIST OF DESIGN INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 11TH DAY OF JANUARY, 1938

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Collector main valve assembly. C. V. McIntire. 20,619; Jan. 11.
Device for phonographs with linear photogram cutters. H. Vogt, J. Massolle, and J. Engl. 20,621; Jan. 11.
Electrical adapter means. H. A. Douglas. 20,618; Jan. 11.
Envelope. J. W. Bear and R. E. Sublett. 20,615; Jan. 11.
Film magazine for amateur motion picture cameras. S. S. Porter. 20,622; Jan. 11.
Lock, Door. W. A. Beauchamp. 20,616; Jan. 11.
Shoe sole or the like and manufacturing same. J. R. Caldwell. 20,617; Jan. 11.
Storage and dispensing apparatus for liquefied gases. L. J. White. 20,624; Jan. 11.
Wax and production of same, High melting point. C. F. Tears. 20,623; Jan. 11.
Wrench, Torque measuring. J. H. Sharp. 20,620; Jan. 11.

Agitator. T. J. Litle, Jr. 107,879; Jan. 11.
Airplane. D. R. Berlin. 107,850; Jan. 11.
Airplane. B. C. Boulton and J. S. McDonnell. 107,891; Jan. 11.
Airplane. F. E. Flader. 107,903; Jan. 11.
Ashtray or similar article. R. A. Kelly. 107,873; Jan. 11.
Blouse. A. M. Lowenthal. 107,909; Jan. 11.
Cabinet for check controlled apparatus. S. Brown. 107,851; Jan. 11.
Case, Piano. L. Jiranek. 107,870; Jan. 11.
Case, Vanity. A. Wewetzer. 107,897-8; Jan. 11.
Casing, Air conditioning. C. A. Arnold and R. P. Hansen. 107,901; Jan. 11.
Casing for a suction cleaner or similar article. F. L. Pierce. 107,884; Jan. 11.
Centerpiece, Illuminated. J. C. Minchin. 107,881; Jan. 11.
Coat. J. A. Silverman. 107,914; Jan. 11.
Coffee brewer. C. Abrams. 107,847; Jan. 11.
Comfortable. J. May. 107,896; Jan. 11.
Cord, Assist. G. W. Nesbitt. 107,882; Jan. 11.
Corn pepper. E. E. Preston. 107,885; Jan. 11.
Cuff link. E. S. Mix. 107,896; Jan. 11.
Cushion. R. Green. 107,929; Jan. 11.
Dial and panel for battery testers, Combined. C. H. Kolseth. 107,875; Jan. 11.
Dish, Soap. E. G. Welles. 107,889; Jan. 11.
Display and retainer support, Combined. G. E. Noel. 107,883; Jan. 11.
Dress. J. Abbate. 107,917-18; Jan. 11.
Dress. J. Bensi. 107,919; Jan. 11.
Dress. P. Fracchia. 107,928; Jan. 11.
Dress. M. Michelson. 107,911; Jan. 11.
Dress. M. Michelson. 107,931; Jan. 11.
Dress. S. S. Schwartz. 107,933; Jan. 11.
Dress. M. B. Smith. 107,913; Jan. 11.
Dress. F. Sussman. 107,934; Jan. 11.
Dress. P. Wenett. 107,915; Jan. 11.
Dress. S. Zahn. 107,935-6; Jan. 11.
Dress ensemble. I. Lampel. 107,908; Jan. 11.
Dress ensemble. M. Pono. 107,932; Jan. 11.
Electrical connecter body. C. E. Gilbert. 107,905; Jan. 11.
Fabric, Embroidered. L. L. Kahn. 107,906-7; Jan. 11.
Fabric, Embroidered textile. W. G. Meier. 107,910; Jan. 11.
Fabric or similar article, Textile. M. Christen. 107,921-5; Jan. 11.
Fabric, Textile. F. M. R. Burns. 107,853; Jan. 11.
Fabric, Textile. L. Eichmann. 107,926-7; Jan. 11.
Fabric, Textile. S. S. S. McNiel. 107,930; Jan. 11.
Fabric, Textile. H. W. Wilde. 107,899; Jan. 11.
Gravy boat and tray, Combined. M. S. Cornell, Jr. 107,854; Jan. 11.
Grille. R. H. Hutchinson. 107,894; Jan. 11.
Grille, Door. R. H. Hutchinson. 107,869; Jan. 11.
Grille for windows and the like. R. H. Hutchinson. 107,868; Jan. 11.
Handbag. H. Felmann. 107,892-3; Jan. 11.
Hat. O. Friedman. 107,904; Jan. 11.
Jewelry setting or similar article. P. J. Armeny. 107,848; Jan. 11.
Key and finger ring, Combination. E. Gross. 107,864; Jan. 11.
Lace insert or similar article. G. Zellweger. 107,916; Jan. 11.
Laundry machine. K. C. Haven. 107,865-6; Jan. 11.
Lighter and cigarette container, Combined pyrophoric. L. V. Aronson. 107,849; Jan. 11.
Lighting fixture. J. H. Waterbury. 107,888; Jan. 11.
Lighting fixture or similar article, Adjustable ceiling. J. Levy. 107,877-8; Jan. 11.
Mattress. M. Marsack. 107,880; Jan. 11.
Negligee. R. Rosenfeld. 107,912; Jan. 11.
Plate or similar article. R. A. Kelly. 107,871; Jan. 11.
Plate or similar article, Torte. R. A. Kelly. 107,872; Jan. 11.
Ring, Finger. J. J. Klecka. 107,874; Jan. 11.
Rug. R. F. Bemporad. 107,890; Jan. 11.
Scarf blouse. J. F. Berlinger. 107,920; Jan. 11.
Seat, Chair. J. W. Burks. 107,852; Jan. 11.
Shoe. D. Levin. 107,876; Jan. 11.
Shoe. C. B. Snyder. 107,886; Jan. 11.
Shoe. A. Vamos. 107,887; Jan. 11.
Shoe or similar article. S. Ferragamo. 107,857-9; Jan. 11.
Slicing machine. C. Dapp. 107,855; Jan. 11.
Stool, Milk. R. G. Ferris. 107,860; Jan. 11.
Tag, Identification. W. E. Hicks. 107,867; Jan. 11.
Top for automotive vehicles. L. Brodton. 107,902; Jan. 11.
Tumbler. E. W. Fuerst. 107,861-3; Jan. 11.
Vaporizer, Medicated. T. A. Andersen. 107,900; Jan. 11.
Wire, Insulated. C. A. Farrar. 107,856; Jan. 11.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 11TH DAY OF JANUARY, 1938

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Accordion. R. Pancotti. 2,105,365; Jan. 11.
Acid, Manufacture of sulphuric. R. B. Ferguson. 2,104,858; Jan. 11.
Acoustical reverberation system, Variable. A. Pfister. 2,104,811; Jan. 11.
Actuating means for knitting mechanism. P. Schmidt. 2,105,444; Jan. 11.
Advertising sign. R. A. Bennett and M. A. Sneed. 2,105,209; Jan. 11.
Agglutinant. I. Chesler. 2,105,310; Jan. 11.
Air conditioning apparatus. H. K. Steinfeld, H. L. Galson, and A. S. Locke. 2,105,205; Jan. 11.
Air conditioning system. R. B. P. Crawford. 2,104,851; Jan. 11.
Air, Device for conditioning and cooling. P. Crosley, Jr. 2,105,108; Jan. 11.
Airplane with floating wings. J. Akerman. 2,105,307; Jan. 11.
Air to carburetors, Device for conditioning the intake. P. W. Noble. 2,105,433; Jan. 11.
Alcohols for aqueous emulsions, Separating higher aliphatic. C. O. Henke and H. M. Parmelee. 2,104,803; Jan. 11.
Alloy steel tool. J. P. Gill. 2,105,114; Jan. 11.
Alloys, Heat resistant. W. Gödecke and W. Guertler. 2,105,283; Jan. 11.
Alpha-nitronapthalene, Hydrogenation of. C. O. Henke and R. G. Benner. 2,105,321; Jan. 11.
Ammonolysis of halogeno-aromatic compounds to produce amines. R. Frye. 2,104,983; Jan. 11.
Amusement device. D. H. Smith. 2,105,279; Jan. 11.
Anesthetic, Local. R. T. Major and A. B. Boese. 2,104,753; Jan. 11.
Anesthetising machine. J. A. Heidbrink. 2,104,988; Jan. 11.
Annealing furnace, Electrically heated. W. Rohn. 2,104,886; Jan. 11.
Antirattler device for windows and the like. E. V. Francescon. 2,105,414; Jan. 11.
Apparatus for cleaning and degreasing articles. H. Höllerer. 2,104,991; Jan. 11.
Apron. F. F. Hort. 2,105,322; Jan. 11.
Arc welding system. C. J. Holslag. 2,105,079; Jan. 11.
Article handling apparatus. R. C. Kivley and G. Stuhlfauth. 2,105,084; Jan. 11.
Article of furniture, Convertible. L. I. Cohn and A. J. Brinkman. 2,105,408; Jan. 11.
Ashtray and coaster. T. R. Moss. 2,105,157; Jan. 11.
Automobile door lock. A. J. Leonard. 2,104,838; Jan. 11.
Awning. W. F. Crawford. 2,105,409; Jan. 11.
Back rest. D. S. Smith. 2,105,336; Jan. 11.
Bag: *See*—
Valve bag.
Bag. C. L. Hodden and N. Cherkasoff. 2,105,319; Jan. 11.
Bags, Process and machine for making window. G. W. Poppe. 2,104,814; Jan. 11.
Baller, Pressure. E. L. Condra. 2,104,942; Jan. 11.
Ballcock. J. F. Duncan and E. H. Barlow. 2,105,314; Jan. 11.
Bar: *See*—
Composite bus-bar.
Battery carrier. V. B. Dawson. 2,105,249; Jan. 11.
Battery, Galvanic. A. Dassler. 2,104,973; Jan. 11.
Battery installation. W. S. Saunders. 2,104,765; Jan. 11.
Battery installation, Storage. W. S. Saunders. 2,104,766-73; Jan. 11.
Bearing assembly, Resilient side. A. Stucki. 2,104,840; Jan. 11.
Bed and cabinet, Portable folding. L. W. Skobel. 2,105,236; Jan. 11.
Bed, Hospital or invalid. A. L. Hurst. 2,105,040; Jan. 11.
Bed motion for flat bed presses, Reciprocating. F. R. Molitor. 2,105,328; Jan. 11.
Bed, Rocking hospital. H. H. Howell, E. E. Rutledge, and C. E. Sanders. 2,104,745; Jan. 11.
Bench, Tube push. K. Korbuly. 2,105,150; Jan. 11.
Bib. M. M. Doty. 2,105,029; Jan. 11.
Bin bottom for concrete structures. A. Clever. 2,104,896; Jan. 11.
Binder, Loose-leaf. J. Schade. 2,105,234; Jan. 11.
Binding post construction, Loose leaf. F. S. Schade. 2,105,231; Jan. 11.
Binocular, Rapid focusing. G. R. Chesnut, Jr. 2,105,348; Jan. 11.
Bismuth allantoinate and making it. W. H. Engels and G. A. Stein. 2,104,738; Jan. 11.
Bit: *See*—
Cross roller bit.
Blind, Venetian. J. E. Johnson. 2,105,082; Jan. 11.
Blind, Venetian. D. Neumann. 2,104,907; Jan. 11.
Block: *See*—
Die block.
Body fluids and contents, Method and apparatus for controlling the distribution and pressure of certain human. J. R. Poppen. 2,104,758; Jan. 11.
Body for vehicles, and particularly for motor vehicles, Convertible. G. A. Paulin. 2,105,293; Jan. 11.
Boiler superheater. C. S. Turner. 2,104,937; Jan. 11.
Bomb sight and pilot director. H. B. Inglis. 2,105,147; Jan. 11.
Bookbinding. J. Murray. 2,105,222; Jan. 11.
Book cover. M. T. Kafka. 2,105,041; Jan. 11.
Boot tree. H. J. Baas. 2,105,395; Jan. 11.
Borax, Production of. P. T. Dolley. 2,105,109; Jan. 11.
Bottle and nipple therefor, Nursing. E. C. Tarrant. 2,105,170; Jan. 11.
Bottle closure and dispensing device. J. C. Windbiel. 2,105,023; Jan. 11.
Bottle closure and liquid dispenser, Combined. Le R. P. Root and F. O. Killorin. 2,105,202; Jan. 11.
Bow. G. Flatto. 2,105,436; Jan. 11.
Bowling pin. K. Kraft. 2,105,045; Jan. 11.
Box: *See*—
Safety switch box. Shoe box.
Box. C. E. and W. F. Gruber. 2,105,243; Jan. 11.
Box and box blank. J. T. Curtis. 2,105,025; Jan. 11.
Box and manufacture thereof, Composite. F. E. Neely. 2,105,359; Jan. 11.
Box making machine. G. B. Scheffey. 2,105,375; Jan. 11.
Box or receptacle. W. F. Best and W. Kremer. 2,105,179; Jan. 11.
Boxes, Making. G. B. Scheffey. 2,105,270; Jan. 11.
Bracket: *See*—
Insulator bracket. Shelf bracket.
Bracket for ladders, Platform. S. J. Harding. 2,104,987; Jan. 11.
Brake: *See*—
Sled brake.
Brake. E. G. Carroll and C. H. Taylor. 2,104,735; Jan. 11.
Brake. G. H. Hunt. 2,105,323; Jan. 11.
Brake. L. E. La Brie. 2,105,046; Jan. 11.
Brake. C. Press. 2,105,297; Jan. 11.
Brake. G. P. Roberts. 2,105,298-9; Jan. 11.
Brake construction. C. S. Ash. 2,105,176; Jan. 11.
Brake drum. C. W. Dake. 2,104,923; Jan. 11.
Brake operating mechanism. E. G. McCauley. 2,105,196 Jan. 11.
Brake operating mechanism. J. A. Rykaczewski. 2,104,909; Jan. 11.
Brake slack adjuster. M. P. Blomberg. 2,104,787; Jan. 11.
Breastplate cover pad. M. Maher. 2,105,290; Jan. 11.
Breast support. P. Boris. 2,104,725; Jan. 11.
Brush for dynamo-electric machines. W. O. Helwig. 2,105,038; Jan. 11.
Brush forming apparatus. R. T. Scully and W. S. Lang. 2,105,334; Jan. 11.
Brush holder assembly and brush. C. E. Berger. 2,104,721; Jan. 11.
Buckle and identification tag, Combination cotton tie. R. Masino and O. H. Keep. 2,104,755; Jan. 11.
Buffer attachment. J. A. Hunt. 2,104,837; Jan. 11.
Building. A. T. Levy. 2,104,870-4; Jan. 11.
Building, Prefabricated. A. T. Levy. 2,104,869; Jan. 11.
Building, Prefabricated. A. T. Levy. 2,104,875; Jan. 11.
Building, Prefabricated. A. T. Levy. 2,104,877; Jan. 11.
Building, Prefabricated. J. H. Magnuson. 2,104,876; Jan. 11.
Building, Prefabricated. J. A. Wetherbee. 2,104,876; Jan. 11.
Bumper for hedge shears. F. H. Rauh. 2,105,332; Jan. 11.
Burglar alarm switch. J. Pickard. 2,105,006; Jan. 11.
Burner: *See*—
Gaseous fuel burner. Oil burner.
Bus body. E. M. Hicks. 2,104,989; Jan. 11.
Bust support. V. F. Kemp. 2,104,867; Jan. 11.
Butadienes and preparing them, Halogen substituted. W. H. Carothers. 2,104,789; Jan. 11.
Butterfly valve. S. F. Briggs. 2,105,343; Jan. 11.
Button fastener. G. A. Robbins. 2,104,885; Jan. 11.
Cable: *See*—
Electric cable. Network cable.
Cage, Roller bearing. W. L. Scribner. 2,105,013; Jan. 11.
Camera. J. Mihalyi. 2,105,256; Jan. 11.
Camera, Motion picture. G. Laube, R. C. Stevens, and C. M. Miller. 2,104,948; Jan. 11.

Can. H. Sebell. 2,105,445; Jan. 11.
Cap: *See*—
Nurse's cap.
Cap form feeding attachment for paper bottle capping machines. I. F. Mandell. 2,104,931; Jan. 11.
Carbohydrates, Nitration of organic. J. A. Wyler. 2,105,389; Jan. 11.
Carbon removing tool. M. Holhut. 2,104,900; Jan. 11.
Carbonylic compounds, Stabilization of unsaturated. H. P. A. Groll and G. Hearne. 2,105,284; Jan. 11.
Carburetor. F. N. Russell. 2,105,300; Jan. 11.
Carburetor, Fuel-gas and air. P. M. Sartell. 2,105,056; Jan. 11.
Card playing apparatus. E. W. Larsson-Letsén. 2,105,358; Jan. 11.
Carrier: *See*—
Battery carrier.
Carton. M. Burger. 2,104,969; Jan. 11.
Carton, Egg. A. E. Bueschel. 2,105,181; Jan. 11.
Case: *See*—
Match book case. Shipping case.
Case or the like, Brief. S. Solomon. 2,104,935; Jan. 11.
Cash receiver. J. J. Murtaugh. 2,105,442; Jan. 11.
Casing and making same, Bookbinder. E. S. Schade. 2,105,232; Jan. 11.
Cathode beams, Device for controlling. R. Barthélemy. 2,105,177; Jan. 11.
Cellulose derivatives, Reducing the viscosity of. K. Thinius. 2,104,957; Jan. 11.
Cellulose process. R. F. Conaway. 2,104,849; Jan. 11.
Centrifugal apparatus, Automatic. R. A. Stepa. 2,105,059; Jan. 11.
Chair: *See*—
Obstetrical chair.
Charge cooler. J. H. Robertson. 2,105,267; Jan. 11.
Chassis-frame for motor-vehicles. E. G. Grinham. 2,105,144; Jan. 11.
Chassis, Motor vehicle. H. Ledwinka. 2,105,153; Jan. 11.
Chime, Electric door. E. G. Anderson. 2,104,963; Jan. 11.
Churn. F. G. Clark. 2,105,212; Jan. 11.
Chute, Silo. W. W. Gurney. 2,105,145; Jan. 11.
Cigarettes, Manufacture of. W. F. M. Edwards. 2,105,412; Jan. 11.
Cinematography to produce stereoscopic solid effects, Method of. I. M. Terwilliger. 2,104,779; Jan. 11.
Circuit: *See*—
Control circuit. Vacuum tube circuit.
Tuned oscillator circuit.
Circuit breaker. B. F. Jennings. 2,105,286; Jan. 11.
Circuit breaker. R. Temple, Jr. 2,104,914; Jan. 11.
Circuits, Vacuum tube. D. K. Gannett. 2,104,861; Jan. 11.
Clamp: *See*—
Plate clamp.
Clamp. C. W. Card. 2,105,345; Jan. 11.
Clasp, Garment. L. Stark. 2,104,955; Jan. 11.
Classification. J. S. Pellett. 2,105,126; Jan. 11.
Classifier. H. E. T. Haultain. 2,104,926; Jan. 11.
Clipper, Hair. L. C. Nicholl. 2,105,223; Jan. 11.
Clock device, Electrical. M. Môme. 2,105,050; Jan. 11.
Closure construction for washing machines. G. W. Johnson. 2,105,246; Jan. 11.
Closure, Container. E. M. Enkur and R. E. Greenholtz. 2,105,031; Jan. 11.
Closure for containers, Adjustable double. J. W. McNeil. 2,104,806; Jan. 11.
Closure for tubes or containers. D. Henderson. 2,105,118; Jan. 11.
Clutch: *See*—
Friction clutch.
Clutch. F. M. Guy. 2,105,188; Jan. 11.
Clutch controlling mechanism. C. S. Bragg. 2,104,731; Jan. 11.
Clutch operating means on motor vehicles. K. Maybach. 2,105,429; Jan. 11.
Coal, Apparatus for heating. J. S. Morgan. 2,105,156; Jan. 11.
Compensator for an oscillation generator, Frequency. H. O. Peterson. 2,105,096; Jan. 11.
Composite article. C. F. Lauenstein and C. J. Brinkworth. 2,105,048; Jan. 11.
Composite bus-bar. R. W. Shoemaker. 2,104,824; Jan. 11.
Compounds of polymerized acrylic acid or its esters with sulphur or selenium and making the same. P. Nowak. 2,105,361; Jan. 11.
Condenser potting composition. R. P. Lutz. 2,105,087; Jan. 11.
Connecter: *See*—
Electrical connecter. Wire connecter.
Connecter. A. A. Berndt. 2,105,178; Jan. 11.
Container: *See*—
Display container. Pencil head container.
Indicator container. Pouring spout container.
Container. M. M. Cunningham. 2,105,313; Jan. 11.
Container. G. R. Sharpe. 2,105,057; Jan. 11.
Containers, Apparatus for cleaning. Le B. B. Johnson. 2,105,458; Jan. 11.
Control circuit, Automatic fidelity. R. A. Braden. 2,104,788; Jan. 11.
Control system. F. Mohler and L. A. Umansky. 2,105,431; Jan. 11.
Control system. M. A. Whiting. 2,105,384; Jan. 11.
Conveyer. J. W. Forsythe. 2,105,142; Jan. 11.
Cooler: *See*—
Charge cooler.
Copper plate printing machine. K. T. Lang. 2,105,249; Jan. 11.
Cornerpiece and shoe clamp for boxes, Combination. E. Ritter. 2,105,373; Jan. 11.
Correlating subsurface strata. H. N. Herrick. 2,104,743; Jan. 11.
Coupler, Locomotive pilot. J. G. Bower. 2,104,846; Jan. 11.
Coupling. H. Yeskin. 2,104,920; Jan. 11.
Cover: *See*—
Book cover. Umbrella cover.
Cover and dispensing cabinet therefor, Sanitary seat. A. E. Wiitala. 2,105,133; Jan. 11.
Cover for match books, Safety. H. B. Eastman. 2,105,141; Jan. 11.
Cover for pots, Locking. I. D. Richheimer. 2,105,201; Jan. 11.
Cover for tops of cans and the like. G. C. Davis. 2,105,027; Jan. 11.
Covers and the like, Making slip. S. Krasnov. 2,105,123; Jan. 11.
Cravat or necktie. M. P. and K. H. Exline. 2,104,977; Jan. 11.
Cross roller bit. F. L. Scott and N. B. Berleth. 2,104,821; Jan. 11.
Cross winding machine. H. Dersen. 2,105,140; Jan. 11.
Crystalline formation. A. M. Marks. 2,104,949; Jan. 11.
Current transmission system. M. T. Wintsch. 2,105,134; Jan. 11.
Cut-off and transfer mechanism. R. L. Wilcox. 2,105,387; Jan. 11.
Cut-off mechanism. R. L. Wilcox. 2,105,385; Jan. 11.
Cut-off mechanism. R. L. Wilcox and H. L. Hoyt. 2,105,386; Jan. 11.
Cut-out. W. O. Schultz and A. G. Steinmayer. 2,104,933; Jan. 11.
Cutter: *See*—
Drill cutter.
Cutter flushing device. R. P. Sherman. 2,104,823; Jan. 11.
Cylinder machine. B. Pöhler. 2,105,261; Jan. 11.
Decorating spherical and other articles having curved surfaces by a stenciling process, Method of and apparatus for. J. C. Smith. 2,105,378; Jan. 11.
Detonator. H. Junghans. 2,105,423; Jan. 11.
Device for preventing unintentional locking of automobile doors. J. W. Fitz Gerald. 2,105,350; Jan. 11.
Device having decorated transparencies. H. M. Riley. 2,105,008; Jan. 11.
Diaphragm and making same. W. C. Shaw. 2,104,776; Jan. 11.
Die block. W. F. Finkl. 2,104,979; Jan. 11.
Dihydroxy isodibenzanthrone, Manufacture of. R. F. Thomson, I. B. Anderson, and S. Thornley. 2,104,960; Jan. 11.
Dispenser: *See*—
Powder dispenser.
Dispenser. D. D. Hoefler. 2,104,990; Jan. 11.
Dispenser. L. A. Paul. 2,105,370; Jan. 11.
Dispenser. O. N. Wiswell. 2,104,843; Jan. 11.
Dispenser for beverages, Portable. C. W. Sweitzer. 2,105,339; Jan. 11.
Dispenser or container. H. W. Rueger. 2,104,887; Jan. 11.
Dispensing attachment for beverage containers. G. W. Myers. 2,105,051; Jan. 11.
Display container. A. H. Newman. 2,105,199; Jan. 11.
Display device. G. H. Reverman. 2,104,951; Jan. 11.
Door: *See*—
Veneered door.
Drawer for gas ranges and the like, Broiler. C. H. and R. F. Hoffstetter. 2,105,418; Jan. 11.
Drill: *See*—
Roller boring drill. Three-cutter drill.
Drill cutter. F. L. Scott. 2,104,822; Jan. 11.
Drums containing very thick lubricants or other viscous materials, Apparatus for emptying. E. Piqueres. 2,105,160; Jan. 11.
Duplex separable fastener. L. Roseman. 2,105,333; Jan. 11.
Duplicating apparatus. A. Marchev and V. M. Leach. 2,105,195; Jan. 11.
Duplicating apparatus for typewriters, Multiple. J. J. Weber. 2,105,279; Jan. 11.
Dyes, Polymethine. W. Dieterle and K. Horst. 2,104,855; Jan. 11.
Dyestuffs of the acylaminoanthraquinone series containing a thiazolic radical and making same, Vat. W. Zerweck and W. Kunse. 2,104,891; Jan. 11.
Elbows, Apparatus for forming sheet metal. C. J. Holub. 2,104,993; Jan. 11.
Electric alarm switch. F. G. Gibson. 2,105,113; Jan. 11.
Electric cable. H. A. Staples. 2,105,168; Jan. 11.
Electric control device for block printing machines. O. Brophy. 2,104,894; Jan. 11.
Electric discharge lamp, Gaseous. J. L. Cox. 2,105,138; Jan. 11.
Electric lamp. H. E. Metcalf. 2,105,430; Jan. 11.
Electric lock. W. Wagner. 2,105,304; Jan. 11.

Electric meter mounting. H. A. Bakke. 2,105,396; Jan. 11.
Electric plug lock. J. G. Guinn. 2,104,945; Jan. 11.
Electric switch. G. H. Clark. 2,104,848; Jan. 11.
Electrical condenser and spacing strip therefor. A. Di Giacomo. 2,104,797; Jan. 11.
Electrical conductor, Insulated. P. Nowak and H. Hofmeier. 2,105,362; Jan. 11.
Electrical connecter. G. E. Andre. 2,104,786; Jan. 11.
Electrical connecting device. O. Spahr. 2,104,888; Jan. 11.
Electrical energy, System for transmitting. A. R. Locke. 2,105,194; Jan. 11.
Electrical exploration of the subsurface, Method and apparatus for. J. J. Jakosky. 2,105,247; Jan. 11.
Electrical transmission system, High-frequency. E. L. C. White. 2,105,305; Jan. 11.
Electrolyte. J. B. Brennan. 2,104,732; Jan. 11.
Electrolyte and making same. J. B. Brennan and E. L. Marsh. 2,104,733; Jan. 11.
Electron discharge device. H. Rothe. 2,104,816; Jan. 11.
Electron discharge device. E. Wiegand, W. Meyer, and H. Pulfrich. 2,104,784; Jan. 11.
Electron tube. W. Dällenbach. 2,105,026; Jan. 11.
Elevator latch. R. K. Hertel. 2,105,077; Jan. 11.
Engine: *See*—
Reciprocating engine.
Engine construction, Internal combustion. G. H. Blettner. 2,104,892; Jan. 11.
Engine cooling and heating means for motor vehicles. W. A. Kysor. 2,105,193; Jan. 11.
Engine, pump, or compressor of the swash or wobble plate types, Reciprocating. K. K. Turner. 2,105,019; Jan. 11.
Enunciator. H. F. Buses and J. N. Huser. 2,104,895; Jan. 11.
Esters of polycarboxylic acids, Sulphated. J. H. Wernts. 2,104,782; Jan. 11.
Excavating machine. G. Jacobs. 2,104,928; Jan. 11.
Exerciser. H. L. Hussmann. 2,104,927; Jan. 11.
Exposure meter. J. Mihalyi and N. B. Green. 2,105,255; Jan. 11.
Eye solution. E. A. Markush and J. Miller. 2,105,326; Jan. 11.
Fabric: *See*—
Woven fabric.
Fabric. S. Saftlas. 2,105,301; Jan. 11.
Fabrics and making same, Crisp sheer. H. I. Huey and W. W. Russell. 2,104,748; Jan. 11.
Fan, Circulating. H. I. Finch. 2,105,315; Jan. 11.
Fastener: *See*—
Button fastener. Slide fastener.
Duplex separable fastener.
Fastener for undergarments, Waistband. H. Herrle. 2,105,417; Jan. 11.
Fastener for wrist watch straps. C. B. Greenberg. 2,105,143; Jan. 11.
Fastening-inverting mechanism. T. H. Seely. 2,105,377; Jan. 11.
Faucet. H. J. M. Rasmussen. 2,105,331; Jan. 11.
Feeder and waterer, Poultry. F. W. Buckle. 2,105,403; Jan. 11.
Feeding device. A. Allendorf. 2,105,068; Jan. 11.
Fender welt. G. G. Barr and A. H. Kirchner. 2,105,397; Jan. 11.
Ferrule for handles and attaching same. H. W. Hindes. 2,105,119; Jan. 11.
Filing and stacking equipment. C. J. Streeter. 2,104,912; Jan. 11.
Filing equipment. C. J. Streeter. 2,104,913; Jan. 11.
Film guide for film magazines. L. R. Martin. 2,105,254; Jan. 11.
Film strip. O. Wittel. 2,105,238; Jan. 11.
Filter glass holder. F. M. Bowers. 2,105,071; Jan. 11.
Finishes on articles of manufacture, System of deriving decorative. L. V. Casto. 2,104,790; Jan. 11.
Finishing machine. R. B. Woodcock and H. Boothroyd. 2,105,388; Jan. 11.
Fish cleaning and filleting machine. C. G. Ullin. 2,105,207; Jan. 11.
Flame producing mechanism. L. V. Aronson. 2,104,965; Jan. 11.

Electric alarm switch.
Electric switch.
Switch construction, Electric. M. Guett and R. H. Bentley. 2,105,415; Jan. 11.
Switch for fire prevention devices for motion picture machines. E. Saelens and C. Moreau. 2,104,952; Jan. 11.
Switching device. W. Giger and C. Peter. 2,105,455; Jan. 11.
Synchronising device, Mechanical. E. Martin. 2,105,089; Jan. 11.
Synthetic compound and its production. P. Nowak and H. Hofmeier. 2,105,363; Jan. 11.
Tail device for airplanes. R. Saulnier. 2,105,374; Jan. 11.
Tank: *See*—
Portable tank.
Pressure tank.
Wooden tank.
Tape, Measuring. A. W. Keuffel. 2,105,140; Jan. 11.
Telephone system. O. I. Carpenter and B. F. Moss. 2,104,971; Jan. 11.
Telephone system. R. G. Dixon. 2,104,975; Jan. 11.
Telephone system. W. Michaelis. 2,105,001; Jan. 11.
Telephone system. N. H. Saunders. 2,105,012; Jan. 11.
Telephone transmission system. H. H. Smith. 2,105,016; Jan. 11.
Television method and apparatus. F. C. P. Henroteau. 2,104,862; Jan. 11.
Temperature control in a flotation process. A. J. Weinig. 2,105,294; Jan. 11.
Temperature control means for extrusion apparatus. W. W. Kagi and R. Gillis. 2,105,083; Jan. 11.
Temperature controller for electric flatirons, etc., Automatic. F. W. Carpenter. 2,104,970; Jan. 11.
Thread carrier device. E. F. Richter and J. E. Garrett. 2,104,815; Jan. 11.
Thread-cutter drill. F. L. Scott. 2,104,820; Jan. 11.
Tie, Four-in-hand. I. D. Wolfson. 2,105,306; Jan. 11.
Tile beam and span tile floor structure, Precast reinforced. C. T. Bridgman and H. Giese. 2,105,106; Jan. 11.
Timelock. C. A. Miller. 2,105,441; Jan. 11.
Tip. J. C. Morrow. 2,104,904; Jan. 11.
Tire cutting machine. H. J. Fleming. 2,105,316; Jan. 11.
Titanium-iron arsenates and making same, Hydrated. C. J. Kinzie and E. Wainer. 2,105,459; Jan. 11.
Tool: *See*—
Alloy steel tool.
Carbon removing tool.
Shovel or like tool.
Tool and method of use, Honing. K. W. Connor. 2,105,024; Jan. 11.
Tool handle. E. Bachtold. 2,105,239; Jan. 11.
Tool holder. W. H. Pagenkopf. 2,105,330; Jan. 11.
Tooth crown, Reenforced porcelain. A. Barrett and L. Hirschhorn. 2,105,398; Jan. 11.
Torch, Welding and cutting. C. R. Richter. 2,104,761; Jan. 11.
Torque arm and similar structural member. J. D. Soehner and H. S. Holmes. 2,105,132; Jan. 11.
Toy. C. H. Fleischer. 2,104,742; Jan. 11.
Traffic control system. A. P. B. Renshaw. 2,105,443; Jan. 11.
Trailer. A. D. Carpenter. 2,104,734; Jan. 11.
Trailer. G. Horsfield. 2,105,246; Jan. 11.
Tree loading and unloading mechanism. C. F. Irish. 2,105,353; Jan. 11.
Trimming apparatus. J. C. Smith. 2,105,131; Jan. 11.
Trimming attachment for sewing machines. M. Feil. 2,105,032; Jan. 11.
Trimming machine. F. M. Card. 2,105,347; Jan. 11.
Truck, Warehouse. W. A. Berg. 2,105,210; Jan. 11.
Tube: *See*—
Electron tube.
Tube and circuit, Amplifying. G. Jobst and E. Klotz. 2,105,081; Jan. 11.
Tube and making same, High pressure. B. L. Quarnstrom. 2,104,884; Jan. 11.
Tubes, Apparatus for manufacturing cellulose coated and impregnated fibrous. J. P. Smith. 2,105,273; Jan. 11.
Tubes, Device for expressing contents from collapsible. C. Stanton. 2,104,954; Jan. 11.
Tubing, Protected. H. J. Little. 2,105,124; Jan. 11.
Tuned oscillator circuit. B. J. Thompson. 2,104,915; Jan. 11.
Umbrella. A. E. Pollock. 2,105,225; Jan. 11.
Umbrella cover. F. Voelker. 2,105,172; Jan. 11.
Vacuum breaking device for preventing back siphonage in water systems. E. J. Kocour. 2,105,044; Jan. 11.
Vacuum tube circuit. H. A. Affel. 2,104,844; Jan. 11.
Vacuum wheel. R. E. McLemore. 2,104,881; Jan. 11.
Valve: *See*—
Butterfly valve.
Relief valve.
Valve. H. S. Cover. 2,105,183; Jan. 11.
Valve. C. M. Dolby. 2,105,282; Jan. 11.
Valve bag. D. E. Scott. 2,105,376; Jan. 11.
Valve construction, Lubricator. J. C. Morrow. 2,104,903; Jan. 11.
Valve for a four-stroke opposed piston engine, Sleeve. E. Schmid. 2,105,272; Jan. 11.
Valve for heating apparatus. L. W. Eggleston. 2,105,453; Jan. 11.
Vehicle: *See*—
Motor vehicle.
Vehicle. R. Laborda. 2,105,085; Jan. 11.
Vehicle head lamp. W. Honing. 2,105,419; Jan. 11.
Vehicle seat. E. O. Schjolin. 2,104,818; Jan. 11.
Vehicle with variable propulsion, Motor. A. Kégresse. 2,105,042; Jan. 11.
Veneered door. G. L. Gilkey. 2,105,187; Jan. 11.
Vibrating endless screen. S. M. Akeyson. 2,104,785; Jan. 11.
Wall and ceiling partition tie. D. McNamara. 2,105,327; Jan. 11.
Wall hook. E. H., F. E. B., and C. Tate. 2,105,061-2; Jan. 11.

Warp feed for wire weaving looms. H. L. Thompson. 2,105,102; Jan. 11.
Waste for journal box use, Apparatus for and the method of treating fibrous. E. S. Pearce. 2,105,094; Jan. 11.
Water heater. L. B. Weymouth. 2,104,918; Jan. 11.
Water power, Verticle drop. A. G. Grondahl. 2,104,984; Jan. 11.
Water purification. O. M. Urbain. 2,105,277; Jan. 11.
Water softener and softening water. H. M. Haagenson. 2,104,986; Jan. 11.
Waving appliance, Permanent. M. Arnold. 2,105,069; Jan. 11.
Weather stripping. N. C. Schlegel. 2,105,164; Jan. 11.
Web registering mechanism. J. Degnan. 2,105,185; Jan. 11.
Welding apparatus. J. L. Jones. 2,104,749-50; Jan. 11.
Well drilling rig. C. W. MacKay. 2,105,091; Jan. 11.
Wetting and dispersing agents and making the same. H. Bertsch and H. Stober. 2,104,723; Jan. 11.
Wharve for spindles for spinning, twisting, winding, and similar machines. C. Schleifer. 2,105,271; Jan. 11.
Wheel: *See*—
Skate wheel.
Vacuum wheel.
Wheel. F. C. Frank. 2,105,317; Jan. 11.
Wheel and making same, Buffing. R. A. Goodman. 2,104,925; Jan. 11.
Wheel and spring suspension, Vehicle. J. Tjaarda. 2,105,171; Jan. 11.
Wheel suspension, Independent. F. E. Clemons. 2,104,736; Jan. 11.
Wicket, Barrier. J. Soderholm. 2,105,204; Jan. 11.
Window structure, Car. S. E. Blessin. 2,105,180; Jan. 11.
Wiper blade, Windshield. T. R. Walton. 2,105,021; Jan. 11.
Wire connecter. L. H. Church. 2,105,182; Jan. 11.
Wire connecter. F. G. Ridgers. 2,105,120; Jan. 11.
Wire stitching machine. W. A. Pratt. 2,105,372; Jan. 11.
Wooden tank. J. P. Walker. 2,104,961; Jan. 11.
Woven fabric. H. B. Jackson. 2,105,190; Jan. 11.
Wrapper for necktie sets, Inspection. O. Markowitz. 2,104,999; Jan. 11.
Wrapper or label for toilet packages. P. D. Parsons. 2,105,367; Jan. 11.
Wrapping machine. C. H. Petskeyes. 2,105,159; Jan. 11.
Wrench. L. E. Hagbo. 2,105,244; Jan. 11.
Yarn, Device for twisting. L. J. O'Dowd. 2,104,809; Jan. 11.
Yarn from artificial staple fibers and making same, Spun. C. Dreyfus. 2,104,798; Jan. 11.
Yarn, Twisting. L. J. O'Dowd. 2,104,810; Jan. 11.
Yarns, Apparatus for humidifying textile. T. and P. J. Lydon. 2,105,088; Jan. 11.
Yarns from continuous filaments, Operation for the production of staple fiber. H. and W. I. Taylor. 2,104,827; Jan. 11.
Yellow stain in photographic preparations and regulation of the halogen content thereof, Preventing. A. Steigmann. 2,105,274; Jan. 11.
Zinc oxide, Manufacture of. R. Allavena. 2,105,394; Jan. 11.

CLASSIFICATION OF PATENTS

ISSUED JANUARY 11, 1938

In view of the fact that the issue is being checked weekly by the Classification Division, the class and subclass in this list are correct as of this date. Where there is a discrepancy between the classification given in the patent head and the classification in this list, the classification of this list governs.

NOTE.—First number—class, second number—subclass, third number—patent number

Wallace, Wayne W., Harriman, Tenn. Garden tool. 108,044; Jan. 18.
Warshaw, Samuel, New York, N. Y. Dress. 107,980; Jan. 18.
Weissman, Samuel, New York, N. Y. Display container for watches. 107,981; Jan. 18.
West, John W., Maplewood, N. J., assignor to Joe Lowe Corporation, New York, N. Y. Handle stick. 108,025; Jan. 18.
Wilkinson, Gladys M., executrix. (See Wilkinson, James W.)
Wilkinson, James W., deceased, Kansas City, by G. M. Wilkinson, executrix, Johnson, Kans. Electric welding apparatus. 108,045; Jan. 18.
Williams, Othneil G., assignor to William L. Gilbert Clock Corporation, Winsted, Conn. Combination clock and weather and temperature indicator. 108,007; Jan. 18.
Willman, Carlton H. (See Allenby, W. F., and Willman.)
Wolfsheim & Sachs, Inc. (See Hiscock, William J., assignor.)
Woodward, Lee L., Owosso, Mich. Shelved table. 107,982; Jan. 18.
Zahn, Samuel, New York, N. Y. Dress ensemble. 108,061; Jan. 18.

LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 18TH DAY OF JANUARY, 1938

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Abbott, Albert I. (See Miller, W. C., and Abbott.)
Acker, George H., Shaker Heights, assignor to The Farval Corporation, Cleveland, Ohio. Lubricating valve. 2,105,577; Jan. 18.
Acme Steel Company. (See Henderson, Clarence S., assignor.)
Adams, J. D., Manufacturing Company. (See Lyden, Frank J., assignor.)
Advance Machine Co. (See Gebert, A. E., and Black, assignors.)
Aiken, Thomas McG., Pittsburgh, Pa. Window operating and door locking mechanism. 2,105,830; Jan. 18.
Akau, George. (See Ley, G. J., Payne, and Akau.)
Aktiebolaget Facit. (See Carlström, B., and Hanson, assignors.)
Aldridge, Blair G., and E. G. Ragatz, assignors to Union Oil Company of California, Los Angeles, Calif. Preventing corrosion in the distillation of hydrocarbon oil. 2,105,874; Jan. 18.
Allen, S. L., & Co. (See Bowen, James M., assignor.)
Alther, Joseph G., assignor to Universal Oil Products Company, Chicago, Ill. Treatment of hydrocarbons. 2,105,515; Jan. 18.
American Brass Company, The. (See Hull, Daniel R., assignor.)
American Casting & Manufacturing Corporation. (See Dietze, Emil, assignor.)
American Cyanamid & Chemical Corporation. (See Davis, Clarke F., assignor.)
American Electrical Heater Company. (See Hanser, C. A., and Thomas, assignors.)
American Plastics Corporation. (See Parsons, John, assignor.)
American Rolling Mill Company, The. (See Hudson, Edwin B., assignor.)
American Rolling Mill Company, The. (See Millan, Edward N., assignor.)
American Telephone and Telegraph Company. (See Darnell, E., Enoch, Grubb, and Freeman, assignors.)
American Telephone and Telegraph Company. (See Hathaway, L. A., and Fay, assignors.)
Anderson, Carl E. (See Montan, A., and Anderson.)
Anderson, Carl E., East Orange, assignor to Eastern Tool & Mfg. Co., Bloomfield, N. J. Slide loop. 2,105,516; Jan. 18.
Andreini, Michele, Milan, Italy. Carriage for Röntgen apparatus. 2,105,961; Jan. 18.
Andrussow, Leonid, Mannheim, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Production of hydrogen cyanide. 2,105,631; Jan. 18.
Angus, George, & Company Limited et al. (See Krasslet, Theodor, assignor.)
Armstrong, Clifford H., assignor to Copes Regulators Limited, London, England. Valve. 2,105,681; Jan. 18.
Associated Electric Laboratories, Inc. (See Lomax, Clarence E., assignor.)
Attenhofer, Adolf, Zurich, Switzerland. Ski attaching device. 2,106,110; Jan. 18.
Auditorium Conditioning Corporation. (See Hunicke, Clarence C., assignor.)
Ault, Waldo C., and C. A. Hochwalt, Dayton, Ohio, assignors to Monsanto Chemical Company, St. Louis, Mo. Manufacture of Motor fuel. 2,105,464; Jan. 18.
Aurelius, Bernard E., et al. (See Olson, Oscar L., assignor.)
Aurelius, Eugene A., et al. (See Olson, Oscar L., assignor.)
Auslander, Henry, New York, N. Y. Sectional cigarette case. 2,105,517; Jan. 18.
Auto Research Corporation. (See Bijur, Joseph, assignor.)
Autogiro Company of America. (See Bennett, J. A. J., and Hodgess, assignors.)
Aviation Manufacturing Corporation. (See Preston, C. I., and Hammill, assignors.)
B. B. Chemical Co. (See Macdonald, Alexander D., assignor.)
Bahan, William H., Greenville, S. C. Shuttle box for looms. 2,105,578; Jan. 18.
Bailey Meter Company. (See Junkins, Raymond D., assignor.)
Baker, Louis S., Parlin, I. H. Morgan, South River, and R. J. Quaid, Sayreville, N. J., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Process of nitrating cellulose. 2,105,627; Jan. 18.
Baker-Raulang Company, The. (See Remde, Edward H., assignor.)
Balbinder, Arthur. (See Feuer, S. R., Freedman, Hosinsky, and Balbinder.)
Bale, Ralph G., et al. (See McCarty, Roy C., assignor.)
Balmford, Alfred B., et al. (See Burn, Walter S., assignor.)
Balsiger, Harold H. (See Ott, C. L., and Balsiger.)
Bannon, Edward F., assignor to Harvey Hubbell, Incorporated, Bridgeport, Conn. Cord connector body. 2,105,465; Jan. 18.
Barber, Charles C., Rockville, Centre, N. Y., and C. W. McWilliams, Kearny, N. J., assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y. Shaft bearing. 2,105,900; Jan. 18.
Barlow, Sidney D., and P. Sussman, New York, N. Y. Marking implement. 2,106,046; Jan. 18.
Barnes, Merritt S., Oneonta, N. Y. Lawn cleaning and fertilising machinery. 2,105,603; Jan. 18.
Barrett, George J., and S. Robichaux, Houston, Tex. Well-boring apparatus. 2,105,722; Jan. 18.
Barrett, George J., et al. (See Cutrer, C. C., and Broussard, assignors.)
Bates Manufacturing Company, The. (See Lang, William, assignor.)
Bausch & Lomb Optical Company. (See Papello, Karl, assignor.)
Bayer, Alfons, and K. Kösslinger, Dessau, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Manufacture of alkali cellulose. 2,106,111; Jan. 18.
Baylis, Robert M., Dayton, Ohio. Aerial toy. 2,105,579; Jan. 18.
Beall, Lee M., Tulsa, Okla. Arch and wall construction. 2,105,804; Jan. 18.
Beattie, Clay H., Jr. (See Hering, D., and Beattie.)
Bechik, Michael, St. Paul, Minn. Handle. 2,105,580; Jan. 18.
Beck, Charles R. and G. L., Anderson, Ind., assignors to Hillerich & Bradsby Co., Louisville, Ky. Apparatus for treating baseball bats. 2,105,466; Jan. 18.
Beck, Garnett L. (See Beck, Charles R. and G. L.)
Becker, Helmut, assignor to Ernst Leitz, G. m. b. H., Wetzlar, Germany. Film loading cassette. 2,105,628; Jan. 18.
Becker, Helmut, assignor to Ernst Leitz, G. m. b. H., Wetzlar, Germany. Moving picture camera cabette. 2,105,629; Jan. 18.
Becker, Helmut, assignor to Ernst Leitz, G. m. b. H., Wetzlar, Germany. Photographic film camera. 2,105,630; Jan. 18.
Becker, Helmut, Wetzlar, Germany. Motion picture camera. 2,105,631; Jan. 18.
Becker, Joseph, Pittsburgh, Pa., assignor, by mesne assignments, to Koppers Company. Coking coal briquettes. 2,105,832; Jan. 18.
Beers, George L., Collingswood, N. J., assignor to Radio Corporation of America. Selectivity control system. 2,105,518; Jan. 18.
Beers, Royce L., Birmingham, assignor to Detroit Stoker Company, Monroe, Mich. Apron tuyère for stokers. 2,105,675; Jan. 18.
Behr, Harry C. A., and J. J. Eck, assignors to Yorktown Electric Roaster Manufacturing Corporation, York, Pa. Automatic roaster. 2,105,778; Jan. 18.
Bell Telephone Laboratories, Incorporated. (See Barber, C. C., and McWilliams, assignors.)
Bell Telephone Laboratories, Incorporated. (See Clark, J. E., Ekstrand, and Ronci, assignors.)
Bell Telephone Laboratories, Incorporated. (See Dudley, Homer, W., assignor.)
Bell Telephone Laboratories, Incorporated. (See Harrison, Henry C., assignor.)
Bell Telephone Laboratories, Incorporated. (See Korn, Franklin A., assignor.)
Bell Telephone Laboratories, Incorporated. (See Laico, Joseph P., assignor.)
Bell Telephone Laboratories, Incorporated. (See Meidenhall, Hialam E., assignor.)
Bell Telephone Laboratories, Incorporated. (See Merriam, Francis F., assignor.)
Bell Telephone Laboratories, Incorporated. (See Nyquist, Harry, assignor.)
Bell Telephone Laboratories, Incorporated. (See Ronci, Victor L., assignor.)
Bell Telephone Laboratories, Incorporated. (See Towne, Charles C., assignor.)
Bell Telephone Laboratories, Incorporated. (See Whitney, Wiley, assignor.)
Belmont Radio Corporation. (See Mattes, Harold C., assignor.)

Bendix, Harry, Antioch, Calif., assignor to Great Western Electro-Chemical Company. Manufacture of nitromethane. 2,105,581; Jan. 18.
Bender, Robert W., assignor to Inter-Collegiate Press, Kansas City, Mo. Plate holder for intaglio printing machines. 2,105,970; Jan. 18.
Bendix Aviation Corporation. (See Chappell, R. R., McCormack, and Stroh, assignors.)
Bendix Products Corporation. (See Price, Harold W., assignor.)
Bennett, James A. J., Geniate, Newton Mearns, and F. L. Hodgson, Clarkston, Scotland, assignors to Autogiro Company of America, Wilmer Grove, Pa. Aircraft having rotative sustaining wings. 2,106,033; Jan. 18.
Bensing, Mary L. V. (See Bensing, William A., and M. L. V.)
Bensing, William A., and M. L. V. Bensing, Lincoln, Nebr. Breeder. 2,105,719; Jan. 18.
Bergmans, Jan, Eindhoven, Netherlands, assignor to General Electric Company. Electric lamp. 2,106,079; Jan. 18.
Bernemer, Vincent, Shandaken, N. Y. Hose nozzle. 2,106,412; Jan. 18.
Bernhard, Edgar, et al. (See Bednarz, Alexander F., assignor.)
Bickel, Clifford A., assignor to The Monarch Machine Tool Company, Sidney, Ohio. Diameter gauging apparatus. 2,105,962; Jan. 18.
Biddison, Pascal M., Dallas, Tex., and M. R. Ryan and C. R. Burns, assignors to Danciger Oil & Refineries, Inc., Tulsa, Okla. Treatment of hydrocarbons. 2,105,467; Jan. 18.
Bigelow-Sanford Carpet Co. (See Cooper, Wellesley B., assignor.)
Bijur, George, executor. (See Bijur, Joseph.)
Bijur, Joseph, deceased, by G. Bijur, executor, New York, N. Y.; said J. Bijur assignor, by mesne assignments, to Auto Research Corporation. Lubrication. 2,105,465; Jan. 18.
Birch, Harold W., Belmont, Mass. Darling table. 2,105,715; Jan. 18.
Birch, William T., Chicago, Ill. Water pressure regulator. 2,105,976; Jan. 18.
Bird, Herbert E. (See Jacobs, M. V., and Bird.)
Birge, Francis J., assignor to Seymour Manufacturing Company, Incorporated, Seymour, Ind. Weed cutter. 2,106,047; Jan. 18.
Black, Floyd C. (See Gebert, A. E., and Black.)
Blair, Joseph N., assignor of one-half to J. W. Roxborough, Detroit, Mich. Propeller. 2,105,923; Jan. 18.
Bloch, Julius. (See Heimsath, K. D., and Brassart, assignors.)
Bloom, Otto L. (See Isbell-Shalom, Samuel, and Bloom.)
Boeff Corporation. (See Behmler, Frank D., assignor.)
Bodell, Henry R., Cushing, N. Y., assignor to Celanese Corporation of America. Colored artificial yarn and like materials and making same. 2,105,518; Jan. 18.
Boese, Albert B., Jr., Pittsburgh, Pa., assignor to Carbide and Carbon Chemicals Corporation. Production of resins. 2,105,461; Jan. 18.
Bob, George W., Chattanooga, Tenn. Packing case. 2,105,924; Jan. 18.
Bohman, Axel J. (See Graves, R. V., and Bohman.)
Bonato, Martin, Santa Barbara, Calif. Brace holder and press. 2,106,112; Jan. 18.
Boston, William E., Leicester, England. Knitting machine. 2,105,965; Jan. 18.
Berg-Warner Corporation. (See Rohnberg, Axel F., assignor.)
Borg-Warner Corporation. (See Rucemberg, Carl A., assignor.)
Bosch, Henry, Jr., San Francisco, Calif. Retrieving mechanism. 2,105,460; Jan. 18.
Bowen, James M., Cape May Court House, N. J., assignor to S. L. Allen & Co., Inc., Philadelphia, Pa. Seeding sled. 2,105,633; Jan. 18.
Bowen, John E., Akron, Ohio. Watch construction. 2,105,966; Jan. 18.
Bower Roller Bearing Company. (See Ortegren, Herman A., assignor.)
Bower Roller Bearing Company. (See Zimmerman, Thomas, assignor.)
Bower, Ward E., Washington, D. C. Apparatus for timing. 2,105,470; Jan. 18.
Bowman, Louis G., assignor to Lewis Invisible Stitch Machine Company, St. Louis, Mo. Sewing machine work support. 2,106,020; Jan. 18.
Boyle, Thomas F. (See Pate, Walker M., assignor.)
Boyler, George S., Peterborough, Ontario, Canada. Locomotive draft chamber. 2,106,016; Jan. 18.
Brassart, Otto. (See Heimsath, K. D., and Brassart.)
Braun, Philip N., and E. Davis, assignors to The Prosperity Company Inc., Syracuse, N. Y. Garment or ironing press. 2,105,936; Jan. 18.
Brandel, Georges F., assignor to Societe Anonyme: Societe Marbriere de Paris, Paris, France. Machine for facing the surfaces of hard substances by pressure. 2,106,034; Jan. 18.
Bridgeport Chain & Manufacturing Company, The. (See Freddino, Carney, assignor.)
Briggs Manufacturing Company. (See Graf, Vincent J., assignor.)
Briggs & Stratton Corporation. (See Jacobi, Edward N., assignor.)
Brinker, Frederic A., Denver, Colo. Froth flotation method. 2,105,901; Jan. 18.
Brinkmann, Adolph, Milwaukee, Wis. Ball swinging toy. 2,105,822; Jan. 18.
Brodie, Alan M., Richmond, Va. Golf bag. 2,105,858; Jan. 18.
Brougher, John W., Bremen, Ind. Vehicular traffic signal. 2,106,113; Jan. 18.
Broussard, Joseph L. (See Cutrer, C. C., and Broussard.)
Brown, Betsy C., et al. (See Johnson, Paul W., assignor.)
Brown, Fred O. C., Grand Rapids, Mich. Cuff. 2,105,471; Jan. 18.
Brown, William E. (See Dyer, J. B., and Brown.)
Brumb Development Company, The. (See Williams, Alfred L. W., assignor.)
Buc, Hyym E. (See Rosen, B. Buc, and Lobe, assignors.)
Buck, Frederick W., Washington, D. C. Building. 2,105,854; Jan. 18.
Buckeye Traction Ditcher Company, The. (See George, Charles L., assignor.)
Burdick, Charles L., London, England. Apparatus for determining the moisture content of substances. 2,105,683; Jan. 18.
Burdsal, Charles S., and R. E. W. Titel, Phoenix, Ariz., assignors of fifty-one per cent to said Burdsal and forty-nine per cent to said Titel. Fluid meter. 2,106,007; Jan. 18.
Burke, Charles R. (See Biddison, Pascal M., Ryan, and Burke.)
Burn, Walter S., Hartlepool, assignor to The National Gas and Oil Engine Company, Limited, A. R. Bulmford, Ashton-under-Lyne, and W. S. Burn, Hartlepool, England. Internal combustion engine. 2,105,717; Jan. 18.
Burrows, Lawton A., Wenonah, and W. F. Pilbert, Woodbury, N. J., and E. E. Reid, Baltimore, Md., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Ignition composition. 2,105,635; Jan. 18.
Busse, Edwin G., assignor to Chicago Railway Equipment Company, Chicago, Ill. Brake beam safety guard structure. 2,105,906; Jan. 18.
Buttler, William J., Bickley, assignor to Kleemeiners (British & Overseas) Ltd., Bromley, England. Machine for the manufacture of cartons and the like. 2,105,582; Jan. 18.
Byers, Edwin W., Chicago, Ill. Flashing. 2,105,996; Jan. 18.
Cahn, Charles, Brooklyn, N. Y. Dry shaver. 2,105,835; Jan. 18.
Campbell, A. S., Co. (See Campbell, Alphonse S., assignor.)
Campbell, Alphonse S., Winchester, assignor to A. S. Campbell Co., Inc., East Boston, Mass. Vertical bumper. 2,106,126; Jan. 18.
Campbell, Harry E., Baltimore, Md., assignor to Campbell Metal Window Corporation, New York, N. Y. Casement window operating means. 2,106,081; Jan. 18.
Campbell Metal Window Corporation. (See Campbell, Harry E., assignor.)
Candy, Albert T., Jr., Oak Park, assignor to Candy & Company, Inc., Chicago, Ill. Coded wire. 2,106,043; Jan. 18.
Candy & Company. (See Candy, Albert T., Jr., assignor.)
Capezio, Salvatore, East Paterson, N. J. Sound producing device for footwear. 2,105,842; Jan. 18.
Carbide and Carbon Chemicals Corporation. (See Boese, Albert B., Jr., assignor.)
Carborundum Company, The. (See Klomp, Alfred W., assignor.)
Carey-McFall Co. (See Stuber, Walter J., assignor.)
Carey, Philip, Manufacturing Company, The. (See Graider, H. W., and Fasold, assignors.)
Carlson, Axel W. (See Stake, H., and Carlson.)
Carlson, Gustave A., Detroit, Mich. Adjustable finishing machine. 2,106,082; Jan. 18.
Carlström, Bengt, and E. Hanson, assignors to Aktiebolaget Facit, Atvidaberg, Sweden. Calculating machine and the like. 2,105,520; Jan. 18.
Carney, George C., assignor to H. W. Dietert, Detroit, Mich. Core box stripping machine. 2,105,877; Jan. 18.
Casselman, Elbridge J., Pittsburgh, Pa., assignor to Magazine Repeating Razor Company. Razor blade and steel therefor. 2,105,583; Jan. 18.
Castle, Alfred J., assignor to Inland Steel Company, Chicago, Ill. Rolling ferrous sheets. 2,105,968; Jan. 18.
Castle, Alfred J., assignor to Inland Steel Company, Chicago, Ill. Method of and apparatus for producing ferrous sheet metal. 2,105,969; Jan. 18.
Cawein, Madison, Manhasset, N. Y., assignor to Haselstine Corporation. Periodic voltage generator. 2,105,902; Jan. 18.
Celanese Corporation of America. (See Bodell, Henry R., assignor.)
Celanese Corporation of America. (See Dickie, W. A., and Manchief, assignors.)
Celanese Corporation of America. (See Martin, H. E., and Bauer, assignors.)
Celanese Corporation of America. (See Moss, William H., assignor.)
Celanese Corporation of America. (See Whitehead, William, assignor.)

Cellufoam Corporation. (See Weatherod, George C., assignor.)
Challis, Gail, assignor of one-half to T. T. Logan, Russell Springs, Kans. Row crop mulcher. 2,105,805; Jan. 18.
Chamberlain, Alfred J., Wauwatosa, Wis., assignor to General Metalware Company, Minneapolis, Minn. Dispensing container. 2,105,718; Jan. 18.
Champion Knitwear Company. (See Feinbloom, William F., assignor.)
Champion, Necole, Orange, N. J. Photograph identification. 2,105,521; Jan. 18.
Chappell, Ralph R., Richmond, Va., and D. McCormack, Lutherville, and R. J. Streb, Baltimore, Md., assignors to Bendix Aviation Corporation, South Bend, Ind. Means for controlling conditions or operations. 2,104,063; Jan. 18.
Chemical Works formerly Sandoz. (See Knecht, O., and Wirth, assignors.)
Chicago Railway Equipment Company. (See Busse, Edwin G., assignor.)
Chicago Railway Equipment Company. (See Cottrell, Robert B., assignor.)
Christensen, Chris T., Alhambra, Calif., assignor, by decree of court, to M. T. Christensen. Sand and mud separator. 2,105,584; Jan. 18.
Christensen, Mary T. (See Christensen, Chris T., assignor.)
Chrysler Corporation. (See Lee, Roger K., assignor.)
Chrysler Corporation. (See Patterson, Herbert F., assignor.)
Chrysler Corporation. (See Stamy, David R., assignor.)
Chrysler Corporation. (See Werdehoff, Albert B., assignor.)
Churrell, Franklin O., assignor to Dunlop Tire and Rubber Corporation, Buffalo, N. Y. Back cushion. 2,105,997; Jan. 18.
Ciarrocchi, Igino. (See Levi, M. G., Mariotti, and Ciarrocchi.)
Clark, James E., Long Island City, S. O. Ekstrand, Bergenfield, and V. L. Ronci, Brooklyn, assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y. High power discharge device. 2,105,472; Jan. 18.
Clevenger, Sherman, Cleveland, Ohio. Fire lighter. 2,105,522; Jan. 18.
Clifford, Albert M., Stow, Ohio, assignor to Wingfoot Corporation, Wilmington, Del. Substituted secondary amines as antioxidants for deteriorable organic compositions. 2,105,806; Jan. 18.
Clisbe, Floyd O., and V. Kelly, Chicago, Ill.; said Kelly assignor to said Clisbe. Spraying device. 2,105,903; Jan. 18.
Coddington, Edwin D., Douglaston, Long Island, assignor to Reynolds Corporation, New York, N. Y. Joist suspension. 2,106,084; Jan. 18.
Cohen, Samuel, Brooklyn, assignor to General Instrument Corporation, New York, N. Y. Variable condenser. 2,105,878; Jan. 18.
Coleman, Lyale R., McAllen, and G. L. Cowley, Alamo, Tex. Insecticidal oil. 2,105,856; Jan. 18.
Collins, Cap B., Washington, D. C. Portable electric light. 2,105,719; Jan. 18.
Collins, John J., et al. (See Johnson, Paul W., assignor.)
Colman, Howard D. (See Lilja, Edgar D., assignor.)
Colucci, Nicholas A., Rochester, N. Y. Freewheeling clutch. 2,106,049; Jan. 18.
Consolidated Lithograph Manufacturing Co. Limited. (See Ouellette, Alphonse, assignor.)
Consolidated Water Power & Paper Company et al. (See Massey, P. J., Thiele, and Raprager, assignors.)
Cook, Edward G., Brooklyn, assignor of one-fourth to I. Goldberg, New York, N. Y. Barrel. 2,105,939; Jan. 18.
Cooper, Wellesley B., Amsterdam, N. Y., assignor to Bigelow-Sanford Carpet Co., Inc., Thompsonville, Conn. Floor covering. 2,105,720; Jan. 18.
Copes Regulators Limited. (See Armstrong, Clifford H., assignor.)
Cordes, Bertha L. (See Cordes, Henry G.)
Cordes, Henry G., Palo Alto, Calif.; B. L. Cordes, owner by decree of court. Vacuum tube. 2,105,463; Jan. 18.
Corn Products Refining Company. (See Swallen, Lloyd C., assignor.)
Costa, Joseph L., Woonsocket, assignor to Manville Jenckes Corporation, Manville, R. I. Treatment of acid setting baths used in the manufacture of cellulose products from viscose. 2,105,684; Jan. 18.
Cottrell, Robert B., assignor to Chicago Railway Equipment Company, Chicago, Ill. Brake beam safety guard. 2,105,906; Jan. 18.
Cowley, Gerald L. (See Coleman, L. R., and Cowley.)
Cox, George D., assignor to Williams and Marcus Company, Philadelphia, Pa. Indicia holder for telephones. 2,105,685; Jan. 18.
Crabbs, Herbert J., Wilkinsburg, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Circuit breaker. 2,106,114; Jan. 18.
Crago, Arthur, Mulberry, Fla., assignor to Phosphate Recovery Corporation, New York, N. Y. Differential concentration of non-metallic minerals. 2,105,807; Jan. 18.
Cramer, Howard L., Cuyahoga Falls, Ohio, assignor to Wingfoot Corporation, Wilmington, Del. Vulcanization of rubber. 2,105,808; Jan. 18.
Crawford, Robert B. P. (See Labus, O. A., and Crawford.)
Creed, James G., Houston, Tex., assignor to Halliburton Oil Well Cementing Company, Duncan, Okla. Measuring line catcher. 2,106,626; Jan. 18.
Crosley Radio Corporation, The. (See Money, Boland H., assignor.)
Cross, Marrero. (See Huseby, Oscar H., assignor.)
Crossley, Alfred. (See Spearin, Harold P., assignor.)
Cunningham, Lewis L., assignor to Minneapolis-Honeywell Regulator Company, Minneapolis, Minn. Combustion control system. 2,105,696; Jan. 18.
Currie, Dugald. Des Moines, Iowa. Wagon hitch. 2,105,588; Jan. 18.
Cutrer, Cecil C., and J. L. Broussard, Sulphur, La., assignors to G. J. Barrett and S. Robichaux, Houston, Tex. Whipstock. 2,105,721; Jan. 18.
Dawson, John R., Oak Park, and L. E. Wemple, Chicago, Ill. Die casting apparatus. 2,105,586; Jan. 18.
Dale, Frank L., Hartsville, Ind. Automaton merchandising device. 2,106,904; Jan. 18.
Danciger Oil & Refineries, Inc. (See Biddison, P. M., Ryan, and Burke, assignors.)
Darley, Lon J., Jackson, Miss., assignor, by mesne assignments, to Gravity Meter Corporation. Parking meter. 2,105,970; Jan. 18.
Darnell, Eugene, and H. L. Enoch, Kansas City, and J. N. Grubb, Chillicothe, Mo., and A. E. Freeman, South Orange, N. J., assignors to American Telephone and Telegraph Company. Earth boring machine. 2,105,587; Jan. 18.
Daum, Charles, Forest Hills, Long Island, N. Y. Lunch kit. 2,106,638; Jan. 18.
Davenport Machine Tool Co. (See Silva, Frederick G., assignor.)
Davey, Paul H., Kent, Ohio. Power take-off and associated mechanism. 2,106,085; Jan. 18.
Davey, Paul H., Kent, Ohio. Power take-off and associated mechanism. 2,106,086; Jan. 18.
Davey, Paul H., Kent, Ohio. Power transmitting apparatus. 2,106,087; Jan. 18.
Davis, Charles T., Beverly Hills, Calif. Apparatus for abrading strand material. 2,105,637; Jan. 18.
Davis, Clarke F., Short Hills, N. J., assignor, by mesne assignments, to American Cyanamid & Chemical Corporation. Floating partition. 2,105,595; Jan. 18.
Davis, Ernest. (See Braun, P. N., and Davis.)
Davis, Joseph R., Clarksburg, W. Va. Internal combustion engine. 2,105,780; Jan. 18.
Davis, Lewis H., Haddonfield, N. J., assignor to Radio Corporation of America. Indicator. 2,105,639; Jan. 18.
Davol Rubber Co. (See Raiche, Paul A., assignor.)
Day, Salisbury M., assignor to General Railway Signal Company, Rochester, N. Y. Automatic block signaling system for railroads. 2,105,905; Jan. 18.
De Berry, Homer H., Tulsa, Okla. Key receptacle. 2,105,763; Jan. 18.
De Bourgogne, Helene. (See Hoffman, Grover C., assignor.)
Debrie, Andre L. V. C., Paris, France. Cinematographic intermittent film feed and shutter. 2,106,115; Jan. 18.
De Hart, Arthur D., Modesto, Calif. Automatic door for turkey nests. 2,105,879; Jan. 18.
Delaware Company. (See Goodman, Abraham, assignor.)
Demers, Isaie J. B., assignor to Superior Metal Products Company, St. Paul, Minn. Hot plating containers. 2,105,908; Jan. 18.
Demers, Isaie J. B., assignor to Superior Metal Products Company, St. Paul, Minn. Electric welding machine. 2,105,907; Jan. 18.
Denney, Courtlandt F., assignor to Foster Wheeler Corporation, New York, N. Y. Oil refining. 2,105,523; Jan. 18.
Derby, George T., Jacksonville, Fla. Traffic signal device. 2,105,857; Jan. 18.
De Tar, Donald R., Stratford, Conn., assignor to General Electric Company. Drive mechanism. 2,106,068; Jan. 18.
Detroit Electric Furnace Company. (See Weinheimer, Claude M., assignor.)
Detroit Stoker Company. (See Beers, Royce L., assignor.)
Diamond Alkali Company. (See Elledge, H. G., and Hirsch, assignors.)
Dick, Burns, Ferguson, assignor to Wagner Electric Corporation, St. Louis, Mo. Trailer or truck braking mechanism. 2,105,840; Jan. 18.
Dick, James W., Calgary, Alberta, Canada. Suspender connection. 2,105,909; Jan. 18.
Dick, James W., High River, Alberta, Canada. Garment suspender. 2,105,908; Jan. 18.
Dicke, Allen A., Montclair, N. J., assignor, by mesne assignments, to The National Cash Register Company, Dayton, Ohio. Cash register. 2,105,640; Jan. 18.
Dickie, William A., and E. W. Mesecrief, Spondon, near Derby, England, assignors to Celanese Corporation of America. Textile apparatus. 2,105,474; Jan. 18.
Diebold Safe & Lock Co. (See Miller, W. C., and Abbott, assignors.)

Dietert, Harry W. (See Carney, George C., assignor.)
Dietze, Emil, Richmond Hill, assignor to American Casting & Manufacturing Corporation, Brooklyn, N. Y. Hasp seal. 2,105,824; Jan. 18.
Dixon, Frederick W., Reigate, England. Chassis for motor driven vehicles. 2,105,731; Jan. 18.
Dodge, Howard M. (See Fenton, F., and Dodge.)
Douthitt, Frank W., Ortonville, Minn. Corn ear trimmer. 2,105,525; Jan. 18.
Draeger, Rupert H., U. S. Navy. Camera shutter. 2,105,475; Jan. 18.
Drake, Frederick H., Boonton, N. J., assignor to Radio Corporation of America. Automatic volume control circuit. 2,105,641; Jan. 18.
Drake, Harcourt C., Hempstead, assignor to Sperry Products, Inc., Brooklyn, N. Y. Flaw detector mechanism. 2,105,050; Jan. 18.
Dubbs, Carbon P., Wilmette, assignor to Universal Oil Products Company, Chicago, Ill. Hydrocarbon oil conversion. 2,105,526; Jan. 18.
Dudley, Homer W., Garden City, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Carrier wave transmission system. 2,106,910; Jan. 18.
Duncan, Robert D., Jr., East Orange, N. J., assignor to Wired Radio, Inc., New York, N. Y. Carrier supply system. 2,105,909; Jan. 18.
Dunlop Tire and Rubber Corporation. (See Church, Franklin O., assignor.)
Dunning, Orville M., East Orange, assignor to Thomas A. Edison, Incorporated, West Orange, N. J. Electrochemical translating device. 2,106,051; Jan. 18.
Du Pont, E. I., de Nemours & Company. (See Baker, L. S., Morgan, and Quaid, assignors.)
Du Pont, E. I., de Nemours & Company. (See Burrows, L. A., Filbert, and Reid, assignors.)
Du Pont, E. I., de Nemours & Company. (See Lazier, Wilbur A., assignor.)
Du Pont, E. I., de Nemours & Company. (See Lazier, W. A., and Vaughan, assignors.)
Du Pont, E. I., de Nemours & Company. (See Lycan, William H., assignor.)
Dura Company. (See Floraday, Burton S., assignor.)
Dyer, John R., Dayton, Ohio, assignor to General Motors Corporation, Detroit, Mich. Engine control apparatus. 2,105,643; Jan. 18.
Dyer, John R., Pendleton, and W. H. Brown, Anderson, Ind., assignors to General Motors Corporation, Detroit, Mich. Starter control system. 2,105,723; Jan. 18.
Dzukalo, Leo, Badaxe, Mich. Window lock. 2,106,116; Jan. 18.
Eades, John A., assignor to Read Machinery Company, Incorporated, York, Pa. Hopper discharge apparatus. 2,105,589; Jan. 18.
Eastern Tool & Mfg. Co. (See Anderson, Carl E., assignor.)
Eastern Tool & Mfg. Co. (See Montan, A., and Anderson, assignors.)
Easy Washing Machine Corporation. (See Nelson, Jabez C., assignor.)
Eck, Jules J. (See Behr, H. C. A., and Eck.)
Eclipse Machine Company. (See Maurer, Paul H., assignor.)
Edison, Thomas A., Incorporated. (See Dunning, Orville M., assignor.)
Ekstrand, Sture O. (See Clark, J. E., Ekstrand, and Ronci.)
Electric Controller & Manufacturing Company, The. (See Wright, David C., assignor.)
Electric & Musical Industries Limited. (See White, E. L. C., and Percival, assignors.)
Elledge, Hasvey G., and A. Hirsch, assignors to Diamond Alkali Company, Painesville, Ohio. Producing strontium carbonate. 2,106,131; Jan. 18.
Emsco Asbestos Company. (See Father, Donald W., assignor.)
Endowment Foundation. (See McLean, H. C., and Weber, assignors.)
Enoch, Henry L. (See Darnell, E., Enoch, Grubb, and Freeman.)
Enochson, Guy O., Austin, Minn. Lathe attachment. 2,105,687; Jan. 18.
Enson, Dorsey A. (See Martin, H. E., and Enson.)
Etsten, Morris H., assignor to Independent Lock Company, Fitchburg, Mass. Lock. 2,105,890; Jan. 18.
Evans, Harry O. N., Jr., Pittsburgh, Pa. Radio program announcer. 2,105,527; Jan. 18.
Evans, James M., Detroit, Mich., assignor, by mesne assignments, to Grade Crossing Guard Corporation, Memphis, Tenn. Pump structure. 2,105,909; Jan. 18.
Everett, Samuel J. (See Roebuck, L. N., and Everett.)
Faber, Herbert A., Cincinnati, Ohio. Air filter and humidifier. 2,106,025; Jan. 18.
Fairlie, Matthew. (See Vebach, A. C., and Fairlie.)
Farval Corporation, The. (See Acker, George H., assignor.)
Farval Corporation, The. (See Hillis, David R., assignor.)
Fasold, George A. (See Greider, H. W., and Fasold.)
Faulds, John, Oak Park, Ill. Bake oven. 2,106,052; Jan. 18.
Fauth, Philipp L., Wiesbaden-Dotzheim, assignor to Gesellschaft zur Verwertung Fauth'scher Patente m. b. H., Wiesbaden, Germany. Apparatus for dehydrating oil-containing material, having a high water content, particularly whale flesh. 2,105,782; Jan. 18.
Fay, Harry H. (See Hathaway, L. A., and Fay.)
Federal Telegraph Company. (See Webster, Fullerton D., assignor.)
Feight, Oscar J., Columbus, Ohio, assignor to The Jeffrey Manufacturing Company. Apparatus for breaking down materials. 2,105,764; Jan. 18.
Feinbloom, William F., assignor to Champion Knitwear Company, Inc., Rochester, N. Y. Applying flock. 2,106,132; Jan. 18.
Fellow Gear Shaper Company, The. (See Stubbs, Everard, assignor.)
Fenton, Frank, and H. M. Dodge, Akron, Ohio, assignors to the B. F. Goodrich Company, New York, N. Y. Doll head. 2,106,510; Jan. 18.
Fessenden, George E., Mount Vernon, N. Y. Preserving the natural color in plant specimens. 2,105,668; Jan. 18.
Father, Donald W., assignor to Emsco Asbestos Company, Downey, Calif. Friction tape wrapping. 2,105,881; Jan. 18.
Feuer, Sidney E., H. Freedman, H. Hosinsky, and A. Balbinder, Brooklyn, N. Y. Continuous outlet system. 2,105,833; Jan. 18.
Fibreboard Products, Inc. (See Stitt, Claude M., assignor.)
Fick, Bernice, assignor to Kroger Grocery & Baking Company, Cincinnati, Ohio. Preparing stable chocolate milk. 2,106,089; Jan. 18.
Field, Edward A., and H. A. Field, Jr., Chicago, Ill. Draft stabilizer. 2,105,724; Jan. 18.
Field, Edward A., Jr. (See Field, Edward A., and H. A., Jr.)
Filbert, William F. (See Burrows, L. A., Filbert, and Reid.)
Fisher, Elbert E., St. Louis, Mo. Manufacture of barium compounds. 2,105,940; Jan. 18.
Fitch, Benjamin F., Greenwich, Conn., assignor to Motor Terminals Company, New York, N. Y. Transportable cable-winding mechanism. 2,106,476; Jan. 18.
Flashfold Box Corporation. (See Fries, Nestor, assignor.)
Fleisher, Walter L., New City, N. Y. Air conditioning system. 2,105,882; Jan. 18.
Floraday, Burton S., assignor to Dura Company, Toledo, Ohio. Dome light assembly. 2,106,144; Jan. 18.
Floraday, Burton S., assignor to Dura Company, Toledo, Ohio. Vehicle lamp. 2,106,145; Jan. 18.
Floyd, Robert W. (See Godfrey, F. M., and Floyd.)
Flynn, Benjamin H., Alexandria, La. Wheeled supporting means for heavy machines. 2,106,090; Jan. 18.
Flynn, Edmund J., Palmerton, Pa., assignor to The New Jersey Zinc Company. Manufacture of pigment. 2,105,834; Jan. 18.
Folsy, George A., assignor to Winchester Repeating Arms Company, New Haven, Conn. Disintegrating bullet. 2,105,528; Jan. 18.
Fonarrow, Nelson J. (See Geller, Leon W., assignor.)
Foster, Fred L., assignor to Jamestown Metal Equipment Company, Inc., Jamestown, N. Y. Radiator. 2,106,001; Jan. 18.
Foster, Harold B., Williamsville, assignor to National Aniline & Chemical Company, Inc., New York, N. Y. Purification of phthalic anhydride. 2,105,911; Jan. 18.
Foster Wheeler Corporation. (See Denney, Courtlandt F., assignor.)
Foster Wheeler Corporation. (See Swanson, Harry R., assignor.)
Fournace Development Corporation. (See Fourness, Wilfred, assignor.)
Fourness, Wilfred, Oakland, Calif., assignor, by mesne assignments, to Fourness Development Corporation, Ltd. Compressor system. 2,105,765; Jan. 18.
Francis, Earle V., Columbus, Ohio, assignor to The Jeffrey Manufacturing Company. Fine grinding mill. 2,105,766; Jan. 18.
Frank, Michael, and D. Willinger, Freeport, N. Y. Hairpin dispenser. 2,105,811; Jan. 18.
Franklin, Lester K., Chicago, Ill. Locking handle for automobile hoods. 2,105,912; Jan. 18.
Freddino, Carney, assignor to The Bridgeport Chain & Manufacturing Company, Bridgeport, Conn. Coupling device for flexible members. 2,105,639; Jan. 18.
Freedman, Hyman. (See Feuer, S. E., Freedman, Hosinsky, and Balbinder.)
Freeman, Albert E. (See Darnell, E., Enoch, Grubb, and Freeman.)
Freiberg, Ernest, Brooklyn, N. Y. Bandage binder clip. 2,105,725; Jan. 18.
Frick Company. (See Labus, O. A., and Crawford, assignors.)
Fries, Nestor, assignor to Flashfold Box Corporation, Fort Wayne, Ind. Strip cutting and applying machine. 2,105,726; Jan. 18.
Fritzsch, Frank A., Cincinnati, Ohio. Power transmission mechanism. 2,105,914; Jan. 18.
Fritzsch, Frank A., assignor to The Lodge & Shipley Machine Tool Company, Cincinnati, Ohio. Lathe. 2,105,913; Jan. 18.

Gardner Dairy Equipment Corporation. (See Gardner, John M., assignor.)

Gardner, John H., Holding, assignor to Gardner Dairy Equipment Corporation, Grand Rapids, Mich. Liquid homogenizing and the like method and apparatus. 2,105,926; Jan. 18.

Gartin, Elmer G., Claremont, N. H., assignor to Sullivan Machinery Corporation. Lubricating device. 2,105,492; Jan. 18.

Gartin, Elmer G., Claremont, N. H., assignor to Sullivan Machinery Company. Lubricating apparatus. 2,105,493; Jan. 18.

Gebert, Albert E., Wilmette, and F. G. Black, assignors to Advance Machine Co., Chicago, Ill. Vending machine. 2,105,644; Jan. 18.

Gebhart, Wilmar O. (See Shippy, L. C., and Gebhart.)

Geer, Georgia L. S., et al. (See Schofield, George L.)

Gelber, Leon W., Astoria, assignor of two-thirds to N. J. Penarrow, New York, N. Y. Adhesive tape. 2,105,726; Jan. 18.

Gemmill, William P., York, Pa. Combination divider and platform support. 2,105,645; Jan. 18.

General Alloys Company. (See McCormick, George C., assignor.)

General Aniline Works, Inc. (See Hoffa, E., and Heyna, assignors.)

General Aniline Works, Inc. (See Neresheimer, H., and Ruppel, assignors.)

General Aniline Works Inc. (See Schirm, Erik, assignor.)

General Electric Company. (See Bergmans, Jan, assignor.)

General Electric Company. (See De Tar, Donald R., assignor.)

General Electric Company. (See Jones, Benjamin W., assignor.)

General Electric Company. (See Paxton, Robert, assignor.)

General Electric Company. (See Rick, Theodore A., assignor.)

General Electric Company. (See Safford, Moyer M., assignor.)

General Electric Company. (See Schmidt, Friedrich, assignor.)

General Electric Company. (See Schäbel, F., and Schubert, assignors.)

General Electric Company. (See Stark, Julian H., assignor.)

General Electric Company. (See Welch, Alfred F., assignor.)

General Instrument Corporation. (See Cohen, Samuel, assignor.)

General Metalware Company. (See Chamberlain, Alfred J., assignor.)

General Mills, Inc. (See Hodge, James P., assignor.)

General Motors Corporation. (See Dyer, John B., assignor.)

General Motors Corporation. (See Dyer, J. B., and Brown, assignors.)

General Motors Corporation. (See Hull, Harry B., assignor.)

General Motors Corporation. (See Shippy, L. C., and Gebhart, assignors.)

General Motors Corporation. (See Smilack, Jacob, assignor.)

General Railway Signal Company. (See Day, Salisbury M., assignor.)

General Railway Signal Company. (See Reichard, Wade H., assignor.)

George, Charles L., assignor to The Buckeye Traction Ditcher Company, Findlay, Ohio. Fairlead. 2,106,000; Jan. 18.

George, Landon C., Chicago, Ill. Electrical switch. 2,105,823; Jan. 18.

Gerlach, Erwin, Berlin-Siemensstadt, assignor to Klangfilm G. m. b. H., Berlin, Germany. Speed control system. 2,105,529; Jan. 18.

Gersten, William, Brooklyn, N. Y. Cabinet. 2,105,783; Jan. 18.

Gerted Corporation. (See Lichtenstein, Harry, assignor.)

Gesellschaft zur Verwertung Fauth'scher Patente m. b. H. (See Fauth, Philipp L., assignor.)

Gertelman, Fredrick, Milwaukee, Wis. Removing coating from containers. 2,105,707; Jan. 18.

Gilcrist, Robert S., Chicago, Ill., assignor to Lewis-Howe Company, St. Louis, Mo. Display and shipping carton. 2,105,942; Jan. 18.

Gillette Safety Razor Company. (See Tsetli, Nicholas, assignor.)

Glasscock, John E., Oklahoma City, Okla. Locking stop valve. 2,106,092; Jan. 18.

Gleason, Stanley F., Philadelphia, Pa., assignor to Ham Beller Corporation, Port Chester, N. Y. Meat processing and molding device. 2,105,941; Jan. 18.

Glidden Company, The. (See Moore, C. G., and Zucker, assignors.)

Gleor, Walter E., assignor to Hercules Powder Company, Wilmington, Del. Bottle cap. 2,105,766; Jan. 18.

Goettinger, Charles B., Minneapolis, Ind. Insecticides. 2,105,727; Jan. 18.

Godfrey, Aslee L. (See Smith, Bertha O., assignor.)

Godfrey, Fanny M., Tarrytown, N. Y., and R. W. Floyd, Bloomfield, N. J.; said Floyd assignor to said Godfrey. Tonic food product and making same. 2,105,477; Jan. 18.

Goess, Arthur A., Milwaukee, Wis. Damper construction. 2,106,692; Jan. 18.

Goldberg, Isadore. (See Cook, Edward G., assignor.)

Goldberg, Jacob M., Denver, Colo. Moving picture film reel. 2,105,530; Jan. 18.

Golden, Fred. (See Ballenstedt, John J. O., assignor.)

Goldfarb, Julius, Los Angeles, M. Goldfarb, Altadena, and H. W. Hahn, Glendale, Calif. Dispenser for mayonnaise and like materials. 2,105,648; Jan. 18.

Goldfarb, Meer. (See Goldfarb, Julius and M., and Hahn.)

Goldman, Maurice A., assignor to Johnson & Johnson, New Brunswick, N. J. Metal backed pressure-sensitive adhesive. 2,106,133; Jan. 18.

Goldschmidt, Victor M., Oslo, Norway. Refractories. 2,105,943; Jan. 18.

Goldsworth Bros. Inc. (See Holdsworth, Harry, assignor.)

Goodman, Abraham, Brooklyn, N. Y., assignor to Delaware Company, Inc. Hair curling device. 2,105,720; Jan. 18.

Goodman Manufacturing Company. (See Madeira, John R., assignor.)

Goodrich, B. F., Company, The. (See Fenton, F., and Dodge, assignors.)

Goodwin, George, assignor to Royal Electric Company, Incorporated, Avon, Mass. Electric fuse. 2,105,501; Jan. 18.

Gordon, John T., and R. W. Snyder, Akron, Ohio, assignors to Wingfoot Corporation, Wilmington, Del. Bead wire die. 2,105,812; Jan. 18.

Gosling, Herbert E., Providence, assignor to Hemphill Company, Central Falls, R. I. Yarn speed indicating means. 2,106,146; Jan. 18.

Goss, Harry T., Rutherford, N. J., assignor to L. N. S. Corporation, New York, N. Y. Fluid dispensing apparatus. 2,105,813; Jan. 18.

Gottlieb, Max, Chicago, Ill. Hair waving appliance. 2,105,730; Jan. 18.

Grade Crossing Guard Corporation. (See Evans, James M., assignor.)

Graf, Vincent J., assignor to Briggs Manufacturing Company, Detroit, Mich. Making sinks. 2,105,944; Jan. 18.

Graham, William A., Houston, Tex. Toasting machine. 2,105,858; Jan. 18.

Grammes, L. F., & Sons, Inc. (See Weindel, Fred, Jr., assignor.)

Graumann, Erich. (See Zetzsche, W., and Graumann.)

Graves Process, Inc., The. (See Graves, R. V., and Bohman, assignors.)

Graves, Roy V., and A. J. Bohman, assignors to The Graves Process, Inc., Minneapolis, Minn. Composing machine. 2,105,731; Jan. 18.

Gravity Meter Corporation. (See Darley, Lon J., assignor.)

Great Western Electro-Chemical Company. (See Bender, Harry, assignor.)

Greenblatt, Carl J., Bayonne, N. J. Effervescent tablet. 2,105,690; Jan. 18.

Greer, Frederick W., Belmont, assignor to J. W. Greer Company, Middlesex, Mass. Conveying apparatus. 2,106,134; Jan. 18.

Greer, J. W., Company. (See Greer, Frederick W., assignor.)

Greider, Harold W., Wyoming, and G. A. Fasold, Cincinnati, Ohio, assignors to The Philip Carey Manufacturing Company. Making bituminized web materials. 2,105,531; Jan. 18.

Griffey, Leon J., and C. C. Herndon, assignors to Hanlon-Waters, Inc., Tulsa, Okla. Time control mechanism. 2,106,694; Jan. 18.

Griffin, George, Paterson, N. J., assignor, by mesne assignments, of three-fourths to M. P. Griffin, and one-fourth to J. W. Steward. Manufacture of attrition devices. 2,105,915; Jan. 18.

Griffin, Miller P., et al. (See Griffin, George, assignor.)

Grigg, Arthur F., Metuchen, and J. E. Zeller, Montclair, N. J. Automotive radiator sealing and pressure relief means. 2,105,971; Jan. 18.

Gross, Otto J., and J. H. Woolhiser, Elmhurst, N. Y. Thermostatic control device. 2,106,001; Jan. 18.

Grubb, Joel N. (See Darnell, E., Enoch, Grubb, and Freeman.)

Guest, John F., Kelowna, British Columbia, Canada, assignor of one-half to J. L. Rosenberg, New York, N. Y. Rifle. 2,106,027; Jan. 18.

Gutwein, Theodore, Dayton, Ohio. Shoe. 2,105,647; Jan. 18.

Haas, Louis W., Chicago, Ill., assignor to The W. E. Long Company. Sterilizing wrapped bakery products. 2,105,648; Jan. 18.

Hagberg, Paul C., Cleveland, Ohio. Window channel or the like. 2,105,784; Jan. 18.

Hagenbook, Thuhloe M., assignor to International Door Company, Evansville, Ind. Trolley for revolving doors. 2,105,972; Jan. 18.

Hahn, Harry W. (See Goldfarb, Julius and M., and Hahn.)

Hall, Eric E., Chicago, Ill. Portable window scaffold. 2,106,002; Jan. 18.

Halliburton Oil Well Cementing Company. (See Creed, James C., assignor.)

Halsesek, Joseph C., Malin, Oreg. Self-propelled potato digger. 2,105,532; Jan. 18.

Ham Beller Corporation. (See Gleason, Stanley F., assignor.)

Hamilton Caster and Manufacturing Company, The. (See Henry, Alphonse, assignor.)

Hammill, Harry M. (See Preston, C. I., and Hammill.)

Hanlon-Waters, Inc. (See Griffey, Leon J., and Herndon, assignors.)

Hann, Edward, and J. M. Prentice, Holyoke, Mass.; said Prentice assignor to said Hann. Printed typewriting machine. 2,105,723; Jan. 18.

Hansen, Edmund E., Hollywood, Calif. Electro-photographically recording sound. 2,105,760; Jan. 18.

Hansor, Charles A., Detroit, and L. H. Thomas, Birmingham, assignors to American Electrical Heater Company, Detroit, Mich. Plug contact. 2,105,824; Jan. 18.

Hanson, Roy. (See Carbutcher, B., and Hanson.)

Harris, George M., Chicago, Ill. Bobstand. 2,105,785; Jan. 18.

Harris, John P., Wilmette, Ill., and W. A. Welch, Tyrone, Pa., assignors, by mesne assignments, to West Virginia Pulp & Paper Company, New York, N. Y. Rendering fat. 2,105,478; Jan. 18.

Harrison, Henry C., Port Washington, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Sound reproducing system. 2,105,915; Jan. 18.

Hart-Carter Company. (See Johnson, L., and Blenson, assignors.)

Hass, Henry B., and R. T. Mellon, assignors to Purdue Research Foundation, West Lafayette, Ind. Chlorination process. 2,105,736; Jan. 18.

Hat Corporation of America. (See Tibbals, Nathan V., assignor.)

Hathaway, Lloyd A., Scotch Plains, and H. H. Fay, Oakhurst, N. J., assignors to American Telephone and Telegraph Company. Directional device. 2,105,562; Jan. 18.

Hatton, William H., Gardiner, Maine. Apparatus for molding pulp bodies. 2,105,593; Jan. 18.

Hayes, Harvey C., Washington, D. C. Apparatus for measuring thickness. 2,105,479; Jan. 18.

Haseltine Corporation. (See Erwin, Madison, assignor.)

Heimach, Karl D., Stuttgart, Germany, and C. Brassert, Zurich, Switzerland, assignors to J. Bloch, Frankfort-on-the-Main, Germany. Closure for tubes and the like. 2,106,028; Jan. 18.

Heltzel, Joseph W., Warren, Ohio. Expansion joint. 2,106,096; Jan. 18.

Hemphill Company. (See Gosling, Herbert E., assignor.)

Henderson, Clarence S., Batavia, assignor to Acme Steel Company, Chicago, Ill. Metal coil. 2,106,724; Jan. 18.

Hennessy, James J., Montclair, N. J. Lubricator drain. 2,105,849; Jan. 18.

Henrich, Frank E., Leanex, S. Dak. Card and pamphlet holder. 2,105,564; Jan. 18.

Henry, Alphonse, assignor to The Hamilton Caster and Manufacturing Company, Hamilton, Ohio. Tractor wheel. 2,106,125; Jan. 18.

Henry, Nelson B., Columbus, Ga. Combination seed cotton cleaner-drier. 2,105,756; Jan. 18.

Hepp, Harold J. (See Snow, R. D., and Hepp.)

Hercules Powder Company. (See Gloor, Walter E., assignor.)

Hercules Powder Company. (See Milliken, Mahlon G., assignor.)

Hereford, Pearl J., Huntington, W. Va. Matrix drier. 2,105,973; Jan. 18.

Hering, Donald, South Gate, and C. H. Beattie, Jr., Covina, Calif., assignors to Sperry-Sun Well Surveying Company, Philadelphia, Pa. Case orientation apparatus. 2,105,650; Jan. 18.

Herndon, Chester C. (See Griffey, L. J., and Herndon.)

Herpich, Carl, Berlin-Charlottenburg, Germany. Traveling or like rug. 2,105,787; Jan. 18.

Herrington, Arthur W., assignor to Marmon-Herrington Company, Inc., Indianapolis, Ind. Combat vehicle. 2,105,917; Jan. 18.

Herrington, Arthur W., assignor to Marmon-Herrington Company, Inc., Indianapolis, Ind. 4-wheel drive vehicle. 2,105,918; Jan. 18.

Hess, Claude L., Detroit, Mich. Stud setter. 2,105,788; Jan. 18.

Hess, Fred., assignor to The Selas Company, Philadelphia, Pa. Gas burning apparatus. 2,106,333; Jan. 18.

Hewitt, Alfred, Jamaica, N. Y., assignor to Metropolitan Device Corporation, Terminal box. 2,106,666; Jan. 18.

Heyna, Hans. (See Hoffa, E., and Heyna.)

Hillerich & Bradsby Co. (See Beck, Charles R. and G. L., assignors.)

Hillis, David R., Detroit, Mich., assignor to The Farval Corporation, Cleveland, Ohio. Lubricating system. 2,105,595; Jan. 18.

Hinderliter, Frank J., Tulsa, Okla. Hollow trip casing spear. 2,105,885; Jan. 18.

Hirsch, Alfred. (See Elledge, H. G., and Hirsch.)

Hochwalt, Carroll A. (See Ault, W. C., and Hochwalt.)

Hodge, James P., Amarillo, Tex., assignor to General Mills, Inc., Minneapolis, Minn. Processes cohering apparatus. 2,105,735; Jan. 18.

Hodgson, Frederick L. (See Bennett, J. A. J., and Hodgson.)

Hoe, R., & Co. (See Horton, Albert J., assignor.)

Hoff, John G., assignor to The Tappan Stove Company, Mansfield, Ohio. Gas range. 2,105,506; Jan. 18.

Hoffa, Erwin, and H. Heyna, Frankfort-on-the-Main, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Water-insoluble ortho-disazo dyestuffs and fiber dyed therewith. 2,105,919; Jan. 18.

Hoffman, Edward L., Montgomery, Ala. Safety bolt. 2,105,480; Jan. 18.

Hoffman, Gruver C., assignor of one-half to H. de Bourgogne, New York, N. Y. Treatment of tissue paper. 2,106,099; Jan. 18.

Holdsworth, Harry, Bronxville, assignor to Holdsworth Bros. Inc., New York, N. Y. Wall construction. 2,105,770; Jan. 18.

Holdsworth, Harry, Bronxville, assignor to Holdsworth Bros. Inc., New York, N. Y. Wall construction. 2,105,771; Jan. 18.

Holland Company. (See Holland, Cyrus J., assignor.)

Holland, Cyrus J., Chicago, Ill., assignor to Holland Company. Vehicle spring. 2,105,661; Jan. 18.

Holloway, Judson H. (See Parrett, A. N., and Holloway.)

Holter, Alfred, Abbedissegen, near Oslo, Norway. Making concrete roads. 2,106,117; Jan. 18.

Homan, John G., Steubenville, Ohio. Candy novelty. 2,106,087; Jan. 18.

Honda, Kotaro, Sendai, Japan. Steel for permanent magnets. 2,105,652; Jan. 18.

Honda, Kotaro, Sendai, Japan. Nickel titanium, cobalt, magnets. 2,105,653; Jan. 18.

Honda, Kotaro, Sendai, Japan. Nickel, titanium, cobalt, iron, and copper permanent magnet. 2,105,654; Jan. 18.

Honda, Kotaro, Sendai, Japan. Alloy of nickel, titanium, cobalt, iron, and aluminum for permanent magnets. 2,105,655; Jan. 18.

Honda, Kotaro, Sendai, Japan. Nickel, titanium, cobalt, iron, and manganese permanent magnet. 2,105,656; Jan. 18.

Honda, Kotaro, Sendai, Japan. Alloy for permanent magnets. 2,105,657; Jan. 18.

Honda, Kotaro, Sendai, Japan. Permanent magnet. 2,105,658; Jan. 18.

Horton, Albert J., White Plains, assignor, by mesne assignments, to R. Hoe & Co., Inc., New York, N. Y. Inking mechanism and printing machines. 2,106,029; Jan. 18.

Houchin, Lowell L., Columbus, Ohio. Lens grinding and polishing machine. 2,105,691; Jan. 18.

Hoyt, Philip S., Clarksville, Ga., assignor to Southern Mining and Milling Company. Treatment of cyanite ore. 2,105,587; Jan. 18.

Hozinsky, Hyman. (See Feuer, S. R., Freedman, Hozinsky, and Balbinder.)

Hruska, Joseph J., Milwaukee, Wis. Safety vehicle tire. 2,105,659; Jan. 18.

Hruska, Joseph J., Milwaukee, Wis. Tire. 2,105,660; Jan. 18.

Hubbard, Karl H., assignor to Taylor Instrument Companies, Rochester, N. Y. Control system. 2,105,595; Jan. 18.

Hubbell, Harvey, Incorporated. (See Bannon, Edward F., assignor.)

Hudson, Edwin B., assignor to The American Rolling Mill Company, Middletown, Ohio. Process and mechanism for rolling endless lengths of metal in reversible mills. 2,106,736; Jan. 18.

Huffman, Mervin C., Claremont, N. H., assignor to Sullivan Machinery Company. Lubricating apparatus. 2,105,491; Jan. 18.

Hughes, Henry, & Son, Limited. (See Sproule, Donald O., assignor.)

Hull, Daniel R., Watertown, assignor to The American Brass Company, Waterbury, Conn. Hot workable brasse. 2,105,945; Jan. 18.

Hull, Harry B., assignor to General Motors Corporation, Dayton, Ohio. Refrigerating apparatus. 2,105,974; Jan. 18.

Hull Manufacturing Company, The. (See Hull, William K., assignor.)

Hull, William K., assignor to The Hull Manufacturing Company, Hagerstown, Md. Apparatus for detecting gases. 2,106,147; Jan. 18.

Hunicke, Clarence C., Palisade, N. J., assignor to Auditorium Conditioning Corporation. Air conditioning apparatus. 2,105,692; Jan. 18.

Huseby, Oscar H., assignor of one-half to M. Cress, Waco, Tex. Nest box for hens. 2,105,737; Jan. 18.

Hutchings, George F., St. Louis, Mo. Tire pressure indicator. 2,105,738; Jan. 18.

Huth, Charles L., Milwaukee, Wis. Lawn mower. 2,106,088; Jan. 18.

Hyde, Henry W., Dedham, Mass. Electric clock attachment. 2,105,590; Jan. 18.

I. G. Farbenindustrie Aktiengesellschaft. (See Andrussow, Leonid, assignor.)

I. G. Farbenindustrie Aktiengesellschaft. (See Bayerl, A., and Kieslinger, assignors.)

I. G. Farbenindustrie Aktiengesellschaft. (See Nelles, Johannes, assignor.)

I. G. Farbenindustrie Aktiengesellschaft. (See Nieuwland, Hans F., assignor.)

I. G. Farbenindustrie Aktiengesellschaft. (See Reppe, W., and Nicolai, assignors.)

I. G. Farbenindustrie Aktiengesellschaft. (See Zetzsche, W., and Graumann, assignors.)

Illinois Iron & Bolt Company. (See Warner, Arthur L., assignor.)
Imperial Chemical Industries Limited. (See Somon, Charles E., assignor.)
Independent Lock Company. (See Etsten, Morris H., assignor.)
Independent Lock Company. (See Shaw, Harold D., assignor.)
Indrieri, Alexander F., assignor of two per cent to E. Bernhard and fifteen per cent to D. Petrusselli and V. Seave, Chicago, Ill. Spring motor and refrigerator drive. 2,105,856; Jan. 12.
Industrial Rayon Corporation. (See Schwartz, Harvey A., assignor.)
Ingersoll-Rand Company. (See Metzgar, Chester W., assignor.)
Ingersoll-Rand Company. (See Smith, William A., Sr., assignor.)
Ingles, Clinton, assignor to National Water Main Cleaning Co., New York, N. Y. Device used for coating the interior of a water main. 2,106,004; Jan. 18.
Inland Steel Company. (See Castle, Alfred J., assignor.)
Inter-Collegiate Press. (See Bender, Robert W., assignor.)
International Corset Company. (See Schopbach, Charles H., assignor.)
International Door Company. (See Hagenbook, Thurlee M., assignor.)
International Projector Corporation. (See Morfesi, E., and Kindelmann, assignors.)
International Standard Electric Corporation. (See Webb, John K., assignor.)
Ish-Shalom, Samu-El, and O. I. Bloom, New York, N. Y. Matrix for photo composing machines. 2,105,555; Jan. 18.
Ish-Shalom, Samu-El, and O. I. Bloom, New York, N. Y. Matrix for type casting. 2,105,554; Jan. 18.
Jackson, Kingsley J. (See Jackson, Walter L. and K. J.)
Jackson, Walter L. and K. J., Perth, Western Australia, Australia. Hose joint tightener. 2,106,118; Jan. 18.
Jacobi, Edward N., assignor to Briggs & Stratton Corporation, Milwaukee, Wis. Lock. 2,105,659; Jan. 18.
Jacobs, Mordecai V., and H. S. Bird, assignor to M. V. Jacobs and M. Kemble, London, England. Pianoforte. 2,105,739; Jan. 18.
Jamestown Metal Equipment Company. (See Foster, Fred L., assignor.)
Jeffrey Manufacturing Company, The. (See Feight, Oscar J., assignor.)
Jeffrey Manufacturing Company, The. (See Francis, Earle V., assignor.)
Jeffrey Manufacturing Company, The. (See Stevenson, Robert W., assignor.)
Jenkins, John W., Indianapolis, Ind. Piston valve engine. 2,105,699; Jan. 18.
Jones, James A., assignor to Quaker City Iron Works, Philadelphia, Pa. Valve. 2,106,126; Jan. 18.
Johannesen, Vaughn L., Cranford, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Strand handling apparatus. 2,105,920; Jan. 18.
Johannsen, Helmut, Berlin-Charlottenburg, assignor to C. Lorenz Aktiengesellschaft, Berlin-Tempelhof, Germany. Radio receiving arrangement. 2,105,534; Jan. 18.
Johnsdahl, Glenn E., and C. M. Sublette, Denver, Colo. Fountain pen. 2,105,600; Jan. 18.
Johnson & Johnson. (See Goldman, Maurice A., assignor.)
Johnson, Leonard, and M. A. Rieman, Minneapolis, Minn., assignors to Hart-Carter Company, Peoria, Ill. Grain separating drum. 2,105,481; Jan. 18.
Johnson, Paul W., assignor of thirty per cent to B. C. Brown and twenty per cent to J. J. Collins, San Francisco, Calif. Detachable curtain rod bracket. 2,105,482; Jan. 18.
Jones, Benjamin W., Schenectady, N. Y., assignor to General Electric Company. Circuit controlling means. 2,106,100; Jan. 18.
Jones, Hugh J., Denver, Colo. Stropping razor. 2,105,535; Jan. 18.
Jones, Lester L., and F. Mortellaro, Denver, Colo. Whisky aging apparatus. 2,105,693; Jan. 18.
Joy Manufacturing Company. (See Nodine, Frank R., assignor.)
Junkins, Raymond D., Cleveland Heights, Ohio, assignor to Bailey Meter Company. Measuring and controlling apparatus. 2,106,036; Jan. 18.
Kamsvaag, Gudmund, Marchantville, assignor to Warren Webster & Company, Camden, N. J. Heating system. 2,105,590; Jan. 18.
Kanadys Leo. (See Krause, Georg A., assignor.)
Kallmeyer, Georg, Tabarz, Thur-Wald, Germany, assignor to Walter Lines, London, England. Constructional toy. 2,106,145; Jan. 18.
Kelly, Vaughan. (See Clisbe, F. O., and Kelly.)
Kemble, Michael, et al. (See Jacobs, M. V., and Bird, assignors.)
Kennedy, Woodford A., Charlotte, N. C. Registering apparatus for machines. 2,106,005; Jan. 18.
Kenniston, Frank, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for applying pressure to shoe bottoms. 2,105,601; Jan. 18.
Kindelmann, Albert. (See Morfesi, E., and Kindelmann.)
Kirshner, Arthur C., assignor to The National Cash Register Company, Dayton, Ohio. Merchandise ticket printer. 2,105,660; Jan. 18.
Klangfilm G. m. b. H. (See Gerlach, Erwin, assignor.)
Klangfilm G. m. b. H. (See Kleffel, Fritz, assignor.)
Klecka, Joseph, Downers Grove, Ill. Passing ball. 2,105,861; Jan. 18.
Kleentaimers (British & Overseas) Ltd. (See Butler, William J., assignor.)
Kleffel, Fritz, assignor to Klangfilm G. m. b. H., Berlin, Germany. Multiplex film phonograph. 2,105,661; Jan. 18.
Klein, Charles H., assignor to The National Telephone Supply Company, Cleveland, Ohio. Cable supporting device. 2,106,006; Jan. 18.
Klein, Charles H., assignor to The National Telephone Supply Company, Cleveland, Ohio. Wire connecting device. 2,106,007; Jan. 18.
Klemp, Alfred W., Detroit, Mich., assignor, by mesne assignments, to The Carborundum Company, Niagara Falls, N. Y. Making matrices. 2,105,694; Jan. 18.
Kloner, Joseph H., Brooklyn, N. Y. Pseudo neon sign. 2,106,031; Jan. 18.
Knapp, Kenneth C., Galva, assignor of one-fourth to O. L. Sherrill, Canton, and one-tenth to S. R. Knapp, McPherson, Kans. Pipe-line reclaimer. 2,105,602; Jan. 18.
Knapp, S. R., et al. (See Knapp, Kenneth C., assignor.)
Knecht, Oskar, and T. Wirth, assignors to the firm of Chemical Works formerly Sandoz, Basel, Switzerland. Red azo-dyestuffs and their manufacture. 2,105,862; Jan. 18.
Kniss, Frank C., and R. N. Vickers, Smackover, Ark. Well pump. 2,106,976; Jan. 18.
Knudsen, James, Chicago, Ill. Automobile collapsible berth. 2,105,740; Jan. 18.
Koppers Company. (See Becker, Joseph, assignor.)
Korn, Franklin A., Elizabeth, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Number checking system. 2,105,921; Jan. 18.
Kösslinger, Karl. (See Bayerl, A., and Kösslinger.)
Krafelt Corporation of America. (See Larson, L. L., and Schwartz, assignors.)
Kramar, Ernst, assignor to C. Lorenz Aktiengesellschaft, Berlin-Tempelhof, Germany. Signaling method and arrangement therefor. 2,105,537; Jan. 18.
Krassolt, Theodor, South, y/Neumark, Germany, assignor of four-fifths to M. Presburg, Paris, France, and one-fifth to George Angus & Company Limited, Newcastle-on-Tyne, England. Manufacture of asbestos rings. 2,106,119; Jan. 18.
Krause, Georg A., Munich, Germany, assignor, by mesne assignments, to Katadyn Inc., New York, N. Y. Sterilising liquid. 2,105,835; Jan. 18.
Kroger Grocery & Bakery Company. (See Fick, Bernice, assignor.)
Kruger, O. H. (See Steuer, Otto A., assignor.)
Kuhlik, Hattie B. (See Kuhlik, Jacob M., assignor.)
Kuhlik, Jacob M., Brooklyn, assignor to H. B. Kuhlik, Kings County, N. Y. Sound device. 2,105,741; Jan. 18.
Kuhrts, George J., Jr., assignor to Standard Steel Works, Los Angeles, Calif. Portable paving plant. 2,106,008; Jan. 18.
L. N. S. Corporation. (See Goss, Harry T., assignor.)
Labus, Otto A., Wisconsin Rapids, Wis., and E. B. P. Crawford, Chicago, Ill., assignors to Frick Company, Waynesboro, Pa. Air conditioning system. 2,106,101; Jan. 18.
Laico, Joseph P., Brooklyn, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Electron discharge device. 2,105,483; Jan. 18.
Lainger, Vergil T., Arkansas City, Kans. Gauge tape case. 2,106,053; Jan. 18.
Landis, George G., assignor to The Lincoln Electric Company, Cleveland, Ohio. Motor protective device. 2,105,603; Jan. 18.
Landis Tool Company. (See Ott, C. L., and Balsiger, assignors.)
Landon, Vernon D., Collingswood, N. J., assignor to Radio Corporation of America. Reduction of noise. 2,105,538; Jan. 18.
Lang, Franz, Munich, Germany, assignor, by mesne assignments, to Lanova Corporation, New York, N. Y. Air chamber Diesel engine. 2,105,662; Jan. 18.
Lang, William, assignor to The Bates Manufacturing Company, West Orange, N. J. File fastener. 2,105,836; Jan. 18.
Lange, Edward H., Baltimore, Md. Tobacco pipe. 2,105,539; Jan. 18.
Lange, Emil, Berlin-Zehlendorf, Germany. Arc rupturing device for electric switches. 2,106,032; Jan. 18.
Langer, Hans, Berlin-Wilmersdorf, and E. Putter, Berlin-Charlottenburg, assignors to Schering-Kahlbaum A. G., Berlin, Germany. Whooping cough vaccine and making the same. 2,105,486; Jan. 18.
Langford, George W., Ann Arbor, Mich. Air conditioning apparatus. 2,106,287; Jan. 18.
Langlois, Joseph U., Hull, Quebec, Canada. Bearing 2,105,970; Jan. 18.
Lanova Corporation. (See Lang, Franz, assignor.)
Larson, Louis L., and G. L. Schwartz, assignor to Krofelt Corporation of America, Wilmington, Del. Floor covering. 2,105,434; Jan. 18.

Larson, Otto, St. Louis, Mo. Transmission mechanism. 2,105,485; Jan. 18.
Latour, Gaston L., San Francisco, Calif. Self-closing cap for containers. 2,105,695; Jan. 18.
Lauenstein, Carl F., and P. Y. Ulmer, Indianapolis, Ind., assignors to Link-Belt Company, Chicago, Ill. Treating metal. 2,105,863; Jan. 18.
Laverty, Ernest L., Toledo, Ohio. Blade haft. 2,105,663; Jan. 18.
Lazier, Wilbur A., Marshallton, assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Catalytic hydrogenation process for the production of aldehydes. 2,105,540; Jan. 18.
Lazier, Wilbur A., Marshallton, assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Catalytic hydrogenation of hydroxyaromatic carboxylic acids and their esters. 2,105,696; Jan. 18.
Lazier, Wilbur A., New Castle County, Del., and J. V. Vaughan, Lakewood, Ohio, assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Chromium sulphomolybdate catalyst. 2,105,665; Jan. 18.
Lebe, Robert B. (See Rosen, H. Sam, and Lebe.)
Lebe, Robert B. (See Rosen, H. Sam, and Lebe.)
Le Coney, Joseph H., Bedford, assignor to Shepherd Worsted Mills, Newton, Mass. Combination garment. 2,105,102; Jan. 18.
Lee, Karrington M., Chicago, Ill. Cosky molding device. 2,105,009; Jan. 18.
Lee, Roger K., assignor to Chrysler Corporation, Highland Park, Mich. Motor vehicle. 2,105,742; Jan. 18.
Lee, Roger K., Highland Park, assignor to Chrysler Corporation, Detroit, Mich. Piston and piston and connecting rod assembly. 2,105,743; Jan. 18.
Leighton, John W., Port Huron, Mich. Wheel suspension for motor vehicles. 2,105,541; Jan. 18.
Leighton, Lawrence C., [illegible], Panama, Canal Zone.
Leiter, Harry H. (See [illegible] Hart B., assignor.)
Leitz, Ernst, G. m. b. H. (See Bocker, Helmut, assignor.)
Leitz, Ernst, G. m. b. H. (See Bocker, Siegfried, assignor.)
Lent, Constantine P., New York, N. Y. Folding electric stove. 2,105,814; Jan. 18.
Le Tourneau, Robert G., assignor to R. G. Le Tourneau, Inc., Peoria, Ill. Tool shaft. 2,105,744; Jan. 18.
Le Tourneau, R. G., Inc. (See Le Tourneau, Robert G., assignor.)
Levi, Mario G., A. Mariotti, and I. Ciarrocchi, Milan, Italy. Purification and regeneration of used lubricating oils. 2,106,010; Jan. 18.
Lewis, George B., Cleveland, Ohio. Leafed article. 2,106,696; Jan. 18.
Lewis-Howe Company. (See Gliscka, Robert S., assignor.)
Lewis Invisible Stitch Machine Company. (See Bowman, Louis G., assignor.)
Lewis Invisible Stitch Machine Company. (See Mueller, Charles W., assignor.)
Lewis, Lawrence W., Beverly Hills, Calif. Nonsticky molasses and syrup liquid products and making the same. 2,105,745; Jan. 18.
Lewis, Sidney M., St. Joseph, Mo. Applicator. 2,105,946; Jan. 18.
Ley, Gaston J., J. H. Payne, and G. Akau, Honolulu, Hawaii, dedicated to the free use of the people of the United States. Making food product. 2,105,977; Jan. 18.
Leybassen, Wilhelm, Nuremberg, Germany. Electromagnetic overload circuit breaker. 2,105,604; Jan. 18.
Lichtenstein, Harry, New York, N. Y., assignor to Gerted Corporation. Sleeveless undergarment. 2,105,605; Jan. 18.
Lilja, Edgar D., assignor to H. D. Colman, Rockford, Ill. Synchronous motor. 2,105,606; Jan. 18.
Lilly, Ill, and Company. (See Steele, Horace A., assignor.)
Lincoln Electric Company, The. (See Landis, George G., assignor.)
Lindberg, Le Roy J., Glasgow, Mont. High frequency apparatus. 2,106,130; Jan. 18.
Linder, Ernest G., Philadelphia, Pa., assignor to Radio Corporation of America, New York, N. Y. Radio apparatus. 2,106,149; Jan. 18.
Lines, Walter. (See Kellner, Georg, assignor.)
Link-Belt Company. (See Lauenstein, C. F., and Ulmer, assignors.)
Linsell, Alfred A., London, England, assignor to Radio Corporation of America. Radio receiver. 2,105,789; Jan. 18.
Li-On Bedding Company. (See Marmack, Max, assignor.)
Li-On Bedding Company, The. (See Lodge & Shipley Machine Tool Company, The.)
Lodge & Shipley Machine Tool Company, The. (See Fritsch, Frank A., assignor.)
Logan, T. T. (See Challis, Gail, assignor.)
Lomax, Clarence R., Oak Park, assignor to Associated Electric Laboratories, Inc., Chicago, Ill. Telegraph system. 2,105,611; Jan. 18.
Long, Glen D., Kansas City, Mo. Hand scraper. 2,106,083; Jan. 18.
Long, W. M., Company, The. (See Haas, Louis W., assignor.)
Longfellow, Earl R., assignor to H. H. Leiter, Warsaw, Ind. Surgical hyperextension frame. 2,106,150; Jan. 18.
Longfellow, Earl R., assignor to H. H. Leiter, Warsaw, Ind. Surgical leg splint. 2,106,151; Jan. 18.
Lozell, Eugene, Sidney, N. Y. Cattle gun. 2,106,103; Jan. 18.
Lorenz, C., Aktiengesellschaft. (See Johannsen, Helmut, assignor.)
Lorenz, C., Aktiengesellschaft. (See Kramar, Ernst, assignor.)
Lorenzo, Frank, Rochester, N. Y. Fenderteel. 2,106,121; Jan. 18.
Lowe, Joe, Corporation. (See Thomas, Norman M., assignor.)
Loson, Carl F., Massillon, Ohio. Carbonating and dispensing receptacle for liquids. 2,105,487; Jan. 18.
Lubrication Corporation, The. (See Tear, Harry R., assignor.)
L'Wello, Robert, Seattle, Wash. Razor blade scraper. 2,105,960; Jan. 18.
Lyons, William H., South Milwaukee, Wis., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Sulphurized violanthrene derivatives and preparing same. 2,105,978; Jan. 18.
Lyden, Frank J., assignor to J. D. Adams Manufacturing Company, Indianapolis, Ind. Dynamo-electric machine. 2,105,772; Jan. 18.
Lyons, Joseph, assignor to New Era Shirt Company, St. Louis, Mo. Collar. 2,105,668; Jan. 18.
Lysons, Jay W., New York, N. Y. Typesetting device. 2,105,697; Jan. 18.
Maas, Elov F., Cuyahoga Falls, Ohio, assignor to Wingfoot Corporation, Wilmington, Del. Ship fender. 2,105,815; Jan. 18.
Macdonald, Alexander D., Malden, assignor to E. B. Macdonald Chemical Co., Boston, Mass. Adhesive and coating composition. 2,105,697; Jan. 18.
Macdonald, Alexander D., Malden, assignor to E. B. Macdonald Chemical Co., Boston, Mass. Playing ball. 2,105,746; Jan. 18.
Madeira, John B., assignor to Goodman Manufacturing Company, Chicago, Ill. Belt conveyer. 2,105,889; Jan. 18.
Magazine Repeating Razor Company. (See Casselman, Elbridge J., assignor.)
Magney, Gottlieb R., Minneapolis, Minn. Humidifier with truncated cones. 2,105,773; Jan. 18.
Mahlmann, Noble, et al. (See Morgan, David G., assignor.)
Major, Samuel J., Providence, assignor to Shambow Shuttle Company, Woonsocket, R. I. Loom shuttle. 2,105,818; Jan. 18.
Mall, Arthur W., Chicago, Ill. Terrazzo grinding apparatus. 2,106,032; Jan. 18.
Mall, Arthur W., Chicago, Ill. Rail grinder. 2,106,034; Jan. 18.
Mall, Arthur W., Chicago, Ill. Terrazzo grinding angle spindle. 2,106,035; Jan. 18.
Maltby, Edward H., White Bear Lake, Minn., assignor to Standard Conveyor Company. Conveyer. 2,105,923; Jan. 18.
Manley, Forest E., Galva, Ill. Trestle brace. 2,105,979; Jan. 18.
Manville Jenckes Corporation. (See Costa, Joseph L., assignor.)
Marathon Paper Mills Company. (See Mull, Arthur B., assignor.)
Margulies, John, Yonkers, N. Y., and D. H. Young, East Orange, N. J.; said Young assignor to said Margulies. Sweatband for hats. 2,105,990; Jan. 18.
Mariotti, Alberto. (See Levi, M. G., Mariotti, and Ciarrocchi.)
Marmon-Herrington Company. (See Herrington, Arthur W., assignor.)
Marmack, Max, assignor to Li-On Bedding Company, Milwaukee, Wis. Mattress. 2,105,923; Jan. 18.
Mårtensson, Erik M., Stockholm, Sweden. Testing apparatus. 2,105,542; Jan. 18.
Martin, Herbert E., and D. A. Enson, Cumberland, Md., assignors to Celanese Corporation of America. Non-corrosive organic derivatives of cellulose. 2,105,543; Jan. 18.
Martin, Herbert E., and D. A. Enson, Cumberland, Md., assignors to Celanese Corporation of America. Preparation of organic derivatives of cellulose. 2,105,544; Jan. 18.
Martin, Stoddard B., Lakewood, Ohio, and C. B. Waechter, Bradford, Pa. Pipe or rod coupling. 2,105,747; Jan. 18.
Mascuch, Joseph J., Newark, N. J. Radio shielding for electrical distributing systems. 2,105,790; Jan. 18.
Mascuch, Joseph J., Newark, N. J. Ignition shielding. 2,105,791; Jan. 18.
Massey, Peter J., et al. (See Massey, P. J., Thiele, and Massey, assignors.)
Massey, Peter J., River Forest, Ill., W. F. Thiele, and B. F. Raprager, assignors, by mesne assignments, of nine-tenths to Consolidated Water Power & Paper Company, Wisconsin Rapids, Wis., and one-tenth to P. J. Massey, Chicago, Ill. Apparatus for applying mobile films. 2,105,488; Jan. 18.
Massey, Peter J., River Forest, Ill., W. F. Thiele, and B. F. Raprager, assignors, by mesne assignments, of nine-tenths to Consolidated Water Power & Paper Company, Wisconsin Rapids, Wis., and one-tenth to P. J. Massey, Chicago, Ill. Machine for applying mobile films. 2,105,981; Jan. 18.

Massey, Peter J., River Forest, Ill., W. F. Thiele, and B. F. Raprager, assignors, by mesne assignments, of nine-tenths to Consolidated Water Power & Paper Company, Wisconsin Rapids, Wis., and one-tenth to P. J. Massey, River Forest, Ill. Mobile slim distributing mechanism. 2,105,962; Jan. 18.

Massey, Peter J., River Forest, Ill., W. F. Thiele, and B. F. Raprager, assignors, by mesne assignments, of nine-tenths to Consolidated Water Power & Paper Company, Wisconsin Rapids, Wis., and one-tenth to P. J. Massey. Cleaning roll. 2,106,104; Jan. 18.

Mattes, Harold C., Chicago, Ill., assignor to Belmont Radio Corporation. Indicating and control apparatus. 2,106,152; Jan. 18.

Maurer, Paul H., Elmira, assignor to Eclipse Machine Company, Elmira Heights, N. Y. Automatic starting mechanism. 2,106,947; Jan. 18.

Mayer, Marie, S., Vineland, N. J., and G. W. Schilling, Philadelphia, Pa. Game apparatus. 2,106,937; Jan. 18.

McAllister, Earl J., et al. (See McCarty, Roy C., assignor.)

McBath, Bartley R., Jr., Montclair, N. J., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Safety appliance for steam jet refrigeration apparatus. 2,106,545; Jan. 18.

McBee, Earl T. (See Hass, H. B., and McBee.)

McCarty, Roy C., assignor of two-thirds to E. J. McAllister, three-thirds to J. H. Von Hatten, Seattle, and two-thirds to R. G. Bale, Spokane, Wash. Hydraulic brake lockout. 2,106,766; Jan. 18.

McClelland, Arthur H., assignor to E. J. Bess, Los Angeles, Calif. Diathermy apparatus. 2,106,749; Jan. 18.

McCormick, Denis. (See Chappell, R. R., McCormack, and Streb.)

McCormick, George C., Needham, assignor to General Abrasive Company, Boston, Mass. Self wearing surface. 2,106,823; Jan. 18.

McCown, Donald R., San Diego, Calif. Hair net. 2,106,956; Jan. 18.

McDonald, James, Weehawken, N. J., assignor to Todd Combustion Equipment, Inc., New York, N. Y. Flame cone or diffuser. 2,105,946; Jan. 18.

McGowan, Frank D., Worcester, Mass. Container. 2,106,122; Jan. 18.

McLean, Harry C., and A. L. Weber, assignors to Endowment Foundation, New Brunswick, N. J. Removal of spray residue. 2,106,606; Jan. 18.

McMillan, Vernon R., Terre Haute, Ind. Nose guard. 2,106,607; Jan. 18.

McNevin, Donald J. (See White, R. H., and McNevin.)

McWatt, Homer E., Rome, Ga., assignor to Tubize Chatillon Corporation. Bleaching artificial silk. 2,106,839; Jan. 18.

McWilliams, Charles W. (See Barber, C. C., and McWilliams.)

Melbman, Albert, Detroit, and M. Sheras, Manistee, assignors to Tax-Auditor Systems, Inc., Detroit, Mich. Sales tax check machine. 2,105,948; Jan. 18.

Mendenhall, Hallam E., Summit, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Electron discharge device. 2,105,824; Jan. 18.

Merganthaler, Rene H., Winnetka, Ill. Container top. 2,106,847; Jan. 18.

Merriam, Francis F., Montclair, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Antenna system. 2,105,925; Jan. 18.

Merritt, Matthew M., Middleton, assignor to The Tanning Process Company, Boston, Mass. Portable work support. 2,106,606; Jan. 18.

Merts, Method, Chicago, Ill. Conical cup and ice cream receptacle. 2,105,949; Jan. 18.

Metropolitan Device Corporation. (See Hewitt, Alfred, assignor.)

Metzger, Chester W., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Piston. 2,105,950; Jan. 18.

Millan, Edward M., assignor to The American Rolling Mill Company, Middletown, Ohio. Annealing cover. 2,106,750; Jan. 18.

Miller, Anthony P., Pleasantville, N. J. Composite plank. 2,106,305; Jan. 18.

Miller, William C., and A. L. Abbott, assignors to Diebold Safe & Lock Co., Canton, Ohio. Money drawer and tender. 2,106,923; Jan. 18.

Millikan, Mahlon G., assignor to Hercules Powder Company, Wilmington, Del. Production of cellulose esters. 2,106,609; Jan. 18.

Minneapolis-Honeywell Regulator Company. (See Cunningham, Lewis L., assignor.)

Mirovalle, John J. (See Roberson, Samuel D., assignor.)

Monarch Machine Tool Company, The. (See Bickel, Clifford A., assignor.)

Moncrieff, Robert W. (See Dickie, W. A., and Moncrieff.)

Money, Roland H., assignor to The Crosley Radio Corporation, Cincinnati, Ohio. Condenser device for reflexion. 2,105,751; Jan. 18.

Monsanto Chemical Company. (See Ault, W. C., and Hedrick, assignors.)

Monsanto Chemical Company. (See Stehman, Carlyle J., assignor.)

Monten, Adolph, Montclair, and C. E. Anderson, East Orange, assignors to Eastern Tool & Mfg. Co., Bloomfield, N. J. Reamer. 2,105,948; Jan. 18.

Moore, Charles G., Lakewood, and M. Zecher, assignors to The Glidden Company, Cleveland, Ohio. Wood staining. 2,105,924; Jan. 18.

Morfeal, Eugene, Astoria, Long Island, and A. Kindelmann, Floral Park, assignors to International Projector Corporation, New York, N. Y. Gate lifter. 2,105,890; Jan. 18.

Morgan, David G., assignor of one-fourth to N. Mahlmann, and one-fourth to H. J. O'Leary, San Francisco, Calif. Spring making apparatus. 2,105,861; Jan. 18.

Morgan, Ivan M. (See Baker, L. S., Morgan, and Quaid.)

Morrell, Jacque C., assignor to Universal Oil Products Company, Chicago, Ill. Conversion of hydrocarbon oils. 2,105,549; Jan. 18.

Morrison, Willard L., Chicago, Ill. Auto-vent. 2,105,891; Jan. 18.

Mortellaro, Frank. (See Jones, L. L., and Mortellaro.)

Moss, William H., London, England, assignor to Celanese Corporation of America. Protective covering. 2,106,480; Jan. 18.

Moss, William H., London, England, assignor to Celanese Corporation of America. Compositions of matter. 2,105,962; Jan. 18.

Mossberg, Harold F., assignor to O. F. Mossberg & Sons, Incorporated, New Haven, Conn. Repeating firearm. 2,106,752; Jan. 18.

Mossberg, O. F., & Sons, Incorporated. (See Mossberg, Harold F., assignor.)

Motor Terminals Company. (See Fitch, Benjamin F., assignor.)

Mueller, Charles W., assignor to Lewis Invisible Stitch Machine Company, St. Louis, Mo. Dog feed mechanism for sewing machines. 2,106,106; Jan. 18.

Mueller, Otto, Toledo, Ohio. Manual control for automobile generators. 2,105,926; Jan. 18.

Mull, Arthur B., Appleton, assignor to Marathon Paper Mills Company, Rothschild, Wis. Display unit. 2,106,153; Jan. 18.

Müller, Ferdinand C. H. (See Pillicd, T. J., and Müller.)

Napolillo, Angelo, Chicago, Ill. Cooking tool. 2,106,057; Jan. 18.

National Aniline & Chemical Company. (See Foster, Harold B., assignor.)

National Aniline and Chemical Company. (See Perkins, Robert L., assignor.)

National Bearing Metals Corporation. (See Vigne, Albert, assignor.)

National Cash Register Company, The. (See Dicke, Allen A., assignor.)

National Cash Register Company, The. (See Kirshner, Arthur C., assignor.)

National Cash Register Company, The. (See Shipley, Bernis M., assignor.)

National Gas and Oil Engine Company, The, et al. (See Burn, Walter S., assignor.)

National Telephone Supply Company, The. (See Klein, Charles H., assignor.)

National Water Main Cleaning Co. (See Ingles, Clinton, assignor.)

Nelles, Johannes, Leverkusen–Schlebusch, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Unsaturated ketones. 2,105,792; Jan. 18.

Nelson, Jabez C., assignor to Easy Washing Machine Corporation, Syracuse, N. Y. Agitator for washing machines. 2,105,774; Jan. 18.

Neresheimer, Heinrich, and W. Bupped, Ludwigshafen-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Vat dyestuffs of the pyrazinoanthraquinone series. 2,106,840; Jan. 18.

New Era Shirt Company. (See Lyons, Joseph, assignor.)

New Jersey Zinc Company, The. (See Flynn, Edmund J., assignor.)

Nicolai, Fritz. (See Reppe, W., and Nicolai.)

Nielsen, Emanuel, and V. A. Parts, Rochine, Wis., assignors to Scovill Manufacturing Company, Waterbury, Conn. Electric motor. 2,106,058; Jan. 18.

Nilson, John L., Chicago, Ill. Shaving implement. 2,105,775; Jan. 18.

Nissen, Hans F., Dessau, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Apparatus for projecting picture or sound films. 2,105,698; Jan. 18.

Noble, Warren, Michigan City, Ind., assignor to Sullivan Machinery Company. Lubricator. 2,105,690; Jan. 18.

Nodine, Frank H., Meadville, Pa., assignor to Joy Manufacturing Company. Colored fastener elements and making them. 2,106,012; Jan. 18.

No-Mercury Felt Corporation. (See Bartakuff, Jack D., assignor.)

Northern, Charles S., Asheville, and G. M. Quave, West Asheville, N. C. Pipe organ. 2,105,796; Jan. 18.

Norris, Charles C., Riverside, Calif. Combination closet tank cover and ventilator. 2,105,794; Jan. 18.

Norton, Daniel F., Chicago, Ill. Cigarette extinguisher. 2,106,699; Jan. 18.

Nyquist, Harry, Millburn, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Gain control system. 2,106,257; Jan. 18.

O'Brien, Walter L., Oak Park, Ill. Automatic bagger and loader. 2,106,610; Jan. 18.

Ocon, Ernest A., New York, N. Y. Refining and cracking oil. 2,106,013; Jan. 18.

O'Connor, George K., Winnetka, assignor to Smoot Engineering Corporation, Chicago, Ill. Regulator. 2,106,036; Jan. 18.

Oilgear Company, The. (See Simonds, Paul, assignor.)

O'Leary, Edward J., et al. (See Morgan, David G., assignor.)

Olin, John M., Alton, assignor to Western Cartridge Company, East Alton, Ill. Loaded small caliber rifle cartridge. 2,106,107; Jan. 18.

Olson, Oscar L., Cambridge, assignor of one-half to R. E. Aurelius and E. A. Aurelius, Graham, Minn. Automatic safety switch. 2,105,811; Jan. 18.

Orlove, Max, Washington, D. C. Water power. 2,106,824; Jan. 18.

Ortegren, Herman A., assignor to Bower Roller Bearing Company, Detroit, Mich. Shackles for bearing conical surfaces. 2,106,753; Jan. 18.

Ostermann, Rudolf M., Kenilworth, Ill., and A. Williams, Munster, Ind., assignors to The Superheater Company, New York, N. Y. Fuel water heating system. 2,105,817; Jan. 18.

Ostrander, John K., Philadelphia, Pa. Electric cable. 2,106,060; Jan. 18.

Otis, Harbert C., Dallas, Tex. Well drilling head. 2,105,754; Jan. 18.

Ott, Conrad L., and H. H. Schlegel, assignors to Landis Tool Company, Waynesboro, Pa. Automatic line bearing grinder. 2,105,941; Jan. 18.

Ouellette, Alphonse, Beaumont, assignor to Consolidated Lithograph Manufacturing Co., Limited, Montreal, Quebec, Canada. Container. 2,106,025; Jan. 18.

Packard Motor Car Company. (See Tibbetts, Milton, assignor.)

Pallas, Vernon R., Cortland, N. Y. Surface abrasive and polishing machine. 2,105,612; Jan. 18.

Palmer, McKinley, Beverly Hills, Calif. Piston and cylinder construction. 2,106,494; Jan. 18.

Palmer, McKinley, Beverly Hills, Calif. Valve construction. 2,105,695; Jan. 18.

Palmer, McKinley, Beverly Hills, Calif. Combined ventilator and air cleaner for motor vehicles. 2,106,497; Jan. 18.

Palmer, McKinley, Los Angeles, Calif. Vacuum operated device. 2,105,494; Jan. 18.

Panagopoulos, John, Youngstown, Ohio. Beer cooler keg. 2,106,776; Jan. 18.

Pagello, Karl, Daros, Switzerland, assignor, by mesne assignments, to Bausch & Lomb Optical Company, Rochester, N. Y. Sighting device for following aerial targets. 2,106,985; Jan. 18.

Parisot, Henry W., assignor to Rogers Radio Tubes Ltd., Toronto, Ontario, Canada. Voltage indicating electron discharge tube. 2,106,318; Jan. 18.

Parkersburg Rig & Reel Company, The. (See Schwemlein, W., and Settle, assignors.)

Parrett, Arthur N., and Y. H. Holloway, Shelton, Wash., assignors to Rainier Pulp & Paper Company, San Francisco, Calif. Acetylation of wood pulp. 2,105,698; Jan. 18.

Parsons, John, Bainbridge, N. Y., assignor to American Plastics Corporation. Plastic working. 2,105,689; Jan. 18.

Parsons, Philip D., Swarthmore, assignor to Scott Paper Company, Chester, Pa. Towel dispensing cabinet. 2,104,105; Jan. 18.

Parsons, Ralph M., assignor to The Ralph M. Parsons Company, Chicago, Ill. Baffle column. 2,105,951; Jan. 18.

Parsons, Ralph M., assignor to The Ralph M. Parsons Company, Mount Vernon, Ohio. Method and apparatus for treating cracked hydrocarbon oils. 2,105,820; Jan. 18.

Parsons, Ralph M., assignor to The Ralph M. Parsons Company, Mount Vernon, Ohio. Furnace. 2,105,809; Jan. 18.

Parsons, Ralph M., assignor to The Ralph M. Parsons Company, Mount Vernon, Ohio. Furnace. 2,105,819; Jan. 18.

Parsons, Ralph M., assignor to The Ralph M. Parsons Company, Mount Vernon, Ohio. Tube still. 2,105,820; Jan. 18.

Parsons, Ralph M., assignor to The Ralph M. Parsons Company, Chicago, Ill. Furnace. 2,105,821; Jan. 18.

Parsons, Ralph M., Company, The. (See Parsons, Ralph M., assignor.)

Parts, Victor A. (See Nilson, H., and Parts.)

Pate, Wesley M., assignor of one-half to T. F. Boyle, New Orleans, La. Monovalve cylinder head construction. 2,105,699; Jan. 18.

Patterson, Herbert F., assignor to Chrysler Corporation, Detroit, Mich. Power transmission. 2,105,785; Jan. 18.

Paxton, Robert, Drexel Hill, Pa., assignor to General Electric Company. Electric switch gear. 2,104,061; Jan. 18.

Payne, John M. (See Lay, G. J., Payne, and Adam.)

Pelouch, James J. (See Rabagia, P. L., and Pelouch.)

People of the United States, Dedicated to the free use of the. (See Lay, G. J., Payne, and Adam.)

Percival, William S. (See White, R. H. C., and Percival.)

Perkins, Robert L., East Aurora, assignor to National Aniline and Chemical Company, Inc., New York, N. Y. Manufacture of iron oxide products. 2,105,670; Jan. 18.

Perrin, Jay C., Los Angeles, Calif., assignor to Towlsaver, Inc. Towel dispenser. 2,105,928; Jan. 18.

Perry, Robert E., Chicago, Ill. Dispensing device. 2,105,892; Jan. 18.

Pestarini, Joseph M., Grant City, Staten Island, N. Y. Electric current converter. 2,106,014; Jan. 18.

Peterson, Soren P. D., Webster City, Iowa. Thresher screen. 2,105,986; Jan. 18.

Petroleum Processes Corporation, The. (See Stanton, Robert E., assignor.)

Petroleum Rectifying Company of California. (See Roberts, Claudius H. M., assignor.)

Petrusselli, Dominick, et al. (See Indrieri, Alexander F., assignor.)

Pfeiffer, Wilhelm, Tepl. near Karlsbad, Czechoslovakia. Steam baking oven. 2,105,988; Jan. 18.

Phillips Petroleum Company. (See Snow, R. D., and Hepp., assignors.)

Phosphate Recovery Corporation. (See Cargo, Arthur, assignor.)

Phosphate Recovery Corporation. (See Tartaron, Francis X., assignor.)

Pierce, John B., Foundation. (See Strong, William E. S., assignor.)

Pillicd Cabinet Company, The. (See Pillicd, T. J., and Müller, assignors.)

Pillicd, Thomas J., and F. C. H. Müller, assignors to The Pillicd Cabinet Company, Swanton, Ohio. Display cabinet. 2,105,599; Jan. 18.

Pindell, Oliver P., Columbus, Ohio. Safety match packet. 2,105,943; Jan. 18.

Pitch, George, Minneapolis, Minn. Garden tool. 2,106,057; Jan. 18.

Pointer, Delbert, Farmer City, Ill. Valve steam clearance fig. 2,105,503; Jan. 18.

Polster, Philip, Waupun, Wis. Automobile license plate holder. 2,106,015; Jan. 18.

Poston, Emmett V., Springfield, Ill. Fabricated brick construction. 2,106,613; Jan. 18.

Prendergast, Pierce, Pittsburgh, Pa. Fuse plug. 2,106,109; Jan. 18.

Prentice, James M. (See Hass, H., and Prentice.)

Presbrey, Maurice, et al. (See Krasnitz, Theodor, assignor.)

Prescott, Henry T., Chicago, Ill. Head for musical instruments. 2,106,016; Jan. 18.

Preston, Charles I., and H. M. Hammill, Williamsport, Pa., assignors to Aviation Manufacturing Corporation, Chicago, Ill. Controllable pitch propeller. 2,106,845; Jan. 18.

Price, Harold W., assignor to Bendix Products Corporation, South Bend, Ind. Valve for brakes. 2,106,017; Jan. 18.

Primm, Joseph P., Rome, Ga. Knitted fabric. 2,106,057; Jan. 18.

Prosperity Company Inc., The. (See Emens, P. M., and Davis, assignors.)

Purdue Research Foundation. (See Hass, H. B., and McBee, assignors.)

Purdy, William C., Tallulah, La. Fumigating device. 2,105,551; Jan. 18.

Putter, Erich. (See Langer, H., and Putter.)

Quaid, Ralph J. (See Baker, L. S., Morgan, and Quaid.)

Quaker City Iron Works. (See Jensen, James A., assignor.)

Quave, George M. (See Northern, C. S., and Quave.)

Radio Corporation of America. (See Beers, George L., assignor.)

Radio Corporation of America. (See Davis, Lewis H., assignor.)

Radio Corporation of America. (See Deeke, Frederick H., assignor.)

Radio Corporation of America. (See Landon, Vernon D., assignor.)

Radio Corporation of America. (See Linder, Ernest G., assignor.)

Radio Corporation of America. (See Linnell, Alfred A., assignor.)

Radio Corporation of America. (See Smith, Rogers M., assignor.)

Radio Corporation of America. (See Stevens, Clifford E., assignor.)

Radio Corporation of America. (See Goodman, George K., assignor.)

Radio Corporation of America. (See Vance, Arthur W., assignor.)

Rafael Process Corporation. (See Bafton, Harold R., assignor.)

Rafton, Harold R., Andover, Mass., assignor to Rafael Process Corporation. Pigment manufacture. 2,105,503; Jan. 18.

Ragatz, Edward G. (See Aldridge, R. C., and Ragatz.)

Raiche, Paul A., Providence, R. I., assignor to Devol Rubber Co. Apparatus for the manufacture of rubber bathing. 2,104,016; Jan. 18.

Rainier Pulp & Paper Company. (See Parrett, A. N., and Holloway, assignors.)

Ramage, William D., Berkeley, Calif. Purification of beverages. 2,105,500; Jan. 18.

Ramage, William D., Berkeley, Calif. Purification of beverages. 2,105,701; Jan. 18.

Ramsay, Erskine, Birmingham, Ala. Mining coal. 2,106,504; Jan. 18.

Ramsay, Erskine, Birmingham, Ala. Mining machine. 2,105,903; Jan. 18.

Rapenger, Bert F. (See Mamsey, P. J., Thiele, and Rapenger.)

Rasmussen, Hermann, Saxony, Germany. Threshing machine frame. 2,106,123; Jan. 18.

Rawlings, Arthur D., Barnes, England. Cigarette or cigar. 2,106,062; Jan. 18.

Rawson, Emanuel, Chicago, Ill., and A. Williams, Munster, Ind., assignors to The Superheater Company, New York, N. Y. Feed water heating system. 2,105,922; Jan. 18.

Read Machinery Company. (See Eades, John A., assignor.)

Reagan, Walter G., Lebanon, Ind. Container blank. 2,105,944; Jan. 18.

Reed, Forrest C., Kansas City, Mo. Producing carbon black. 2,106,137; Jan. 18.

Reed, Robin. (See Stumbo, Ray J., assignor.)

Rehnberg, Axel F., Rockford, assignor, by mesne assignments, to Borg-Warner Corporation, Chicago, Ill. Roller feed mechanism for roller bearing assembling machines. 2,105,920; Jan. 18.

Reichard, Wade E., assignor to General Railway Signal Company, Rochester, N. Y. Signaling system for railroads. 2,105,930; Jan. 18.

Reid, Ebenezer R. (See Burrows, L. A., Filbert, and Reid.)

Remde, Edward H., assignor to The Baker-Raulang Company, Cleveland, Ohio. Industrial truck. 2,106,063; Jan. 18.

Reppe, Walter, and F. Nicolai, Ludwigshafen-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Production of organic sulphur compounds. 2,105,846; Jan. 18.

Reynolds Corporation. (See Coddington, Edwin D., assignor.)

Ricardo, Harry R., London, England. Combustion chamber of internal combustion engine of the compression ignition type. 2,106,194; Jan. 18.

Rice, Trew & Rice Co. Inc. (See Trew, James W., assignor.)

Rich, Theodore A., Schenectady, N. Y., assignor to General Electric Company. Load indicator for three-phase generators. 2,106,064; Jan. 18.

Ridet, Henri A., assignor to Société Anonyme: Fours et Appareils Stein, Paris, France. Fuel agitator. 2,105,902; Jan. 18.

Rieman, Martin A. (See Johnson, L., and Rieman.)

Riepe, Walter H., Hutchinson, Minn. Pipe aligning tool. 2,105,954; Jan. 18.

Riner, Ivan H., assignor to U. S. Bottlers Machinery Co., Chicago, Ill. Container conveying apparatus. 2,105,795; Jan. 18.

Roberson, Samuel D., assignor to J. J. Miravalle, St. Louis, Mo. Electric water heater. 2,106,019; Jan. 18.

Roberts, Claudius H. M., Long Beach, assignor to Petroleum Rectifying Company of California, Los Angeles, Calif. Method and apparatus for electric dehydration of emulsions. 2,105,614; Jan. 18.

Robichaux, Posthene. (See Barrett, G. J., and Robichaux.)

Robichaux, Posthene, et al. (See Cutrer, C. C., and Brunnard, assignors.)

Roe, Nathaniel Patchogue, N. Y. Control device for oil burners. 2,105,931; Jan. 18.

Roebuck, Leslie N., Melbourne, Australia, and S. J. Everett, Thornton Heath, England; said Everett assignor to said Roebuck. Mechanism for grinding artificial dentures. 2,106,125; Jan. 18.

Roesch, Siegfried, assignor to Ernst Leitz, G. m. b. H., Wetzlar, Germany. Microscope. 2,105,671; Jan. 18.

Rogers Radio Tubes Ltd. (See Parker, Henry W., assignor.)

Rohmer, Frank D., Midland, assignor to Bocji Corporation, Pittsburgh, Pa. Relay for automobile lighting circuits. 2,105,756; Jan. 18.

Romain, Arthur J., Chippewa Falls, Wis. Tube closure device. 2,105,615; Jan. 18.

Rood, Victor L. (See Clark, J. E., Ehstrand, and Rood.)

Rood, Victor L., Brooklyn, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Electron discharge device. 2,105,506; Jan. 18.

Rood, Victor L., Brooklyn, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Electron discharge device. 2,105,507; Jan. 18.

Rose-Derry Company. (See Rose, Edward, assignor.)

Rose, Edgar J. (See McClelland, Arthur H., assignor.)

Rose, Edward, assignor to Rose-Derry Company, Newton, Mass. Mattress. 2,106,065; Jan. 18.

Rosen, Raphael, Cranford, H. H. Bue, Roselle, and R. R. Lobo, Elizabeth, N. J., assignors to Standard Alcohol Company. Manufacture of isopropyl ether. 2,105,508; Jan. 18.

Rosenberg, Benjamin F., assignor to Scully-Jones & Company, Chicago, Ill. Boring tool. 2,105,787; Jan. 18.

Rosenberg, Joseph L. (See Guest, John F., assignor.)

Roxborough, John W. (See Blair, Joseph N., assignor.)

Royal Electric Company. (See Goodwin, George, assignor.)

Rubin, Samuel, New Rochelle, N. Y., assignor to Vega Manufacturing Corporation, Wilmington, Del. Insulated wire. 2,105,552; Jan. 18.

Ruesenberg, Carl A., Rockford, assignor to Borg-Warner Corporation, Chicago, Ill. Friction clutch. 2,105,932; Jan. 18.

Ruliancich, John J. O., assignor to F. Golden, New Kensington, Pa. Radial engine. 2,105,846; Jan. 18.

Rumsey, Herbert, Jr., Nutley, N. J. Measuring apparatus. 2,106,038; Jan. 18.

Ruppel, Wilhelm. (See Nerenheimer, H., and Ruppel.)

Rush, Weaver A., Beatrice, Nebr. Traveling bag for automobiles. 2,105,930; Jan. 18.

Russell, Robert A., Bastburg, Va. Adjustable finger ring. 2,105,796; Jan. 18.

Ryan, Max R. (See Biddison, Pascall, Ryan, and Burke.)

Sadgrove, William H., Weybridge, England. Chair, settee, or like furniture. 2,106,066; Jan. 18.

Sadtler, Robert R., Selinsgrove, Pa. Rust preventing composition and rust prevention. 2,105,672; Jan. 18.

Safford, Mayer M., Schenectady, N. Y., assignor to General Electric Company. Condenser dielectric material. 2,106,039; Jan. 18.

St. Clair, Julia A., San Francisco, Calif. Lingerie strap holder. 2,106,072; Jan. 18.

Saint Genies, Anne H. J. D. L., Versailles, France. Reproduction and projection of goffered films. 2,105,797; Jan. 18.

Salmonson, Anton, Stapleton, N. Y. Hot water heating system. 2,105,593; Jan. 18.

Sartakoff, Jack D., Elmhurst, Long Island, N. Y., assignor to Ne-Mercury Felt Corporation. Preparing fur for felting. 2,105,804; Jan. 18.

Saunders, Philip K., Wolverhampton, England. Fluid-controlling valve. 2,105,864; Jan. 18.

Scarborough, Frederick, Springfield, Mass. Hose manufacture. 2,105,758; Jan. 18.

Scavo, Vito, et al. (See Indrieri, Alexander F., assignor.)

Schering-Kahlbaum A. G. (See Langer, H., and Putter, assignors.)

Schilling, George W. (See Mayer, M. S., and Schilling.)

Schirm, Erik, Dessau, Germany, assignor to General Aniline Works Inc., New York, N. Y. Basic azo-dyestuffs and their production. 2,105,965; Jan. 18.

Schmidt, Frank H., Hillsboro, Ohio. Shingle. 2,106,067; Jan. 18.

Schmidt, Friedrich, Berlin-Karlshorst, Germany, assignor to General Electric Company. Blower rotor for very high peripheral velocity. 2,106,040; Jan. 18.

Schmidtke, Albert H., St. Joseph, Mich., assignor, by mesne assignments, to Seymour & Peck Company, Chicago, Ill. Machine for securing heads in cylindrical containers. 2,106,020; Jan. 18.

Schmittacher, Herman, assignor to Venus Corporation, New York, N. Y. Shower hood. 2,105,956; Jan. 18.

Schneider, Jos., & Co., Optotechnische Gesellschaft. (See Troenier, Albrecht W., assignor.)

Schöbel, Fritz, Berlin-Pankow, and P. Schubert, Berlin-Karlshorst, Germany, assignors to General Electric Company. Mechanical motion transmitting device. 2,106,041; Jan. 18.

Schofield, Carrie L., et al. (See Schofield, George L.)

Schofield, George L., National City, assignor to said G. L. Schofield, as trustee, for C. L. Schofield, G. L. S. Geer, and E. S. S. Stacy-Judd, Los Angeles, Calif. Automobile front end supporting mechanism. 2,105,822; Jan. 18.

Scholtse, Herman J., Berkeley, Calif. Flexible shaft coupling. 2,105,702; Jan. 18.

Schopbach, Charles H., assignor to International Corset Company, Aurora, Ill. Garment. 2,106,021; Jan. 18.

Schröter, Hans O. (See Schröter, Kurt and H. O.)

Schröter, Kurt and H. O., Wechmar, Gotha-Land, Germany. Chassis of vehicles. 2,105,553; Jan. 18.

Schubert, Paul. (See Schöbel, F., and Schubert.)

Schultz, Paul L., and J. J. Pelouch, assignors to The United States Air Compressor Company, Cleveland, Ohio. Dispensing device. 2,105,991; Jan. 18.

Schwartz, George L. (See Larson, L. L., and Schwartz.)

Schwartz, Harvey A., assignor to Industrial Rayon Corporation, Cleveland, Ohio. Treatment of textile materials. 2,105,509; Jan. 18.

Schwemlein, William, and S. B. Settle, assignors to The Parkersburg Rig & Reel Company, Parkersburg, W. Va. Gin pole for derricks. 2,105,865; Jan. 18.

Schultz, Paul L., and J. J. Pelouch, assignors to The United States Air Compressor Company, Cleveland, Ohio. Dispensing device. 2,105,990; Jan. 18.

Scott Paper Company. (See Parsons, Philip D., assignor.)

Scovill Manufacturing Company. (See Nielsen, E., and Parts, assignors.)

Scully-Jones & Company. (See Rosenberg, Benjamin F., assignor.)

Seddon, George, et al. (See Tabley, George L., assignor.)

Segay, Jean D., assignor, by mesne assignments, to Universal Oil Products Company, Chicago, Ill. Treatment of hydrocarbon oils. 2,106,054; Jan. 18.

Sell, Gilbert E., Cynwyd, Pa. Electric furnace. 2,104,022; Jan. 18.

Selas Company, The. (See Hess, Fred, assignor.)

Self, Benjamin M., Detroit, Mich. Gauge for indicator for lathes. 2,105,703; Jan. 18.

Servel, Inc. (See Thomas, Albert R., assignor.)

Settle, Samuel B. (See Schwemlein, W., and Settle.)

Severson, Arthur N., Milwaukee, Wis. Liquid dispensing device. 2,105,967; Jan. 18.

Seymour Manufacturing Company. (See Birge, Francis J., assignor.)

Seymour & Peck Company. (See Schmidtke, Albert H., assignor.)

Shambow Shuttle Company. (See Major, Samuel J., assignor.)

Shaw, Harold D., assignor to Independent Lock Company, Fitchburg, Mass. Doorknob. 2,106,616; Jan. 18.

Shaw, Harold D., assignor to Independent Lock Company, Fitchburg, Mass. Doorknob. 2,106,617; Jan. 18.

Sheaffer, Milton W., Hanover, Pa. Headlight control means for motor vehicles. 2,105,926; Jan. 18.

Shell Development Company. (See van Peski, Adrianus J., assignor.)

Shepherd Worsted Mills. (See Le Croy, Joseph H., assignor.)

Sherar, Morris. (See Malkman, A., and Sherar.)

Sherrill, O. L., et al. (See Kemp, Kenneth C., assignor.)

Shipley, Burnis M., assignor to The National Cash Register Company, Dayton, Ohio. Cash register. 2,105,873; Jan. 18.

Shippy, Lee C., Lockport, N. Y., and W. O. Gebhart, Anderson, Ind., assignors, by mesne assignments, to General Motors Corporation, Detroit, Mich. Making hollow bodies. 2,105,704; Jan. 18.

Shonle, Horace A., assignor to Eli Lilly and Company, Indianapolis, Ind. Methallyl-substituted barbituric compound. 2,106,128; Jan. 18.

Shonle, Horace A., assignor to Eli Lilly and Company, Indianapolis, Ind. Methallyl-substituted barbituric compound. 2,106,130; Jan. 18.

Shoup, John T. (See Welch, R. L., and Shoup.)

Silberstein, Isidor, Paris, France, assignor to Prof. Dr. Max Volmer, Neubabelsberg-Potsdamerbahn, Germany. Electrode for open arc lamps. 2,106,150; Jan. 18.

Silva, Frederick G., assignor to Davenport Machine Tool Co., Incorporated, Rochester, N. Y. Making collets. 2,105,618; Jan. 18.

Simonds, Paul, assignor to The Ollmar Company, Milwaukee, Wis. Sectional drive. 2,105,924; Jan. 18.

Sinclair Refining Company. (See Volnach, A. C., and Fairlie, assignors.)

Sirch, Charles W., Los Angeles, Calif. Diving board apparatus. 2,106,068; Jan. 18.

Slack, John A., Jamaica, N. Y. Visualizing camera. 2,105,557; Jan. 18.

Slusser, Harry R., assignor to The Timken Roller Bearing Company, Canton, Ohio. Roller bearing. 2,106,127; Jan. 18.

Smillack, Jacob, assignor to General Motors Corporation, Dayton, Ohio. Refrigerating apparatus. 2,105,958; Jan. 18.

Smith, Beauford B. (See Waunch, Robert, assignor.)

Smith, Benjamin R., Owensboro, Ky. Chair. 2,105,510; Jan. 18.

Smith, Bertha O., assignor of one-half to A. L. Godfrey, Minneapolis, Minn. Device for depicting prevailing air currents of the earth. 2,105,619; Jan. 18.

Smith, Claude H., Tallmadge, Ohio, assignor to Wingfoot Corporation, Wilmington, Del. Plastic. 2,105,825; Jan. 18.

Smith, Lester C., West Hartford, assignor to The Spencer Turbine Company, Hartford, Conn. Hat cleaning tool. 2,106,069; Jan. 18.

Smith, Rogers M., Merchantville, N. J., assignor to Radio Corporation of America. Noise control system. 2,105,558; Jan. 18.

Smith, William A., Sr., Athens, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Guard for rock drills. 2,105,777; Jan. 18.

Smoot Engineering Corporation. (See O'Connor, George K., assignor.)

Snow, Robert D., and H. J. Hagy, assignors to Phillips Petroleum Company, Bartlesville, Okla. Insulating and sound proofing material and producing same. 2,105,511; Jan. 18.

Snyder, Robert W. (See Gordon, J. T., and Snyder.)

Société Anonyme: Fours et Appareils Stein. (See Ridet, Henri A., assignor.)

Société Anonyme: Société Matérieux de Paris. (See Bressel, Georges P., assignor.)

Solar Laboratories. (See Williams, Wilbert S., assignor.)

Sosson, Charles E., Ardrossan, Scotland, assignor to Imperial Chemical Industries Limited. Delay action detonator and fuse and delay composition for use therein. 2,105,674; Jan. 18.

Southern Mining and Milling Company. (See Hoyt, Philip S., assignor.)

Spathelf, Roy A., St. Louis, Mo. Hinge. 2,105,705; Jan. 18.

Spearin, Harold P., assignor to A. Cromley, Chicago, Ill. Automatic volume control system. 2,105,850; Jan. 18.

Electric Company, Incorporated, New York, N. Y. De-

Spencer, Frank C., Westerfield, N. J., assignor to Western vice for attaching members. 2,105,683; Jan. 18.

Spencer Turbine Company, The. (See Smith, Lester C., assignor.)

Sperry Products, Inc. (See Drake, Harcourt C., assignor.)

Sperry-Sun Well Surveying Company. (See Hering, D., and Beattie, assignors.)

Spots, Chester A., Syndicate, The. (See Spots, Chester A., assignor.)

Spots, Chester A., Laurel, Quebec, assignor to The Chester A. Spots Syndicate, Ottawa, Ontario, Canada. Drafting or lay-out apparatus. 2,106,070; Jan. 18.

Sproule, Donald O., Ilford, assignor of one-half to Henry Hughes & Son, Limited, London, England. Delivering an intermittent electrical current. 2,105,675; Jan. 18.

Stacy-Judd, Elizabeth S. S., et al. (See Schofield, George L.)

Stake, Herman, and A. W. Carlson, Worcester, Mass.; said Stake assignor to said Carlson. Labeling machine. 2,106,847; Jan. 18.

Stamy, David R., Huntington Woods, assignor to Chrysler Corporation, Detroit, Mich. Fastener. 2,105,706; Jan. 18.

Stancliff, Louis G., Cincinnati, Ohio. Device for winding and cutting cellophane. 2,106,707; Jan. 18.

Standard Alcohol Company. (See Rosen, R., Bue, and Lobo, assignors.)

Standard Conveyor Company. (See Maltby, Edward H., assignor.)

Standard Steel Works. (See Kubrts, George J., Jr., assignor.)

Stanton, Robert E., Denver, Colo., assignor to The Petroleum Processes Corporation, Wichita, Kans. Decolorizing petroleum oils. 2,106,071; Jan. 18.

Stark, Julian H., Fort Wayne, Ind., assignor to General Electric Company. Coin controlled time switch. 2,106,042; Jan. 18.

Stehman, Carlyle J., Dayton, Ohio, assignor to Monsanto Chemical Company, St. Louis, Mo. Production of alkyl sulphates. 2,105,512; Jan. 18.

Stelljes, Fred D., East Orange, assignor to T. & L. Company Incorporated, Newark, N. J. Handle for luggage. 2,105,559; Jan. 18.

Stever, Otto A., Los Angeles, assignor to O. H. Kruger, San Marino, Calif. Tile. 2,105,895; Jan. 18.

Stevens, Clifford E., Glen Ridge, N. J., assignor, by mesne assignments, to Radio Corporation of America, New York, N. Y. Electroacoustic device. 2,105,934; Jan. 18.

Stevenson, Robert W., Columbus, Ohio., assignor to The Jeffrey Manufacturing Company, Reducing apparatus. 2,105,759; Jan. 18.

Steward, John W., et al. (See Griffin, George, assignor.)

Stewart, Marvin, Ashland, Ky. Brake. 2,105,967; Jan. 18.

Stift, Edward, St. Louis, Mo. Brake mechanism. 2,105,560; Jan. 18.

Stitt, Claude M., Antioch, assignor to Fibreboard Products, Inc., San Francisco, Calif. Box making machine. 2,105,620; Jan. 18.

Stitt, Henry J., New York, N. Y. Game. 2,106,128; Jan. 18.

Stock, Thomas D., et al. (See Tabley, George L., assignor.)

Stow, Clarence E., Kansas City, Mo., assignor to Westoco Products, Inc. Windshield sprayer. 2,105,676; Jan. 18.

Streb, Robert J. (See Chappell, R. R., McCormack, and Streb.)

Strong, William E. S., assignor to John B. Pierce Foundation, New York, N. Y. Roof construction. 2,106,140; Jan. 18.

Stubbs, Everard, assignor to The Fellows Gear Shaper Company, Springfield, Vt. Honing gears, and for truing the honing means. 2,105,800; Jan. 18.

Stuber, Walter J., assignor to Carey-McFall Co., Philadelphia, Pa. Shade roller plunger trunnion. 2,106,073; Jan. 18.

Stuber, Walter J., assignor to Carey-McFall Co., Philadelphia, Pa. Venetian blind headrail support. 2,106,074; Jan. 18.

Stumbo, Ray J., assignor of one-third to R. Reed, Salem, Oreg. Vaporizing apparatus for internal combustion engines. 2,105,677; Jan. 18.

Sublette, Clifford M. (See Johndohl, G. H., and Sublette.)

Sullivan Machinery Corporation. (See Gartin, Elmer G., assignor.)

Sullivan Machinery Company. (See Huffman, Mervin C., assignor.)

Sullivan Machinery Company. (See Noble, Warren, assignor.)

Sundback, Gideon, assignor to Talon, Inc., Meadville, Pa. Making separable fasteners. 2,106,129; Jan. 18.

Superheater Company, The. (See Ostermann, R. M., and Williams, assignors.)

Superheater Company, The. (See Rawson, E., and Williams, assignors.)

Superior Metal Products Company. (See Demers, Isaie J. B., assignor.)

Surgident, Ltd. (See van Rossem, Walter J., assignee.)

Sussman, Philip. (See Barlow, S. D., and Sussman.)

Swallen, Lloyd C., Terre Haute, Ind., assignor, by mesne assignments, to Corn Products Refining Company, New York, N. Y. Production of zein. 2,106,760; Jan. 18.

Swanson, Harry R., White Plains, assignor to Foster Wheeler Corporation, New York, N. Y. Oil treatment. 2,105,935; Jan. 18.

Swartwood, Kenneth, assignor to Universal Oil Products Company, Chicago, Ill. Conversion of hydrocarbons. 2,105,561; Jan. 18.

Swingspout Measure Company. (See Wiswell, Osro N., assignor.)

T. & T. Company Incorporated. (See Stelljes, Fred D., assignor.)

Tabley, George L., Paddington, near Sydney, New South Wales, assignor of one-fourth to T. D. Stock and one-fourth to G. Seddon, Sydney, Australia. Head band for headwear. 2,106,075; Jan. 18.

Talen, Inc. (See Sundback, Gideon, assignor.)

Tanning Process Company, The. (See Merritt, Matthew M., assignor.)

Tappan Stove Company, The. (See Hoff, John G., assignor.)

Tartaron, Francis X., Mulberry, Fla., assignor to Phosphate Recovery Corporation, New York, N. Y. Concentration of nonmetallic minerals. 2,105,826; Jan. 18.

Tartaron, Francis X., Mulberry, Fla., assignor to Phosphate Recovery Corporation, New York, N. Y. Concentration of nonmetallic minerals. 2,105,827; Jan. 18.

Tax-Auditor Systems, Inc. (See Mothman, A., and Sheaff, assignors.)

Taylor Instrument Companies. (See Hubbard, Karl H., assignor.)

Tear, Harry R., Evanston, assignor to The Lubriection Corporation, Chicago, Ill. Lubricant dispenser. 2,106,023; Jan. 18.

Testi, Nicholas, assignor to Gillette Safety Razor Company, Boston, Mass. Mechanical powder puff. 2,106,621; Jan. 18.

Tetzlaff, Benjamin A. (See Vaver, Walter, assignor.)

Thiele, William F. (See Massey, P. J., Thiele, and Raprager.)

Thomas, Albert R., Evansville, Ind., assignor to Servel, Inc., New York, N. Y. Refrigeration. 2,105,862; Jan. 18.

Thomas, Arvine N., Canton, Ohio, assignor to J. P. Ward, Jr., Chicago, Ill. Typewriter stand. 2,105,968; Jan. 18.

Thomas, De Witt V. B., East Orange, N. J. Game. 2,106,563; Jan. 18.

Thomas, Laurence H. (See Hauser, C. A., and Thomas.)

Thomas, Norman M., Brooklyn, assignor to Joe Lowe Corporation, New York, N. Y. Viscous liquid filling and measuring apparatus. 2,106,076; Jan. 18.

Thompson, Tom H., Detroit, Mich. Vehicle spring. 2,106,269; Jan. 18.

Tibbals, Nathan V., New Canaan, assignor to Hat Corporation of America, Norwalk, Conn. Hat. 2,105,622; Jan. 18.

Tibbetts, Milton, assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle. 2,105,956; Jan. 18.

Timken Roller Bearing Company, The. (See Slusser, Harry R., assignor.)

Title, Ralph E. W. (See Burdsall, C. S., and Title.)

Tobiasson, Anders J., Lysekil, Sweden. Vessel or box for canning. 2,105,795; Jan. 18.

Todd Combustion Equipment, Inc. (See McDonald, James, assignor.)

Tolmann, Charles P., Kew Gardens, N. Y. Liquid fuel conditioning apparatus. 2,105,992; Jan. 18.

Tonsten, Frank D., assignor to Wurton Machine Company, Philadelphia, Pa. Treating tobacco. 2,105,843; Jan. 18.

Tourtaver, Inc. (See Purrin, Jay C., assignor.)

Towne, Charles C., Summit, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Drive for rotating elements of electro-optical systems. 2,105,897; Jan. 18.

Trew, James W., Gettysburg, assignor to Rice, Trew & Rice Co. Inc., Biglerville, Pa. Fringe support for use in packing fruits. 2,106,141; Jan. 18.

Trojan Powder Company. (See Wyler, Joseph A., assignor.)

Tronnier, Albrecht W., Bad Kreuznach, assignor to the Corporation of Jos. Schneider & Co., Optotechnische Gesellschaft, Berlin, Germany. Photographic objective. 2,105,729; Jan. 18.

Tronnier, Albrecht W., Bad Kreuznach, assignor to the Corporation of Jos. Schneider & Co., Optotechnische Gesellschaft, Berlin, Germany. Corrected objective. 2,105,077; Jan. 18.

Tubize Chatillon Corporation. (See McCutt, Homer E., assignor.)

Tuthill, Harry J., Ferguson, Mo. Apparatus for use in making drawings. 2,105,708; Jan. 18.

Ulmer, Paul F. (See Lauenstein, C. F., and Ulmer.)

Union Carbide and Carbon Corporation. (See Wilson, Alexander L., assignor.)

Union Oil Company of California. (See Aldridge, B. G., and Rogats, assignors.)

United-Carr Fastener Corporation. (See Upham, Preston, assignor.)

United Shoe Machinery Corporation. (See Kamineen, Frank, assignor.)

United States Air Compressor Company, The. (See Sandin, P. L., and Peterson, assignors.)

U. S. Bottlers Machinery Co. (See Risser, Ivan H., assignor.)

Universal Oil Products Company. (See Alther, Joseph G., assignor.)

Universal Oil Products Company. (See Dubbs, Carbon P., assignor.)

Universal Oil Products Company. (See Morrell, Jacque C., assignor.)

Universal Oil Products Company. (See Seguy, Jean D., assignor.)

Universal Oil Products Company. (See Swartwood, Kenneth, assignor.)

Upham, Preston, Brookline, assignor to United-Carr Fastener Corporation, Cambridge, Mass. Handbag fastener structure. 2,106,142; Jan. 18.

Urquhart, George G. (See Urquhart, Radcliffe M. and G. G.)

Urquhart, Radcliffe M., Philadelphia, and G. G. Urquhart, Cynwyd, Pa. Method and apparatus for foam generating and distributing. 2,106,043; Jan. 18.

Usselman, George R., Port Jefferson, Long Island, N. Y., assignor to Radio Corporation of America. Modulation. 2,105,678; Jan. 18.

Usselman, George R., Port Jefferson, Long Island, N. Y., assignor to Radio Corporation of America. Phase modulation. 2,105,849; Jan. 18.

Vance, Arthur W., Camden, N. J., assignor to Radio Corporation of America. Television apparatus. 2,105,870; Jan. 18.

Van Pesel, Adrianus J., Amsterdam, Netherlands, assignor to Shell Development Company, San Francisco, Calif. Recovering of gasoline distillate. 2,105,850; Jan. 18.

Van Rossum, Walter J., West Los Angeles, assignor to Surgident, Ltd., Los Angeles, Calif. Flexible package for hydrocolloid impression materials. 2,105,623; Jan. 18.

Vaughan Motor Co. (See Weiss, Samuel, assignor.)

Vaughan, John V. (See Lanier, W. A., and Vaughan.)

Vaver, Harriet, administratrix. (See Vaver, Walter.)

Vaver, Walter, deceased, Clarke, assignor of one-half to B. A. Tetzlaff, Riverside, Ill.; H. Vaver administratrix. Gun sight. 2,105,964; Jan. 18.

Vega Manufacturing Corporation. (See Reuben, Samuel, assignor.)

Venus Corporation. (See Schmittacher, Herman, assignor.)

Vickers, Richard N. (See Kuhn, P. C., and Vickers.)

Vigne, Albert, Webster Groves, assignor to National Bearing Metals Corporation, St. Louis, Mo. Oil and dust seal for journal boxes. 2,105,971; Jan. 18.

Violetto, Richard J., Virginia, Minn. Resilient closure. 2,105,709; Jan. 18.

Volck, Arvid C., Whiting, and M. Fabrio, Hammond, Ind., assignors to Standard Refining Company, New York, N. Y. Lubricant demetalliser. 2,105,852; Jan. 18.

Volmer, Prof. Dr. Max. (See Silberstein, Luder, assignor.)

Von Harten, John H., et al. (See McCarty, Roy C., assignor.)

Von Schantz, Gustaf S., Newton, Mass. Metal stair construction. 2,105,565; Jan. 18.

Wadel, Josef, Hamburg, Germany. Casing for suppositories. 2,105,710; Jan. 18.

Waechter, Charles B. (See Martin, S. B., and Waechter.)

Wagner Electric Corporation. (See Dick, Burns, assignor.)

Wagner, William E., Kilworthy, Ontario, Canada, assignor to Western Cartridge Company, East Alton, Ill. Shot shell. 2,105,926; Jan. 18.

Ward, James P., Jr. (See Thomas, Arvine N., assignor.)

Warner, Arthur L., assignor to Illinois Iron & Bolt Company, Carpentersville, Ill. Grinding machine. 2,105,872; Jan. 18.

Warren, Webster & Company. (See Kamsvaag, Gudmund, assignor.)

Watkins, William R., Hemet, Calif. Subirrigation device. 2,105,566; Jan. 18.

Watts, Albert E., Montreal, Quebec, Canada. Boiler. 2,106,502; Jan. 18.

Waunch, Robert, Salem, assignor to E. E. Smith, Silverton, Oreg. Casting block. 2,105,506; Jan. 18.

Weathered, George C., assignor to Celluform Corporation, Chicago, Ill. Producing layers of distended thermo material. 2,105,721; Jan. 18.

Webb, John K., Aldwych, London, England, assignor to International Standard Electric Corporation, New York, N. Y. Joint for high tension electric cables. 2,105,567; Jan. 18.

Weber, Albert L. (See McLean, H. C., and Weber.)

Webster, Fullerton D., Mountain Lakes, assignor to Federal Telegraph Company, Newark, N. J. Apparatus for diathermic treatment. 2,105,568; Jan. 18.

Weindel, Fred, Jr., assignor to E. F. Gaumnitz & Sons, Inc., Allentown, Pa. Bushion or sign. 2,105,630; Jan. 18.

Weinheimer, Claude M., assignor to Detroit Electric Furnace Company, Detroit, Mich. Door and operating mechanism. 2,105,572; Jan. 18.

Weiss, Samuel, assignor to Vaughan Motor Co., Inc., Portland, Oreg. Tractor. 2,105,685; Jan. 18.

Welch, Alfred F., Fort Wayne, Ind., assignor to General Electric Company. Directional self-starting induction motor. 2,105,513; Jan. 18.

Welch, Alfred F., Fort Wayne, Ind., assignor to General Electric Company. Self-reversing motor drive. 2,105,514; Jan. 18.

Welch, Robert E., and J. T. Shoup, Canton, Ohio. Hydraulic brake. 2,105,712; Jan. 18.

Welch, William A. (See Harris, J. P., and Welch.)

Wemple, Leland E. (See Deason, J. E., and Wemple.)

Werdehoff, Albert B., Lake Orion, assignor to Chrysler Corporation, Highland Park, Mich., Prance. 2,105,713; Jan. 18.

West, Frank R., Detroit, Mich. Bolt and chain lock. 2,105,714; Jan. 18.

West Virginia Pulp & Paper Company. (See Harris, J. P., and Welch, assignors.)

Western Cartridge Company. (See Olin, John M., assignor.)

Western Cartridge Company. (See Wagner, William E., assignor.)

Western Electric Company. (See Johannessen, Vaughn L., assignor.)

Western Electric Company. (See Spencer, Frank C., assignor.)

Westinghouse Electric & Manufacturing Company. (See Crabbs, Herbert J., assignor.)

Westeco Products, Inc. (See Stow, Clarence M., assignor.)

White, Eric L. C., Hillingdon, and W. S. Percival Hanwell, assignors to Electric & Musical Industries Limited, Hayes, England. Directional wireless aerial system. 2,105,569; Jan. 18.

White, Ralph H., and D. J. McNevin, Chicago, Ill. Facing tape for Venetian blinds. 2,106,987; Jan. 18.

Whitehead, William, Cumberland, Md., assignor to Celanese Corporation of America. Treatment of organic derivatives of cellulose. 2,105,570; Jan. 18.

Whitney, Wiley, Bloomfield, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telephone exchange system. 2,105,741; Jan. 18.

Wichtendahl, Rudolf, Hanover, Germany. Hydraulically actuated friction clutch. 2,105,638; Jan. 18.

Williams, Alfred L. W., assignor to The Brush Development Company, Cleveland, Ohio. Piezoelectric device and making the same. 2,106,145; Jan. 18.

Williams, Arthur. (See Gotsmann, E. M., and Williams.)

Williams, Arthur. (See Rawson, E., and Williams.)

Williams and Masons Company. (See Cox, George D., assignor.)

Williams, Oscar C., San Diego, Calif. Hair dressing tool. 2,105,971; Jan. 18.

Williams, Walter W., Bloomington, Ill. Flame control for fluid fuel burners. 2,105,634; Jan. 18.

Williams, Wilbert E., Columbus, Ohio, assignor, by mesne assignments, to Solar Refrigerator, Denver, Pa. Stencil ing apparatus. 2,105,673; Jan. 18.

Willinger, David. (See Frank, H., and Willinger.)

Wilson, Alexander L., Pittsburgh, Pa., assignor, by mesne assignments, to Union Carbide and Carbon Corporation. Production of morpholine ethanols. 2,105,828; Jan. 18.

Wilson, Herbert J., New York, N. Y. Electrical connecting and supporting means. 2,105,575; Jan. 18.

Winchester Repeating Arms Company. (See Young, George A., assignor.)

Wing, Forrest H., Tacoma, Wash. Bunting. 2,105,674; Jan. 18.

Wingfoot Corporation. (See Clifford, Albert M., assignor.)

Wingfoot Corporation. (See Cramer, Howard I., assignor.)

Wingfoot Corporation. (See Gordon, J. T., and Snyder, assignors.)

Wingfoot Corporation. (See Mass, Elor F., assignor.)

Wingfoot Corporation. (See Smith, Claude H., assignor.)

Wingfoot Corporation. (See Woodward, Alva W., assignor.)

Wired Radio, Inc. (See Duncan, Robert D., Jr., assignor.)

Wirth, Theodor. (See Knecht, O., and Wirth.)

Wiswell, Osro N., assignor to Swingspout Measure Company, Los Angeles, Calif. Can opener and dispensing device. 2,105,575; Jan. 18.

Wittek, Joseph, Pasadena, Calif., assignor to Wittek Manufacturing Co., Chicago, Ill. Hedge and tree trimmer. 2,105,576; Jan. 18.

Wittek Manufacturing Co. (See Wittek, Joseph, assignor.)

Wood, Edward L., Detroit, Mich. Service station power oil removal unit. 2,105,761; Jan. 18.

Wood, Milton B., Ellingville, N. Y. Game apparatus. 2,106,084; Jan. 18.

Woodward, Alva W., Kent, Ohio, assignor to Wingfoot Corporation, Wilmington, Del. Wheel or rim. 2,105,820; Jan. 18.

Woolhiser, Jay H. (See Gross, O. J., and Woolhiser.)

Worthington Pump and Machinery Corporation. (See Heath, Barthy E., Jr., assignor.)

Wright, David C., Euclid, assignor to The Electric Controller & Manufacturing Company, Cleveland, Ohio. Cam-set sew timing device. 2,105,640; Jan. 18.

Wurton Machine Company. (See Tonsten, Rush D., assignor.)

Wyler, Joseph A., assignor to Trojan Powder Company, Allentown, Pa. Preparation of nitrates of monohydric aliphatic alcohols. 2,105,902; Jan. 18.

Yorktown Electric Heater Manufacturing Corporation. (See Behr, H. C. K., and Bek, assignors.)

Young, David H. (See Marvalle, J., and Young.)

Young, Lawrence K., Seattle, Wash. Disappearing wall cabinet board. 2,106,044; Jan. 18.

Zamborsky, Andrew M., Cleveland, Ohio. Fishing device. 2,106,046; Jan. 18.

Zelenoff, Paul P., Philadelphia, Pa. Whipping top. 2,105,904; Jan. 18.

Zeller, John E. (See Grieg, A. E., and Zeller.)

Zetzmann, Walther, and E. Graumann, Premnitz, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfurt-on-the-Main, Germany. Manufacture of threads from viscose. 2,106,502; Jan. 18.

Zimmerman, Thomas, assignor to Bower Roller Bearing Company, Detroit, Mich. Machine for honing conical surfaces. 2,105,762; Jan. 18.

Zucker, Milton. (See Moore, C. G., and Zucker.)

LIST OF REISSUE INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 18TH DAY OF JANUARY, 1938

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Battery filling device. A. H. Mosher. 20,627; Jan. 18.
Blow-out preventer. J. W. MacClatchie. 20,631; Jan. 18.
Coupling, Hose. A. A. Eisenman. 20,629; Jan. 18.
Electrical control mechanism for trolley bucket plants. H. E. Hallenbeck. 20,630; Jan. 18.
Shield, Frost. J. R. Thorp. 20,628; Jan. 18.
Tape actuating device. W. J. Zenner. 20,626; Jan. 18.
Tone arm for electric phonographs. M. Zeh. 20,625; Jan. 18.
Tuning scale. H. M. Lewis. 20,632; Jan. 18.

LIST OF PLANT INVENTIONS

Rose. F. H. Howard. 268; Jan. 18.

LIST OF DESIGN INVENTIONS

Advertising device or the like. J. O. Reinecke. 106,034–6; Jan. 18.
Ball, Tennis. S. G. Ball. 107,939; Jan. 18.
Blotter and pad holder for desks, Combination. G. Stone. 106,024; Jan. 18.
Bottle. E. L. Brandeis. 106,010; Jan. 18.
Bottle. F. McIntosh. 107,966; Jan. 18.
Box for cigarettes, playing cards and the like. H. Lathrop. 106,016; Jan. 18.
Box, Shoeshine. C. H. Churchill. 107,945; Jan. 18.
Cabinet, Radio. A. L. Herron. 107,965; Jan. 18.
Cabinet, Spool display. B. J. Graham. 107,957; Jan. 18.
Camera. W. D. Teague. 107,976; Jan. 18.
Chair. R. Mulwitz and H. G. Jennings. 107,967; Jan. 18.
Clip, Pen and pencil. C. E. Marshall. 107,964–5; Jan. 18.
Clock and weather and temperature indicator, Combination. O. G. Williams. 106,007; Jan. 18.
Clothesline tightener. M. Bocchino. 107,944; Jan. 18.
Coat. H. Miller. 106,031; Jan. 18.
Coat. J. A. Silverman. 106,038–41; Jan. 18.
Compressor, Motor driven portable. J. W. Jones. 106,001; Jan. 18.
Container for watches, Display. S. Weissman. 107,961; Jan. 18.
Container or similar article, Jewelry display. W. J. Hiscock. 107,997–106,000; Jan. 18.
Dress. H. Berry. 107,940–2; Jan. 18.
Dress. T. Coleman. 106,043; Jan. 18.
Dress. P. Fracchia. 107,950–53; Jan. 18.
Dress. I. Lampel. 106,053; Jan. 18.
Dress. A Magazia. 106,054; Jan. 18.
Dress. M. Michelson. 106,029; Jan. 18.
Dress. R. Perlman. 106,033; Jan. 18.
Dress. S. J. Foster. 106,056; Jan. 18.
Dress. D. W. Price. 107,973–4; Jan. 18.
Dress. K. Root. 107,975; Jan. 18.
Dress. B. Shapiro. 106,055; Jan. 18.
Dress. M. B. Smith. 106,058; Jan. 18.
Dress. M. Wagner. 107,978–9; Jan. 18.
Dress. M. Wagner. 106,060; Jan. 18.
Dress. S. Warshaw. 107,980; Jan. 18.
Dress ensemble. E. M. Ciccone. 106,046–7; Jan. 18.
Dress ensemble. T. Coleman. 106,049; Jan. 18.
Dress ensemble. S. Connelli. 106,050; Jan. 18.
Dress ensemble. M. Michelson. 106,030; Jan. 18.
Dress ensemble. D. W. Price. 107,972; Jan. 18.
Dress, Ensemble. N. Rolfe. 106,057; Jan. 18.
Dress ensemble. W. G. Steinman. 106,042; Jan. 18.
Dress ensemble. S. Zahn. 106,061; Jan. 18.
Electric power unit, Portable. W. F. Allenby and C. H. Willman. 107,963; Jan. 18.
Eyeshade or similar article. A. N. Gates. 107,954; Jan. 18.
Fabric, Textile. P. S. Schwartz. 106,021; Jan. 18.
Fan, Electric. M. S. Park. 106,032; Jan. 18.
Frame member for a velocipede, Rear. E. J. Anderson. 107,967; Jan. 18.
Glider. A. S. Goldberg. 107,955; Jan. 18.
Glove. J. A. Higier. 107,998; Jan. 18.
Goblet or similar article. E. A. Kelly. 106,003–3; Jan. 18.
Handbag. H. Fehmann. 106,012–13; Jan. 18.
Handbag. H. Fehmann. 106,020; Jan. 18.
Handbag. H. Fehmann. 106,031–2; Jan. 18.
Handle stick. J. W. West. 106,025; Jan. 18.
Hose tower and cabinet for automobile service stations or the like, Combined. W. A. Kropp. 107,959–61; Jan. 18.
Jar. N. F. Stener. 106,023; Jan. 18.
Jar, Pucker. F. J. Petty. 106,020; Jan. 18.
Label. E. Opler. 107,968; Jan. 18.
Lamp, Semi-indirect electric. E. A. Dickerson. 107,949; Jan. 18.
Mantel or similar article. D. J. Baum. 106,006–9; Jan. 18.
Masher or similar article, Vegetable. J. G. Jackson. 106,028; Jan. 18.
Mixer, Portable food. W. F. Allenby and C. H. Willman. 107,964; Jan. 18.
Pajamas. J. R. Abraham. 107,983; Jan. 18.
Plate or similar article. E. A. Kelly. 106,005; Jan. 18.
Plate or similar article, Salad. E. A. Kelly. 106,004; Jan. 18.
Platen frame for typewriting machines. J. N. Hoffman. 106,014; Jan. 18.
Press or the like. E. M. Pfauser. 107,971; Jan. 18.
Projector. S. Edwards. 107,948; Jan. 18.
Scarf. P. Q. O'Hara. 106,019; Jan. 18.
Shaver, Dry. E. Knapp. 106,015; Jan. 18.
Shoe. W. L. Delaney. 107,946; Jan. 18.
Shoe. L. J. Epstein. 107,949; Jan. 18.
Shoe. J. Lane. 107,962; Jan. 18.
Shoe. A. H. Lansing. 107,963; Jan. 18.
Shoe sole. N. H. Towsley. 107,977; Jan. 18.
Sink. J. R. Morgan. 106,017; Jan. 18.
Slip. S. B. Hochman. 106,027; Jan. 18.
Slipper. L. Goodkind. 107,956; Jan. 18.
Strainer. C. R. T. Hess. 107,969; Jan. 18.
Table, Shelved. L. L. Woodard. 107,982; Jan. 18.
Tank top, Toilet. C. C. Norris. 106,018; Jan. 18.
Telephone hand-set-mounting. H. Sengebusch. 106,022; Jan. 18.
Textile fabric. W. Ross. 106,037; Jan. 18.
Tongs, Serving. J. C. Brown. 106,011; Jan. 18.
Tool, Garden. W. W. Wallace. 106,049–4; Jan. 18.
Tumbler. R. W. Fuerst. 107,992–7; Jan. 18.
Tumbler. M. O. Hansen. 107,992–04; Jan. 18.
Velocipede frame member. E. J. Anderson. 107,938; Jan. 18.
Waffle iron or the like. H. A. Smith. 106,026; Jan. 18.
Watch, Wrist. I. L. Bloom. 107,943; Jan. 18.
Welding apparatus, Electric. J. W. Wilkinson. 106,045; Jan. 18.
Wheel and tire, Combined. J. V. Martin. 106,055; Jan. 18.
Workstand or the like. E. M. Pfauser. 107,969–70; Jan. 18.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 18TH DAY OF JANUARY, 1938

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Abrasive and polishing machine, Surface. V. R. Pallas. 2,105,612; Jan. 18.
Adhesive and coating composition. A. D. Macdonald. 2,105,697; Jan. 18.
Adhesive, Metal backed pressure-sensitive. M. A. Goldman. 2,106,123; Jan. 18.
Adjustable finger ring. R. A. Russell. 2,105,796; Jan. 18.
Aerial system, Directional wireless. R. L. C. White and W. S. Percival. 2,105,800; Jan. 18.
Agitator for washing machines. J. C. Nelson. 2,105,774; Jan. 18.
Air chamber Diesel engine. F. Lang. 2,105,662; Jan. 18.
Air conditioning apparatus. C. C. Hanicke. 2,105,692; Jan. 18.
Air conditioning apparatus. G. W. Langford. 2,105,887; Jan. 18.
Air conditioning system. W. L. Fleisher. 2,105,882; Jan. 18.
Air conditioning system. O. A. Labes and R. B. P. Crawford. 2,106,101; Jan. 18.
Aircraft having rotative sustaining wings. J. A. J. Bennett and F. L. Hodgson. 2,105,682; Jan. 18.
Air currents of the earth, Device for depicting prevailing. B. O. Smith. 2,105,619; Jan. 18.
Alkyl sulphates, Production of. C. J. Stahman. 2,105,512; Jan. 18.
Alloy for permanent magnets. K. Honda. 2,105,687; Jan. 18.
Alloy of nickel, titanium cobalt, iron, and aluminum for permanent magnets. K. Honda. 2,105,688; Jan. 18.
Amines as antioxidants for deteriorable compositions, Substituted secondary. A. M. Clifford. 2,105,806; Jan. 18.
Annealing cover. E. N. Millan. 2,105,760; Jan. 18.
Announcer, Radio program. H. O. N. Evans, Jr. 2,105,527; Jan. 18.
Antenna system. F. F. Merriam. 2,105,938; Jan. 18.
Applicator. S. M. Lewis. 2,105,946; Jan. 18.
Arc rupturing device for electric switches. E. Lange. 2,106,032; Jan. 18.
Arch and wall construction. L. M. Beall. 2,105,804; Jan. 18.
Asbestos rings, Manufacture of. T. Krumsiit. 2,106,119; Jan. 18.
Attrition devices, Manufacture of. G. Griffin. 2,105,918; Jan. 18.
Automobile front end supporting mechanism. G. L. Scheidell. 2,105,822; Jan. 18.
Auto-vent. W. L. Morrison. 2,105,801; Jan. 18.
Azo-dyestuffs and their manufacture, Red. O. Knecht and T. Wirth. 2,105,962; Jan. 18.
Azo-dyestuffs and their production, Basic. E. Schirm. 2,105,965; Jan. 18.
Bag: *See*—
Golf bag.
Bag for automobiles, Traveling. W. A. Rush. 2,105,989; Jan. 18.
Bagger and loader, Automatic. W. L. O'Brien. 2,105,810; Jan. 18.
Bakery products, Sterilizing wrapped. L. W. Haas. 2,105,648; Jan. 18.
Ball, Punching. J. Klecka. 2,105,941; Jan. 18.
Ball, Playing. A. D. Macdonald. 2,105,745; Jan. 18.
Band for headwear, Head. G. L. Tabley. 2,105,975; Jan. 18.
Bandage binder clip. E. Freiberg. 2,105,725; Jan. 18.
Barbituric compound, Methallyl-substituted. H. A. Shonle. 2,106,128–9; Jan. 18.
Barium compounds, Manufacture of. E. E. Fisher. 2,105,940; Jan. 18.
Barrel. E. G. Cook. 2,105,939; Jan. 18.
Baseball bats, Apparatus for treating. C. R. and G. L. Beck. 2,106,466; Jan. 18.
Baths used in the manufacture of cellulose products from viscose, Treatment of acid setting. J. L. Costa. 2,105,654; Jan. 18.
Bead wire die. J. T. Gordon and R. W. Snyder. 2,105,813; Jan. 18.
Bearing: *See*—
Roller bearing. Shaft bearing.
Bearing. J. U. Lonsdale. 2,105,979; Jan. 18.
Bedstead. G. M. Harris. 2,105,788; Jan. 18.
Belt conveyer. J. R. Madaire. 2,105,988; Jan. 18.
Belt, Safety. E. L. Hoffman. 2,105,680; Jan. 18.
Berth, Automobile collapsible. J. Knudson. 2,105,740; Jan. 18.
Beverages, Purification of. W. D. Ramage. 2,105,700–1; Jan. 18.
Blade heft. E. L. Laverty. 2,105,661; Jan. 18.
Blank, Container. W. G. Reagan. 2,106,044; Jan. 18.
Blind head rail support, Venetian. W. J. Stuber. 2,106,074; Jan. 18.
Block: *See*—
Cutting block.
Board: *See*—
Wall cabinet board.
Boiler. A. E. Watts. 2,105,801; Jan. 18.
Bolt and chain lock. F. E. West. 2,105,714; Jan. 18.
Boring tool. B. F. Rosenberg. 2,105,757; Jan. 18.
Bottle cap. W. E. Gloor. 2,105,768; Jan. 18.
Box: *See*—
Terminal box.
Box for booms, Shuttle. W. H. Bahan. 2,105,578; Jan. 18.
Box making machine. C. M. Stitt. 2,105,620; Jan. 18.
Brace, Trestle. F. E. Manley. 2,105,979; Jan. 18.
Bracket: *See*—
Curtain rod bracket.
Brake: *See*—
Hydraulic brake.
Brake. M. Stewart. 2,105,867; Jan. 18.
Brake beam safety guard structure. E. G. Busse. 2,105,905; Jan. 18.
Brake lockout, Hydraulic. R. C. McCarty. 2,105,749; Jan. 18.
Brake mechanism. E. Stift. 2,105,560; Jan. 18.
Brick construction, Fabricated. E. V. Poston. 2,105,613; Jan. 18.
Bronze, Hot workable. D. R. Hull. 2,105,945; Jan. 18.
Brooder. W. A. and M. L. V. Banning. 2,105,779; Jan. 18.
Bubble column. R. M. Parsons. 2,105,501; Jan. 18.
Building. F. W. Beck. 2,105,824; Jan. 18.
Bullet, Disintegrating. G. A. Tyley. 2,105,523; Jan. 18.
Bumper, Vertical. A. S. Campbell. 2,106,130; Jan. 18.
Burring table. H. W. Birch. 2,105,715; Jan. 18.
Cabinet: *See*—
Display cabinet. Towel dispensing cabinet.
Cabinet. W. Gersten. 2,105,763; Jan. 18.
Cable: *See*—
Electric cable.
Cable supporting device. C. H. Klein. 2,106,006; Jan. 18.
Cable winding mechanism, Transportable. B. P. Fitch. 2,105,476; Jan. 18.
Calculating machine and the like. B. Carlström and R. Hansen. 2,105,520; Jan. 18.
Camera, Motion picture. H. Becker. 2,105,631; Jan. 18.
Camera, Photographic film. H. Becker. 2,105,630; Jan. 18.
Camera, Visualizing. J. A. Slack. 2,105,557; Jan. 18.
Candy novelty. J. G. Homan. 2,106,007; Jan. 18.
Cap: *See*—
Bottle cap.
Cap for containers, Self-closing. G. L. Latour. 2,105,695; Jan. 18.
Carbon black, Producing. F. C. Reed. 2,106,137; Jan. 18.
Card and pamphlet holder. F. E. Henrich. 2,105,564; Jan. 18.
Carriage for Röntgen apparatus. M. Andreini. 2,105,961; Jan. 18.
Carrier supply system. R. D. Duncan, Jr. 2,105,809; Jan. 18.
Carrier wave transmission system. H. W. Dudley. 2,105,910; Jan. 18.
Cartridge, Loaded small caliber rifle. J. M. Olin. 2,106,107; Jan. 18.
Case: *See*—
Cigarette case. Packing case.
Gauge tape case.
Casettes, Film loading. H. Becker. 2,105,628; Jan. 18.
Casette, Moving picture camera. H. Becker. 2,105,629; Jan. 18.
Casing for suppositories. J. Wadel. 2,105,710; Jan. 18.
Casing spear, Hollow trip. F. J. Hinderliter. 2,105,885; Jan. 18.
Catalytic hydrogenation of hydroaromatic carboxylic acids and their esters. W. A. Lazier. 2,105,864; Jan. 18.
Catalyst, Chromium sulphomolybdate. W. A. Lazier and J. Y. Vaughen. 2,105,685; Jan. 18.
Catalytic hydrogenation process for the production of aldehydes. W. A. Lazier. 2,105,540; Jan. 18.
Cellulose esters, Production of. M. G. Milliken. 2,105,609; Jan. 18.
Cellulose, Manufacture of alkali. A. Bayerl and K. Kleinfinger. 2,106,111; Jan. 18.
Cellulose, Noncorrosive organic derivatives of. H. E. Martin and D. A. Eanor. 2,105,543; Jan. 18.
Cellulose, Preparation of organic derivatives of. H. E. Martin and D. A. Eanor. 2,105,544; Jan. 18.
Cellulose, Treatment of organic derivatives of. W. Whitehead. 2,105,570; Jan. 18.

Cellophane, Device for winding and cutting. L. G. Stanciff. 2,105,707; Jan. 18.
Cellulose, Process of nitrating. L. S. Baker, I. H. Morgan, and R. J. Quaid. 2,105,527; Jan. 18.
Chair. B. R. Smith. 2,105,510; Jan. 18.
Chair, settee or like furniture. W. H. Sadgrove. 2,106,066; Jan. 18.
Chassis for motor driven vehicles. F. W. Dixon. 2,105,781; Jan. 18.
Chassis of vehicles. K. and H. O. Schröter. 2,105,883; Jan. 18.
Check machine, Sales tax. A. Melhman and M. Sheras. 2,105,948; Jan. 18.
Chlorination process. H. B. Haas and R. T. McBee. 2,105,723; Jan. 18.
Cigarette case, Sectional. H. Auslander. 2,105,517; Jan. 18.
Cigarette extinguisher. D. F. Norton. 2,106,059; Jan. 18.
Cigarette or cigar. A. D. Rawlings. 2,106,062; Jan. 18.
Circuit: *See*—
Volume control circuit.
Circuit breaker. H. J. Crabbe. 2,104,114; Jan. 12.
Circuit breaker, Electromagnetic overload. W. Laphausen. 2,105,604; Jan. 18.
Circuit controlling means. B. W. Jones. 2,106,100; Jan. 18.
Clip: *See*—
Bandage binder clip.
Clock attachment, Electric. H. W. Hyde. 2,105,580; Jan. 18.
Closure for tubes and the like. K. D. Heimach and O. Brassart. 2,106,023; Jan. 18.
Closure, Resilient. R. J. Violette. 2,105,709; Jan. 18.
Clutch: *See*—
Freewheeling clutch. Friction clutch.
Coal briquetting, Coking. J. Becher. 2,105,833; Jan. 18.
Coal Mining. E. Ramsay. 2,105,504; Jan. 18.
Coating from containers, Removing. F. Gottelmann. 2,105,767; Jan. 18.
Coating the interior of a water main, Device used for. C. Ingles. 2,105,094; Jan. 18.
Coil, Metal. C. S. Henderson. 2,105,734; Jan. 18.
Collar. J. Lyons. 2,105,668; Jan. 18.
Collets, Sizing. F. G. Silva. 2,105,618; Jan. 18.
Color in plant specimens, Preserving the natural. G. R. Fernekes. 2,105,698; Jan. 18.
Combat vehicle. A. W. Herrington. 2,105,917; Jan. 18.
Combustion chamber of internal combustion engine of the compression ignition type. H. R. Ricardo. 2,104,124; Jan. 18.
Combustion control system. L. L. Cunningham. 2,105,656; Jan. 18.
Composing machine. R. V. Graves and A. J. Bohman. 2,105,731; Jan. 18.
Compositions of matter. W. H. Moss. 2,105,952; Jan. 18.
Compressor system. W. Fourness. 2,105,765; Jan. 18.
Condenser: *See*—
Variable condenser.
Condenser device for refrigerators. R. H. Money. 2,105,751; Jan. 18.
Conditions or operations, Controlling. R. R. Chappell, D. McCormack, and R. J. Streb. 2,104,083; Jan. 12.
Container: *See*—
Dispensing container.
Container. F. D. McGowan. 2,106,122; Jan. 18.
Container. A. Ouellette. 2,105,953; Jan. 18.
Container conveying apparatus. I. H. Risser. 2,105,795; Jan. 18.
Containers, Hot plating. I. J. R. Demers. 2,105,906; Jan. 18.
Control device for oil burners. N. Boe. 2,105,931; Jan. 18.
Control for automobile generators, Manual. O. Mueller. 2,106,926; Jan. 18.
Control system. K. H. Webbard. 2,105,598; Jan. 18.
Conveyer. E. H. Maltby. 2,105,922; Jan. 18.
Conveying apparatus. P. W. Greer. 2,106,134; Jan. 18.
Cooking tool. A. Napolillo. 2,106,057; Jan. 18.
Cooky molding device. K. M. Lee. 2,104,009; Jan. 12.
Cord connector body. M. F. Bannon. 2,105,446; Jan. 18.
Core box stripping machine. G. C. Carney. 2,105,677; Jan. 18.
Core orientation apparatus. D. Hering and C. H. Beattie, Jr. 2,105,650; Jan. 18.
Corrosion in the distillation of hydrocarbon oil, Preventing. R. G. Aldridge and R. G. Hegatz. 2,105,874; Jan. 18.
Cotton cleaner-drier, Combination seed. N. B. Henry. 2,105,726; Jan. 18.
Coupling: *See*—
Flexible shaft coupling. Pipe or rod coupling.
Coupling device for flexible members. C. Freddino. 2,105,889; Jan. 18.
Cover: *See*—
Annealing cover.
Cover and ventilator, Combination closet tank. C. C. Norris. 2,105,794; Jan. 18.
Covering, Protective. W. H. Moss. 2,105,489; Jan. 18.
Cuff. F. O. C. Brown. 2,105,471; Jan. 18.

Measuring line catcher. J. G. Creed. 2,105,636; Jan. 18.
Meat processing and molding device. S. F. Gleason. 2,105,941; Jan. 18.
Merchandising device, Automaton. F. L. Dale. 2,105,904; Jan. 18.
Metal in reversible mills, Process and mechanism for rolling endless lengths of. E. B. Hudson. 2,105,736; Jan. 18.
Metal, Method of and apparatus for producing ferrous sheet. A. J. Castle. 2,105,960; Jan. 18.
Metal, Treating. C. F. Lauenstein and P. F. Ulmer. 2,105,888; Jan. 18.
Meter: See—
Fluid meter. Parking meter.
Microscope. S. Rosech. 2,105,671; Jan. 18.
Milk, Preparing stable chocolate. B. Fick. 2,106,069; Jan. 18.
Mill: See—
Fine grinding mill.
Minerals, Concentration of nonmetallic. F. X. Tartaron. 2,106,526-7; Jan. 18.
Minerals, Differential concentration of non-metallic. A. Crago. 2,105,607; Jan. 18.
Mining machine. E. Ramsay. 2,105,805; Jan. 18.
Modulation. G. L. Usselman. 2,105,679; Jan. 18.
Moisture content of substances, Apparatus for determining the. C. L. Burdick. 2,105,933; Jan. 18.
Molasses and syrup liquid products and making the same, Nonsticky. L. W. Lewis. 2,105,745; Jan. 18.
Motion transmitting device, Mechanical. F. Schöbel and P. Schubert. 2,106,041; Jan. 18.
Motor: See—
Electric motor. Synchronous motor.
Self-starting inductor motor.
Motor drive, Self-reversing. A. F. Welch. 2,105,514; Jan. 18.
Motor protective device. G. G. Landis. 2,105,603; Jan. 18.
Motor vehicle. R. K. Lee. 2,105,742; Jan. 18.
Motor vehicle. M. Tibbetts. 2,105,824; Jan. 18.
Mower, Lawn. C. L. Huth. 2,106,009; Jan. 18.
Mulcher, Row crop. G. Challis. 2,105,805; Jan. 18.
Multiple switch. L. C. Leighton. 2,106,084; Jan. 18.
Nest box for hens. O. H. Huseby. 2,105,757; Jan. 18.
Nitrates of monohydric aliphatic alcohols, Preparation of. J. A. Wyler. 2,105,902; Jan. 18.
Nitromethane, Manufacture of. H. Bender. 2,105,581; Jan. 18.
Noise control system. R. M. Smith. 2,105,558; Jan. 18.
Noise, Reduction of. V. D. Landon. 2,105,536; Jan. 18.
Nose guard. V. R. McMillan. 2,105,607; Jan. 18.
Nozzle, Hose. V. Bernecser. 2,105,632; Jan. 18.
Number checking system. P. A. Kern. 2,105,921; Jan. 18.
Objective, Corrected. A. W. Tronnier. 2,106,077; Jan. 18.
Oil-containing material having a high water content, particularly whale dash, Apparatus for dehydrating. P. L. Fauth. 2,105,782; Jan. 18.
Oil conversion, Hydrocarbon. C. F. Dubbs. 2,105,526; Jan. 18.
Oil, Insecticidal. L. R. Coleman and G. L. Cowley. 2,105,856; Jan. 18.
Oil refining. C. F. Dunney. 2,105,523; Jan. 18.
Oil, Refining and cracking. R. A. Ocon. 2,104,012; Jan. 18.
Oil removal unit, Service station power. H. L. Wood. 2,105,761; Jan. 18.
Oil treatment. H. R. Swanson. 2,105,935; Jan. 18.
Oils, Conversion of hydrocarbon. J. C. Morrell. 2,105,540; Jan. 18.
Oils, Conversion of hydrocarbon. K. Swartwood. 2,105,561; Jan. 18.
Oils, Decolorizing petroleum. R. E. Stanton. 2,106,071; Jan. 18.
Oils, Method and apparatus for treating cracked hydrocarbon. E. M. Parsons. 2,105,499; Jan. 18.
Oils, Purification and regeneration of used lubricating. M. G. Levi, A. Mariotti, and I. Ciarrocchi. 2,106,010; Jan. 18.

Oils, Treatment of hydrocarbon. J. D. Segay. 2,105,554; Jan. 18.
Opener and dispensing device, Can. O. N. Wiswell. 2,105,575; Jan. 18.
Ore, Treatment of cyanite. P. S. Hoyt. 2,105,697; Jan. 18.
Organ, Pipe. C. S. Nerbern and G. M. Quave. 2,105,793; Jan. 18.
Outlet system, Continuous. S. R. Fuge, H. Freedman, E. Hoolasky, and A. Balsamo. 2,105,833; Jan. 18.
Oven, Bake. J. Fiedler. 2,105,883; Jan. 18.
Oven, Steam baking. W. Fiedler. 2,105,882; Jan. 18.
Packing for hydrocolloid impression materials, Flexible. W. J. van Roessen. 2,105,622; Jan. 18.
Packing case. G. W. Bell. 2,105,944; Jan. 18.
Paper, Art for the treatment of tissue. G. C. Hoffman. 2,106,096; Jan. 18.
Parking meter. L. J. Darley. 2,105,970; Jan. 18.
Partition, Flooring. C. F. Davis. 2,105,889; Jan. 18.
Paving plant, Portable. G. J. Kuhrts. 2,106,006; Jan. 18.
Pen, Fountain. G. B. Johndahl and C. M. Sublette. 2,105,600; Jan. 18.
Periodic voltage generator. M. Cawein. 2,105,902; Jan. 18.
Phase modulation. G. L. Usselman. 2,105,949; Jan. 18.
Phonograph, Multiplex film. F. Kistler. 2,105,801; Jan. 18.
Photograph identification. N. Champion. 2,105,521; Jan. 18.
Photographic objective. A. W. Tronnier. 2,105,799; Jan. 18.
Phthalic anhydride, Purification of. H. B. Foster. 2,105,911; Jan. 18.
Pianoforte. M. V. Jacobs and H. S. Bird. 2,105,739; Jan. 18.
Piezoelectric device and making same. A. L. W. Williams. 2,106,143; Jan. 18.
Pigment manufacture. H. R. Rafton. 2,105,503; Jan. 18.
Pigment, Manufacture of. B. J. Flynn. 2,105,834; Jan. 18.
Pipe: See—
Tobacco pipe.
Pipe aligning tool. W. H. Rippe. 2,105,954; Jan. 18.
Pipe-line reclaimer. K. C. Knapp. 2,105,902; Jan. 18.
Pipe or rod coupling. S. B. Martin and C. B. Waechter. 2,105,747; Jan. 18.
Piston. C. W. Metzger. 2,105,930; Jan. 18.
Piston and cylinder construction. Mek. Palmer. 2,105,494; Jan. 18.
Piston and piston and connecting rod assembly. R. K. Lee. 2,105,743; Jan. 18.
Piston valve engine. J. W. Jenkins. 2,106,089; Jan. 18.
Pitch propeller, Controllable. C. I. Pearson and H. M. Hammill. 2,105,843; Jan. 18.
Plank, Composite. A. P. Miller. 2,106,105; Jan. 18.
Plastic. C. H. Smith. 2,105,886; Jan. 18.
Plastic working. J. Parsons. 2,106,040; Jan. 18.
Plug: See—
Fuse plug.
Plug contact. C. A. Hauser and L. H. Thomas. 2,105,884; Jan. 18.
Portable electric light. C. B. Collins. 2,105,719; Jan. 18.
Portable work support. M. M. Merritt. 2,105,606; Jan. 18.
Potato digger, Self-propelled. J. C. Halseusek. 2,105,632; Jan. 18.
Powder puff, Mechanical. M. Tenti. 2,105,621; Jan. 18.
Power take-off and associated mechanism. P. H. Davey. 2,106,085-6; Jan. 18.
Power transmission. H. F. Patterson. 2,105,755; Jan. 18.
Power transmission mechanism. F. A. Fritzsch. 2,105,914; Jan. 18.
Power transmitting apparatus. P. H. Davey. 2,106,087; Jan. 18.
Press: See—
Garment or ironing press.
Pressure releasing apparatus. J. P. Hodge. 2,105,736; Jan. 18.
Propeller. J. N. Blair. 2,105,943; Jan. 18.
Pseudo neon sign. J. H. Kinser. 2,105,951; Jan. 18.
Pulp bodies, Apparatus for molding. W. H. Hatton. 2,105,893; Jan. 18.
Pump: See—
Well pump.
Pump structure. J. M. Hynes. 2,105,939; Jan. 18.
Radial engine. J. J. O. Pateras. 2,105,946; Jan. 18.
Radiator. F. L. Foster. 2,104,857; Jan. 18.
Radiator cooling and pressure relief system, Automotive. A. F. Grim and J. R. Hall. 2,105,971; Jan. 18.
Radio apparatus. H. G. Linder. 2,105,749; Jan. 18.
Radio receiver. A. A. Lissell. 2,105,799; Jan. 18.
Radio receiving arrangement. H. Schaumann. 2,105,534; Jan. 18.
Radio shielding for electrical distributing systems. J. J. Mascuch. 2,105,790; Jan. 18.
Rail wearing surface. O. C. McCormick. 2,105,838; Jan. 18.
Rake. A. Montan and C. E. Andersen. 2,105,648; Jan. 18.
Range, Gas. J. G. Hoff. 2,105,596; Jan. 18.
Razor blade and steel therefor. E. J. Casselman. 2,105,583; Jan. 18.
Razor, Stropping. H. J. Jones. 2,105,836; Jan. 18.
Receptacle: See—
Key receptacle.
Receptacle for liquids, Carbonating and dispensing. C. F. Lenon. 2,105,487; Jan. 18.
Reducing apparatus. E. W. Stevenson. 2,105,760; Jan. 18.
Reed for musical instruments. H. T. Prescott. 2,106,014; Jan. 18.
Reel: See—
Film reel.
Refractories. V. M. Goldschmidt. 2,105,942; Jan. 18.
Refrigerating apparatus. H. B. Hull. 2,105,974; Jan. 18.
Refrigerating apparatus. J. Smilack. 2,105,968; Jan. 18.
Refrigeration. A. R. Thomas. 2,105,562; Jan. 18.
Register, Cash. A. A. Dicke. 2,106,040; Jan. 18.
Register, Cash. B. M. Shipley. 2,105,673; Jan. 18.
Registering apparatus for machines. W. A. Kennedy. 2,106,005; Jan. 18.
Regulator: See—
Water pressure regulator.
Regulator. C. K. O'Connor. 2,106,086; Jan. 18.
Relay for automobile lighting circuits. F. D. Rohmer. 2,105,756; Jan. 18.
Resins, Production of. A. B. Boese, Jr. 2,105,461; Jan. 18.
Retrieving mechanism. H. Bosch, Jr. 2,105,469; Jan. 18.
Rifle. J. F. Guest. 2,106,027; Jan. 18.
Ring: See—
Adjustable finger ring.
Roads, Making concrete. A. Holter. 2,106,117; Jan. 18.
Rooster, Automatic. H. C. A. Behr and J. J. Betz. 2,105,778; Jan. 18.
Roll, Cleaning. P. J. Massey, W. F. Thiele, and B. F. Raprager. 2,106,104; Jan. 18.
Roller bearing. H. R. Shaner. 2,106,127; Jan. 18.
Roller feed mechanism for roller bearing assembling machines. A. F. Rohnberg. 2,105,929; Jan. 18.
Roof construction. W. M. B. Strong. 2,106,140; Jan. 18.
Rotor for very high peripheral velocity, Blower. F. Schmidt. 2,106,040; Jan. 18.
Rubber, Vulcanization of. H. I. Cramer. 2,106,008; Jan. 18.
Rug, Traveling or like. C. Herpich. 2,106,787; Jan. 18.
Rust preventing composition and method of rust prevention. R. E. Sadtler. 2,105,672; Jan. 18.
Safety appliance for steam jet refrigeration apparatus. B. R. McBath, Jr. 2,105,845; Jan. 18.
Safety switch, Automatic. O. L. Olson. 2,105,611; Jan. 18.
Sand and mud separator. C. T. Christensen. 2,105,594; Jan. 18.
Scaffold, Portable window. E. E. Hall. 2,106,002; Jan. 18.
Scraper, Hand. G. D. Long. 2,106,055; Jan. 18.
Scraper, Razor blade. R. L'Wolfe. 2,105,960; Jan. 18.
Screen: See—
Threaber screen.
Seal for journal boxes, Oil and dust. A. Vigne. 2,106,071; Jan. 18.
Seal, Hasp. E. Dietze. 2,105,624; Jan. 18.
Selectivity control system. G. L. Beers. 2,105,518; Jan. 18.
Self-starting inductor motor, Directional. A. F. Welch. 2,106,513; Jan. 18.
Separator: See—
Sand and mud separator.
Sewing machines, Top feed mechanism for. C. W. Mueller. 2,106,106; Jan. 18.
Shade roller plunger trunnion. W. J. Stuber. 2,106,073; Jan. 18.
Shaft bearing. C. C. Barber and C. W. McWilliams. 2,106,000; Jan. 18.
Shaver, Dry. C. Caico. 2,105,855; Jan. 18.
Shaving implement. J. L. Nilson. 2,105,776; Jan. 18.
Shell, Shot. W. E. Warner. 2,105,963; Jan. 18.
Shingle. F. H. Schmidt. 2,106,067; Jan. 18.
Shoe. T. Gutwein. 2,105,847; Jan. 18.
Shower hood. H. Schmaltzhacher. 2,105,950; Jan. 18.
Shutter, Camera. R. H. Draeger. 2,105,478; Jan. 18.

4-wheel drive vehicle.
Vehicle lamp. B. S. Moradory. 2,106,145; Jan. 18.
Vehicle spring. C. J. Holland. 2,105,881; Jan. 18.
Vehicle spring. T. M. Thompson. 2,105,889; Jan. 18.
Vehicular traffic signal. J. W. Brougher. 2,106,122; Jan. 18.
Vending machine. A. B. Gebert and F. C. Black. 2,105,644; Jan. 18.
Ventilator and air cleaner for motor vehicles, Combined. M. Palmer. 2,105,497; Jan. 18.
Vessel or box for canning. A. F. Tobiasson. 2,105,798; Jan. 18.
Violanthrone derivatives and preparing same, Sulphurized. W. H. Lycan. 2,105,978; Jan. 18.
Volume control circuit, Automatic. F. H. Drake. 2,105,641; Jan. 18.
Volume control system, Automatic. H. P. Spearin. 2,105,959; Jan. 18.
Wagon hitch. D. Currie. 2,105,585; Jan. 18.
Wall cabinet board, Disappearing. L. R. Young. 2,106,044; Jan. 18.
Wall construction. H. Holdsworth. 2,105,779-1; Jan. 18.
Watch construction. J. E. Bowen. 2,105,966; Jan. 18.
Water heater, Electric. S. D. Roberson. 2,106,019; Jan. 18.
Water heating system, Feed. R. M. Ostermann and A. Williams. 2,105,617; Jan. 18.
Water heating system, Feed. E. Rawson and A. Williams. 2,105,622; Jan. 18.
Water power. M. Orlove. 2,105,624; Jan. 18.
Water pressure regulator. W. T. Birch. 2,105,876; Jan. 18.
Web materials, Making Mirrorized. H. W. Grulder and G. A. Fasold. 2,105,851; Jan. 18.
Weed cutter. F. J. Berge. 2,106,047; Jan. 18.
Well-boring apparatus. G. S. Barrett and S. Robichaux. 2,105,722; Jan. 18.
Well drilling head. H. C. Otis. 2,105,754; Jan. 18.
Well pump. F. C. Knies and R. N. Vickers. 2,105,975; Jan. 18.
Wheel: See—
Tractor wheel.
Wheel or rim. A. W. Woodward. 2,105,829; Jan. 18.
Wheel suspension for motor vehicles. J. W. Leighton. 2,105,541; Jan. 18.
Wheeled supporting means for heavy machines. R. H. Flynn. 2,106,090; Jan. 18

Whipstock. C. C. Cutrer and J. L. Broussard. 2,105,721; Jan. 18.
Whisky aging apparatus. L. L. Jones and F. Mortellaro. 2,105,693; Jan. 18.
Window channel or the like. P. C. Hagberg. 2,105,784; Jan. 18.
Window lock. L. Dzukalo. 2,106,116; Jan. 18.
Window operating and door locking mechanism. T. McG. Aiken. 2,105,590; Jan. 18.
Window operating means, Casement. H. E. Campbell. 2,106,061; Jan. 18.
Wire, Coded. A. T. Candy, Jr. 2,106,048; Jan. 18.
Wire connecting device. C. H. Klein. 2,106,007; Jan. 18.
Wire, Insulated. S. Ruben. 2,105,552; Jan. 18.
Wood pulp, Acetylation of. A. N. Parrett and J. H. Holloway. 2,105,498; Jan. 18.
Wood staining. C. G. Moore and M. Zucker. 2,105,984; Jan. 18.
Work support, Sewing machine. L. G. Bowman. 2,106,060; Jan. 18.
Yarn and like materials, and making same, Colored artificial. H. R. Bodell. 2,105,519; Jan. 18.
Yarn speed indicating means. H. E. Gosling. 2,106,146; Jan. 18.
Zein, Production of. L. C. Swallen. 2,105,760; Jan. 18.

CLASSIFICATION OF PATENTS

ISSUED JANUARY 18, 1938

In view of the fact that the issue is being checked weekly by the Classification Division, the class and subclass in this list are correct as of this date. Where there is a discrepancy between the classification given in the patent head and the classification in this list, the classification of this list governs.

NOTE.—First number—class, second number—subclass, third number—patent number

197— 12: 2,105,731
88: 2,105,620

LIST OF TRADE-MARK APPLICANTS

PUBLISHED FOR OPPOSITION

[Act of Feb. 20, 1905, Sec. 6, as amended Mar. 2, 1907]

Agonis Club, Columbus, Ohio. Pins, badges, and buttons. Serial No. 399,067; Jan. 25. Class 38.

Aluminum Goods Mfg. Co., Jersey City, N. J., and Manitowoc, Wis. Base metal cookers. Serial No. 396,658; Jan. 25. Class 13.

American Frog Raisers Association. (See Mabie, Roy W.)

Amscin Company, The, Jersey City, N. J. Medicinal preparation. Serial No. 400,284; Jan. 25. Class 6.

Anderman-Bob Burns, Inc., New York, N. Y. Piece goods. Serial No. 399,293; Jan. 25. Class 42.

Aunt Jen's. (See Weiss, Jeanette.)

Austin, Albert L., Cleveland, Ohio. Abdominal and rupture supports. Serial No. 400,237; Jan. 25. Class 44.

Autocrat Oil Burner Corporation, Cedar Rapids, Iowa. Oil burners, oil burning furnaces, boiler units, etc. Serial No. 399,338; Jan. 25. Class 24.

B. F. W. Products. (See Frost, Winfred L.)

Bachman, M. H., Shoe Co., Inc., Middletown, Pa. Children's shoes. Serial No. 400,152; Jan. 25. Class 39.

Banner Wholesale Grocers, Inc., Chicago, Ill. Canned fruits, canned vegetables, canned sauerkraut, etc. Serial No. 397,018; Jan. 25. Class 46.

Bardstown Distillery, Inc., Bardstown, Ky. Whiskey. Serial No. 400,866; Jan. 25. Class 49.

Bay State Milling Co., Winona, Minn. Rye flour and rye meal. Serial No. 400,262; Jan. 25. Class 46.

Belli, D. B., Inc., doing business as Dumm-Rumm Company, San Francisco, Calif. Soft drink. Serial No. 399,642; Jan. 25. Class 45.

Beltraction Co., Chicago, Ill. Material for treating mechanical belting. Serial No. 399,266; Jan. 25. Class 4.

Berry Bros. & Co., London, England. Wines. Serial No. 399,395; Jan. 25. Class 47.

Berry Bros. & Co., London, England. Whiskey, gin, brandy, etc. Serial No. 399,823; Jan. 25. Class 49.

Bestov Products, Inc., New York, N. Y. Malt chocolate mixture in powder form. Serial No. 399,819; Jan. 25. Class 46.

Blade Master, Inc., New York, N. Y. Manually operated razor blade sharpening apparatus. Serial No. 395,395; Jan. 25. Class 28.

Bourjois, Inc., New York, N. Y. Shaving soap. Serial No. 396,023; Jan. 25. Class 4.

Brewer-Titchener Corporation, The, Cortland, N. Y. Drop forgings. Serial No. 398,765; Jan. 25. Class 13.

Bright, P. V., & Company, Chicago, Ill. Danish blue cheese. Serial No. 400,221; Jan. 25. Class 46.

Bristol Company, The, Waterbury, Conn. Valves. Serial No. 400,153; Jan. 25. Class 26.

Bucher, John V., Albany, N. Y. Warning signal. Serial No. 399,950; Jan. 25. Class 19.

Burke & James, Inc., Chicago, Ill. Cameras, photo enlargers, camera enlarging and condensing lenses, etc. Serial No. 394,017; Jan. 25. Class 24.

Ceramic Machinery Company, The, Hamilton, Ohio. Diesel locomotives, gas mechanical locomotives, and parts thereof. Serial No. 394,122; Jan. 25. Class 23.

Chatham Manufacturing Company, Winston-Salem, N. C. Rugs. Serial No. 399,823; Jan. 25. Class 42.

Chevron Co. (See Knapp-Monarch Company.)

Chrysler Corporation, Highland Park, Mich. Bearings for machinery. Serial Nos. 396,421–3; Jan. 25. Class 22.

Clapp, Harold H., Inc., Rochester, N. Y. Canned vegetables, canned soups, canned prunes, etc. Serial No. 398,860; Jan. 25. Class 46.

Cliffs Dow Chemical Company, Marquette, Mich. Acetic acid, acetone, creosote, etc. Serial No. 394,318; Jan. 25. Class 6.

Colgate-Palmolive-Peet Company, Jersey City, N. J. Shaving soap and shaving stick. Serial No. 397,014; Jan. 25. Class 4.

Commercial Soap and Chemical Co., San Francisco, Calif. Scouring soap powder and toilet liquid soap. Serial No. 396,084; Jan. 25. Class 4.

Commercial Soap and Chemical Co., San Francisco, Calif. Fly,roach, and moth sprays, and insecticides. Serial No. 395,005; Jan. 25. Class 6.

Cooke, Shubel S., Cobleskill, N. Y. Salve. Serial No. 396,260; Jan. 25. Class 6.

Creek Chub Bait Company, The, Garrett, Ind. Artificial fishing lure. Serial No. 394,586; Jan. 25. Class 22.

Crystex Laboratories, Inc., Charitea, Iowa. Preparation for use in dressing the hair. Serial No. 399,546; Jan. 25. Class 6.

Del Monte-Hickey Company, Inc., New York, N. Y. Coats, suits, dresses, blouses, and skirts. Serial Nos. 399,342–3; Jan. 25. Class 39.

Denney, John L., doing business as Kamba Laboratories, Fresno, Calif. Medical preparation. Serial No. 397,633; Jan. 25. Class 6.

Deutsche Hydrierwerke, A.-G., Berlin-Charlottenburg, Germany. Polishing waxes. Serial No. 395,982; Jan. 25. Class 16.

Dix, Henry A., & Sons Corporation, New York, N. Y. Piece goods. Serial No. 398,241; Jan. 25. Class 42.

Domestic Air Conditioning Company, Highland Park, Mich. Complete automatic oil heating and air conditioning units for buildings. Serial No. 399,750; Jan. 25. Class 34.

Dumm-Rumm Company. (See Belli, D. B., Inc.)

Ebberts, John, Shoe Co. Inc., Buffalo, N. Y. Shoes. Serial No. 399,957; Jan. 25. Class 39.

Educational Research Council Inc., New York, N. Y. Leaflets, charts, and books. Serial No. 398,514; Jan. 25. Class 35.

Eising, Eugene H., Jr., doing business as Kyrene Laboratories, New York, N. Y. Pharmaceutical preparation. Serial No. 394,593; Jan. 25. Class 6.

Empire Beef Corporation, Worcester, Mass. Bread and coffee. Serial No. 382,195; Jan. 25. Class 46.

Enterprise Manufacturing Company of Pennsylvania, The, Philadelphia, Pa. Coffee mills. Serial No. 400,156; Jan. 25. Class 23.

Etablissements Boudios, Romilly-sur-Seine, France. Corsets, corselets, foundation garments, etc. Serial No. 400,227; Jan. 25. Class 39.

Evans, Glen L., Inc., Caldwell, Idaho. Fish hooks. Serial No. 400,053; Jan. 25. Class 22.

Familex Products Company. (See Parent, Romeo.)

Feinstein, P., & Sons, Inc., New York, N. Y. Coats, vests, trousers, etc. Serial No. 398,766; Jan. 25. Class 39.

Felker Manufacturing Co., Torrance, Calif. Diamond impregnated metal saw blades, diamond impregnated drills, drilling machines, etc. Serial No. 395,290; Jan. 25. Class 28.

Four-Jacks Corporation, Chicago, Ill. Non-repeating indicating wheel or "wheel of fortune". Serial No. 399,654; Jan. 25. Class 22.

Freeman Corporation, The, New York, N. Y. Critical journal of social and economic affairs. Serial No. 399,296; Jan. 25. Class 38.

Freeman, Edwin M., Denver, Colo. Jelly-like material for use in application to coated surfaces. Serial No. 397,361; Jan. 25. Class 6.

Frost, Winfred L., doing business as B. F. W. Products, Los Angeles, Calif. Medicinal preparations. Serial No. 380,452; Jan. 25. Class 6.

Galef, Jacques L., New York, N. Y. Alarm pistols, alarm revolvers, automatic pistols, etc. Serial No. 398,534; Jan. 25. Class 9.

Gem City Machines, Inc., Dayton, Ohio. Miniature shooting gallery. Serial No. 400,411; Jan. 25. Class 22.

General Chemical Company, New York, N. Y. Sodium phosphate detergents. Serial Nos. 397,439–40; Jan. 25. Class 4.

General Food Products Co. (See Safeway Stores, Incorporated.)

Goodrich Grinding Wheel Co., Chicago, Ill. Grinding wheels, sharpening stones, and hones, etc. Serial No. 384,794; Jan. 25. Class 4.

Goodyear Tire & Rubber Company, The, Akron, Ohio. Belts and belting of rubber. Serial No. 399,606; Jan. 25. Class 35.

Gruber, Edward H., doing business as Gruber Bottling Works, Philadelphia, Pa. Beverages sold as soft drinks. Serial No. 399,889; Jan. 25. Class 45.

Gustin-Bacon Manufacturing Co., Kansas City, Mo. Pipe couplings. Serial No. 399,890; Jan. 25. Class 13.

Hampden Brewing Company, Willimansett, Mass. Beer, ale, mild ale, etc. Serial No. 400,691; Jan. 25. Class 45.

Hansen, Marguerite, doing business as San Francisco Stove Works, San Francisco, Calif. Cast iron and cast bronze plates. Serial No. 399,965; Jan. 25. Class 12.

Hatcher, Allen B., Charleston, W. Va. Beverages, and syrups and extracts for making the same. Serial No. 399,710; Jan. 25. Class 45.

Day, Wilbur M., assignor to The Baldwin Company, Cincinnati, Ohio. Piano case. 108,070; Jan. 25.
De Benque, Helen, New York, N. Y. Knitted glove. 108,172; Jan. 25.
De Bernard, Henriette, St. Louis, Mo. Blouse. 108,173; Jan. 25.
Di Prestore, Thomas, New York, N. Y. Coat ensemble. 108,174; Jan. 25.
Di Verdura, Fulco, assignor to P. E. Flato, New York, N. Y. Brooch or similar article. 108,115; Jan. 25.
Di Verdura, Fulco, assignor to P. E. Flato, New York, N. Y. Brooch or similar article. 108,116; Jan. 25.
Di Verdura, Fulco, assignor to P. E. Flato, New York, N. Y. Cigarette case or similar article. 108,117; Jan. 25.
Di Verdura, Fulco, assignor to P. E. Flato, New York, N. Y. Brooch or similar article. 108,118; Jan. 25.
Di Verdura, Fulco, assignor to P. E. Flato, New York, N. Y. Watchcase or similar article. 108,119; Jan. 25.
Easy Washing Machine Corporation. (See Little, Thomas J., Jr., assignor.)
Epstein, Louis J., Jersey City, N. J. Shoe. 108,120; Jan. 25.
Etkin, Simon, New York, N. Y. Dress ensemble. 108,190; Jan. 25.
Etkin, Simon, New York, N. Y. Dress ensemble. 108,191; Jan. 25.
Fatherley, Robert E., Darien, Conn., assignor to Yale Fabrics Corp., New York, N. Y. Textile fabric or similar article. 108,176; Jan. 25.
Flato, Paul E. (See di Verdura, Fulco, assignor.)
Flato, Paul E. (See Klety, Adolphe, assignor.)
Florsheim Shoe Company, The. (See Pick, Oswald M., assignor.)
Fracchia, Pauline, New York, N. Y. Dress ensemble. 108,153; Jan. 25.
Fraser, Edwin J., Chicago, Ill. Lantern chimney. 108,071; Jan. 25.
Friedberger-Aaron Manufacturing Company. (See Aull, Harry, assignor.)
Fuerst, Edwin W., assignor to Libbey Glass Company, Toledo, Ohio. Tumbler. 108,072; Jan. 25.
Fuerst, Edwin W., assignor to Libbey Glass Company, Toledo, Ohio. Tumbler. 108,073; Jan. 25.
Gans, Paul H., New York, N. Y. Bottle or similar container. 108,121; Jan. 25.

Gennaro, Emil L. (See Gennaro, Robert C., V. L., and E. L.)

Gennaro, Robert C., V. L., and E. L., Hazelton, Pa. Bottle. 108,074; Jan. 25.

Gennaro, Vincent L. (See Gennaro, Robert C., V. L., and E. L.)

Gilbert, A. C., Company, The. (See Gilbert, Alfred C., assignor.)

Gilbert, Alfred C., Hamden, assignor to The A. C. Gilbert Company, New Haven, Conn. Structural toy element. 108,098; Jan. 25.

Goldsmith, Samuel R., New York, N. Y. Handbag. 108,122; Jan. 25.

Granat, Joseph, San Francisco, Calif. Multiple gem mounting. 108,123; Jan. 25.

Grasewitz, Jacob, New York, N. Y. Textile fabric. 108,154; Jan. 25.

Greenman, Jack, New York, N. Y. Dress ensemble. 108,192; Jan. 25.

Greenstein, Ben, New York, N. Y. Dress. 108,138; Jan. 25.

Gruen Watch Company, The. (See Katz, Benjamin S., assignor.)

Hall, Mercedes, New York, N. Y. Dress ensemble. 108,193; Jan. 25.

Hammond Instrument Company. (See Stephens, George H., assignor.)

Hansen, Marius H., et al. (See Hanssen, S. L., Olsen, and Schmid, assignors.)

Hanssen, Stan L., A. P. Olsen, and A. A. Schmid, assignors to M. H. Hansen and S. L. Hanssen, Chicago, Ill. Dial housing for a weighing scale. 108,075; Jan. 25.

Hanssen, Stan L., et al. (See Hanssen, S. L., Olsen, and Schmid, assignors.)

Hess, Clarence R. T., Prairie View, assignor to Edward Katzinger Company, Chicago, Ill. Cake turned or similar article. 108,076; Jan. 25.

Hess, Clarence R. T., Prairie View, assignor to Edward Katzinger Company, Chicago, Ill. Batter whip or similar article. 108,077; Jan. 25.

Hess, Clarence R. T., Prairie View, assignor to Edward Katzinger Company, Chicago, Ill. Cake turner or similar article. 108,078; Jan. 25.

Heyman, Herman C., New York, N. Y. Glove. 108,176; Jan. 25.

Higginson, George J., New York, N. Y. Plate or similar article. 108,079; Jan. 25.

Higginson, George J., New York, N. Y. Plate or similar article. 108,080; Jan. 25.

Higier, Julius A., Gloversville, N. Y. Glove. 108,156; Jan. 25.

Hirsutus Laboratories. (See Kahn, Ely J., assignor.)

Hoffman, Rudolph, Rocky River, Ohio, assignor to American Stove Company, St. Louis, Mo. Range. 108,177; Jan. 25.

Horowitz, Solomon, New York, N. Y. Textile fabric. 108,157; Jan. 25.

Hubbing, John D., New York, N. Y. Ribbon. 108,139; Jan. 25.

Jackson, Joseph G., Oak Park, assignor to The Edward Katzinger Company, Chicago, Ill. Baking pan. 108,140; Jan. 25.

Jackson, Joseph G., Oak Park, assignor to The Edward Katzinger Company, Chicago, Ill. Baking pan. 108,141; Jan. 25.

Jaschke, Alwine, administratrix. (See Jaske, F., and Johnson.)

Jaske, Fred, deceased, Alameda, and C. M. Johnson, San Francisco, Calif.; A. Jaschke administratrix of said F. Jaske. Brooch or similar article. 108,178; Jan. 25.

Jaske, Fred, deceased, Alameda, and C. M. Johnson, San Francisco, Calif.; A. Jaschke administratrix of said F. Jaske. Brooch or similar article. 108,179; Jan. 25.

Johnson, Carl M. (See Jaske, F., and Johnson.)

Johnson, Ross H., Indianapolis, Ind. Longitudinal arch support. 108,099; Jan. 25.

Johnson, Ross H., Indianapolis, Ind. Adjustable metatarsal insole. 108,100; Jan. 25.

Kahn, Ely J., assignor to Hirsutus Laboratories, New York, N. Y. Jar. 108,081; Jan. 25.

Katz, Benjamin S., assignor to The Gruen Watch Company, Cincinnati, Ohio. Display box for rings. 108,082; Jan. 25.

Katzinger, Edward, Company. (See Hess, Clarence R. T., assignor.)

Katzinger, Edward, Company, The. (See Jackson, Joseph G., assignor.)

Kaufman, Benjamin M., New York, N. Y. Textile fabric. 108,180; Jan. 25.

Kelly, Robert A., East Pittsburgh, assignor to United States Glass Company, Pittsburgh, Pa. Covered jar or similar article. 108,083; Jan. 25.

Kingman, Russell B., Orange, N. J., assignor to Metal Textile Corporation. Doll. 108,084; Jan. 25.

Kingman, Russell B., Orange, N. J., assignor to Metal Texture Corporation. Doll. 108,085; Jan. 25.

Kiety, Adolphe, assignor to P. E. Plato, New York, N. Y. Brooch or similar article. 108,124; Jan. 25.

Koch, Gustav H., Springfield, Mass., assignor to Westinghouse Electric & Manufacturing Company. Electric fan. 108,142; Jan. 25.

Lang, Josef, Salzburg, Austria, assignor to The Stetson Shoe Company, Inc., Weymouth, Mass. Shoe. 108,101; Jan. 25.

Levy, David, New York, N. Y. Slip or similar article. 108,181; Jan. 25.

Levy, Sidney, New York, N. Y. Blouse. 108,182; Jan. 25.

Libbey Glass Company. (See Fuerst, Edwin W., assignor.)

Litle, Thomas J., Jr., assignor to Easy Washing Machine Corporation, Syracuse, N. Y. Agitator cap. 108,158; Jan. 25.

Lummis, Leslie A., Jr., Bernardsville, N. J., assignor to Parsons Ammonia Company, Inc., New York, N. Y. Bottle. 108,125; Jan. 25.

Lunts, Dorothy, New York, N. Y. Dress. 108,193; Jan. 25.

Maling, Roy, Boston, Mass. Shoe. 108,126; Jan. 25.

Malleable Iron Range Company. (See Burrow, Herbert T., assignor.)

Mandl, Sigmund, assignor to Blackhawk Mfg. Co., Milwaukee, Wis. Wrench member. 108,143; Jan. 25.

Mandl, Sigmund, assignor to Blackhawk Mfg. Co., Milwaukee, Wis. Wrench or the like. 108,159; Jan. 25.

Marks, Isaac, New York, N. Y. Coat. 108,183; Jan. 25.

Marshall Field & Company. (See Mey, Marcel, assignor.)

McAllister, Harley J., Chicago, Ill. Vacuum cleaner casing. 108,102; Jan. 25.

Metal Textile Corporation. (See Kingman, Russell B., assignor.)

Mey, Marcel, Paris, France, assignor to Marshall Field & Company, Chicago, Ill. Textile fabric. 108,086; Jan. 25.

Mey, Marcel, Paris, France, assignor to Marshall Field & Company, Chicago, Ill. Textile fabric. 108,087; Jan. 25.

Mey, Marcel, Paris, France, assignor to Marshall Field & Company, Chicago, Ill. Textile fabric. 108,088; Jan. 25.

Mey, Marcel, Paris, France, assignor to Marshall Field & Company, Chicago, Ill. Textile fabric. 108,089; Jan. 25.

Mey, Marcel, Paris, France, assignor to Marshall Field & Company, Chicago, Ill. Textile fabric. 108,090; Jan. 25.

Miller, Henry, New York, N. Y. Suit ensemble. 108,184; Jan. 25.

Mullen, Mary, assignor to Rosenau Bros. Inc., Philadelphia, Pa. Dress. 108,127; Jan. 25.

Noble, Olbert C., assignor to Tygart Valley Glass Company, Washington, Pa. Jar. 108,091; Jan. 25.

Odencrants, Henning, assignor to Valley Shoe Corporation, St. Louis, Mo. Shoe. 108,129; Jan. 25.

Olsen, Andrew P. (See Hanssen, S. L., Olsen, and Schmid.)

Parsons Ammonia Company. (See Briner, Darrell E., assignor.)

Parsons Ammonia Company. (See Lummis, Leslie A., Jr., assignor.)

Patty, Woodrow and M. Brooks, Santa Fe, N. Mex. House marker. 108,130; Jan. 25.

Pehrson, Henry L., assignor to Anderson Brass Shops, Inc., Rockford, Ill. Drawer pull. 108,092; Jan. 25.

Peters, Henry M., Chicago, Ill. Portable electric lamp. 108,144; Jan. 25.

Pick, Oswald M., assignor to The Florsheim Shoe Company, Chicago, Ill. Shoe or similar article. 108,103; Jan. 25.

Pick, Oswald M., assignor to The Florsheim Shoe Company, Chicago, Ill. Shoe or similar article. 108,104; Jan. 25.

Pick, Oswald M., assignor to The Florsheim Shoe Company, Chicago, Ill. Shoe or similar article. 108,105; Jan. 25.

Pick, Oswald M., assignor to The Florsheim Shoe Company, Chicago, Ill. Shoe or similar article. 108,106; Jan. 25.

Pick, Oswald M., assignor to The Florsheim Shoe Company, Chicago, Ill. Shoe or similar article. 108,107; Jan. 25.

Pick, Oswald M., assignor to The Florsheim Shoe Company, Chicago, Ill. Shoe or similar article. 108,128; Jan. 25.

Pono, Marie, New York, N. Y. Dress. 108,145; Jan. 25.

Pono, Marie, New York, N. Y. Dress. 108,160; Jan. 25.

Presnlaff, Murray, New York, N. Y. Blouse. 108,185; Jan. 25.

Reid, Clarence W., Rochester, N. Y. Scraping tool. 108,131; Jan. 25.

Rosenau Bros. Inc. (See Mullen, Mary, assignor.)

Ross, Walter, New York, N. Y. Textile fabric. 108,161; Jan. 25.

Schlossel, Philip, New York, N. Y. Dress. 108,162; Jan. 25.

Schmid, Albert A. (See Hanssen, S. L., Olsen, and Schmid.)

Scovill Manufacturing Company. (See Clemmons, Herbert D., assignor.)

Shedlin, Nan S., New York, N. Y. Dress. 108,194; Jan. 25.

Shedlin, Nan S., New York, N. Y. Dress. 108,195; Jan. 25.

Shedlin, Nan S., New York, N. Y. Dress. 108,196; Jan. 25.

Smith, Marie E., New York, N. Y. Dress ensemble. 108,163; Jan. 25.

Smith, Marie E., New York, N. Y. Dress ensemble. 108,164; Jan. 25.

Smith, Marie E., New York, N. Y. Dress. 108,197; Jan. 25.

Snyder, Hannah, New York, N. Y. Dress ensemble. 108,198; Jan. 25.

Snyder, Hanna, New York, N. Y. Dress. 108,199; Jan. 25.

Springer, Hans, New York, N. Y. Slipper or similar article. 108,132; Jan. 25.

Stephens, George H., Glencoe, assignor to Hammond Instrument Company, Chicago, Ill. Electric organ. 108,133; Jan. 25.

Stephens, Roscoe, Folsom City, Calif. File. 108,165; Jan. 25.

Stetson Shoe Company, The. (See Lang, Josef, assignor.)

Summers, Lottie M., Dayton, Ohio. Bead sign. 108,166; Jan. 25.

Summers, Lottie M., Dayton, Ohio. Bead sign. 108,109; Jan. 25.

Trickle, Ross H., Newark, Ohio. Barber's cabinet or similar article. 108,110; Jan. 25.

Trollen, Martin E., assignor to Brown & Bigelow, St. Paul, Minn. Pencil. 108,111; Jan. 25.

Turpan, Mark, West New York, N. J. Textile fabric. 108,186; Jan. 25.

Turpan, Mark, West New York, N. J. Textile fabric. 108,187; Jan. 25.

Tygart Valley Glass Company. (See Noble, Olbert C., assignor.)

United States Glass Company. (See Kelly, Robert A., assignor.)

Valley Shoe Corporation. (See Odencrants, Henning, assignor.)

Weinstat, Samuel, New York, N. Y., assignor to Bancroft Walker Company, Waltham, Mass. Shoe. 108,134; Jan. 25.

Welch, Herman B., assignor to Amity Leather Products Co., West Bend, Wis. Billfold. 108,135; Jan. 25.

Welch, Herman B., assignor to Amity Leather Products Co., West Bend, Wis. Billfold. 108,168; Jan. 25.

Werber, Samuel M., University City, Mo. Dress. 108,169; Jan. 25.

Westinghouse Electric & Manufacturing Company. (See Koch, Gustav H., assignor.)

White, Clarence J., Peoria, Ill. Support for floral displays. 108,093; Jan. 25.

Wilson, Fred G., Brooklyn, N. Y. Combined beverage cooler and dispenser. 108,094; Jan. 25.

Wingfoot Corporation. (See Darrow, Burgess, assignor.)

Wingfoot Corporation. (See Brenner, Elmer F., assignor.)

Wood, John, Manufacturing Company. (See Bradley, Eric H., assignor.)

Yale Fabrics Corp. (See Fatherley, Robert H., assignor.)

Young, Douglas, Inc. (See Young, Lewis D., assignor.)

Young, Lewis D., Providence, R. I., assignor to Douglas Young, Inc. Display box. 108,136; Jan. 25.

Zavell, Arnold, New York, N. Y. Textile fabric or similar article. 108,170; Jan. 25.

Zellweger, Gustav, Palisades, N. J. Lace fabric or similar article. 108,095; Jan. 25.

Zellweger, Gustav, Palisades, N. J. Lace insert or similar article. 108,096; Jan. 25.

LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 25TH DAY OF JANUARY, 1938

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Ash, William, New Ulm, Minn. Valve refacing tool. 2,106,201; Jan. 25.

Adams, Charles F., New York, N. Y. Vacuum and pressure filling apparatus for fluid, plastic, or various other materials. 2,106,492; Jan. 25.

Adamson, Seth, Larchmont, assignor to United States Rubber Products, Inc., New York, N. Y. Trousers. 2,106,324; Jan. 25.

Addressograph-Multigraph Corporation. (See Wescott, William B., assignor.)

Agfa Ansco Corporation. (See Goldhammer, L., and Frost, assignors.)

Ahrenholtz, Charles, Highland Park, assignor of one-half to H. P. Lieberthal, Chicago, Ill. Arch support. 2,106,202; Jan. 25.

Aikman, Burton S., Wilkinsburg, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Fluid pressure controlled clutch. 2,106,472; Jan. 25.

Aikman, Burton S., Wilkinsburg, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Brake and clutch control device. 2,106,473; Jan. 25.

Ajax Electric Furnace Corporation. (See Howard, K. S., and Loche, assignors.)

Akins, Randall P., Denver, Colo. Ore concentrator. 2,106,290; Jan. 25.

Aktiebolaget Kemiska Patenter. (See Nordengren, Sven G., assignor.)

Aktiengesellschaft Brown Boveri & Cie. (See Gaudenzi, Arthur, assignor.)

Alco Valve Company. (See Thompson, Parke H., II, assignor.)

All Metal Products Company. (See Brethen, C. A., and Gora, assignors.)

Allegheny Steel Company. (See Scharschu, C. A., and Kiefer, assignors.)

Allen, James R., Glendale, Calif. Advertising apparatus. 2,106,335; Jan. 25.

Allis-Chalmers Manufacturing Company. (See Ring, J. J., Nichols, and Pfau, assignors.)

Allison, William D., assignor to Hudson Motor Car Company, Detroit, Mich. Wheel suspensions. 2,106,291; Jan. 25.

Allison, William M., New York, N. Y. Effecting bactericidal action by the aid of chlorine. 2,106,513; Jan. 25.

Alphin, Gilbert E., Mount Olive, N. C. Window fixture. 2,106,420; Jan. 25.

Altvater, Arthur W., University City, Mo. Ornamenting device. 2,106,312; Jan. 25.

Aluminum Company of America. (See Keller, F., and Hastings, assignor.)

American Can Company. (See Hothersall, John M., assignor.)

American Hardware Corporation, The. (See Bernhard, Benjamin S., assignor.)

American Lurgi Corporation. (See Schober, Oskar, assignor.)

American Optical Company. (See Splaine, Edward M., assignor.)

American Smelting and Refining Company. (See Lindner, Karl A., assignor.)

American Telephone and Telegraph Company. (See Swart, Leland K., assignor.)

Amrine, Leclare H., assignor to Imperial Molded Products Corporation, Chicago, Ill. Cover and applicator. 2,106,313; Jan. 25.

Anastasakis, Steve, Clarksburg, W. Va. Water motor. 2,106,264; Jan. 25.

Anderson, Carl J. H., Newark, Del. Binding books. 2,106,419; Jan. 25.

Andersen, Frithiof B., Bloomfield, N. J., C. O. Mallinckrodt, Forest Hills, N. Y., and A. L. Stillwell, Westfield, N. J., assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y. Voltage or gain control. 2,106,336; Jan. 25.

Anderson, W. Charles, Linden, Calif. Maintaining chestnuts in prime condition. 2,106,314; Jan. 25.

Anderson, John C. (See Frost, P. F., and Anderson.)

Anemostat Corporation of America. (See Kurth, Frans J., assignor.)

Angelieux, Pierre, and J. M. Gutmann, Paris, France. Optical adjusting device for cinematographic apparatus. 2,106,307; Jan. 25.

Anheuser-Busch, Incorporated. (See Winter, Henry G., assignor.)

Anstice, Josiah, & Co. Inc. (See Browne, Lindsay H., assignor.)

Appel, Oscar J., Paterson, N. J. Oil burner. 2,106,265; Jan. 25.

Appleton Electric Company. (See Tornblom, Nils A., assignor.)

Ashe, Marcellus T., Garden City, N. Y. Frame for advertising cards. 2,106,203; Jan. 25.

Atlas Powder Company. (See Power, J. T., and Brown, assignors.)

Auld, James E., Coconut Grove, Fla. Window operating device. 2,106,369; Jan. 25.

Autographic Register Company. (See Brenn, Carl W., assignor.)

Automatic Temperature Control Co. (See Wilhjelm, Christian, assignor.)

Bausch-Ross Tool Company. (See Brown, Ora A., assignor.)

Badertscher, Dana K., assignor to Hudson Motor Car Company, Detroit, Mich. Vacuum controlled transmission. 2,106,292; Jan. 25.

Baehr, Hans, and W. Wensel, Leuna, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Removal of gaseous weak acids from gases containing the same. 2,106,446; Jan. 25.

Baker, Job D., Gilbertville, Mass., assignor to Sullivan Machinery Company. Punching mechanism. 2,106,160; Jan. 25.

Baker-Raulang Company, The. (See Hawkins, Paul E., assignor.)

Baldwin, James L., Oak Park, Ill. Double belt carrier. 2,106,514; Jan. 25.

Balke, Clarence W., Highland Park, assignor to Ramet Corporation of America, North Chicago, Ill. Hard alloys. 2,106,161; Jan. 25.

Balke, Clarence W., Highland Park, assignor to Ramet Corporation of America, North Chicago, Ill. Hard alloys. 2,106,162; Jan. 25.

Barnes Drill Co. (See Johnson, Albert M., assignor.)

Barnett, Lawrence T. (See Giles, George A., assignor.)

Barr, Henry T. (See Sweeney, Benjamin F., assignor.)

Barrett, Joseph M., East Cleveland, Ohio. Humidity and air cooling machine. 2,106,590; Jan. 25.

Barsky, George, New York, N. Y., G. Klinkenstein, Maplewood, and Kohleder, Newark, N. J., and C. F. Silleck, Brooklyn, N. Y., assignors to C. J. Osborne Co., New York, N. Y., and Maas & Waldstein Co., Newark, N. J. Pigmented composition. 2,106,447; Jan. 25.

Barton, William K. (See Pattison, H. J., and Barton.)

Bartusch, Alexander P., Lockport, N. Y. Drawing instrument. 2,106,398; Jan. 25.

Bassick Company, The. (See Herold, Walter F., assignor.)

Bate, Russell O., Macedonia, Ohio. Chick feed trough. 2,106,266; Jan. 25.

Bates, Harry H., and W. O., Jr., Joliet, Ill. Safety razor. 2,106,587; Jan. 25.

Bates, William O., Jr. (See Bates, H. H., and W. O., Jr.)

Bates, Lloyd G., West Hartford, assignor to Hartford-Empire Company, Hartford, Conn. Glass feeding apparatus. 2,106,545; Jan. 25.

Bath, Wilmer H., West Conshohocken, assignor to The Sharples Specialty Company, Philadelphia, Pa. Centrifugal machine. 2,106,688; Jan. 25.

Baughman, George W., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Acceleration control system. 2,106,474; Jan. 25.

Bausch & Lomb Optical Company. (See Eppenstein, Otto, assignor.)

Bausch & Lomb Optical Company. (See Freund, Otto, assignor.)

Beaumont, Charles A., Decatur, and F. Sherritt, Chicago, Ill. Safety tread. 2,106,390; Jan. 25.

Beechlyn, John T., assignor to O. S. Walker Co. Inc., Worcester, Mass. Portable demagnetiser. 2,106,233; Jan. 25.

Beiter, Frank, Long Island City, N. Y. Hair clip. 2,106,561; Jan. 25.

Bell, Alfred B., Philadelphia, Pa. Printer's type cabinet. 2,106,163; Jan. 25.

Bell Telephone Laboratories, Incorporated. (See Anderson, F. B., Mallinckrodt, and Stillwell, assignors.)

Bell Telephone Laboratories, Incorporated. (See Black, Harold S., assignor.)

Bell Telephone Laboratories, Incorporated. (See Doba, Stephen, Jr., assignor.)

Bell Telephone Laboratories, Incorporated. (See Field, Joseph C., assignor.)

Bell Telephone Laboratories, Incorporated. (See Flegal, J. R., and Priesman, assignors.)

Bell Telephone Laboratories, Incorporated. (See Hickman, C. N., and Kingsbury, assignors.)

Bell Telephone Laboratories, Incorporated. (See Kinkead, Fullerton S., assignor.)

Bell Telephone Laboratories, Incorporated. (See Low, Frank K., assignor.)

Bell Telephone Laboratories, Incorporated. (See Marshall, Viola A., assignor.)

Bell Telephone Laboratories, Incorporated. (See Raymond, Ralph, assignor.)

Benander, George W., Maryville, assignor to Monowatt Electric Corporation, Bridgeport, Conn. Electric receptacle. 2,106,595; Jan. 25.

Benjamin Electric Mfg. Company. (See McBroom, Clyde V., assignor.)

Berglund, Emil, et al. (See Milnes, Harold, assignor.)

Bernhard, Benjamin S., Boston, Mass., assignor to The American Hardware Corporation, New Britain, Conn. Hold open device. 2,106,448; Jan. 25.

Bertrand, Frederic E., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Folding machine and [illegible] to which said machine may be applied. 2,106,[illegible]; Jan. 25.

Besson, Earl A., Maplewood, and C. H. Pepin, Beverly, Mass., assignors to United Shoe Machinery Corporation, Paterson, N. J. Machine for use in the manufacture of woven material. 2,106,207; Jan. 25.

Bigger, Trafford W., and F. L. Hargrove, Schenectady, N. Y., assignors to General Electric Company. Boiler drum. 2,106,589; Jan. 25.

Billstein, Arthur M. P. (See Grindall, W. H., and Billstein.)

Bishop, Mark. (See Fletcher, H., Bishop, and Jones.)

Black, Harold S., Elmhurst, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Transmission system. 2,106,237; Jan. 25.

Black, William A., Mendelsir, N. J., assignor to United Research Corporation, Long Island City, N. Y. Flywheel clutch mechanism. 2,106,336; Jan. 25.

Blake, William H., Brooklyn, N. Y. Mechanical pencil. 2,106,389; Jan. 25.

Bocji Corporation, trustee. (See Jenkins, Clarence E., assignor.)

Bodge, Horace A., White Plains, N. Y. Ball driving device. 2,106,625; Jan. 25.

Boegehold, Alfred L., Detroit, and A. W. Schlechter, Dearborn, assignors to General Motors Corporation, Detroit, Mich. Bearing and method. 2,106,560; Jan. 25.

Bowlby, Walter D., Jersey City, N. J., assignor to Egyptian Lacquer Manufacturing Company. Coated flexible sheet. 2,106,164; Jan. 25.

Boyd, Charles R., Chicago, Ill. Spark plug. 2,106,449; Jan. 25.

Brace, Lemper P., South Bend, Ind., assignor to International Engineering Corporation, Chicago, Ill. Control. 2,106,450; Jan. 25.

Bradshaw, James B. (See Erickson, Prentis E., assignor.)

Brandwein, Edward G., assignor to Crystal Tube Mfg. Co., Chicago, Ill. Container for cigars or the like. 2,106,475; Jan. 25.

Brasseltos, Chester H., New York, N. Y., assignor to Sirian Lamp Company, Newark, N. J. Incandescent electric lamp. 2,106,680; Jan. 25.

Braun, Sylvan, and F. P. Hess, assignors to The Enterprise Manufacturing Company of Pennsylvania, Philadelphia, Pa. Food chopper. 2,106,626; Jan. 25.

Bray, Ulric E., Palos Verdes Estates, assignor to Union Oil Company of California, Los Angeles, Calif. Solvent extraction of oils. 2,106,224; Jan. 25.

Brenn, Carl W., Montclair, assignor to Autographic Register Company, Hoboken, N. J. Manifolding. 2,106,165; Jan. 25.

Brennan, John H., Minneapolis, Minn. Spraying device. 2,106,627; Jan. 25.

Brethen, Charles A., Wyandotte, and J. Gora, Ecorse, assignors to All Metal Products Company, Wyandotte, Mich. Toy pistol. 2,106,469; Jan. 25.

Bridgeport Brass Company. (See Broecker, Lewis C., assignor.)

Brigxman, Harold F., and R. A. Fuller, Fort Wayne, Ind., assignors to General Electric Company. Refrigerating system. 2,106,591; Jan. 25.

Briggs Manufacturing Company. (See Pattison, H. J., and Barton, assignors.)

Briggs Manufacturing Company. (See Tjaarda, John, assignor.)

Brill, J. G., Company, The. (See Henry, Eugene E., assignor.)

Brinard, Maxime J., San Francisco, Calif. Varnish and paper drying machine. 2,106,339; Jan. 25.

Broecker, Lewis C., assignor to Bridgeport Brass Company, Bridgeport, Conn. Tire and valve stem. 2,106,673; Jan. 25.

Brooks, Howard L., and H. F. Macintyre, assignors to Furro Enameling Company, Oakland, Calif. Building construction. 2,106,215; Jan. 25.

Brosseau, Joseph E., West Chicago, and F. J. Kerber, Chicago, Ill.; said Kerber assignor to said Brosseau. Control device. 2,106,559; Jan. 25.

Brown, Archibald M., assignor to The Firestone Steel Products Company, Akron, Ohio. Apparatus for assembling spark plugs. 2,106,451; Jan. 25.

Brown Instrument Company, The. (See Harrison, Thos. R., assignor.)

Brown, Kenneth E. (See Power, J. T., and Brown.)

Brown, Ora A., South Gate, assignor to Bausch-Ross Tool Company, Los Angeles, Calif. Releasing spear. 2,106,235; Jan. 25.

Browne, Lindsay H., assignor, by mesne assignments, to Josiah Anstice & Co. Inc., Rochester, N. Y. Motor car control device. 2,106,401; Jan. 25.

Brusam, Herman A., and L. W. Covert, assignors to Röhm & Haas Company, Philadelphia, Pa. Reaction product and process. 2,106,452; Jan. 25.

Bryan, Clare, Chicago, Ill. Fishhook. 2,106,370; Jan. 25.

Bryce, James W., Bloomfield, N. J., assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y. Accounting machine. 2,106,476; Jan. 25.

Bryce, James W., Bloomfield, N. J., assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y. Accounting machine. 2,106,477; Jan. 25.

Bucci, Marc A., Hoboken, N. J. Milking cow toy. 2,106,562; Jan. 25.

Bucyrus-Erie Company. (See Ruhloff, Frederic C., assignor.)

Budd, Edward G., Manufacturing Company. (See Ledwinka, Joseph, assignor.)

Buffalo Electric Furnace Corporation. (See Sell, Gilbert E., assignor.)

Bulldog Electric Products Company. (See Thomson, Alfred J., assignor.)

Burger, Frederick W., Niles, assignor to Clark Equipment Company, Buchanan, Mich. Wheel. 2,106,270; Jan. 25.

Burks, Byron R., Los Angeles, Calif. Compressor. 2,106,236; Jan. 25.

Burnell, Edward J., and W. J. Heacock, assignors to Link-Belt Company, Chicago, Ill. Wash box discharge control. 2,106,204; Jan. 25.

Busch, Conrad J., Wyomissing, assignor to The Narrow Fabric Company, West Reading, Pa. Method and apparatus for producing braid. 2,106,674; Jan. 25.

Bush, Eugene S., assignor to Bush Manufacturing Company, St. Louis, Mo. Engine blower drive and control. 2,106,237; Jan. 25.

Bush Manufacturing Company. (See Bush, Eugene S., assignor.)

Busse, Edwin G., assignor to Chicago Railway Equipment Company, Chicago, Ill. Railway car door structure. 2,106,168; Jan. 25.

Byers, Thomas A., Spokane, Wash. Speed control device. 2,106,493; Jan. 25.

Cahn, Bernard, San Diego, Calif. Garment hanger. 2,106,563; Jan. 25.

Calco Chemical Company, The. (See Munro, W. P., Northey, and Locher, assignors.)

Callo, Alexander. (See Gerngross, O., and Callo.)

Canfield, Robert W., and T. Waugh, West Hartford, assignors to Hartford-Empire Company, Hartford, Conn. Apparatus for forming glassware. 2,106,546; Jan. 25.

Canfield, Robert W., West Hartford, assignor to Hartford-Empire Company, Hartford, Conn. Glass melting furnace. 2,106,547; Jan. 25.

Carlesimo, Angelo, Detroit, Mich. Pull shovel excavator. 2,106,402; Jan. 25.

Carr, Raymond L., Boston, Mass. Vehicle body. 2,106,403; Jan. 25.

Carthage Mills Incorporated. (See Greiser, Melvin R., assignor.)

Celanese Corporation of America. (See Dreyfus, C., and Schneider, assignors.)

Celanese Corporation of America. (See Whitehead, William, assignor.)

Cen-Tennial Cotton Gin Company. (See Roberts, Hugh, Jr., assignor.)

Central Metallic Casket Co. (See Larson, Raymond, assignor.)

Cheney, Allan, Cynwyd, Pa. Shower bath and pan. 2,106,516; Jan. 25.

Chicago Railway Equipment Company. (See Busse, Edwin G., assignor.)

Christensen, Norman V., C. F. Rubel, C. C. Smith, Chicago, and H. J. LeVeaconte, Western Springs, assignors to Union Special Machine Company, Chicago, Ill. Fabric feeding mechanism for sewing machines. 2,106,517; Jan. 25.

Christenson, George, Plainfield, N. J., assignor to Johns-Manville Corporation, New York, N. Y. Packing material and assembly. 2,106,293; Jan. 25.

Cherry-Burrell Corporation. (See Conovet, Walter K., assignor.)

Chubbuck, Charles L., San Marino, Calif. Making dry lime sulphur compositions. 2,106,294; Jan. 25.

Clark Equipment Company. (See Burger, Frederick W., assignor.)

Cleveland Pneumatic Tool Company, The. (See Wallace, John F., assignor.)

Coca-Cola Company, The. (See Morin, Louis H., assignor.)

Coleman, Sheldon, and B. W. Tullis, Wichita, Kans. Odor control for liquid fuel burning stoves. 2,106,690; Jan. 25.

Colman, Howard D., Rockford, Ill. Self-adjusting brake. 2,106,167; Jan. 25.

Colonial Broach Company. (See Halborg, Carl J., assignor.)

Compo, John J., Defiance, Ohio. Muffler clamp. 2,106,628; Jan. 25.

Connor, Kirke W., Detroit, Mich., assignor to Micromatic Hone Corporation. Unit abrading element. 2,106,205; Jan. 25.

Conover, Walter K., New Castle, Pa., assignor to Cherry-Burrell Corporation, Chicago, Ill. Valve. 2,106,340; Jan. 25.

Continental Can Company. (See Punte, William F., assignor.)

Consetti, Achille, assignor to the firm J. R. Geigy A. G., Basel, Switzerland. Manufacture of colored lacquers and coating compositions. 2,106,518; Jan. 25.

Consetti, Achille, assignor to the firm J. R. Geigy A. G., Basel, Switzerland. Manufacture of colored lacquers and film forming coatings. 2,106,519; Jan. 25.

Cook, Robert V., assignor to Fairbanks, Morse & Company, Chicago, Ill. Evaporator. 2,106,295; Jan. 25.

Cooke, Allen B., Danville, Ill., assignor to United Autographic Register Co. Refolding mechanism for duplicating machines. 2,106,520; Jan. 25.

Cooper, Francis W., assignor to The Stead Rail Anchor Company, Limited, Montreal, Quebec, Canada. Rail anchor. 2,106,548; Jan. 25.

Copeland, L. T., et al., administrators. (See Hunter, Percy E.)

Cornell-Dubilier Corporation. (See Deeley, Paul McK., assignor.)

Corning Glass Works. (See Hood, Harrison P., assignor.)

Corning Glass Works. (See Hostetter, John C., assignor.)

Cosma Laboratories Company, The. (See Hower, Charles C., assignor.)

Coulter, Harold B., Mamaroneck, assignor to The Dorr Company, Inc., New York, N. Y. Classifier. 2,106,549; Jan. 25.

Covert, Lloyd W. (See Bruson, H. A., and Covert.)

Cox, Walter T., Chicago, Ill. Merchandising package. 2,106,629; Jan. 25.

Cox, William J., Woodruff, Utah. Circumferentially divided wheel rim. 2,106,421; Jan. 25.

Crane, Edward F., assignor to Norman E. Crane, Newark, N. J. Building board. 2,106,390; Jan. 25.

Crane, Norman E. (See Crane, Edward F., assignor.)

Crossen, Robert W., Jr., Plainfield, and H. Somervell, Evanston, assignors to Farrell Manufacturing Company, Joliet, Ill. Tank vehicle. 2,106,206; Jan. 25.

Crossley, Alfred, and H. E. Meinema, assignors to Johnson Laboratories, Inc., Chicago, Ill. Automatic volume control system. 2,106,207; Jan. 25.

Crystal Tube Mfg. Co. (See Brandwein, Edward G., assignor.)

Curran, Edward N., assignor to H. Richards, St. Louis, Mo. Demonstrating device. 2,106,478; Jan. 25.

Cutler, Frank W., Portland, Oreg., assignor to Food Machinery Corporation, San Jose, Calif. Fruit sizer. 2,106,541; Jan. 25.

Dahl, Fred, Clear Lake, S. Dak. Combined table and ironing board. 2,106,422; Jan. 25.

Dallas, Robert M., Beverly, assignor to Hoague-Sprague Corporation, Lynn, Mass. Stay-plaiting mechanism for blank-making machines. 2,106,271; Jan. 25.

Deanesly, Richard M., Berkeley, assignor to Shell Development Company, San Francisco, Calif. Continuous method of reacting liquid reagents. 2,106,521; Jan. 25.

Deans, Arthur C., Los Angeles, Calif. Luminous tube display. 2,106,238; Jan. 25.

Debor, Hermann, Munich, Germany, assignor to Dominion Oxygen Company, Limited. Hollow vessel for high pressures. 2,106,494; Jan. 25.

Debor, Hermann, Munich, Germany, assignor to Dominion Oxygen Company, Limited. Making pressure vessels. 2,106,495; Jan. 25.

Debor, Hermann, Munich, Germany, assignor to Dominion Oxygen Company, Limited. Making containers. 2,106,496; Jan. 25.

Deeley, Paul M., assignor to Cornell-Dubilier Corporation, New York, N. Y. Electrolytic device. 2,106,208; Jan. 25.

De Groote, Melvin, St. Louis, assignor to The Tret-O-Lite Company, Webster Groves, Mo. Breaking petroleum emulsions. 2,106,239; Jan. 25.

De Groote, Melvin, St. Louis, and B. Keiser, assignors to The Tret-O-Lite Company, Webster Groves, Mo. Breaking petroleum emulsions. 2,106,240; Jan. 25.

De Groote, Melvin, St. Louis, assignor to The Tret-O-Lite Company, Webster Groves, Mo. Breaking petroleum emulsions. 2,106,241; Jan. 25.

De Groote, Melvin, St. Louis, assignor to The Tret-O-Lite Company, Webster Groves, Mo. Breaking petroleum emulsions. 2,106,242; Jan. 25.

De Groote, Melvin, St. Louis, assignor to The Tret-O-Lite Company, Webster Groves, Mo. Breaking petroleum emulsions. 2,106,243; Jan. 25.

De Groote, Melvin, St. Louis, assignor to The Tret-O-Lite Company, Webster Groves, Mo. Breaking petroleum emulsions. 2,106,244; Jan. 25.

De Lavaud, Dimitri S., Paris, France. Hydraulic transmission. 2,106,423; Jan. 25.

Delta Electric Company. (See Wiley, Lee M., assignor.)

Demonet, Eugene A., Brooklyn, assignor to The Western Union Telegraph Company, New York, N. Y. Printing telegraph system. 2,106,691; Jan. 25.

Demuth, Clinton L., Forest Hills, Wilkinsburg, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Circuit interrupter. 2,106,316; Jan. 25.

Denlston, Robert F., Mount Vernon, Ill., and W. P. Hawthorne, Augusta, Kans., assignors to Socony-Vacuum Oil Company, Incorporated, New York, N. Y. Apparatus for determining the dew point of a vapor product. 2,106,593; Jan. 25.

Denny, Alfred S., Hopewell, Va., assignor, by mesne assignments, to The Solvay Process Company, New York, N. Y. Production of alkali metal nitrates. 2,106,168; Jan. 25.

De Witt, William J., assignor to Shoe Form Co., Inc., Auburn, N. Y. Shoe form. 2,106,497; Jan. 25.

Desendorf, Edwin M., Austin, Tex. Changing the color of natural stone. 2,106,317; Jan. 25.

Dick, Burns, Ferguson, assignor to Wagner Electric Corporation, St. Louis, Mo. Liquid pressure mechanism. 2,106,592; Jan. 25.

Dinnerville, Walter, assignor to Western Railroad Supply Company, Chicago, Ill. Apparatus for controlling a waving crossing signal. 2,106,594; Jan. 25.

Dixon, Joseph, Crucible Company. (See Shonnard, Orlando D., assignor.)

Doba, Stephen, Jr., Woodside, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Electric discharge tube circuits. 2,106,342; Jan. 25.

Doering, Charles and H., Chicago, Ill. Method of and apparatus for removing foreign matter from liquids. 2,106,630; Jan. 25.

Doering, Henry. (See Doering, Charles and H.)

Dominion Oxygen Company. (See Debor, Hermann, assignor.)

Dopheide, Hans. (See Pritschow, K., and Dopheide.)

Dorey, George B. (See Harel, Olivier A., assignor.)

Dorey, George B., Westmount, Quebec, Canada. Resilient brake connection. 2,106,343; Jan. 25.

Dorr Company, The. (See Coulter, Harold B., assignor.)

Downward, Leslie W., assignor to The Downward Turbine Corporation, Wilmington, Del. Rotary steam engine. 2,106,371; Jan. 25.

Downward Turbine Corporation. (See Downward, Leslie W., assignor.)

Draper Corporation. (See Tutas, James M., assignor.)

Draving, Arthur M., assignor to H. H. Eby, Inc., Philadelphia, Pa. Electrical terminal. 2,106,595; Jan. 25.

Dreyfus, Camille, New York, N. Y., and G. Schneider, Montclair, N. J., assignors to Celanese Corporation of America. Film and sheet of organic derivatives of cellulose. 2,106,296; Jan. 25.

Dreyfus, Henry, London, England. Manufacture and use of cellulose derivatives. 2,106,297; Jan. 25.

Dreyfus, Henry, London, England. Treatment of materials. 2,106,298; Jan. 25.

Duff, John, Jr., New Bedford, Mass. Delivery nozzle. 2,106,596; Jan. 25.

Du Pont, E. I., de Nemours & Company. (See Kreimeier, Oscar R., assignor.)

Du Pont, E. I., de Nemours & Company. (See Magill, Paul L., assignor.)

Du Pont, E. I., de Nemours & Company. (See Tanner, Walton B., assignor.)

Duraj, Stanley, Russelton, Pa. Plate lifter. 2,106,391; Jan. 25.

Earnshaw Knitting Company. (See Le Coney, Joseph H., assignor.)

Eby, Hugh H., Inc. (See Draving, Arthur M., assignor.)

Edeby, John A., et al. (See Nilson, Harold, assignor.)

Edge, Charles N., Parsonage Point, Rye, N. Y. Sailboat. 2,106,209; Jan. 25.

Egyptian Lacquer Manufacturing Company. (See Bowlby, Walter D., assignor.)

Einfalt, Georg, Nuremberg, Germany. Traffic-line toy. 2,106,424; Jan. 25.

Ekdahl, Edward B., Irvington, assignor to Sefco, Inc., Newark, N. J. Portable strainer for insertion in the mouths of liquid containers. 2,106,453; Jan. 25.

Elektricitätsgesellschaft "Sanitas". (See Hofmann, Joseph, assignor.)

Elektricitätsgesellschaft "Sanitas" G. m. b. H. (See Hofmann, Josef, assignor.)

Elliott Addressing Machine Company, The. (See Elliott, Harmon P., assignor.)

Elliott, Harmon P., Watertown, Mass., assignor to The Elliott Addressing Machine Company. Repeat printing attachment for addressing machines. 2,106,675; Jan. 25.

Elliott, Mary J. (See Elliott, Roy D. and M. J.)

Elliott, Roy D. and M. J., Jersey City, N. J. Filtering. 2,106,318; Jan. 25.

Ellis, Carlton, Montclair, N. J., assignor to Ellis-Foster Company. Triethanolamine resin. 2,106,522; Jan. 25.

Ellis, Carleton, Montclair, N. J., assignor to Ellis-Foster Company. Complex resinous body and making same. 2,106,523; Jan. 25.

Ellis-Foster Company. (See Ellis, Carleton, assignor.)

Ellsworth, Joe R. (See Jones, L. T., and Ellsworth.)

Elsey, G. W., Dayton, Ohio, assignor to General Motors Corporation, Detroit, Mich. Shock absorber. 2,106,272; Jan. 25.

Embleton, Rowland, Swinton, England, assignor to General Electric Company. Gas-arc torch. 2,106,692; Jan. 25.

Enock, Arthur G., Wembley Park, England. Mechanism for raising bottles on to the table of a bottle filling and capping machine. 2,106,210; Jan. 25.

Enterprise Manufacturing Company of Pennsylvania, The. (See Braun, S., and Hess, assignors.)

Eppenstein, Otto, Jena, Germany, assignor, by mesne assignments, to Bausch & Lomb Optical Company, Rochester, N. Y. Stereoscopic range finder having stationary measuring marks. 2,106,631; Jan. 25.

Erickson, Prentis E., assignor to J. B. Bradshaw, Minneapolis, Minn. Automobile steering wheel. 2,106,169; Jan. 25.

Evans, Richard B. (See Parton, D. W., and Evans.)

Ewing, Wylie B., assignor to Wheeling Steel Corporation, Wheeling, W. Va. Composite pipe. 2,106,404; Jan. 25.

Esaki, Seiichi, Nishiyodogawa-Ku, Osaka, Japan. Producing powdered cocoa substitution. 2,106,372; Jan. 25.

F. N. F. Limited. (See Merton, J., and Hannay, assignor.)

Faber & Schleicher, A. G. (See Wermser, Arthur, assignor.)

Fairbanks, Morse & Company. (See Cook, Robert V., assignor.)

Farrell Manufacturing Company. (See Crossen, R. W., Jr., and Somervell, assignors.)

Faville, Frederick A., Chicago, Ill. Testing lubricants. 2,106,170; Jan. 25.

Federighi, George J., San Francisco, Calif. Handwheel for grinders. 2,106,319; Jan. 25.

Ferguson, John S., Schenectady, N. Y., assignor to General Electric Company. Catalytic material and making the same. 2,106,297; Jan. 25.

Fer-O-Con Corporation. (See Kitrbaty, Guy F., assignors.)

Ferro Enameling Company. (See Brooks, H. L., and MacIntyre, assignors.)

Fessler, Albra H., Flint, assignor to General Motors Corporation, Detroit, Mich. Ceramic compositions and making the same. 2,106,598; Jan. 25.

Fibreboard Products, Inc. (See Lewis, Boyd R., assignor.)

Fidelity Trust Company et al., administrators. (See Hunter, Percy E.)

Field, Joseph C., Maplewood, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Selective signal system. 2,106,466; Jan. 25.

Field, Oscar S., and J. B. Willing, assignors to General Railway Signal Company, Rochester, N. Y. Highway crossing signaling system. 2,106,602; Jan. 25.

Finch, William G. H., New York, N. Y. Manufacture of newspaper sound record supplements. 2,106,245; Jan. 25.

Firestone Steel Products Company, The. (See Brown, Archibald M., assignor.)

Firestone Tire & Rubber Company, The. (See Stevens, Horace D., assignor.)

Fitz, Leonard M., and L. B. Logan, Topeka, Kans. Current diversion means. 2,106,584; Jan. 25.

Fitch, Ellery E., Irwin, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Fluid pressure brake. 2,106,479; Jan. 25.

Fitch, Ellery E., Irwin, and G. T. McClure, McKeesport, assignors to The Westinghouse Air Brake Company, Wilmerding, Pa. Fluid pressure brake. 2,106,480; Jan. 25.

Flegal, John R., New York, N. Y., and N. Y. Priesman, Wyoming, N. J., assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y. Electrical device. 2,106,344; Jan. 25.

Fleming, Howard M., West Orange, assignor to Gardner Company, Orange, N. J. Register. 2,106,273; Jan. 25.

Fogelson, Emil, Boston, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Flexing machine. 2,106,171; Jan. 25.

Food Machinery Corporation. (See Cutler, Frank W., assignor.)

Food Machinery Corporation. (See Twomley, Herbert E., assignor.)

Fossa, Joseph, Salem, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for lacing shoe uppers. 2,106,320; Jan. 25.

Fourness, Charles A., Appleton, assignor to Paper Patents Company, Neenah, Wis. Wedding. 2,106,246; Jan. 25.

Fourness, Girard, Hollywood, Calif. Telephone switch. 2,106,200; Jan. 25.

Fowler, Anna. (See Schmitt, Paula F., assignor.)

Francisco, Ferris L., New York, N. Y. Cigarette package and blank or wrapper therefor. 2,106,480; Jan. 25.

Frank, William H., Detroit, Mich. Electrical distribution system. 2,106,565; Jan. 25.

Franklin, Lawrence W., Delawanna, N. J., assignor to The Western Union Telegraph Company, New York, N. Y. Home record cut-out assembly. 2,106,693; Jan. 25.

Franklin Steel Works. (See Long, George, assignor.)

Frayer, Lee A., and C. L. Harvey, Kent, assignors to The Lamson & Sessions Company, Cleveland, Ohio. Apparatus for cutting bar stock. 2,106,274; Jan. 25.

Frayer, Lee A., Kent, assignor to The Lamson & Sessions Company, Cleveland, Ohio. Feed and cut-off mechanism. 2,106,275; Jan. 25.

Frede, Charles F., St. Louis, Mo., assignor to General Steel Castings Corporation, Granite City, Ill. Axle structure. 2,106,345; Jan. 25.

Freund, Otto, Jena, Germany, assignor, by mesne assignments, to Bausch & Lomb Optical Company, Rochester, N. Y. Supplementary device for binocular range finders. 2,106,632; Jan. 25.

Frost, Paul. (See Goldhammer, L., and Frost.)

Frost, Parmenas F., Mount Vernon, N. Y., and J. C. Anderson, Keyport, N. J. Wire coiling and interweaving mechanism. 2,106,454; Jan. 25.

Frost Veneer and Plywood Company. (See Thomas, Francis C. O., assignor.)

Fuller, Roger A. (See Briggeman, H. F., and Fuller.)

G. M. S. Corporation. (See Sloan, Theodore H., assignor.)

Gair, Robert, Company. (See Hughes, Hector P., assignor.)

Gardner Company. (See Fleming, Howard M., assignor.)

Garriott, Carl D., Eagle City, Okla. Cable and pipe clutch. 2,106,373; Jan. 25.

Gaudenzi, Arthur, assignor to Aktiengesellschaft Brown Boveri & Cie, Baden, Switzerland. Electron discharge device control system. 2,106,524; Jan. 25.

Gaylor, Peter J. (See Young, P. L., and Wiesevich.)

Geigy, J. R., A. G. (See Consetti, Achille, assignor.)

General Aniline Works, Inc. (See Schnitzspahn, Karl, assignor.)

General Electric Company. (See Bigger, T. W., and Hargrove, assignors.)

General Electric Company. (See Briggeman, H. F., and Fuller, assignors.)

General Electric Company. (See Embleton, Rowland, assignor.)

General Electric Company. (See Ferguson, John S., assignor.)

General Electric Company. (See Jagger, Claude A., assignor.)

General Electric Company. (See La Pierre, Cramer W., assignor.)

General Electric Company. (See La Pierre, C. W., and Menger, assignors.)

General Electric Company. (See Merrill, Wilbur L., assignor.)

General Electric Company. (See Unwin, Kenneth J., assignor.)

General Electric Company. (See Wall, George, assignor.)

General Motors Corporation. (See Boegehold, A. L., and Schluchter, assignors.)

General Motors Corporation. (See Elsey, George W., assignor.)

General Motors Corporation. (See Fessler, Albra H., assignor.)

General Motors Corporation. (See Holmes, John Q., assignor.)

General Motors Corporation. (See Schwartzwalder, K., and Kirk, assignors.)

General Motors Corporation. (See Smith, Harry F., assignor.)

General Motors Corporation. (See Smith, Rolf M., assignor.)

General Railway Signal Company. (See Field, O. S., and Willing, assignors.)

General Railway Signal Company. (See Mackey, Stuart J., assignor.)

General Railway Signal Company. (See Reichard, Wade H., assignor.)

General Railway Signal Company. (See Willing, Joseph E., assignor.)

General Steel Castings Corporation. (See Frede, Charles F., assignor.)

General Steel Castings Corporation. (See Hallquist, Einar G., assignor.)

General Steel Castings Corporation. (See Lanning, Howard H., assignor.)

General Steel Castings Corporation. (See Pflager, Harry M., assignor.)

Gerngross, Otto, Yeni-Sehire, Turkey, and A. Callo, Bomhild, Germany. Material impermeable to ultra-violet rays and production thereof. 2,106,599; Jan. 25.

Giles, George A., Bensenville, assignor of one-half to L. T. Barnett, Glencoe, Ill. Styling facing sheet assembly. 2,106,481; Jan. 25.

Gill, George A. (See Tyree, H. J., Talley, and Gill.)

Girodin, Marius E., Quimper, France. Machine for the manufacture of biscuits. 2,106,633; Jan. 25.

Gleason, Anthony H., Elizabeth, N. J., assignor to Standard Oil Development Company. Improved lubricants and manufacturing the same. 2,106,347; Jan. 25.

Gleichmann, Hans, Falkenhain, near Spandau, assignor to Siemens-Shuckertwerke Aktiengesellschaft, Berlin-Siemensstadt, Germany. Power plant. 2,106,346; Jan. 25.

Goldhammer, Leo, Munich, and P. Frost, Munich-Neuharlaching, Germany, assignors to Agfa Ansco Corporation, Binghamton, N. Y. Film magazine. 2,106,374; Jan. 25.

Gora, John. (See Brethen, C. A., and Gora.)

Grant, Helen G., Asheville, N. C. Container. 2,106,425; Jan. 25.

Grant, Helen G., Asheville, N. C. Container and making the same. 2,106,426; Jan. 25.

Green, Daniel, Company. (See Green, James A., assignor.)

Green, James A., assignor to Daniel Green Company, Dolgeville, N. Y. Shoe and making the same. 2,106,676; Jan. 25.

Greenwood, Henry B., assignor to F. X. Hooper Company, Inc., Glen Arm, Md. Duplex single facer. 2,106,500; Jan. 25.

Greiner, Melvin R., Cincinnati, assignor to Carthage Mills Incorporated, Carthage, Ohio. Printing of fibrous materials by impregnation. 2,106,634; Jan. 25.

Grindell, William H., and A. E. P. Billstein, Altoona, assignors to The Pennsylvania Railroad Company, Philadelphia, Pa. Track rail flaw detecting apparatus. 2,106,624; Jan. 25.

Greene, William F., assignor to The R. K. Le Blond Machine Tool Company, Cincinnati, Ohio. Chuck. 2,106,501; Jan. 25.

Groll, Herbert P. A., Oakland, and G. Hearne, Berkeley, assignors to Shell Development Company, San Francisco, Calif. Production of carbonylic compounds. 2,106,347; Jan. 25.

Guertin, Gilles, Amelia, Ohio. Saw guard. 2,106,321; Jan. 25.

Guilberson Corporation, The. (See Guilberson, Samuel A., III, assignor.)

Guilberson, Samuel A., III, assignor to The Guilberson Corporation, Dallas, Tex. Anchoring device. 2,106,392; Jan. 25.

Guin, Lester W., Mishawaka, assignor to South Bend Current Controller Company, South Bend, Ind. Electrical apparatus. 2,106,211; Jan. 25.

Gutmann, Jean M. (See Angenieux, P., and Gutmann.)

H & H Machine & Motor Parts Co. (See Vollmer, Walter G., assignor.)

Hafcke, Philip M., Washington, D. C. Vacuum tube. 2,106,172; Jan. 25.

Halberg, Carl J., Detroit, Mich., Assignor to Colonial Broach Company. Apparatus for broaching an aperture in an article relative to its outer dimension. 2,104,212; Jan. 25.

Halberg, Carl J., Detroit, Mich., assignor to Colonial Broach Company. Broaching machine. 2,106,213; Jan. 25.

Hall, Judd B. (See Hall, Samuel S., and J. B.)

Hall, Samuel S., and J. B., assignors to The Surety Rubber Company, Carrollton, Ohio. Static resisting garment. 2,106,348; Jan. 25.

Hallquist, Elmar G., Wallingford, Pa., assignor to General Steel Castings Corporation, Granite City, Ill. Wheel. 2,106,566; Jan. 25.

Hannay, Robert S. B. (See Morton, J., and Hannay.)

Hansson, Oscar, Goteborg, Sweden. Exhaust pipe for internal combustion engines. 2,106,427; Jan. 25.

Harder, Perry J., Newalla, Okla. Veterinarian's instrument. 2,106,635; Jan. 25.

Hargrove, Frank L. (See Bigger, T. W., and Hargrove.)

Harel, Oliver A., assignor to G. B. Dorey, Montreal, Quebec, Canada. Hand brake for railway cars and the like. 2,106,349; Jan. 25.

Hargnett, Harold L., Turtle Creek, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Muffler. 2,106,482; Jan. 25.

Harlow, Clark J., Deer Park, Ohio. Brake operating mechanism. 2,106,636; Jan. 25.

Harnly, David H., Chicago, Ill. Weatherproofing structure for doors. 2,106,322; Jan. 25.

Harrison, Thomas R., Wyncote, assignor to The Brown Instrument Company, Philadelphia, Pa. Control valve. 2,106,900; Jan. 25.

Hartford-Empire Company. (See Bates, Lloyd G., assignor.)

Hartford-Empire Company. (See Canfield, Robert W., assignor.)

Hartford-Empire Company. (See Canfield, R. W., and Waugh, assignors.)

Hartford-Empire Company. (See Merrill, Donald G., assignor.)

Harvey, Carl L. (See Frayer, L. A., and Harvey.)

Hastings, Charles M. (See Keller, F., and Hastings.)

Hasset, Walter E., Rochester, N. Y. Truck refrigerator. 2,106,637; Jan. 25.

Hausmann, Max, Berlin-Zehlendorf-Mitte, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Oxygen emergency apparatus with closed respiratory circuit. 2,106,393; Jan. 25.

Havemeyer, Clara D., Chicago, Ill. Container. 2,106,405; Jan. 25.

Hawker, Roland G., Burlington, Vt. Bibb seating tool. 2,106,173; Jan. 25.

Hawkins, Paul E., Lakewood, assignor to The Baker-Raulang Company, Cleveland, Ohio. Power control mechanism. 2,106,502; Jan. 25.

Hawthorne, Wendell P. (See Denniston, R. F., and Hawthorne.)

Haze, Harry S. (See Savage, Will R.)

Heacock, Ward J. (See Burnell, E. J., and Heacock.)

Heaney, William A., Salem, Mass. Valve. 2,106,406; Jan. 25.

Hearne, George. (See Groll, H. P. A., and Hearne.)

Hedlund, Mats, Stockholm, Sweden. Cable mounting for electrical apparatus. 2,106,248; Jan. 25.

Heinemann, Arthur S., Los Angeles, Calif. Multiple article package and method. 2,106,276; Jan. 25.

Henry, Walter I., Hamilton, Mo. Interchangeable sign. 2,106,376; Jan. 25.

Hendrick, Robert W., Newtonville, Mass. Automobile carrier for lengthy articles. 2,106,503; Jan. 25.

Henriksen, Alfred. (See Lincoln, B. H., and Henriksen.)

Henry, Eugene E., Upper Darby, assignor to The J. G. Brill Company, Philadelphia, Pa. Universal tool holder. 2,106,526; Jan. 25.

Hensley, Guy F., Gastine, Calif. Can testing device. 2,106,407; Jan. 25.

Hepler, Edward W., Springdale, Pa. Rotary pump. 2,106,600; Jan. 25.

Hercules Powder Company. (See Ray, Philip A., assignor.)

Herold, Walter F., assignor to The Bassick Company, Bridgeport, Conn. Chair iron. 2,106,174; Jan. 25.

Hess, Frederick P. (See Braun, E., and Hess.)

Hewitt, Hills B., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Brake system. 2,106,483; Jan. 25.

Hewitt, Hills B., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Duplex brake cylinder. 2,106,484; Jan. 25.

Hewitt, Hills B., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Insect excluder. 2,106,485; Jan. 25.

Hickman, Clarence N., Jackson Heights, and B. A. Kingsbury, Brooklyn, assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y. Testing system. 2,106,350; Jan. 25.

Hicks, Leslie A. (See Mellen, G., and Hicks.)

Hiering, William C., assignor to The J. E. Mergott Company, Newark, N. J. Making fabric covered bag frames. 2,106,408; Jan. 25.

Hilliker, Robert E., Akron, Ohio, assignor to The F. H. Watson Company, Jonesboro, Ark. Valve stem. 2,106,638; Jan. 25.

Hoague-Sprague Corporation. (See Dallas, Robert M., assignor.)

Hofmann, Joseph, Berlin-Reinickendorf-Ost, assignor to Elektricitätsgesellschaft "Sanitas", Berlin, Germany. Diathermic apparatus with quenched spark-gap. 2,106,428; Jan. 25.

Hofmann, Joseph, Berlin-Reinickendorf-Ost, assignor to Elektricitätsgesellschaft "Sanitas" G. m. b. H., Berlin, Germany. Electrotherapeutic apparatus. 2,106,429; Jan. 25.

Holloway, Herman H. (See Lockett, A. M., and Holloway.)

Holmes, John O., Anderson, Ind., assignor to General Motors Corporation, Detroit, Mich. Tool support. 2,106,214; Jan. 25.

Honsert, Joseph, Chicago, Ill. Apparatus for electrical etching. 2,106,455; Jan. 25.

Hood, Harrison P., assignor to Corning Glass Works, Corning, N. Y. Low expansion annealed glass. 2,106,526; Jan. 25.

Hooper, F. X., Company. (See Greenwood, Henry B., assignor.)

Hostetter, John C., assignor to Corning Glass Works, Corning, N. Y. Refractory for contacting molten glass. 2,106,527; Jan. 25.

Hothersall, John M., Brooklyn, assignor to American Can Company, New York, N. Y. Ball container. 2,106,175; Jan. 25.

Howard, Karl S., Bryn Mawr, and J. H. Locke, Villa Nova, assignors, by mesne assignments, to Ajax Electric Furnace Corporation, Philadelphia, Pa. Apparatus for handling molten metal. 2,106,456; Jan. 25.

Howes, Charles C., assignor to The Cosmo Laboratories Company, Cleveland, Ohio. Flame sensitive current controlling article. 2,106,249; Jan. 25.

Hudson Motor Car Company. (See Allison, William D., assignor.)

Hudson Motor Car Company. (See Badertscher, Dana K., assignor.)

Hufford, George H., assignor to Thompson Products Incorporated, Detroit, Mich. Joint and making the same. 2,106,567; Jan. 25.

Huffman, William E., and G. W. Replogle, Dayton, Ohio. Quick release valve. 2,106,176; Jan. 25.

Hughes, Hector P., New London, Conn., assignor to Robert Gair Company, Inc., New York, N. Y. Knock-down island display stand. 2,106,301; Jan. 25.

Hultquist, Victor J., Alcoa, Tenn. Building unit. 2,106,177; Jan. 25.

Humblet, Joseph, Brussels, Belgium. Fire protecting means. 2,106,576; Jan. 25.

Humblet, Joseph, Brussels, Belgium. Extinguisher. 2,106,430; Jan. 25.

Hunter, Percy E., deceased, by L. T. Copeland and Fidelity Trust Company, administrators, assignors to Hunter Steel Company, Pittsburgh, Pa. Fence. 2,106,601; Jan. 25.

Hunter, Percy E., deceased, by L. T. Copeland and Fidelity Trust Company, administrators, assignor to Hunter Steel Company, Pittsburgh, Pa. Making fence posts. 2,106,602; Jan. 25.

Hunter Steel Company. (See Hunter, Percy E., assignor.)

Huntington, James B., Cincinnati, Ohio. Deicing attachment for aircraft. 2,106,323; Jan. 25.

Hutchens, Edward, assignor to Utility Manufacturing Company, Cudahy, Wis. Roll grinding machine. 2,106,215; Jan. 25.

Hutt, Albert E., Riverside, Conn. Automatic shut-off valve. 2,106,361; Jan. 25.

Hyman, Eli, Brookline, assignor to Hy-Sil Manufacturing Company, Revere, Mass. Woven fabric. 2,106,457; Jan. 25.

Hy-Sil Manufacturing Company. (See Hyman, Eli, assignor.)

I. G. Farbenindustrie Aktiengesellschaft. (See Bashr, H., and Wentzel, assignors.)

I. G. Farbenindustrie Aktiengesellschaft. (See Hausmann, Max, assignor.)

I. G. Farbenindustrie Aktiengesellschaft. (See Orthner, L., and Sauchez, assignors.)

I. G. Farbenindustrie Aktiengesellschaft. (See Perrenz, F., and Fischer, assignors.)

I. G. Farbenindustrie Aktiengesellschaft. (See Schneider, Wilhelm, assignor.)

I. G. Farbenindustrie Aktiengesellschaft. (See Zorn, H., and Rostosky, assignors.)

Iacino, Natale, New York, N. Y. Water shower temperature regulator. 2,106,468; Jan. 25.

Imperial Molded Products Corporation. (See Amrine, Lodane G., assignor.)

International Business Machines Corporation. (See Bryce, James W., assignor.)

International Engineering Corporation. (See Brace, Kemper P., assignor.)

Jacobson, Irvin. (See Johnson, F. B., and Jacobson.)

Jacques, Emile, Paris, France. Automatic variable speed gear. 2,106,608; Jan. 25.

Jaeger, Claude A., Schenectady, N. Y., assignor to General Electric Company. Resistor. 2,106,604; Jan. 25.

Jaite Company, The. (See Schlegel, Alfred A., assignor.)

Jenkins, Clarence E., Keene, N. H., assignor to Bocil Corporation, trustee, Pittsburgh, Pa. Method and apparatus for the extraction of juices from vegetable pulp and the like. 2,106,469; Jan. 25.

Jenkins, Russell L., Anniston, Ala., assignor, by mesne assignments, to Monsanto Chemical Company. 4-aminodiphenyl complex. 2,106,550; Jan. 25.

Jenkins, Russell L., Anniston, Ala., assignor, by mesne assignments, to Monsanto Chemical Company. 4-aminodiphenyl compounds. 2,106,551; Jan. 25.

Jenkins, Russell L., Kirkwood, Mo., and M. M. Levine, Rochester, N. Y., assignor, by mesne assignments, to Monsanto Chemical Company. Thiocarbanilide derivatives. 2,106,552; Jan. 25.

Jenkinson, George B., Prescott, Ontario, Canada. Cap remover for containers and the like. 2,106,639; Jan. 25.

Johnson, Frederick B., and I. Jacobson, Kansas City, Mo. Disturbance responsive switch. 2,106,605; Jan. 25.

Johnson Laboratories, Inc. (See Crossley, A., and Maimema, assignors.)

Johns-Manville Corporation. (See Christenson, George, assignor.)

Jones, Alfred J., assignor to H. S. & A. Robinson, Limited, Bristol, England. Manufacture of paper or like bag tubes or bags. 2,106,481; Jan. 25.

Jones, Benjamin C. (See Fletcher, H., Bishop, and Jones.)

Jones, Lloyd T., and J. K. Hilsworth, Berkeley, Calif. Insect electrocutor. 2,106,638; Jan. 25.

Johnson, Albert M., assignor to Barnes Drill Company, Rockford, Ill. Honing machine. 2,106,216; Jan. 25.

Johnson, Albert M., assignor to Barnes Drill Co., Rockford, Ill. Machine tool. 2,106,217; Jan. 25.

Johnson Laboratories, Inc. (See Neighbors, C. C., and Maimema, assignors.)

Johnson Laboratories, Inc. (See Schaper, William A., assignor.)

Johnson Laboratories, Inc. (See Sinninger, Dwight V., assignor.)

K. P. F. Electric Company. (See Wilkins, Roy, assignor.)

Karpen, S., & Bros. (See Owler, Thomas D., assignor.)

Kasanjian, Soures, Woodside, Long Island, N. Y. Safety device and valve therefor. 2,106,606; Jan. 25.

Keesee, Roland E., Prattsville, Ark. Wiring device. 2,106,324; Jan. 25.

Keiser, Bernhard. (See De Groote, M., and Keiser.)

Keller, Andreas E., Leonhard, Ill. Agitator for mash tanks. 2,106,329; Jan. 25.

Keller, Fred, and C. M. Hastings, New Kensington, assignors to Aluminum Company of America, Pittsburgh, Pa. Electrolytic condenser. 2,106,178; Jan. 25.

Kelley, Oliver K., assignor, by mesne assignments, to Yellow Truck and Coach Manufacturing Company, Pontiac, Mich. Throttle and transmission interlock. 2,106,607; Jan. 25.

Kelley, Oliver K., assignor, by mesne assignments, to Yellow Truck and Coach Manufacturing Company, Pontiac, Mich. Power shift transmission. 2,106,608; Jan. 25.

Kelly, Andrew J., Richmond, Va. Convertible coaster wagon and sled. 2,106,530; Jan. 25.

Kercher, Frank J. (See Brosseau, J. H., and Kercher.)

Kiefer, George C. (See Schaeuble, C. A., and Kiefer.)

Kingsbury, Burton A. (See Hickman, C. N., and Kingsbury.)

Kinnaird, Fullerton S., Ridgefield Park, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Teletypewriter station. 2,106,353; Jan. 25.

Kirk, William S. (See Schwartzwalder, K., and Kirk.)

Kirkpatrick, Willard H., assignor to National Aluminate Corporation, Chicago, Ill. The production of anion-exchange resins from m-phenylenediamine. 2,106,486; Jan. 25.

Klinkenstein, Gustave. (See Barsky, G., Klinkenstein, Rohleder, and Silleck.)

Knoll, Max, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Television receiver tube. 2,106,250; Jan. 25.

Kops Brothers, Inc. (See Leffmann, Siegfried, assignor.)

Korones, Samuel A. (See Tauber, S., and Korones, assignors.)

Kotrbaty, Guy F., New York, N. Y., assignor to Fur-O-Cen Corporation, Bryn Mawr, Pa. Composite construction mattress. 2,106,179; Jan. 25.

Kovalik, Anthony, Pittsburgh, Pa. Sandwich wrapper 2,106,640; Jan. 25.

Krauss, Friedrich B., Schwarzenberg, Germany, Centrifugal extractor. 2,106,609; Jan. 25.

Kreilich, Lester W., and H. E. Taylor, assignors to The Yerges Manufacturing Company, Fremont, Ohio. Bolting section unit and assembly. 2,106,610; Jan. 25.

Kreimeier, Oscar R., Woodstown, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Preparing tertiary ethynyl carbinols and product thereby produced. 2,106,180; Jan. 25.

Kreimeier, Oscar R., Woodstown, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Ethynyl carbinols and preparing the same. 2,106,181; Jan. 25.

Kreimeier, Oscar R., Woodstown, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Reacting alkali metal acetylides with alkylene oxides and products thereby produced. 2,106,182; Jan. 25.

Krieck, James H., Newark, N. J. Filtering apparatus. 2,106,218; Jan. 25.

Kummer, Ernest W., Denver, Colo., assignor of one-half to D. G. Ong, Prescott, Ariz. Portable air conditioner. 2,106,325; Jan. 25.

Kurth, Franz J., New York, N. Y., assignor to Amusentat Corporation of America. Air distributing device. 2,106,458; Jan. 25.

Laitman, Michael, Brooklyn, N. Y. Closure. 2,106,459; Jan. 25.

Lamson & Sessions Company, The. (See Frayer, Lee A., assignor.)

Lamson & Sessions Company, The. (See Frayer, L. A., and Harvey, assignors.)

Langedijk, Siegfried L., Amsterdam, Netherlands, assignor to Shell Development Company, San Francisco, Calif. Preparation of halogenated organic hydroxy compounds. 2,106,353; Jan. 25.

Lanning, Howard H., Topeka, Kans., assignor to General Steel Castings Corporation, Eddystone, Pa. Spring assembly. 2,106,219; Jan. 25.

La Pierre, Cramer W., Schenectady, N. Y., assignor to General Electric Company. Apparatus for correcting skew and bow in woven material. 2,106,611; Jan. 25.

La Pierre, Cramer W., and F. B. Menger, Schenectady, N. Y., assignors to General Electric Company. Straightener for woven material. 2,106,612; Jan. 25.

Larson, Raymond, assignor to Central Metallic Casket Co., Chicago, Ill. Casket ornamentation. 2,106,695; Jan. 25.

Law, Albert, Jackson Heights, N. Y. Baffle gate bearing for one-way rotation. 2,106,220; Jan. 25.

Le Blond, R. K., Machine Tool Company. (See Greene, William F., assignor.)

Lecher, Hans Z. (See Munro, W. P., Northey, and Lecher.)

Le Coney, Joseph H., Bedford, assignor to Earnshaw Knitting Company, Newton, Mass. Drop seat garment. 2,106,553; Jan. 25.

Ledwinka, Joseph, assignor to Edward G. Budd Manufacturing Company, Philadelphia, Pa. Vehicle body construction. 2,106,677; Jan. 25.

Leeson, Bruce H., Tynemouth, and R. W. Wild, Low Fell, assignors to A. Reyrolle & Company Limited, Hebburn-on-Tyne, England. Electric circuit breaker. 2,106,551; Jan. 25.

Leffmann, Siegfried, London, England, assignor to Kops Brothers, Inc., New York, N. Y. Brassière. 2,106,566; Jan. 25.

Leitch, George A., assignor to Charles H. Pugh Limited, Birmingham, England. Mowing machine. 2,106,641; Jan. 25.

Lepetit, Albert, Montrouge, France. Optical device for measuring angles, such as sextants. 2,106,460; Jan. 25.

Leslie, Ivan A., assignor to Rolls Royce Limited, Derby, England. Hydraulic shock damper. 2,106,461; Jan. 25.

Le Vesconte, Harold J. (See Christensen, N. V., Rubel, Smith, and Le Vesconte.)

Le Vesconte, Harold J. (See Rubel, C. F., and Le Vesconte.)

Levine, Max M. (See Jenkins, R. L., and Levine.)

Levitt, David, New York, N. Y. Folding egg carton. 2,106,613; Jan. 25.

Lewis, Boyd E., San Marino, assignor to Fibreboard Products, Inc., San Francisco, Calif. Box construction. 2,106,302; Jan. 25.

Lewis, Robert B., assignor to Tinius Olsen Testing Machine Company, Philadelphia, Pa. Extensometer. 2,106,696; Jan. 25.

Libbey-Owens-Ford Glass Company. (See Moller, John H., assignor.)
Lick, Carl F., St. Paul, Minn. Safety device for motion picture projecting machines. 2,106,354; Jan. 25.
Liebenthal, Eugene P. (See Ahrenheim, Charles, assignor.)
Ligot, Claude, Montreal, Quebec, Canada. Hair treating device. 2,106,385; Jan. 25.
Lincoln, Bert H., and A. Henriksen, Ponca City, Okla., assignors, by mesne assignments, to The Lubri-Zol Development Corporation, Cleveland, Ohio. Lubricating oils. 2,106,554; Jan. 25.
Lindberg Engineering Company. (See Lindberg, Le Roy A., assignor.)
Lindberg, Le Roy A., Evanston, assignor to Lindberg Engineering Company, Chicago, Ill. Heat treating furnace. 2,106,462; Jan. 25.
Lindner, Karl A., Baltimore, Md., assignor to American Smelting and Refining Company, New York, N. Y. Metal mold. 2,106,614; Jan. 25.
Lindquist, Frank D., Worcester, Mass. Loom. 2,106,504; Jan. 25.
Link-Belt Company. (See Burnell, E. J., and Heacock, assignors.)
Lipton, Ruby, New York, N. Y. Head covering. 2,106,570; Jan. 25.
Lipton, Ruby, New York, N. Y. Hat. 2,106,571; Jan. 25.
Locke Insulator Corporation. (See McCoy, Robert L., assignor.)
Locke, John H. (See Howard, K. S., and Locke.)
Lockett, Andrew M., New Orleans, and H. H. Holloway, Amite, La. Method and apparatus for separating gravel, and the like. 2,106,532; Jan. 25.
Lomas, Hazen G., Detroit, Mich. Dispensing device. 2,106,377; Jan. 25.
London Electric Wire Company and Smiths Limited, The. (See Sands, Alexander J., assignor.)
Long, George, assignor, by mesne assignments, to Franklin Steel Works, Joliet, Ill. Bag opening mechanism. 2,106,603; Jan. 25.
Low, Frank K., Brooklyn, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Signaling system. 2,106,356; Jan. 25.
Lowy, Arthur, Newark, N. J., assignor to New York Engineering Company, New York, N. Y. Suction elevator. 2,106,183; Jan. 25.
Lubri-Zol Development Corporation, The. (See Lincoln, B. H., and Henriksen, assignors.)
Lucas, Leroy E. (See Fisk, L. E., and Lucas.)
Ludwig, Frank G., Lockport, Ill. Window structure. 2,106,281; Jan. 25.
Lumry, Carl C., assignor to Mount Arbor Nurseries, Shenandoah, Iowa. Display case. 2,106,487; Jan. 25.
Lucenge, Vincent J., Brooklyn, N. Y. Dental tool. 2,106,252; Jan. 25.
Luschanowsky, Alexander, Berlin, Germany. Refinement of magnesium and magnesium alloys. 2,106,221; Jan. 25.
Maas & Waldstein Co. et al. (See Barsky, G., Klinkenstein, Rohleder, and Silleck, assignors.)
MacIntyre, Hugh F. (See Brooks, H. L., and MacIntyre.)
Macken Machine Company. (See Putnam, C. A., and Robbins, assignors.)
Mackey, Stuart J., assignor to General Railway Signal Company, Rochester, N. Y. Highway crossing signaling system. 2,106,661; Jan. 25.
Magill, Paul L. F., Ramsomville, N. Y., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Manufacture of white lead. 2,106,555; Jan. 25.
Malinovsky, Andrew, South Gate, Calif. Ceramic composition. 2,106,410; Jan. 25.
Mallinckrodt, Charles O. (See Anderson, F. B., Mallinckrodt, and Stillwell, assignors.)
Marshall, Tola A., Floral Park, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telegraph system. 2,106,357; Jan. 25.
Martin & Schwartz, Inc. (See Pleuthner, Charles, assignor.)
Matthew, Theodore, Burlingame, Calif. Storage battery. 2,106,222; Jan. 25.
Matthews, George D., assignor to Tennessee Stove Works, Chattanooga, Tenn. Circulating heater. 2,106,642; Jan. 25.
Maurer, Edward D., New York, N. Y. Spectacle eyeshade. 2,106,615; Jan. 25.
McBreen, Clyde V., assignor to Benjamin Electric Mfg. Company, Des Plaines, Ill. Motor horn. 2,106,303; Jan. 25.
McClintock, O. B., Company. (See Schweiso, Clifford C., assignor.)
McClure, Glenn T. (See Fitch, E. R., and McClure.)
McCoy, Robert L., assignor to Locke Insulator Corporation, Baltimore, Md. Switch and bus insulator stack. 2,106,616; Jan. 25.
McCune, Joseph C., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Compressor. 2,106,488; Jan. 25.
McCune, Joseph C., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Magnetic track brake. 2,106,489; Jan. 25.
McDonnell, Vincent D., Chicago, Ill. Gas generator. 2,106,184; Jan. 25.
McFadden, Ross M., Los Angeles, Calif. Curler pad. 2,106,326; Jan. 25.
McGee, Robert E., Beeville, Tex. Actuating mechanism for hydraulic brakes. 2,106,504; Jan. 25.
McIntyre, Malcolm, Old Greenwich, Conn. Sailing craft. 2,106,432; Jan. 25.
Meagher, Andrew C., Los Angeles, Calif. Proportioning valve. 2,106,572; Jan. 25.
Mees, Eberhard F., Milwaukee, Wis. Insulating composition. 2,106,617; Jan. 25.
Mehaffey, Robert J., Minneapolis, Minn. Casting bobber. 2,106,618; Jan. 25.
Meinema, Herbert E. (See Crossley, A., and Meinema.)
Meinema, Herbert E. (See Neighbors, C. C., and Meinema.)
Mellen, George, Diamond Head, and L. A. Hicks, Honolulu, Hawaii. Signal device. 2,106,643; Jan. 25.
Menge, Clarence H., Detroit, Mich., assignor to The Murray Corporation of America. Frame and seat. 2,106,644; Jan. 25.
Menger, Francis B. (See La Pierre, C. W., and Menger.)
Mergott, J. B., Company, The. (See Hiering, William C., assignor.)
Merrill, Donald G., West Hartford, assignor to Hartford-Empire Company, Hartford, Conn. Drift controlling apparatus for glassware annealing lehrs. 2,106,678; Jan. 25.
Merrill, Wilbur L., Scotia, N. Y., assignor to General Electric Company. Washing apparatus. 2,106,619; Jan. 25.
Metal Office Furniture Company. (See Wege, Peter M., assignor.)
Meyer, George J., Milwaukee, Wis. Sealing containers. 2,106,464; Jan. 25.
Micromatic Hone Corporation. (See Connor, Kirke W., assignor.)
Mitchell, Loris E., Bloomfield, N. J., assignor, by mesne assignments, to Radio Corporation of America. Metal tube lead-in bushing. 2,106,294; Jan. 25.
Moller, John H., Charleston, W. Va., assignor to Libbey-Owens-Ford Glass Company, Toledo, Ohio. Sheet glass handling apparatus. 2,106,573; Jan. 25.
Monowatt Electric Corporation. (See Benander, George B., assignor.)
Monsanto Chemical Company. (See Jenkins, Russell L., assignor.)
Monsanto Chemical Company. (See Jenkins, R. L., and Levine, assignors.)
Mooney, Fred L., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for pressing the bottoms of shoes. 2,106,277; Jan. 25.
Moore Corporation, The. (See Pletcher, H., Bishop, and Jones, assignors.)
Moore, Francis R., Augusta, Kans., assignor to Socony-Vacuum Oil Company, Incorporated, New York, N. Y. Liquid level indicator. 2,106,574; Jan. 25.
Moore, Frank W., Lennon, Mich. Milk pail cover and fastener therefor. 2,106,378; Jan. 25.
Moore, John T., Tampa, Fla. Tonsillotome. 2,106,575; Jan. 25.
Moorhead, Walter A., Sandy Springs, S. C. Fertilizer distributor. 2,106,645; Jan. 25.
Morin, Louis H., New York, N. Y., assignor to The Coca-Cola Company, Wilmington, Del. Vending machine. 2,106,185; Jan. 25.
Morin, Louis H., Bronx, assignor to Whitehall Patents Corporation, New York, N. Y. Pot for die casting machines. 2,106,505; Jan. 25.
Morse, William E., Rapid City, S. Dak. Distension douche. 2,106,433; Jan. 25.
Morton, James, and R. S. E. Hannay, assignors to F. N. F. Limited, Purly Way, Croydon, England. Knitting machinery. 2,106,434; Jan. 25.
Mount Arbor Nurseries. (See Lumry, Carl C., assignor.)
Mulholland, David E., Reading, Pa. Abrasive sleeve and forming the same. 2,106,186; Jan. 25.
Munro, Alexander C., Britannia Beach, British Columbia, Canada. Elevator classifier. 2,106,154; Jan. 25.
Munro, Alexander C., Britannia Beach, British Columbia, Canada. Concentrator. 2,106,155; Jan. 25.
Munro, Alexander C., Britannia Beach, British Columbia, Canada. Classification. 2,106,156; Jan. 25.
Munro, Webdell P., Bound Brook, and E. H. Northey, and H. E. Lecher, Plainfield, assignors to The Calco Chemical Company, Inc., Bound Brook, N. J. Manufacture of acetamide. 2,106,607; Jan. 25.
Murphey, William, Chattanooga, Tenn. Child's garment. 2,106,646; Jan. 25.
Murray Corporation of America, The. (See Menge, Clarence H., assignor.)
Narrow Fabric Company, The. (See Busch, Conrad J., assignor.)
National Aluminate Corporation. (See Kirkpatrick, Willard H., assignor.)
National Battery Company. (See Reetz, Carl G., assignor.)
National Postal Meter Company. (See Ryan, Commodore D., assignor.)
Naugler, Walter E., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Spray coating apparatus. 2,106,187; Jan. 25.
Neck, Gustav C., Nossebro, Sweden. Manufacture of insulator heads. 2,106,647; Jan. 25.

Nelder, Robert G., assignor to The Submarine Gold Mining Company, Boise, Idaho. Gold mining machinery. 2,106,187; Jan. 25.
Neighbors, Charles C., and H. E. Meinema, assignors to Johnson Laboratories, Inc., Chicago, Ill. Intermediate-frequency coupling device. 2,106,253; Jan. 25.
Neon Lights, Incorporated. (See Smith, Arthur L., assignor.)
New York Engineering Company. (See Lowy, Arthur, assignor.)
Newell, Joseph O., Los Angeles, Calif. Vanity mirror device. 2,106,354; Jan. 25.
Newing, Edward G., Dover, England. Mounting printing surfaces. 2,106,379; Jan. 25.
Nichols, Beverly R. (See Ring, J. J., Nichols, and Pfau.)
Nielsen, Frédéric, Malbosc-Brunssuis, France. Reflector, in particular for vehicles. 2,106,533; Jan. 25.
Nilson, Harold, assignor of one-third to J. A. Edeby, Wayzata, and one-third to R. Berglund, Minneapolis, Minn. Pressure pump. 2,106,620; Jan. 25.
Nordengren, Sven G., assignor to Aktiebolaget Kemiska Patenter, Landskrona, Sweden. Manufacture of superphosphate. 2,106,222; Jan. 25.
Northey, Elmore H. (See Munro, W. P., Northey, and Lecher.)
Novick, Abraham, Flushing, assignor to F. L. Smithe Machine Co. Inc., New York, N. Y. Envelope machine. 2,106,256; Jan. 25.
O'Connor, John L., Taft, Calif. Cap pistol. 2,106,648; Jan. 25.
O'Donnell, Michael V., Pittsburgh, Pa. Multiple leaf spring. 2,106,411; Jan. 25.
Oliver, Charles J., Jr., Tillamook, Oreg. Measuring device. 2,106,649; Jan. 25.
Ohaeseren, Otto, Beckum, Germany. Rope transmission. 2,106,353; Jan. 25.
Olds, Reginald E., Los Angeles, Calif. Stationary inner slide tube for trombones and similar instruments. 2,106,327; Jan. 25.
Olsen, Tinius, Testing Machine Company. (See Lewis, Robert B., assignor.)
Olsen, Harry F., Collingswood, N. J., assignor to Radio Corporation of America. Device for transforming acoustical energy into electrical energy. 2,106,224; Jan. 25.
Ong, David G. (See Kummer, Ernest W., assignor.)
Orthner, Ludwig, Frankfort-on-the-Main, and E. Zaucher, Cologne-Mulheim, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Mercapto-thiazole derivatives. 2,106,465; Jan. 25.
Osborne, C. J., Co. et al. (See Barsky, G., Klinkenstein, Rohleder, and Silleck, assignors.)
Oviatt, James, Los Angeles, Calif. Shirt. 2,106,412; Jan. 12.
Owler, Thomas D., Chicago, Ill., assignor, by mesne assignments, to S. Karpen & Bros. Revolving seat. 2,106,650; Jan. 25.
Packard Motor Car Company. (See Tibbetts, Milton, assignor.)
Paige, Arthur E., Philadelphia, Pa. Underfeed fire pot. 2,106,621; Jan. 25.
Paper Patents Company. (See Fourness, Charles A., assignor.)
Parcells, Paul, Chicago, Ill., assignor to Geo. Whiting Company. Bending rolls machine. 2,106,534; Jan. 25.
Parker, Arthur H. (See Sebell, Harry, assignor.)
Parker, Walter H., Pittsburgh, and N. J. Seibert, Wilkinsburg, assignors to Pittsburgh Equitable Meter Company, Pittsburgh, Pa. Piston gasket. 2,106,651; Jan. 25.
Parkes, Derle W., and E. B. Evans, West Bromwich, assignors to Robinson Brothers Limited, Oldbury, Birmingham, England. Absorption of acidic gases. 2,106,435; Jan. 25.
Parsell, Ray L., administrator. (See Stiennon, Louis.)
Parvin, Edward G., Roselle, assignor to Syncro Machine Company, Newark, N. J. Control means for web wrapping machines. 2,106,490; Jan. 25.
Patent Products Company. (See Shoglow, Harry, assignor.)
Pattison, Herbert J., Detroit, and W. K. Barton, Grosse Pointe Park, assignors to Briggs Manufacturing Company, Detroit, Mich. Portable polishing machine. 2,106,538; Jan. 25.
Paul, Ralph H., West Kensington, London, England. Game scorer. 2,106,496; Jan. 25.
Pennsylvania Railroad Company. (See Grindall, W. H., and Billstein, assignors.)
Pepin, Charles H. (See Besson, R. A., and Pepin.)
Petersen, Aage V., Copenhagen, Denmark, assignor to F. L. Smidth & Company, New York, N. Y. Alternating current apparatus. 2,106,556; Jan. 25.
Pfau, Arnold. (See Ring, J. J., Nichols, and Pfau.)
Pflager, Harry M., St. Louis, Mo., assignor to General Steel Castings Corporation, Granite City, Ill. Car truck. 2,106,390; Jan. 25.
Pinson, Martin L., Phoenix, Ariz., assignor of one-half to Rap A. Pinson, Charlotte, Mich. Load indicator device. 2,106,652; Jan. 25.
Pinson, Rap A. (See Pinson, Martin L., assignor.)
Pittman, Ralph E., Pine Bluff, Ark. Pole fitting. 2,106,305; Jan. 25.
Pittsburgh Equitable Meter Company. (See Parker, W. H., and Seibert, assignors.)
Pletcher, Harry, M. Bishop, and B. C. Jones, assignors to The Moore Corporation, Joliet, Ill. Broiler. 2,106,506; Jan. 25.
Pleuthner, Charles, assignor to Martin & Schwartz, Inc., Buffalo, N. Y. Gasoline dispenser. 2,106,679; Jan. 25.
Pneumatic Scale Corporation. (See Tiano, Dominic W., assignor.)
Podgurski, Walter, Philadelphia, Pa. Truing tool for watch balance wheels. 2,106,653; Jan. 25.
Poe, Alfred L., Jacksonville, Fla. Adjustable carton cleat. 2,106,654; Jan. 25.
Pollard, John A., Edmonton, Alberta, Canada. Target. 2,106,655; Jan. 25.
Poté, Alfred J., Chelsea, assignor, by mesne assignments, to Raytheon Manufacturing Company, Newton, Mass. Lamp switching mechanism. 2,106,413; Jan. 25.
Povenz, Friedrich, Rheinfelden/Baden, and A. Ribothe, Wolfen, Kreis Bitterfeld, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Purifying chlorinated hydrocarbons. 2,106,158; Jan. 25.
Power, James T., Wilmington, Del., and K. B. Brown, Tamaqua, Pa., assignors to Atlas Powder Company, Wilmington, Del. Acceleration of gelatinization of cellulose nitrate and liquid nitric esters and the product thereof. 2,106,168; Jan. 25.
Price, Nathan C., Berkeley, Calif. Control system. 2,106,414; Jan. 25.
Priesman, Neil Y. (See Flegal, J. R., and Priesman.)
Pritschow, Karl, and H. Dopheide, assignors to Voigtländer & Sohn Aktiengesellschaft, Brunswick, Germany. Photographic camera. 2,106,622; Jan. 25.
Proctor, B. A., Company, Inc. (See Proctor, B. A., and Thiede, assignors.)
Proctor, Barton A., Larchmont, and F. C. W. Thiede, Hempstead, assignors to B. A. Proctor Company, Inc., New York, N. Y. Making phonographic records. 2,106,623; Jan. 25.
Pugh, Charles H., Limited. (See Leitch, George A., assignor.)
Punte, William F., Syracuse, assignor to Continental Can Company, Inc., New York, N. Y. Side seam for metal can bodies. 2,106,656; Jan. 25.
Purinton, Bernard S., East Liverpool, Ohio. Method and apparatus for the molding of covered ceramic receptacles. 2,106,415; Jan. 25.
Putman, Claude A., and C. F. Bobbins, assignors to Markem Machine Company, Keene, N. H. Type wheel. 2,106,306; Jan. 25.
Putman, Palmer C., Harwich, Mass. Aero-electric generation system. 2,106,557; Jan. 25.
Pyle, Marie Bruce, Dallas, Tex. Table. 2,106,436; Jan. 25.
Radio Corporation of America. (See Mitchell, Loris E., assignor.)
Radio Corporation of America. (See Olson, Harry F., assignor.)
Raduns, Solomon, Brooklyn, N. Y. Metallic bed. 2,106,657; Jan. 25.
Rakos, Alexander J., Chicago, Ill. Alarm system. 2,106,658; Jan. 25.
Ramet Corporation of America. (See Balke, Clarence W., assignor.)
Ray, George L., Charlotte, N. C. Roofing shingle. 2,106,624; Jan. 25.
Ray, Philip A., assignor to Hercules Powder Company, Wilmington, Del. Xanthates of resin alcohols and their production. 2,106,558; Jan. 25.
Raymond, Ralph, Nyack, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telephone system. 2,106,360; Jan. 25.
Rentmeesters, Pierre J., Brussels, Belgium. Photographic apparatus. 2,106,659; Jan. 25.
Reynolle, A., & Company Limited. (See Leeson, B. H., and Wild, assignors.)
Raytheon Manufacturing Company. (See Poté, Alfred J., assignor.)
Redmer, Martin H., Chicago, Ill. Screw locking means. 2,106,278; Jan. 25.
Reetz, Carl G., assignor to National Battery Company, St. Paul, Minn. Storage battery testing device. 2,106,687; Jan. 25.
Reichard, Wade H., assignor to General Railway Signal Company, Rochester, N. Y. Highway crossing signaling system. 2,106,660; Jan. 25.
Reiland, Frank D., Chicago, Ill. Support for reinforcing steel. 2,106,576; Jan. 25.
Replogle, George W. (See Huffman, W. H., and Replogle.)
Rich, Solomon, Glen Ridge, N. J. Keyboard cam actuating roll for typesetting machines. 2,106,225; Jan. 25.
Richards, Harry. (See Curran, Edward N., assignor.)
Rieche, Alfred. (See Provenz, F., and Rieche.)
Ring, Joseph J., and B. R. Nichols, Wauwatosa, and A. Pfau, assignors to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Governor. 2,106,664; Jan. 25.
Robbins, Charles F. (See Putnam, C. A., and Robbins.)
Roberts, Hugh, Jr., assignor to Cen-Tennial Cotton Gin Company, Columbus, Ga. Conveyer-distributor for cotton and like materials. 2,106,380; Jan. 25.
Robinson Brothers Limited. (See Parkes, D. W., and Evans, assignors.)
Robinson, R. S. & A., Limited. (See Jones, Alfred J., assignor.)

Röhm & Haas Company. (See Bruson, H. A., and Covert, assignors.)

Rohleder, Charles. (See Barsky, G., Klinkenstein, Rohleder, and Silleck.)

Rolls Royce Limited. (See Leslie, Ivan A., assignor.)

Roney, Bela, Annapolis, Md. Arcronograph. 2,106,190; Jan. 25.

Ross, William B., New York, N. Y. Necktie and making the same. 2,106,256; Jan. 25.

Rostinsky, Walter. (See Zorn, H., and Rostinsky.)

Ross, Simon G., Marblehead, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., Manufacture of reinforced shoe bottom units. 2,106,279; Jan. 25.

Rowe, William, assignor of one-third to B. F. J. Storton, San Diego, Calif. Direction signal for automobiles. 2,106,660; Jan. 25.

Rough, Alvan S., Evansville, Ind. Pouring spout. 2,106,281; Jan. 25.

Rubel, Charles F. (See Christensen, N. V., Rubel, Smith, and Le Vesconte.)

Rubel, Charles F., Chicago, and H. J. Le Vesconte, Western Springs, assignors to Union Special Machine Company, Chicago, Ill. Fabric feeding mechanism for sewing machines. 2,106,536; Jan. 25.

Ruhlof, Frederic C., assignor to Bucyrus-Erie Company, South Milwaukee, Wis. Apparatus for constructing levees and the like. 2,106,155; Jan. 25.

Runge, Wilhelm, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Automobile radio apparatus. 2,106,159; Jan. 25.

Ryan, Commodore D, assignor to National Postal Meter Company, Los Angeles, Calif. Mail treating machine. 2,106,191; Jan. 25.

Rylander, Anders J. E. and K. G. V., Stockholm, Sweden. Pressure controlling valve. 2,106,537; Jan. 25.

Rylander, Karl G. V. (See Rylander, Anders J. E. and K. G. V.)

St. Joseph Iron Works. (See Schmidtke, Albert H., assignor.)

Sardeson, Karl, Flushing, N. Y. Dispensing device. 2,106,290; Jan. 25.

Sands, Alexander J., Westminster, assignor to The London Electric Wire Company, and Smiths-Limited, London, England. Machine for covering wire with a helical wrapping. 2,106,437; Jan. 25.

Sattler, Johann, Bohemia, Czechoslovakia. Wind musical instrument. 2,106,281; Jan. 25.

Savage, Will R., Omaha, Nebr., assignor of one-half to H. S. Haas, Chicago, Ill. Motor fuel composition. 2,106,661; Jan. 25.

Savage, Will R., Omaha, Nebr., assignor of one-half to H. S. Haas, Chicago, Ill. Motor fuel composition. 2,106,662; Jan. 25.

Saville, William C., Belvedere, Calif. Method and apparatus for making and decanting champagne. 2,106,192; Jan. 25.

Schaper, William A., assignor to Johnson Laboratories, Inc., Chicago, Ill. Coupling means for permeability-tuned circuits. 2,106,226; Jan. 25.

Scharschu, Charles A., and G. C. Kiefer, Brackenridge, Pa., assignors to Allegheny Steel Company. Surface treatment of metal to prevent localized corrosive attack. 2,106,227; Jan. 25.

Schlegel, Alfred A., Akron, assignor to The Jaite Company, Jaite, Ohio. Box. 2,106,663; Jan. 25.

Schluchter, Alfred W. (See Boegehold, A. L., and Schluchter.)

Schmidt, Karl, Krefeld, Germany. Process and composition for dyeing with aniline black. 2,106,382; Jan. 25.

Schmidtke, Albert H., assignor to St. Joseph Iron Works, St. Joseph, Mich. Basket cover. 2,106,328; Jan. 25.

Schmitt, George P., New York, N. Y. Cigarette medication. 2,106,467; Jan. 25.

Schmitt, Paula F., assignor to A. Fowler, St. Louis, Mo. Extension shelf. 2,106,538; Jan. 25.

Schneider, George. (See Dreyfus, C., and Schneider.)

Schneider, Wilhelm, Dessau in Anhalt, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Manufacture of carbocyanine dyes. 2,106,383; Jan. 25.

Schnitzspahn, Karl, Offenbach-on-the-Main, Germany, assignor to General Aniline Works, Inc., New York, N. Y. Stable diazo salt preparations and preparing them. 2,106,539; Jan. 25.

Schober, Oskar, Horrem, Bezirk Koeln, Germany, assignor to American Lurgi Corporation, New York, N. Y. Coloring and protective coatings. 2,106,228; Jan. 25.

Schreth, Ernest H., Palisade, N. J. Making wood products. 2,106,468; Jan. 25.

Schwartz, Fred J., Toledo, Ohio. Draper hanger. 2,106,429; Jan. 25.

Schwartz, Nathan, New York, N. Y. Filter for filter type respirators. 2,106,257; Jan. 25.

Schwartzwalder, Karl, and W. S. Kirk, Flint, assignors to General Motors Corporation, Detroit, Mich. Sealing composition, method of using same, and articles made therewith. 2,106,578; Jan. 25.

Schweiss, Clifford C., assignor to O. B. McClintock Company, Minneapolis, Minn. Thermometer. 2,106,507; Jan. 25.

Schubert, Julius, assignor to Steiner Bros. Inc., Long Island City, N. Y. Electric soldering iron. 2,106,439; Jan. 25.

Scott, Ephriam J., Forest Hills, Mass., assignor to C. C. H. Thomas. Apparatus for treating materials. 2,106,329; Jan. 25.

Sebell, Harry, Boston, assignor of one-half to Arthur H. Parker, Lexington, Mass. Can. 2,106,330; Jan. 25.

Seco, Inc. (See Birdahl, Edward R., assignor.)

Seibert, Nelson J. (See Parker, W. H., and Seibert.)

Sell, Gilbert R., Cynwyd, Pa., assignor, by mesne assignments, to Buffalo Electric Furnace Corporation, Buffalo, N. Y. Conveyor mechanism for electric furnaces. 2,106,469; Jan. 25.

Sexton, Everett P., East McKeesport, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Fluid pressure brake. 2,106,491; Jan. 25.

Seyferth, Carl G., Muskegon, Mich. Fifth wheel. 2,106,258; Jan. 25.

Sharples Specialty Company, The. (See Bath, Wilmer H., assignor.)

Shaw, Robert W., London, Ontario, Canada. Insole. 2,106,508; Jan. 25.

Shell Development Company. (See Deanesly, Richard M., assignor.)

Shell Development Company. (See Groll, H. P. A., and Hearne, assignors.)

Shell Development Company. (See Langedijk, Siegfried L., assignor.)

Shell Development Company. (See Tijmstra, Sijbren, assignor.)

Sherbondy, William E., Shaker Heights, Ohio. Dispensing receptacle for plastic substances. 2,106,577; Jan. 25.

Sherritt, Frank. (See Beaumont, C. A., and Sherritt.)

Shoe Form Co. (See De Witt, William J., assignor.)

Shoglow, Harry, Cambridge, assignor to Patent Products Corp., Boston, Mass. Bathing accessory. 2,106,664; Jan. 25.

Shonnard, Orlando D., Upper Montclair, assignor to Joseph Dixon Crucible Company, Jersey City, N. J. Device for applying granular materials. 2,106,470; Jan. 25.

Siemens-Schuckertwerke Aktiengesellschaft. (Gleichmann, Hans, assignor.)

Silleck, Clarence F. (See Barsky, G., Klinkenstein, Rohleder, and Silleck.)

Simmons, Arthur W., King's Cross, London, England, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Fluid pressure brake. 2,106,471; Jan. 25.

Simmons, Jack W., Tallahassee, Fla. Wire bound package. 2,106,384; Jan. 25.

Sinninger, Dwight V., assignor to Johnson Laboratories, Inc., Chicago, Ill. Pre-selector system. 2,106,229; Jan. 25.

Sirian Lamp Company. (See Braselton, Chester H., assignor.)

Skinner, John G., Anaconda, Mont. Flange oiler. 2,106,665; Jan. 25.

Sloan, Theodore H., Charleroi, assignor to G. M. S. Corporation, Pittsburgh, Pa. Making hollow glassware. 2,106,193; Jan. 25.

Smidth, F. L., & Company. (See Petersen, Aage V., assignor.)

Smith, Arthur L., La Canada, assignor to Neon Lights, Incorporated, Los Angeles, Calif. Electric sign display and making same. 2,106,331; Jan. 25.

Smith, Clarence C. (See Christensen, N. V., Rubel, Smith, and Le Vesconte.)

Smith, Ewen R., Penig in Saxony, Germany. Apparatus for the forming of thick paper articles such as barrels, tubs, plates, and the like. 2,106,440; Jan. 25.

Smith, Harry F., assignor to General Motors Corporation, Dayton, Ohio. Hinge. 2,106,509; Jan. 25.

Smith, Herbert K., Inglewood, Calif. Wrist watch band. 2,106,540; Jan. 25.

Smith, Harvey A., Webster Groves, Mo. Automatic transmission control. 2,106,307; Jan. 25.

Smith, Rolf M., assignor to General Motors Corporation, Dayton, Ohio. Refrigerating apparatus. 2,106,685; Jan. 25.

Smithe, F. L., Machine Co. Inc. (See Novick, Abraham, assignor.)

Socony-Vacuum Oil Company. (See Denniston, R. F., and Hawthorne, assignors.)

Socony-Vacuum Oil Company. (See Moore, Francis R., assignor.)

Socony-Vacuum Oil Company. (See Webb, Carroll C., assignor.)

Soderberg, John L., Omaha, Nebr. Window. 2,106,308; Jan. 25.

Solvay Process Company, The. (See Denny, Alfred S., assignor.)

Solvay Process Company, The. (See Weston, Charles F., assignor.)

Somervell, Howard. (See Crossen, R. W., Jr., and Somervell.)

South Bend Current Controller Company. (See Guin, Lester W., assignor.)

Splaine, Edward M., assignor to American Optical Company, Southbridge, Mass. Ophthalmic mounting. 2,106,282; Jan. 25.

Splaine, Edward M., assignor to American Optical Company, Southbridge, Mass. Ophthalmic mounting. 2,106,283; Jan. 25.

Splaine, Edward M., assignor to American Optical Company, Southbridge, Mass. Ophthalmic mounting. 2,106,284; Jan. 25.

Springer, Ray W., Detroit, Mich. Shim structure. 2,106,226; Jan. 25.

Spurlin, Robert L., Port Arthur, Tex. Ejector. 2,106,361; Jan. 25.

Stalcup, Ernest F., Rutledge, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Steam jet refrigeration apparatus. 2,106,362; Jan. 25.

Standard Oil Development Company. (See Gleason, Anthony M., assignor.)

Standard Oil Development Company. (See Young, P. L., and Wiesevich, assignors.)

Stead Rail Anchor Company, The. (See Cooper, Francis W., assignor.)

Steiner Bros. Inc. (See Schubert, Julius, assignor.)

Stelser, Franz H. B., assignor to "Universelle" Cigarettenmaschinen-Fabrik J. C. Müller & Co., Dresden, Germany. Apparatus for placing wrappers on the rolling apron of a cigar rolling device. 2,106,441; Jan. 25.

Stevens, Horace D., assignor to The Firestone Tire & Rubber Company, Akron, Ohio. Building method and apparatus. 2,106,442; Jan. 25.

Stewart, Edwin, Philadelphia, Pa. Electric switch. 2,106,666; Jan. 25.

Stimpson, Louis, deceased, New Haven, by R. L. Parsell, Pine Orchard, administrator, assignor to Winchester Repeating Arms Company, New Haven, Conn. Multiple-barrel firearm. 2,106,416; Jan. 25.

Stillwell, Albert L. (See Andersen, P. B., Mallinckrodt, and Stillwell.)

Stockmar, Otto, Hanover, assignor to Vereinigte Leichtmetallwerke G. m. b. H., Hanover-Linden, Germany. Coated aluminum product. 2,106,259; Jan. 25.

Storton, Bernard F. J. (See Rowe, William, assignor.)

Stover, Emery F., Wynnewood, Pa. Gyroscopic fluid meter. 2,106,194; Jan. 25.

Submarine Gold Mining Company, The. (See Neider, Robert G., assignor.)

Sullivan Machinery Company. (See Baber, Job D., assignor.)

Sundstrand, Oscar J., Bridgeport, Conn., assignor to Underwood Elliott Fisher Company, New York, N. Y. Paper supporting and feeding apparatus. 2,106,285; Jan. 25.

Surety Rubber Company, The. (See Hall, Samuel S. and J. B., assignors.)

Swart, Leland E., Mountain Lakes, N. J., assignor to American Telephone and Telegraph Company. Gas-filled tube circuits. 2,106,336; Jan. 25.

Swart, Leland E., Mountain Lakes, N. J., assignor to American Telephone and Telegraph Company. Gas discharge tube circuits. 2,106,337; Jan. 25.

Sweeney, Benjamin F., assignor of one-half to H. T. Barr, Long Beach, Calif. Folding table. 2,106,309; Jan. 25.

Syncro Machine Company. (See Parvin, Edward G., assignor.)

Talley, Clyde. (See Tyree, H. J., Talley, and Gill.)

Tanner, Walton B., Niagara Falls, N. Y., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Manufacture of formamide. 2,106,579; Jan. 25.

Tauts, Herbert R., Milwaukee, Wis. Circular saw apparatus. 2,106,288; Jan. 25.

Taylor, Herbert R. (See Kreilick, L. W., and Taylor.)

Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Knoll, Max, assignor.)

Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Runge, Wilhelm, assignor.)

Tennessee Stove Works. (See Matthews, George D., assignor.)

Tesher, Saul, Brooklyn, and S. A. Keronea, New York, N. Y., Holder for a roll of strip material. 2,106,363; Jan. 25.

Thiede, Ferdinand C. W. (See Proctor, B. A., and Thiede.)

Thiry Léon Huy, Belgium. Mounting of electric insulators. 2,106,667; Jan. 25.

Thomas, C. C. H. (See Scott, Ephriam J., assignor.)

Thomas, Francis C. O., assignor to Frost Veneer and Plywood Company, Sheboygan, Wis. Plywood and furniture made therefrom. 2,106,443; Jan. 25.

Thompson, Parke H., II, Maplewood, assignor to Alco Valve Company, St. Louis, Mo. Thermostatic fitting. 2,106,668; Jan. 25.

Thompson Products Incorporated. (See Hufford, George H., assignor.)

Thomson, Alfred J., assignor to Bulldog Electric Products Company, Detroit, Mich. Circuit breaker. 2,106,580; Jan. 25.

Thorn, Percy M., New Rochelle, N. Y. Closure for receptacles. 2,106,364; Jan. 25.

Thornton, Stuart R., Oakland, Calif. Nut lock. 2,106,669; Jan. 25.

Thumm, William F., Lombard, Ill. Trimming. 2,106,260; Jan. 25.

Tiano, Dominic W., Boston, assignor to Pneumatic Scale Corporation, Limited, Quincy, Mass. Closure applying machine. 2,106,365; Jan. 25.

Tibbetts, Milton, assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle. 2,106,196; Jan. 25.

Tijmstra, Sijbren, Berkeley, assignor to Shell Development Company, San Francisco, Calif. Process and apparatus for contacting fluids. 2,106,366; Jan. 25.

Tjaarda, John, Birmingham, assignor to Briggs Manufacturing Company, Detroit, Mich. Engine mounting. 2,106,541; Jan. 25.

Topping, John A., Brownville, N. Y. Covering material. 2,106,395; Jan. 25.

Topping, John A., Brownville, N. Y. Roof construction. 2,106,396; Jan. 25.

Tornblom, Nils, A., Chicago, Ill., assignor to Appleton Electric Company. Explosionproof union. 2,106,444; Jan. 25.

Tret-O-Lite Company, The. (See De Groote, Melvin assignor.)

Tret-O-Lite Company, The. (See De Groote, M., and Keiser, assignors.)

Tripp, Newell B., Joplin, Mo. Refrigerator closure means. 2,106,230; Jan. 25.

Tullis, Boyd W. (See Coleman, S., and Tullis.)

Tuten, James M., assignor to Draper Corporation, Hopedale, Mass. Adjustable box plate. 2,106,550; Jan. 25.

Twomley, Herbert E., Riverside, Calif., assignor, by mesne assignments, to Food Machinery Corporation. Crate lidding machine. 2,106,543; Jan. 25.

Tyree, Horace J., C. Talley, and G. A. Gill, Mexia, Tex. Shuttle guard attachment for looms. 2,106,510; Jan. 25.

Underwood Elliott Fisher Company. (See Sundstrand, Oscar J., assignor.)

Union Oil Company of California. (See Bray, Ulrice E., assignor.)

Union Special Machine Company. (See Christensen, N. V., Rubel, Smith, and Le Vesconte, assignors.)

Union Special Machine Company. (See Rubel, C. F., and Le Vesconte, assignors.)

United Autographic Register Co. (See Cooke, Allen B., assignor.)

United Research Corporation. (See Black, William A., assignor.)

United Shoe Machinery Corporation. (See Bertrand, Frederic E., assignor.)

United Shoe Machinery Corporation. (See Benson, E. A., and Pepin, assignors.)

United Shoe Machinery Corporation. (See Fogelson, Emil, assignor.)

United Shoe Machinery Corporation. (See Fossa, Joseph, assignor.)

United Shoe Machinery Corporation. (See Mooney, Fred L., assignor.)

United Shoe Machinery Corporation. (See Naugler, Walter E., assignor.)

United Shoe Machinery Corporation. (See Ross, Simon G., assignor.)

United States Rubber Products, Inc. (See Adamson, Seth, assignor.)

Universal Products Co. (See Wollner, Hans, assignor.)

"Universelle" Cigarettenmaschinen-Fabrik J. C. Müller & Co. (See Stelzer, Franz H. B., assignor.)

Unwin, Kenneth J., Schenectady, N. Y., assignor to General Electric Company. Electric switch. 2,106,581; Jan. 25.

Utility Manufacturing Company. (See Hutchens, Edward, assignor.)

Veitch, Edward L., Piedmont, assignor, by mesne assignments, to Vogue Pin Company of California, Oakland, Calif. Hairpin. 2,106,417; Jan. 25.

Vereinigte Leichtmetallwerke G. m. b. H. (See Stockmar, Otto, assignor.)

Vogue Pin Company of California. (See Veitch, Edward L., assignor.)

Voigtländer & Sohn Aktiengesellschaft. (See Pritschow, K., and Dopheide, assignors.)

Vollmer, Walter G., assignor to H & H Machine & Motor Parts Co., St. Louis, Mo. Motor-block stand. 2,106,367; Jan. 25.

Wade, Lorentz G., Baltimore, Md. assignor to Western Electric Company, Incorporated, New York, N. Y. Drying device. 2,106,445; Jan. 25.

Wagner Electric Corporation. (See Dick, Burns, assignor.)

Wagner, Hans, Magdeburg, Germany. Car ventilator. 2,106,418; Jan. 25.

Walker, O. S., Co. Inc. (See Beechlyn, John T., assignor.)

Walker, Thomas M., Auburn, N. Y. Antiskid overshoe. 2,106,670; Jan. 25.

Wall, George, Manchester, England, assignor to General Electric Company. Prepayment meter for electricity, gas, and like commodities. 2,106,582; Jan. 25.

Wallace, John F., assignor to The Cleveland Pneumatic Tool Company, Cleveland, Ohio. Collapsible strut. 2,106,289; Jan. 25.

Wanamaker, Ernest, Chicago, Ill. Air conditioning system. 2,106,515; Jan. 25.

Warren, John W., Knoxville, Tenn. Building unit and wall. 2,106,287; Jan. 25.

Warrick, Jane E., Tampa, Fla. Valve. 2,106,310; Jan. 25.

Watson, F. H., Company, The. (See Hillier, Robert E., assignor.)
Watson, Frank H., Jonesboro, Ark. Valve stem and check valve therefor. 2,106,671; Jan. 25.
Waugh, Thomas. (See Canfield, R. W., and Waugh.)
Webb, Carroll C., Augusta, Kans., assignor to Socony-Vacuum Oil Company, Incorporated, New York, N. Y. Apparatus for producing asphalt. 2,106,553; Jan. 25.
Weckstrom, George S., New York, N. Y. Shower curtain suspension device. 2,106,585; Jan. 25.
Wege, Peter M., East Grand Rapids, assignor to Metal Office Furniture Company, Grand Rapids, Mich. Desk structure. 2,106,544; Jan. 25.
Weidemann, John A., Chicago, Ill. Fixing and preserving gross anatomical specimens and the like. 2,106,261; Jan. 25.
Wenzel, Wilhelm. (See Baehr, H., and Wenzel.)
Wescott, William B., Dover, Mass., assignor, by mesne assignments, to Addressograph-Multigraph Corporation, Cleveland, Ohio. Sheet aluminum planographic plate. 2,106,268; Jan. 25.
Western Electric Company. (See Wade, Lorentz G., assignor.)
Western Railroad Supply Company. (See Dinnerville, Walter, assignor.)
Western Union Telegraph Company. (See Demonet, Eugene A., assignor.)
Western Union Telegraph Company, The. (See Franklin, Lawrence W., assignor.)
Westinghouse Air Brake Company, The. (See Aikman, Burton S., assignor.)
Westinghouse Air Brake Company, The. (See Baughman, George W., assignor.)
Westinghouse Air Brake Company, The. (See Fitch, Hilary R., assignor.)
Westinghouse Air Brake Company, The. (See Fitch, E. R., and McClure, assignors.)
Westinghouse Air Brake Company, The. (See Hargnett, Harold L., assignor.)
Westinghouse Air Brake Company, The. (See Hewitt, Ellis E., assignor.)
Westinghouse Air Brake Company, The. (See McCune, Joseph C., assignor.)
Westinghouse Air Brake Company, The. (See Sexton, Everett P., assignor.)
Westinghouse Air Brake Company, The. (See Simmons, Arthur W., assignor.)
Westinghouse Electric & Manufacturing Company. (See Denault, Clinton L., assignor.)
Westinghouse Electric & Manufacturing Company. (See Stalcup, Ernest F., assignor.)
Weston, Charles F., Prince George County, Va., assignor, by mesne assignments, to The Solvey Process Company, New York, N. Y. Removing and/or preventing the deposition of scale in evaporators. 2,106,196; Jan. 25.
Wheeling Steel Corporation. (See Ewing, Wylie B., assignor.)
Whitehall Patents Corporation. (See Morin, Louis H., assignor.)
Whitehead, William, Cumberland, Md., assignor to Celanese Corporation of America. Applying liquid to textile materials. 2,106,311; Jan. 25.
Whiting, Geo., Company. (See Parcells, Paul, assignor.)
Whiting, Jasper, Boston, Mass. Pipe cleaner. 2,106,584; Jan. 25.
Whitson, Lincoln L., Van Nuys, Calif. Trailer leg. 2,106,230; Jan. 25.
Wiesevich, Peter J. (See Young, P. L., and Wiesevich.)
Wild, Robert W. (See Leeson, B. H., and Wild.)
Wildebour, Charles W., Olympia, Wash. Automatic liquid shut-off device. 2,106,197; Jan. 25.
Wiley, Lee M., assignor to Delta Electric Company, Marion, Ind. Bicycle lamp. 2,106,231; Jan. 25.
Wilhelm, Christian, assignor, by mesne assignments, to Automatic Temperature Control Co., Inc., Philadelphia, Pa. Automatic control system. 2,106,262; Jan. 25.
Wilkins, Roy, assignor to K. P. P. Electric Company, San Francisco, Calif. Contact for electrical apparatus. 2,106,232; Jan. 25.
Williams, Randolph P., Hampton, Va. Air metered shock absorber for airplane landing gears. 2,106,198; Jan. 25.
Williams, Robert A., Chicago, Ill. Bookbinding means. 2,106,511; Jan. 25.
Willing, Joseph E., assignor to General Railway Signal Company, Rochester, N. Y. Highway crossing signaling system. 2,106,683; Jan. 25.
Willing, Joseph E. (See Field, O. S., and Willing.)
Wilson, David E., Santa Monica, Calif. Automobile signal device. 2,106,333; Jan. 25.
Winchester Repeating Arms Company. (See Stiennon, Louis, assignor.)
Winter, Henry G., assignor to Anheuser-Busch, Incorporated, St. Louis, Mo. Cooling cabinet. 2,106,263; Jan. 25.
Winther, Anthony, Kenosha, Wis. Electromagnetic apparatus. 2,106,542; Jan. 25.
Wise, Raymond L., New York, N. Y. Package. 2,106,385; Jan. 25.
Wollner, Hans, Detroit, Mich., assignor to Universal Products Co., Inc. Universal joint mechanism. 2,106,672; Jan. 25.
Wood, John, Manufacturing Company. (See Woodford, Joseph C., assignor.)
Woodford, Joseph C., Haverford, assignor to John Wood Manufacturing Company, Inc., Conshohocken, Pa. Locating, locking, and indicating means for a shiftable gear. 2,106,686; Jan. 25.
Woolley, William J., Chicago, Ill. Air vent. 2,106,512; Jan. 25.
Wormser, Arthur, assignor to Faber & Schleicher, A. G., Offenbach-on-the-Main, Germany. Sheet delivery device and method. 2,106,199; Jan. 25.
Yellow Truck and Coach Manufacturing Company. (See Kelley, Oliver K., assignor.)
Yerges Manufacturing Company, The. (See Krellick, L. W., and Taylor, assignors.)
Young, Philip L., Westfield, and P. J. Wiesevich, Elizabeth, N. J., now, by judicial change of name, to P. J. Gaylor, assignors to Standard Oil Development Company. Extracting perfume materials unstable to heat. 2,106,200; Jan. 25.
Zaucker, Ewald. (See Orthner, L., and Zaucker.)
Zerk, Oscar U., Chicago, Ill. Spare wheel and tire cover. 2,106,586; Jan. 25.
Zorn, Hermann, Ludwighafen-on-the-Rhine, and W. Rosinsky, Oppau, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Production of high quality lubricating oils. 2,106,232; Jan. 25.

LIST OF REISSUE INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 25TH DAY OF JANUARY, 1938

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Alloy. R. H. Leach. 20,638; Jan. 25.
Fluoroscopic device. F. B. Talty. 20,641; Jan. 25.
Gear adjustment for steering gears, Worm. C. F. Hammond, Jr., and H. E. Pulleyblank. 20,637; Jan. 25.
Harvester, Cotton. B. R. Benjamin. 20,633; Jan. 25.
Lock and latch, Combined. J. E. Price. 20,639; Jan. 25.
Sign, Luminous display or reflector. J. C. Stimson. 20,640; Jan. 25.
Size controlling mechanism for boring machines and the like. H. L. Blood. 20,634; Jan. 25.
Wetting agents. B. R. Harris. 20,636; Jan. 25.
Yeast and the product produced thereby, Treatment of. C. P. Freshel. 20,635; Jan. 25.

LIST OF DESIGN INVENTIONS

Arch support, Longitudinal. R. H. Johnson. 108,099; Jan. 25.
Billfold. H. B. Welch. 108,125; Jan. 25.
Billford. H. B. Welch. 108,168; Jan. 25.
Blouse. H. de Bernard. 108,173; Jan. 25.
Blouse. S. Levy. 108,162; Jan. 25.
Blouse. M. Praeslaff. 108,135; Jan. 25.
Bottle. D. E. Briner. 108,112; Jan. 25.
Bottle. R. C., V. L., and E. L. Gennaro. 108,074; Jan. 25.
Bottle. L. A. Lumnia, Jr. 108,126; Jan. 25
Bottle or similar container. P. H. Gans. 108,121; Jan. 25.
Box, Display. L. D. Young. 108,186; Jan. 25.
Box fo. rings, Display. B. S. Katz. 108,082; Jan. 25.
Braid, Snake. J. Alpine. 108,147; Jan. 25.
Brooch or similar article. F. di Verdura. 108,115–6; Jan. 25.
Brooch or similar article. F. de Verdura. 108,118; Jan. 25.
Brooch or similar article. F. Jaske and C. M. Johnson. 108,178–9; Jan. 25.
Brooch or similar article. A. Klety. 108,124; Jan. 25.
Cabinet or similar article, Barber's. R. H. Trickle. 108,110; Jan. 25.
Cap, Agitator. T. J. Little, Jr. 108,158; Jan. 25.
Case or similar article, Cigarette. F. di Verdura. 108,117; Jan. 25.
Case, Piano. W. M. Day. 108,069–70; Jan. 25.
Casing, Dispensing. E. H. Bradley. 108,083; Jan. 25.
Casing, Vacuum cleaner. H. J. McAllister. 108,102; Jan. 25.
Chimney, Lantern. E. J. Fraser. 108,071; Jan. 25.
Coat. L. Marks. 108,183; Jan. 25.
Coat ensemble. T. di Pretore. 108,174; Jan. 25.
Cooler and dispenser, Combined beverage. F. G. Wilson. 108,094; Jan. 25.
Dial housing for a weighing scale. S. L. Hansen, A. P. Olsen, and A. A. Schmid. 108,075; Jan. 25.
Doll. E. B. Kingman. 108,084–5; Jan. 25.
Drawer pull. H. L. Fehrsen. 108,092; Jan. 25.
Dress. T. Coleman. 108,187–9; Jan. 25.
Dress. B. Greenstein. 108,133; Jan. 25.
Dress. D. Luntz. 108,193; Jan. 25.
Dress. M. Mullen. 108,127; Jan. 25.
Dress. M. Pono. 108,145; Jan. 25.
Dress. M. Pono. 108,160; Jan. 25.
Dress. P. Schiessel. 108,162; Jan. 25.
Dress. N. S. Shedlin. 108,194–6; Jan. 25.
Dress. M. E. Smith. 108,197; Jan. 25.
Dress. S. M. Werber. 108,189; Jan. 25.
Dress ensemble. S. Etkin. 108,190–1; Jan. 25.
Dress ensemble. P. Fracchia. 108,153; Jan. 25.
Dress ensemble. J. Greenman. 108,192; Jan. 25.
Dress ensemble. M. Hall. 108,155; Jan. 25.
Dress ensemble. M. E. Smith. 108,163–4; Jan. 25.
Dress ensemble. H. Snyder. 108,198–9; Jan. 25.
Fabric or similar article, Elastic. H. Amil. 108,062; Jan. 25.
Fabric or similar article, Lace. G. Zellweger. 108,095; Jan. 25.
Fabric or similar article, Textile. M. Christen. 108,066; Jan. 25.
Fabric or similar article, Textile. M. Christen. 108,152; Jan. 25.
Fabric or similar article, Textile. R. E. Fatherley. 108,175; Jan. 25.
Fabric or similar article, Textile. A. Zavell. 108,170; Jan. 25.
Fabric, Textile. J. Granowitz. 108,154; Jan. 25.
Fabric, Textile. S. Horowitz. 108,157; Jan. 25.
Fabric, Textile. B. M. Kaufman. 108,150; Jan. 25.
Fabric, Textile. M. May. 108,096–90; Jan. 25.
Fabric, Textile. W. Rees. 108,161; Jan. 25.
Fabric, Textile. M. Turpan. 108,166–7; Jan. 25.
Fan, Electric. G. H. Koch. 108,142; Jan. 25.
File. E. Stephens. 108,165; Jan. 25.
Glove. H. C. Heyman. 108,176; Jan. 25.
Glove. J. A. Higler. 108,156; Jan. 25.
Glove, Knitted. H. de Benque. 108,172; Jan. 25.
Golf ball or the like. F. H. Cavignac. 108,065; Jan. 25.
Handbag. S. R. Goldsmith. 108,122; Jan. 25.
Handle, Valve. H. D. Clemmons. 108,067; Jan. 25.
Hat. G. Amster. 108,171; Jan. 25.
Insole, Adjustable metatarsal. R. H. Johnson. 108,100; Jan. 25.
Jar. E. J. Kahn. 108,081; Jan. 25.
Jar. O. C. Noble. 108,091; Jan. 25.
Jar or similar article, Covered. R. A. Kelly. 108,083; Jan. 25.
Lace insert or similar article. G. Zellweger. 108,096; Jan. 25.
Lamp for motor vehicle, Combination clearance and side marker. G. F. Burgess. 108,137; Jan. 25.
Lamp, Portable electric. H. M. Peters. 108,144; Jan. 25.
Mantel or similar article. D. J. Baum. 108,136; Jan. 25.
Mantel or similar article. D. J. Baum. 108,148–9; Jan. 25.
Marker and corner lamp for motor vehicles, Combination clearance side. G. F. Burgess. 108,064; Jan. 25.
Marker, House. W. Patty and M. Brooks. 108,130; Jan. 25.
Moccasin or similar article. E. J. Biel. 108,112; Jan. 25.
Mounting, Multiple gem. J. Granat. 108,123; Jan. 25.
Organ, Electric. G. H. Stephens. 108,133; Jan. 25.
Pan, Baking. J. G. Jackson. 108,140–1; Jan. 25.
Pencil. M. E. Trollen. 108,111; Jan. 25.
Plate or similar article. G. J. Higginson. 108,079–80; Jan. 25.
Raincoat or similar article. D. Cairns. 108,151; Jan. 25.
Range. H. T. Burrow. 108,114; Jan. 25.
Range. R. Hoffman. 108,177; Jan. 25.
Ribbon. J. D. Huising. 108,139; Jan. 25.
Scarf or similar article. I. Absug. 108,146; Jan. 25.
Shoe. L. J. Epstein. 108,120; Jan. 25.
Shoe. J. Lane. 108,101; Jan. 25.
Shoe. R. Maling. 108,126; Jan. 25.
Shoe. H. Odencrantz. 108,129; Jan. 25.
Shoe. S. Weinstat. 108,134; Jan. 25.
Shoe or similar article. O. M. Pick. 108,102–7; Jan. 25.
Shoe or similar article. O. M. Pick. 108,128; Jan. 25.
Sign, Read. L. M. Summers. 108,108–9; Jan. 25.
Slip or similar article. D. Levy. 108,181; Jan. 25.
Slipper or similar article. H. Springer. 108,132; Jan. 25.
Suit ensemble. H. Miller. 108,184; Jan. 25.
Support for floral displays. C. J. White. 108,093; Jan. 25.
Tire. E. F. Brunner. 108,097; Jan. 25.
Tire. B. Darrow. 108,068; Jan. 25.
Tool, Scraping. C. W. Reid. 108,131; Jan. 25.
Toy element, Structural. A. C. Gilbert. 108,098; Jan. 25.
Tumbler. E. W. Fuerst. 108,072–3; Jan. 25.
Turner or similar article, Cake. C. R. T. Hess. 108,076; Jan. 25.
Turner or similar article, Cake. C. R. T. Hess. 108,078; Jan. 25.
Vanity unit and handbag, Combined. P. Bautista. 108,150; Jan. 25.
Watchcase or similar article. F. di Verdura. 108,119; Jan. 25.
Whip or similar article, Batter. C. R. T. Hess. 108,077; Jan. 25.
Wrench member. S. Mandl. 108,143; Jan. 25.
Wrench or the like. S. Mandl. 108,159; Jan. 25.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 25TH DAY OF JANUARY, 1938

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Abrading element, Unit. K. W. Connor. 2,106,205; Jan. 25.
Abrasive sleeve and forming the same. D. E. Mulholland. 2,106,186; Jan. 25.
Acceleration control system. G. W. Baughman. 2,106,474; Jan. 25.
Acetamide, Manufacture of. W. P. Munro, E. H. Northey, and H. 2. Lecher. 2,106,607; Jan. 25.
Acids from gases containing the same, Removal of gaseous weak. H. Baehr and W. Wensel. 2,106,446; Jan. 25.
Accounting machine. J. W. Bryce. 2,106,476–7; Jan. 25.
Acoustical energy into electrical energy, Device for transforming. H. F. Olson. 2,106,224; Jan. 25.
Actuating mechanism for hydraulic brakes. R. E. McGee. 2,106,504; Jan. 25.
Advertising apparatus. J. R. Allen. 2,106,235; Jan. 25.
Aero-electric generation system. P. C. Putnam. 2,106,557; Jan. 25.
Agitator for mash tanks. A. R. Keller. 2,106,529; Jan. 25.
Air conditioner, Portable. E. W. Kummer. 2,106,325; Jan. 25.
Air conditioning system. E. Wanamaker. 2,106,515; Jan. 25.
Air distributing device. F. J. Kurth. 2,106,458; Jan. 25.
Alarm system. A. J. Rakos. 2,106,658; Jan. 25.
Alkali metal acetylides with alkylene oxides and products thereby produced, Preparing. O. R. Kreimeier. 2,106,182; Jan. 25.
Alkali metal nitrates, Production of. A. S. Denny. 2,106,168; Jan. 25.
Alloys, Hard. C. W. Balke. 2,106,161–2; Jan. 25.
Aluminum product, Coated. O. Stockmar. 2,106,259; Jan. 25.
Anatomical specimens and the like, Fixing and preserving green. J. A. Weidemann. 2,106,261; Jan. 25.
Anchor, Rail. F. W. Cooper. 2,106,548; Jan. 25.
Anchoring device. S. A. Guiberson, III. 2,106,392; Jan. 25.
Arch support. C. Ahronheim. 2,106,202; Jan. 25.
Arcuseograph. B. Ronay. 2,106,190; Jan. 25.
Article package and method, Multiple. A. S. Heineman. 2,106,376; Jan. 25.
Articles, such as barrels, tubs, plates, and the like, Apparatus for the forming of thick paper. E. R. Smith. 2,106,440; Jan. 25.
Asphalt, Apparatus for producing. C. C. Webb. 2,106,583; Jan. 25.
Automatic shut-off valve. A. E. Hutt. 2,106,351; Jan. 25.
Axle structure. C. F. Frede. 2,106,345; Jan. 25.
Bactericidal action by the aid of chlorine, Effecting. W. M. Allison. 2,106,513; Jan. 25.
Bag frames, Making fabric covered. W. C. Hiering. 2,106,408; Jan. 25.
Bag opening mechanism. G. Long. 2,106,463; Jan. 25.
Bag tubes or bags, Manufacture of paper or like. A. J. Jones. 2,106,431; Jan. 25.
Bail container. J. M. Hothersall. 2,106,175; Jan. 25.
Ball driving device. H. A. Bodge. 2,106,625; Jan. 25.
Band, Wrist watch. H. K. Smith. 2,106,540; Jan. 25.
Bar stock, Apparatus for cutting. L. A. Frayer and C. L. Harvey. 2,106,274; Jan. 25.
Basket cover. A. H. Schmidtke. 2,106,328; Jan. 25.
Bath and pan, Shower. A. Cheney. 2,106,516; Jan. 25.
Bathing accessory. H. Shoglow. 2,106,664; Jan. 25.
Battery, Storage. T. Matthew. 2,106,222; Jan. 25.
Battery testing device, Storage. C. G. Reets. 2,106,687; Jan. 25.
Bearing and method. A. L. Boegehold and A. W. Schluchter. 2,106,590; Jan. 25.
Bearing for one-way rotation, Baffle gate. A. Law. 2,106,220; Jan. 25.
Bed, Metallic. S. Raduns. 2,106,657; Jan. 25.
Bending rolls machine. P. Parcells. 2,106,534; Jan. 25.
Bibb seating tool. R. G. Hawker. 2,106,173; Jan. 25.
Bicycle lamp. L. M. Wiley. 2,106,231; Jan. 25.
Board: *See*—

Knitting machinery. J. Morton and R. S. E. Hannay. 2,106,434; Jan. 25.
Lacquers and coating compositions, Manufacture of colored. A. Consetti. 2,106,518; Jan. 25.
Lacquers and film-forming coatings, Manufacture of colored. A. Consetti. 2,106,519; Jan. 25.
Lamp: *See*—
Bicycle lamp. Incandescent electric lamp.
Lamp switching mechanism. A. J. Potè. 2,106,413; Jan. 25.
Lead, Manufacture of white. P. La F. Magill. 2,106,555; Jan. 25.
Leyeese and the like, Apparatus for constructing. F. C. Ruhlick. 2,106,189; Jan. 25.
Lifter: *See*—
Plate lifter.
Lime sulphur compositions, Making dry. C. I. Chubbuck. 2,106,294; Jan. 25.
Liquid level indicator. F. R. Moore. 2,106,574; Jan. 25.
Liquid pressure mechanism. B. Dick. 2,106,592; Jan. 25.
Liquid reagents, Continuous method of reacting. R. M. Deanesly. 2,106,521; Jan. 25.
Liquid shut-off device, Automatic. C. W. Wildebour. 2,106,197; Jan. 25.
Liquid to textile materials, Applying. W. Whitehead. 2,106,311; Jan. 25.
Lead indicator device. M. L. Pinson. 2,106,652; Jan. 25.
Lock: *See*—
Nut lock.
Loom. F. D. Lindquist. 2,106,504; Jan. 25.
Looms, Shuttle guard attachment for. H. J. Tyree, C. Talley, and G. A. Gill. 2,106,510; Jan. 25.
Lubricants and manufacturing the same. A. H. Gleason. 2,106,247; Jan. 25.
Lubricants, Testing. F. A. Faville. 2,106,170; Jan. 25.
Luminous tube display. A. C. Deans. 2,106,238; Jan. 25.
Machine for covering wire with a helical wrapping. A. J. Sands. 2,106,437; Jan. 25.
Machine for lacing shoe uppers. J. Fossa. 2,106,320; Jan. 25.
Machine for pressing the bottoms of shoes. F. L. Mooney. 2,106,277; Jan. 25.
Machine for the manufacture of biscuits. M. E. Giredin. 2,106,633; Jan. 25.
Machine for use in the manufacture of woven material. E. A. Bessom and C. H. Pepin. 2,106,267; Jan. 25.
Machine tool. A. M. Johnson. 2,106,217; Jan. 25.
Magnesium and magnesium alloys, Refinement of. A. Leschenowsky. 2,106,221; Jan. 25.
Magnetic track brake. J. C. McCune. 2,106,489; Jan. 25.
Mail treating machine. C. D. Ryan. 2,106,191; Jan. 25.
Manifolding. C. W. Brenn. 2,106,165; Jan. 25.
Material impermeable to ultra-violet rays and production thereof. O. Gerngross and A. Callo. 2,106,599; Jan. 25.
Materials, Apparatus for treating. E. J. Scott. 2,106,329; Jan. 25.
Materials by impregnation, Printing of fibrous. M. R. Greiser. 2,106,634; Jan. 25.
Materials, Treatment of. H. Dreyfus. 2,106,298; Jan. 25.
Measuring device. C. J. Officer, Jr. 2,106,649; Jan. 25.
Mechanism for raising bottles on to the table of a bottle filling and capping machine. A. G. Enock. 2,106,210; Jan. 25.
Mercapto-thiazole derivatives. L. Orthner and E. Zaucker. 2,106,465; Jan. 25.
Metal, Apparatus for handling molten. K. S. Howard and J. H. Locke. 2,106,456; Jan. 25.
Metal mold. K. A. Lindner. 2,106,614; Jan. 25.
Metal to prevent localised corrosive attack, Surface treatment of. C. A. Scharsche and G. C. Kiefer. 2,106,227; Jan. 25.
Meter: *See*—
Gyroscopic fluid meter. Piston meter.
Meter for electricity, gas, and like commodities, Prepayment. G. Wall. 2,106,562; Jan. 25.
Mirror device, Vanity. J. O. Newell. 2,106,254; Jan. 25.
Mold: *See*—
Metal mold.
Motor: *See*—
Water motor.
Motor-block stand. W. G. Vollmer. 2,106,367; Jan. 25.
Motor vehicle. M. Tibbetts. 2,106,195; Jan. 25.
Mounting: *See*—
Ophthalmic mounting.
Mounting for electrical apparatus, Cable. M. Hedlund. 2,106,548; Jan. 25.
Mounting of electric insulators. L. Thiry. 2,106,667; Jan. 25.
Mowing machine. G. A. Leitch. 2,106,641; Jan. 25.
Muffler. H. L. Hartnett. 2,106,462; Jan. 25.
Muffler clamp. J. J. Compo. 2,106,628; Jan. 25.
Multiple leaf spring. M. V. O'Donnell. 2,106,411; Jan. 25.
Musical instrument, Wind. J. Sattler. 2,106,281; Jan. 25.
Necktie and making the same. W. B. Rose. 2,106,256; Jan. 25.
Newspaper sound record supplements, Manufacture of. W. G. H. Finch. 2,106,245; Jan. 25.
Nozzle, Delivery. J. Daff, Jr. 2,106,590; Jan. 25.
Nut lock. S. R. Thornton. 2,106,669; Jan. 25.

Odor control for liquid fuel burning stoves. S. Coleman and B. W. Tullis. 2,106,690; Jan. 25.
Oil burner. O. J. Appel. 2,106,265; Jan. 25.
Oils, Lubricating. E. H. Lincoln and A. Henriksen. 2,106,554; Jan. 25.
Oils, Production of high quality lubricating. H. Zorn and W. Rosinsky. 2,106,222; Jan. 25.
Oils, Solvent extraction of. U. B. Bray. 2,106,234; Jan. 25.
Oiler, Flange. J. G. Skinner. 2,106,665; Jan. 25.
Ophthalmic mounting. E. M. Spitzbe. 2,106,282-4; Jan. 25.
Optical adjusting device for cinematographic apparatus. P. Angenieux and J. M. Gutmann. 2,106,397; Jan. 25.
Optical device for measuring angles, such as sextants. A. Lepetit. 2,106,460; Jan. 25.
Ore concentrator. R. P. Akins. 2,106,390; Jan. 25.
Ornamenting device. A. W. Altvater. 2,106,212; Jan. 25.
Overshoe, Antiskid. T. M. Walker. 2,106,670; Jan. 25.
Oxygen emergency apparatus with closed respiratory circuit. M. Hausmann. 2,106,393; Jan. 25.
Package. R. L. Wise. 2,106,388; Jan. 25.
Package, Merchandising. W. T. Cox. 2,106,629; Jan. 25.
Package, Wire bound. J. W. Simmons. 2,106,584; Jan. 25.
Packing material and assembly. G. Christenson, 2,106,293; Jan. 25.
Pad: *See*—
Carrier pad.
Paper supporting and feeding apparatus. O. J. Sundstrand. 2,106,255; Jan. 25.
Pencil, Mechanical. W. H. Blake. 2,106,389; Jan. 25.
Perfume materials unstable to heat, Extracting. P. L. Young and P. J. Wiesevich. 2,106,200; Jan. 25.
Petroleum emulsions, Breaking. M. De Groote. 2,106,239; Jan. 25.
Petroleum emulsions, Breaking. M. De Groote. 2,106,241-4; Jan. 25.
Petroleum emulsions, Breaking. M. De Groote and B. Keiser. 2,106,240; Jan. 25.
Photographic apparatus. P. J. Rentmeesters. 2,106,659; Jan. 25.
Pigmented composition. G. Barsky, G. Klinkenstein, C. Kohleder, and C. F. Silleck. 2,106,447; Jan. 25.
Pipe: *See*—
Composite pipe.
Pipe cleaner. J. Whiting. 2,106,584; Jan. 25.
Pipe for internal combustion engines, Exhaust. O. Hansson. 2,106,427; Jan. 25.
Pistol, Cap. J. L. O'Connor. 2,106,642; Jan. 25.
Piston meter. W. H. Parker and N. J. Seibert. 2,106,651; Jan. 25.
Planographic plate, Sheet aluminum. W. B. Wescott. 2,106,266; Jan. 25.
Plate lifter. S. Durnj. 2,106,291; Jan. 25.
Plug: *See*—
Spark plug.
Plywood and furniture made therefrom. F. C. O. Thomas. 2,106,443; Jan. 25.
Pole fitting. R. H. Pittman. 2,106,305; Jan. 25.
Polishing machine, Portable. H. J. Pattison and W. K. Barton. 2,106,535; Jan. 25.
Posts, Making fence. P. B. Hunter. 2,106,602; Jan. 25.
Pot for die casting machines. L. H. Morin. 2,106,505; Jan. 25.
Pot, Underfeed fire. A. E. Paige. 2,106,621; Jan. 25.
Power control mechanism. P. E. Hawkins. 2,106,502; Jan. 25.
Power plant. H. Gleichmann. 2,106,346; Jan. 25.
Preselector system. D. V. Shuninger. 2,106,229; Jan. 25.
Pressure controlling valve. A. J. E. and K. G. V. Rylander. 2,106,537; Jan. 25.
Pressure pump. H. Nilsen. 2,106,630; Jan. 25.
Printer's type cabinet. A. B. Ball. 2,106,163; Jan. 25.
Printing attachment for addressing machines, Repeat. H. P. Elliott. 2,106,675; Jan. 25.
Printing surfaces, Mounting. E. G. Newing. 2,106,379; Jan. 25.
Printing telegraph system. E. A. Dumoulet. 2,106,691; Jan. 25.
Proportioning valve. A. C. Meagher. 2,106,572; Jan. 25.
Pump: *See*—
Pressure pump. Rotary pump.
Punching mechanism. J. D. Baker. 2,106,180; Jan. 25.
Quick release valve. W. E. Huffman and G. W. Replogle. 2,106,176; Jan. 25.
Radio apparatus, Automobile. W. Bunga. 2,106,159; Jan. 25.
Rail flaw detecting apparatus, Track. W. H. Grindall and A. E. F. Billstein. 2,106,694; Jan. 25.
Razor, Safety. H. H. Bates and W. O. Bates, Jr. 2,106,587; Jan. 25.
Reaction product and process. H. A. Bruson and L. W. Covert. 2,106,452; Jan. 25.
Receptacle: *See*—
Electric receptacle.
Receptacle for plastic substances, Dispensing. W. E. Sherbondy. 2,106,577; Jan. 25.
Receptacles, Method and apparatus for the molding of covered ceramic. B. S. Purinton. 2,106,415; Jan. 25.
Record cut-out assembly, Home. L. W. Franklin. 2,106,693; Jan. 25.
Records, Making phonographic. B. A. Procter and F. C. W. Thiede. 2,106,623; Jan. 25.
Reflector, in particular for vehicles. F. Nielsen. 2,106,533; Jan. 25.
Refolding mechanism for duplicating machines. A. B. Cooke. 2,106,520; Jan. 25.
Refractory for contacting molten glass. J. C. Hostetter. 2,106,527; Jan. 25.
Refrigerating apparatus. R. M. Smith. 2,106,585; Jan. 25.
Refrigerating system. H. F. Briggeman and R. A. Fuller. 2,106,591; Jan. 25.
Refrigeration apparatus, Steam jet. E. F. Stalcup. 2,106,342; Jan. 25.
Refrigerator closure means. N. R. Tripp. 2,106,386; Jan. 25.
Refrigerator, Truck. W. E. Hauser. 2,106,637; Jan. 25.
Register. H. M. Fleming. 2,106,273; Jan. 25.
Regulator: *See*—
Shower temperature regulator.
Resin, Triethanolamine. C. Ellis. 2,106,522; Jan. 25.
Resins from m-phenylenediamine, Production of anion-exchange. W. H. Kirkpatrick. 2,106,486; Jan. 25.
Resinous body and making same, Complex. C. Ellis. 2,106,523; Jan. 25.
Resistor. C. A. Jagger. 2,106,604; Jan. 25.
Revolving seat. T. D. Owler. 2,106,650; Jan. 25.
Rim, Circumferentially divided wheel. W. J. Cox. 2,106,421; Jan. 25.
Roll grinding machine. E. Hutchens. 2,106,215; Jan. 25.
Roof construction. J. A. Topping. 2,106,396; Jan. 25.
Rope transmission. O. Ohnesorge. 2,106,358; Jan. 25.
Rotary pump. E. W. Hepler. 2,106,600; Jan. 25.
Rotary steam engine. L. W. Downward. 2,106,371; Jan. 25.
Safety device and valve therefor. S. Kasanjian. 2,106,606; Jan. 25.
Safety device for motion picture projecting machines. C. F. Lick. 2,106,354; Jan. 25.
Sailboat. C. N. Edge. 2,106,206; Jan. 25.
Salt preparations and preparing them, Stable diaso. K. Schnitzspahn. 2,106,539; Jan. 25.
Saw apparatus, Circular. H. E. Tautz. 2,106,288; Jan. 25.
Scale in evaporators, Removing and/or preventing the deposition of. C. F. Weston. 2,106,196; Jan. 25.
Screw locking means. M. H. Redmer. 2,106,278; Jan. 25.
Sealing composition, using same, and articles made therewith. K. Schwartzwalder and W. S. Kirk. 2,106,578; Jan. 25.
Seam for metal can bodies, Side. W. F. Punte. 2,106,656; Jan. 25.
Seat: *See*—
Revolving seat.
Self-adjusting brake. H. D. Colman. 2,106,167; Jan. 25.
Sewing machines, Fabric feeding mechanism for. N. V. Christensen, C. F. Bubel, C. C. Smith and H. J. Le Vesconte. 2,106,517; Jan. 25.

Wash box discharge control. E. J. Burnell and W. J. Heacock. 2,106,204; Jan. 25.
Washing apparatus. W. L. Merrill. 2,106,619; Jan. 25.
Water motor. S. Amasiamakis. 2,106,264; Jan. 25.
Weatherproofing structure for doors. D. H. Harnly. 2,106,522; Jan. 25.
Wheel: See—
Fifth wheel. Type wheel.
Steering wheel.
Wheel. F. W. Burger. 2,106,270; Jan. 25.
Wheel. E. G. Hallquist. 2,106,566; Jan. 25.
Wheel and tire cover, Spare. O. U. Zerk. 2,106,586; Jan. 25.
Wheel suspensions. W. D. Allison. 2,106,291; Jan. 25.
Window. J. L. Soderberg. 2,106,308; Jan. 25.
Window fixture. G. E. Alphin. 2,106,420; Jan. 25.
Window operating device. J. E. Auld. 2,106,360; Jan. 25.
Window structure. F. G. Ludwig. 2,106,251; Jan. 25.
Wire coiling and interweaving mechanism. P. F. Frost and J. C. Anderson. 2,106,454; Jan. 25.
Wiring device. R. R. Keesee. 2,106,324; Jan. 25.
Wood products, Making. E. H. Schroth. 2,106,468; Jan. 25.
Woven fabric. E. Hyman. 2,106,457; Jan. 25.
Wrapper, Sandwich. A. Kovalik. 2,106,640; Jan. 25.
Wrappers on the rolling apron of a cigar rolling device, Apparatus for placing. F. H. B. Stelser. 2,106,441; Jan. 25.
Xanthates of resin alcohols and their production. P. A. Ray. 2,106,558; Jan. 25.

CLASSIFICATION OF PATENTS

ISSUED JANUARY 25, 1938

In view of the fact that the issue is being checked weekly by the Classification Division, the class and subclass in this list are correct as of this date. Where there is a discrepancy between the classification given in the patent head and the classification in this list, the classification of this list governs.

NOTE.—First number—class, second number—subclass, third number—patent number

THE OFFICIAL GAZETTE

OF THE

United States Patent Office

Vol. 486—No. 1 TUESDAY, JANUARY 4, 1938 Price—$16 per year

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscriptions, $10.00 per annum, including general index; $12.75; single numbers, 25 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter address the Commissioner of Patents, Washington, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

International Convention—Adhesion Tanganyika

This Office has been notified by the Secretary of State of the receipt of a notice from the Minister of Switzerland that the United Kingdom of Great Britain and Northern Ireland has adhered, for the Territory of Tanganyika, to the International Convention for the Protection of Industrial Property, as revised at The Hague on November 6, 1925, the adhesion to take effect on January 1, 1938.

CONWAY P. COE,
Commissioner of Patents.

Interference Notice

U. S. PATENT OFFICE, *Washington, D. C., Dec. 3, 1937.*

Robert W. Edens and Omer E. Brubaker, their assigns or legal representatives, take notice:

Four interferences having been declared by this Office between a joint application for patent of Robert W. Edens and Omer E. Brubaker, of 940 Rhodeland Avenue and 2002 Pershing Avenue, San Bernardino, California, respectively, and applications for patent filed by Edwin H. Daniels, 249 South Willard Street, San Jose, California, and Edison Harrington, 1128 Fugate Street, Houston, Texas, and ten other applications, and counsel for the parties Edens and Brubaker having been unable to secure satisfactory service upon said Edens and Brubaker, notice is hereby given that unless said Edens and Brubaker, their assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

JUSTIN W. MACKLIN,
First Assistant Commissioner.

Notice of Cancellation

U. S. PATENT OFFICE, *Washington, D. C., Dec. 1, 1937.*

Charles D. Fox, his assigns or legal representatives, take notice:

A cancellation proceeding has been instituted by this Office upon the application of Modern Merchandising Bureau, Inc., 24 West 44th Street, New York, N. Y., to effect the cancellation of trade-mark registration of M. Hirshfield, No. 341,176, dated April 17, 1906. The assignment records of this Office show a transfer of title to this registration to Charles D. Fox, New York, N. Y., who has been substituted for said M. Hirshfield to defend the registration concerned. The notice of such proceeding sent by registered mail to Charles D. Fox, at the said address, having been returned by the post office as undeliverable, notice is hereby given that unless Charles D. Fox, his assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the cancellation will be proceeded with as in the case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

JUSTIN W. MACKLIN,
First Assistant Commissioner.

SUITS UNDER SECTION 4915 R. S. (35 U. S. C. 63)

Rules of the District Court of the United States for the District of Columbia—Excerpts from

LAW RULE 75, par. 6:

Whenever a case, which has progressed as far as the ready calendars, has been settled or dismissed, the attorneys therein shall at once notify the assignment commissioner of that fact.

EQUITY RULE 52:

A bill in equity shall not be dismissed at the instance of plaintiff except upon motion.

(Emphasis added.)

Service of Papers in Contested Cases

Attention is called to Rule 153 (c), which requires that "every paper" filed in a contested case in the Patent Office must be served upon the other parties.

This includes all appeals in such cases.

Condition of Applications Under Examination at Close of Business December 18, 1937

(Total number of applications awaiting action, excluding Trade-Mark Division, 42,897; Trade-Mark Division, 1,754. Oldest new case, June 10, 1937; oldest amended, May 20, 1937.)

DECISIONS IN PATENT AND TRADE-MARK CASES

U. S. Court of Customs and Patent Appeals

PRESTON AND PRESTON *v.* WHITE

No. 3,960. Decided November 29, 1937

[— F.(2d) —]

INTERFERENCE—APPLICATION AND PATENT—APPEAL.

Where patentees involved in interference with an applicant, appealed to the Court of Customs and Patent Appeals from an adverse decision on priority and applicant gave notice of his election to have the further proceedings conducted in equity as provided in Sec. 4915 R. S. and moved for dismissal of the patentees' appeal, *Held* that the patentees have a right to appeal under Sec. 4911 R. S. since to rule otherwise would deprive them of any right of appeal whatsoever.

APPEAL from the Patent Office. Motion to dismiss denied.

Mr. Myron G. Cleer, Mr. Harry F. Riley, and *Mr. Geo. C. Shoemaker* for Preston and Preston.

Mr. Jerome R. Cox and *Mr. F. P. Keiper* for White.

PER CURIAM:*

On September 28, 1934, an interference proceeding was instituted and declared between a patent to Kenneth D. Preston and Hamilton W. Preston, No. 1,946,759, dated February 13, 1934, and a pending application of one John W. White, Serial No. 718,863, filed April 3, 1934. The subject matter of the patent and the pending application is certain improvements in signal systems for motor vehicles. The case was submitted upon the preliminary statements and the evidence, and the Examiner of Interferences rendered a decision awarding priority of invention to the patentees, Preston and Preston. The applicant, John W. White, appealed from the adverse decision of the Examiner of Interferences to the Board of Appeals, and, the case having been argued and submitted, the decision of the Examiner of Interferences was reversed. Thereupon, Preston and Preston gave notice to the Commissioner of Patents of their appeal to the United States Court of Customs and Patent Appeals, and reasons of appeal were duly filed. Thereupon, the party White, specially appearing, made a motion to dismiss the appeal to this court on the ground that this court has no jurisdiction of the appeal for the reason that section 4911, R. S. provides

"that such appeal (that is, an appeal under section 4911, R. S.) shall be dismissed if any adverse party to such interference shall within twenty days after the appellant shall have filed notice of appeal according to section 4912 of the Revised Statutes, file notice with the Commissioner of Patents that he elects to have all further proceedings conducted as provided in section 4915 of the Revised Statutes,"

and that inasmuch as the party White has filed notice under and by virtue of the provisions of said section 4911, the appeal to the United States Court of Customs and Patent Appeals must be dismissed and further proceedings conducted under and in conformity with the provisions of said section 4915, R. S.

Thereupon the matter came on to be heard upon said motion to dismiss the appeal to this court, and further proceedings upon the merits of the interference were continued until the disposition of said motion.

It will be noted that the situation is that the applicant, the party White, insists that under said section 4911 he was entitled to compel the patentees Preston and Preston to dismiss their appeal to this court upon said notice being filed and to compel the patentees to file a bill in equity under said section 4915, R. S. On the other hand, the patentees insist that said section 4915 gives no such right, and that the patentees have a right to proceed to a trial of the interference proceeding in this court, irrespective of such notice, under said section 4911. It is claimed by the party White that if said sections 4915 and 4911 are so construed as to prevent a transfer of said appeal to a court of equity upon notice being given, as is provided in said section 4911, the result will be to deprive the applicant of a remedy in equity in such cases. It is also insisted that the language of the statute is plain and unambiguous, and provides directly that an appeal shall be dismissed in an interference appeal to the United States Court of Customs and Patent Appeals when such notice is filed, and that to hold otherwise is to legislate contrary to the expressed purpose, intent, and language of the statute.

On the other hand, it is claimed by Preston and Preston, the patentees, that to hold as is urged by the applicant would be to deprive the patentees of any right of appeal.

Section 4915, R. S. (U. S. C., title 35, section 63), is as follows:

Bill in equity to obtain patent. Whenever a patent on application is refused by the Commissioner of Patents, the applicant, unless appeal has been taken from the decision of the Board of Appeals to the United States Court of Customs and Patent Appeals, and such appeal is pending or has been decided, in which case no action may be brought under this section, may have remedy by bill in equity, if filed within six months after such refusal; and the court having cognisance thereof, on notice to adverse parties and other due proceedings had, may adjudge that such applicant is entitled, according to law, to receive a patent for his invention, as specified in his claim, or for any part thereof, as the facts in the case may appear. And such adjudication, if it be in favor of the right of the applicant, shall authorize the Commissioner to issue such patent on the applicant filing in the Patent Office a copy of the adjudication and otherwise complying with the requirements of law. In all cases where there is no opposing party a copy of the bill shall be served on the Commissioner; and all the expenses of the proceedings shall be paid by the applicant, whether the final decision is in his favor or not. In all suits brought hereunder where there are adverse parties the record in the Patent Office shall be admitted in whole or in part, on motion of either party, subject to such terms and conditions as to costs, expenses, and the further cross-examination of the witnesses as the court may impose, without prejudice, however, to the right of the parties to take further testimony. The testimony and exhibits, or parts thereof, of the record in the Patent Office when admitted shall have the same force and effect as if originally taken and produced in the suit.

As we view the matter, the case has been settled by prior adjudications of this court, as well as by decisions of other courts of the United States. We

*The opinion in this case was prepared by the late Presiding Judge Graham and adopted by the court after his death.

refer to *MacGregor* v. *Chesterfield*, 21 F.(2d) 701, a decision of the United States District Court, Eastern District of Michigan. In that case, for the first time to our knowledge, these sections, 4911 and 4915, R. S. were discussed respecting the point here under consideration. In that case, Tuttle, District Judge, held quite plainly and logically, as it seems to us, that a patentee could not sue, under section 4915, R. S., as amended by act, March 2, 1927, § 11 (35 U. S. C. A. § 63), for relief against an order in interference proceedings awarding to another priority of invention, "since such section applies only to the relief of inventors whose application for patent is refused." It will be plainly observed that such must be the reasonable construction to be given to sections 4911 and 4915, R. S. The gist of these sections is that the party in interference who is aggrieved may have a remedy either under section 4911 or section 4915, but it will be noted that the relief provided in section 4915 is limited to the grant of a patent. In view of this fact, where the party already has a patent, what relief may he obtain through equity, having already all that he can obtain therein?

The decision of Judge Tuttle was followed by the Circuit Court of Appeals, Sixth Circuit, in *Heidbrink* v. *McKesson*, 58 F.(2d) 321, 412 O. G. 839. There the Circuit Court observed that section 4915, R. S., is restricted in its operation to cases where a patent on application is refused. Again, the court said:

> • • • The plaintiff-appellant already has his patent. Notwithstanding the fact that the mention of "adverse parties" in both sections seems to indicate that the remedies were intended to be open to the parties to an interference proceeding, and such a proceeding is specifically mentioned in section 59a, we are constrained to the opinion that the only review open to a patentee interferant, after an adverse decision by the Board of Appeals of the Patent Office, is by appeal to the Court of Customs and Patent Appeals, or, after issue of a patent to the applicant, by seeking relief against such interfering patent under Rev. St. § 4915 (35 U. S. C. § 66 [39 U. S. C. A. § 66]). Sections 59a and 63 were not intended, we think, to open the door to a review in the District Court of every decision of the Board of Appeals, and a litigant can avail himself of the remedies there provided only if he brings his case within the conditions so expressly imposed. The decision in *MacGregor* v. *Chesterfield*, supra, is approved.

The same question arose first in this court in *Clyde C. Farmer and Thomas H. Thomas* v. *Daniel Herbert Schweyer*, 19 C. C. P. A. (Patents) 1247, 58 F.(2d) 1056, 423 O. G. 982. In this case Farmer and Thomas, patentees, were involved in an interference with Schweyer who was an applicant. Schweyer was given priority by the Board of Appeals. Thereupon, Farmer and Thomas appealed to this court. Schweyer, within twenty days, filed a cross motion under section 4911, R. S., electing to proceed under section 4915. Farmer and Thomas did not file a bill in equity, and Schweyer moved to dismiss the appeal. The Commissioner of Patents refused to dismiss the appeal, giving the reason that Farmer and Thomas, being patentees, had no cause of action under said section 4915; that a dismissal of their appeal to the United States Court of Customs and Patent Appeals under said section 4911 would leave them without relief on appeal. We cited the cases of *MacGregor* v. *Chesterfield* and *Heidbrink* v. *McKesson*, supra, and followed the doctrine announced therein. Arguendo, we said that section 4911 provides that a patent shall not be issued to the person awarded priority pending the final determination of the proceeding under section 4915, and observed:

> "This would seem to indicate that, in so far as proceedings in equity are concerned, the section was intended to apply only to cases of applicants and not to a patentee."

Again, we said that this section, namely, 4915, R. S., was intended to apply to an applicant and not to a patentee, observing also that if there were interfering patents, then either or both of the patents might be held to be void, or inoperative, or invalid, under section 4918, R. S. The motion of the appellee to dismiss the appeal was denied.

Again, in *Bloodhoert* v. *Levernier*, 20 C. C. P. A. (Patents) 917, 64 F.(2d) 367, 433 O. G. 510, in an opinion by Hatfield, Judge, we adhered to the same reasoning and overruled a motion to dismiss on similar grounds.

In the case of *Wettlaufer et al.* v. *Robins et al.*, recently decided by the United States Circuit Court of Appeals for the Second Circuit, — F.(2d) —, our rulings in the cases of *Farmer* v. *Schweyer*, supra, and *Bloodhoert* v. *Levernier*, supra, were expressly approved.

It is argued by appellee that the legislative history of section 4911 clearly indicates that an applicant in interference proceedings should have the option to file a bill in equity under section 4915 whenever a final decision is made awarding priority of invention to his opponent, and that if we adhere to our former rulings on this point, and upon the merits reverse the Board of Appeals in the instant case, appellee would never have had the opportunity, which Congress intended to preserve, of proceeding in equity under section 4915 to determine the question of priority of invention and his right to a patent.

Appellee asserts that this remedy of proceeding in equity had existed continuously since 1836, and that the legislative history shows that Congress intended that it should continue under the revision of section 4911 in 1927.

Granting that such was the intent of Congress, as ascertained from the legislative proceedings respecting the revision of 1927, it is equally clear that Congress never intended to prevent an interferant patentee from having relief by appeal to this court. The statute is clear and unambiguous that any party dissatisfied with the decision of the Board of Appeals may appeal to this court. It is then provided that under the circumstances stated in section 4911 an appeal so taken shall be dismissed, but the provision for dismissal applies only where a proceeding in equity under section 4915 may be had.

It may be that Congress made a mistake in legislating, and omitted to make provision for a case like the one at bar, but if it did so it is not our province to exercise legislative functions to correct the mistake.

It appears, therefore, from the adjudicated cases on the subject, that the motion of the applicant should not be sustained, that the patentee have a right to proceed under section 4911, R. S., as, to rule otherwise would be to deprive them of any right of appeal whatsoever.

Inasmuch as the case has been heard only on the motion to dismiss, without any hearing on the merits of the interference, the case is continued and it appearing that appellants have already filed their brief on the merits, appellee is allowed until January 1, 1938, to file his brief on the merits.

The motion to dismiss is denied, and the cause is continued until further order.

Patent Suits

[Notices under sec. 4921, R. S., as amended Feb. 18, 1922]

1,175,909, W. A. Hall, Process for the conversion of heavy hydrocarbons into lighter hydrocarbons; 1,228,600, same, Hydrocarbon product; 1,230,100, same, Liquid fuel; 1,242,795, same, Process for the production of motor spirit from heavy hydrocarbons; 1,840,012, O. Rohlmer, Apparatus for making gasoline; 1,883,850, same, Process for making gasoline, D. C., W. D. Okla. (Oklahoma City), Doc. 1456, *The Texas Co.* v. *Gerber Refinery, Inc.* Dismissed on motion of plaintiff, without prejudice—Oct. 30, 1937.

1,231,764, F. Lowenstein, Telephone relay; 1,618,017, same, Wireless telegraph apparatus; 1,403,475, H. D. Arnold, Vacuum tube circuit; 1,465,322, same, Vacuum tube amplifier; 1,403,932, R. H. Wilson, Electron discharge device; 1,531,805, E. C. Mathes, Oscillation generator; 1,658,246, same, Amplifier circuit; 1,573,274, P. A. Chamberlain, Radio condenser; 1,906,198, S. Loewe, System for generating oscillations; 1,702,833, W. S. Lemmon, Electrical condenser; 1,811,095, H. J. Round, Thermionic amplifier and detector; 1,906,780, F. B. Llewellyn, Modulating device; Re. 18,579, Ballantine & Hull, Demodulator and method of demodulation; Re. 18,916, J. G. Aceves, Supply circuits for radio sets, D. C., S. D. N. Y., Doc. E 78/151, *R. C. A. et al.* v. *J. & L. Sera Co., Inc., et al.* Consent decree for plaintiff (notice Oct. 26, 1937).

Adjudicated Patents

(C. C. A. Ohio.) Riddell patent, No. 1,462,626, for athletic shoe, claim 1 *Held* invalid. *John T. Riddell, Inc.*, v. *P. Goldsmith Sons Co.*, 92 F.(2d) 353.

(C. C. A. Ohio.) Riddell patent, No. 1,642,827, for athletic shoe, claims 1, 4, and 5 *Held* invalid. *Id.*

(C. C. A. Ohio.) Maynard patent, No. 1,655,968, for piston, *Held* valid and infringed. *Cleveland Trust Co.* v. *Schriber-Schroth Co.*, 92 F.(2d) 330.

(C. C. A. Ohio.) Riddell patent, No. 1,659,666, for athletic-shoe construction, *Held* invalid. *John T. Riddell, Inc.*, v. *P. Goldsmith Sons Co.*, 92 F.(2d) 353.

(C. C. A. Ohio.) Gulick patent, No. 1,815,723, for piston, claims 1, 11, 12, 13, 15, 18, 30, and 33 *Held* valid and infringed. *Cleveland Trust Co.* v. *Schriber-Schroth Co.*, 92 F.(2d) 330.

Disclaimers

1,902,460.—*Albert H. Mittag*, Schenectady, N. Y. ELECTRIC TRANSLATING CIRCUITS. Patent dated March 21, 1933. Disclaimer filed December 8, 1937, by the assignee, *General Electric Company.*

Hereby enters this disclaimer to claim 11 in said specification.

2,035,176.—*Miles A. McLennan*, Riverton, N. J. RADIO RECEIVER. Patent dated March 24, 1936. Disclaimer filed December 15, 1937, by the assignee, *Radio Corporation of America.*

Hereby enters this disclaimer to claims 3 and 10 in said specification.

2,089,518.—*John J. Williams*, Wheeling, W. Va. METHOD AND APPARATUS FOR FORMING METAL CLOSURES. Patent dated August 10, 1937. Disclaimer filed December 1, 1937, by the assignee, *Hazel-Atlas Glass Company.*

Hereby enters this disclaimer to claims 12 and 13 in said patent.

TRADE-MARKS

OFFICIAL GAZETTE, JANUARY 4, 1938

[VOL. 486. No. 1]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

Marks applied for "under the ten-year proviso" are registrable under the provision in clause (b) of section 5 of said act as amended February 18, 1911.

As provided by section 1 of said act, a fee of ten dollars must accompany each notice of opposition.

CLASS 1

Raw or Partly Prepared Materials

Ser. No. 396,610. NORTH CAROLINA GRANITE CORPORATION, Mount Airy, N. C. Filed Aug. 20, 1937.

MOUNT AIRY GRAN-I-GRIT

The words "Insoluble", "Grit", and "Mount Airy" are disclaimed apart from the mark.

For Poultry Grit.

Claims use since June 27, 1935.

Ser. No. 396,639. THE LANATIN CORPORATION, Oakdale, Montville, Conn. Filed Aug. 21, 1937.

LANATIN

For Vegetable Fibers Designed for the Fabrication of Yarns and Threads Which Are Adaptable for the Production of Textile Fabrics.

Claims use since Oct. 14, 1935.

Ser. No. 396,827. SENTRY COAL MINING COMPANY, Madisonville, Ky. Filed Oct. 9, 1937.

The words "Stray Seam" are disclaimed apart from the mark.

For Coal.

Claims use since July 1, 1937.

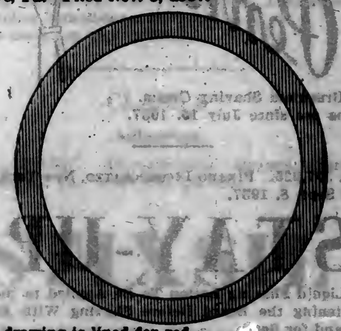
Ser. No. 398,716. THE WALKER T. DICKERSON COMPANY, Columbus, Ohio. Filed Oct. 20, 1937.

Insulwhyte

For Heat Transmission Resisting Compound for Use as a Filler in Shoe Manufacture, Said Compound Consisting of a Siliceous Wool and a Binder.

Claims use since Nov. 13, 1936.

Ser. No. 398,991. GAFCO, Inc., New York, N. Y. Filed Oct. 27, 1937.



The words "Lambskin" and "Made in Hungary" are disclaimed apart from the mark.

For Fur Felts and Dyed Skins and Plates.

Claims use since May, 1937.

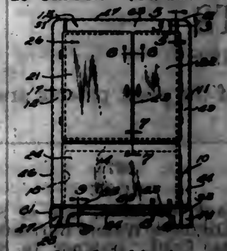
REISSUES

JANUARY 4, 1938



20,610

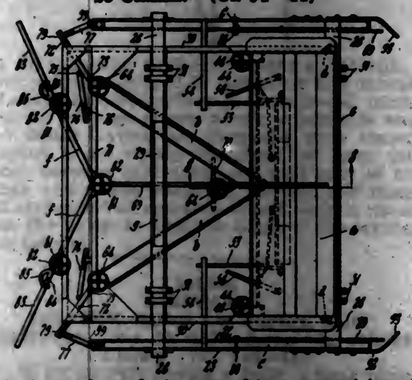
CABINET DESIGN

Leonard H. Darbyshire, Detroit, Mich., assignor, by mesne assignments, to Borg-Warner Corporation, a corporation of Illinois

Original No. 2,039,152, dated October 27, 1936, Serial No. 692,852, October 3, 1933. Application for reissue February 4, 1937, Serial No. 124,143

19 Claims. (Cl. 220—9)

1. A heat insulated cabinet comprising a top wall, an end wall and a front wall having a door opening formed therein, said door opening having a vertically disposed edge portion in spaced relation to the outer surface of said end wall, said top and front walls having a groove formed across the upper surfaces thereof, respectively, in alignment with said edge of and terminating at said door opening, and a flanged end panel for covering the end surfaces of said cabinet disposed outwardly of said groove and edge of said door opening and the corner formed by the juncture of said three walls, said covering having securing flanges projecting inwardly of said cabinet for engagement therewith within said door opening and said groove.



20,611

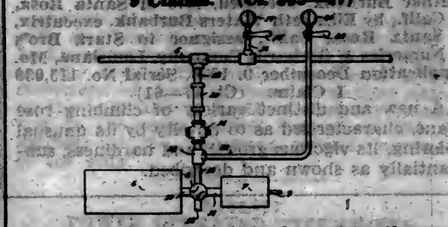
MACHINE FOR SPREADING AND SURFACING ROAD MATERIAL

Alma N. Nickerson, Plymouth, Mass.

Original No. 1,976,291, dated August 14, 1934, Serial No. 632,635, August 4, 1932. Application for reissue November 11, 1935, Serial No. 49,269

25 Claims. (Cl. 94—44)

1. A road surfacing machine comprising in combination two elongated parallel runners, a hopper between the runners, the hopper being adapted to receive material to be spread and deliver it between the runners, the runners extending rearwardly of the hopper and restraining the sidewise spread of the material discharged from the hopper as the machine is moved forward on a road bed, means for regulating the discharge of material from the hopper, a leveling plow behind the hopper, and additional spreading means cooperating with said plow and adjustably movable laterally relative to the plow for laterally spreading material behind the hopper to a greater width than the length of the hopper.



20,612

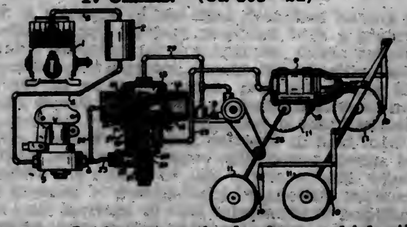
CONTROL FOR AUTOMATIC AIR BRAKE APPARATUS

Michael Reynolds, Ottumwa, Iowa

Original No. 1,992,443, dated February 26, 1935, Serial No. 720,171, April 13, 1934. Application for reissue September 26, 1935, Serial No. 42,310

9 Claims. (Cl. 303—47)

1. In an automatic air brake system, the combination with a train line and the brake mechanism of individual cars of a train, means for restricting the flow of air from said train line to said brake mechanism of one or more cars, and means for reducing the air pressure between said restricting means and said brake mechanism of said one or more cars to actuate said brake mechanism without actuating the brake mechanism of the other cars of the train.



20,613

SPEED CONTROLLED BRAKE

Theophile Tarision, Livry-Gargan, France, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a corporation of Pennsylvania

Original No. 2,024,669, dated December 17, 1935, Serial No. 730,877, June 16, 1934. Application for reissue May 12, 1937, Serial No. 142,232. In France December 7, 1933.

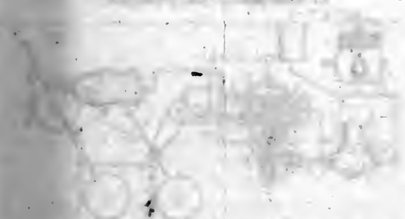
17 Claims. (Cl. 303—21)

1. In a fluid pressure brake for a vehicle, the combination with a brake cylinder, of manually controlled means for effecting the supply of fluid under pressure to the brake cylinder, means operative to establish a fluid pressure which pres-

sure is proportional to the speed of a vehicle wheel, a brake controlling valve device comprising valve means for controlling the supply of fluid under pressure to the brake cylinder, a first movable abutment subject to the opposing pressures of the brake cylinder and the pressure of fluid supplied to effect an application of the brakes for operating said valve means, and a second movable abutment subject to the opposing pressures of the fluid supplied to effect an application of the brakes and to said fluid pressure which is proportional to the speed of the vehicle, said last named movable abutment also controlling the operation of said valve device.

20,614
CONCENTRATION OF ORES
George H. Wigten, Eureka, Utah
No Drawing. Original No. 1,783,267, dated December 2, 1930, Serial No. 375,892, July 3, 1929. Application for reissue October 6, 1931, Serial No. 567,290
15 Claims. (Cl. 209—166)

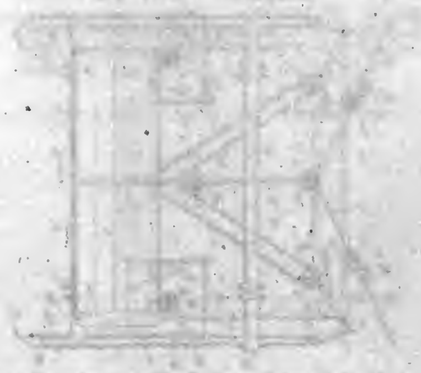
1. The process of concentrating oxidised ores by froth flotation which comprises subjecting the ore in the form of a pulp to a flotation operation in the presence of the reaction product of an oxygen free aromatic amino compound and phosphorus pentasulfid.



PLANT PATENTS

GRANTED JANUARY 4, 1938

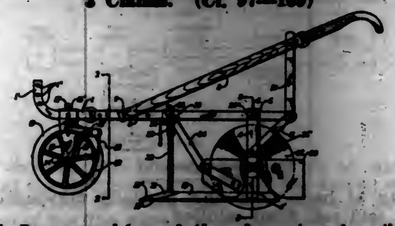
Owing to the fact that almost all of the illustrations of the plant patents are in colors, it is not practicable to print a cut of the drawing.



266
ROSE
Luther Burbank, deceased, late of Santa Rosa, Calif., by Elizabeth Waters Burbank, executrix, Santa Rosa, Calif., assignor to Stark Bro's Nurseries & Orchards Company, Louisiana, Mo.
Application December 9, 1936, Serial No. 115,039
1 Claim. (Cl. 47—61)

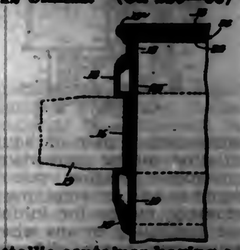
A new and distinct variety of climbing rose plant, characterized as to novelty by its unusual coloring, its vigorous growth and hardiness, substantially as shown and described.

267
ROSE
Luther Burbank, deceased, late of Santa Rosa, Calif., by Elizabeth Waters Burbank, executrix, Santa Rosa, Calif., assignor to Stark Bro's Nurseries & Orchards Company, Louisiana, Mo.
Application December 14, 1936, Serial No. 115,879
1 Claim. (Cl. 47—61)



A new and distinct variety of climbing rose plant, characterized by its white tea rose-like flower, borne on long, strong stems, with old rose fragrance, substantially as shown and described.

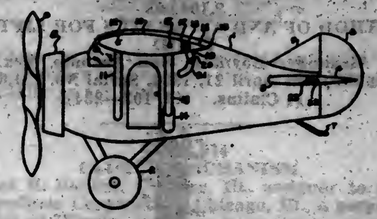
PATENTS



GRANTED JANUARY 4, 1938

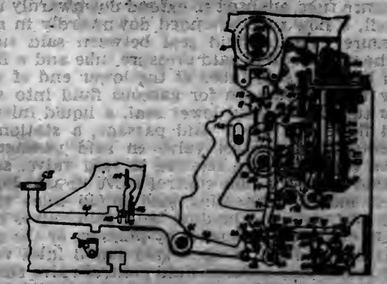
2,104,094
COMBINED CULTIVATOR AND WEED CUTTER
William Ackermann, London, Ohio
Application September 15, 1936, Serial No. 100,867
3 Claims. (Cl. 97—169)

1. In a machine of the character described, a frame comprising an inverted U-shaped member, a pair of rearwardly diverged blades having their rear ends rigidly connected with said U-shaped member, a vertically extending rod connected with the forward portions of said blades and also with said frame, a gauge wheel adjustably mounted on said frame in advance of said blades, a non-rotatable axle supported by the legs of said U-shaped frame member, a non-rotatable bushing mounted on said axle, an anti-skid disk, and extended hub members connected with said disk and rotatably mounted on said bushing.



2,104,095
CONTAINER
Charolette A. Arneson, Chicago, Ill.
Application September 2, 1936, Serial No. 479,164
Renewed May 6, 1936
12 Claims. (Cl. 220—53)

1. In a metallic container having a side wall, a cover, a flange secured to said cover and extending along the outer surface of the side wall, means securing the edge of said flange to said side wall, said flange having an elongated strip thereof adapted to be ripped therefrom to sever said flange between said cover and said edge of the flange, and means positioned between said flange and said side wall operable as said strip is ripped from the flange to wipe the edges of the opening thus formed.



2,104,096
AIRPLANE
John McK. Baffee, Los Angeles, Calif.
Application June 20, 1933, Serial No. 676,368
7 Claims. (Cl. 244—42)

1. In an aircraft having a body, a wing pivotally mounted on said body about a pivot in the forward part of the wing and comprising a main wing section and a trailing edge flap pivoted on said main section for movement with respect thereto, mechanism to positively swing said wing about its pivotal mounting, a control member secured to said flap, said body having guide means comprising one portion concentric with the pivot of the wing and another portion non-

concentric therewith, said portions cooperating with said control member whereby the flap is held in alignment with the said main section during the first portion of the downward pivotal movement of the wing from its normal setting on the body and is displaced downwardly relative to the main section throughout the remainder of the downward pivotal movement of the wing.

2,104,097
POWER OPERATED TYPEWRITER
Raymond G. Bower, Detroit, Mich., assignor to Burroughs Adding Machine Company, Detroit, Mich., a corporation of Michigan
Application April 28, 1933, Serial No. 668,247
22 Claims. (Cl. 197—98)

10. A machine of the class described having a traveling paper carriage provided with a platen movably mounted for line spacing, power return means for said carriage, means for arresting said carriage in an intermediate position during its return, means controlled by a manipulative member operable, when said member is manipulated in one manner with said carriage in said intermediate position, to cause said power means to complete the return of said carriage, and, when said member is manipulated in another manner with said carriage in said intermediate position, to cause said power means to line space said platen and said carriage to remain stationary.

21. A machine of the class described having a traveling paper carriage, means operable to move said carriage across the machine in one

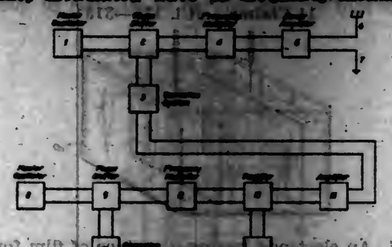
direction, motor driven means for returning said carriage in the opposite direction, said motor driven means including a normally disconnected clutch and a normally open motor switch, manipulative means operable by a momentary manipulation to engage said clutch and close said switch in such a manner that they will remain in said position after said manipulative means is released, and means automatically set into operation after the stoppage of said carriage to return said clutch to disconnected condition and to open said switch irrespective of the position of said manipulative means.

2,104,068
METHOD OF AND APPARATUS FOR LIFTING FLUID
Alexander Boynton, San Antonio, Tex.
Application April 21, 1934, Serial No. 721,669
14 Claims. (Cl. 103—234)

1. In a device of the character described, a pressure tube adapted to extend downwardly into a well, a flow tube extended downwardly in said pressure tube, a fluid seal between said tubes at the upper end of said pressure tube and a fluid seal between said tubes at the lower end of said flow tube, a passage for gaseous fluid into said flow tube above said lower seal, a liquid inlet to said flow tube below said passage, a stationary gaseous fluid control valve in said passage, a valve cage movable relative to said valve, seats in said cage, a liquid control valve in said liquid inlet, means connecting said liquid inlet valve and said cage and holding both said valves normally closed and operable by pressure of the gaseous lifting fluid to open said liquid inlet valve and retain said gaseous fluid control valve closed, and then movable in response to an increase in pressure of the well liquid thereon to open said gaseous fluid control valve and close said liquid inlet control valve.

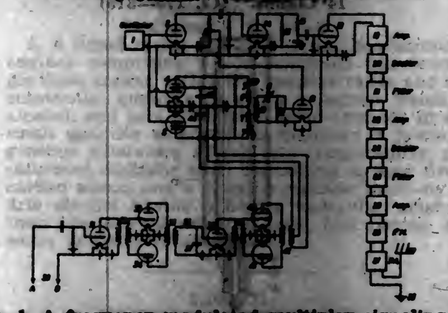
2,104,069
PROCESS FOR THE MANUFACTURE OF BORIC ACID
William E. Burts, Trona, Calif., and Harald de Rapp, Charleston, W. Va., assignors to American Potash & Chemical Corporation, Trona, Calif., a corporation of Delaware
Application June 25, 1932, Serial No. 618,639½
10 Claims. (Cl. 23—140)

18. In a process of treating solutions containing boric acid and a salt of a strong mineral acid, the steps comprising adding a sodium containing compound capable of increasing the solubility of boric acid and partially crystallizing out said salt from solution.



2,104,610
LIQUID WEIGHT METER
William S. Clarkson, Ann Arbor, Mich.
Application December 26, 1935, Serial No. 56,128
12 Claims. (Cl. 249—26)

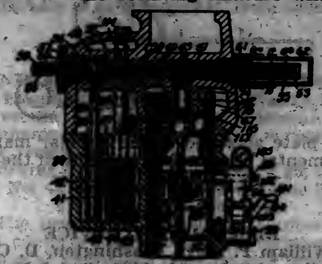
1. In combination, a pair of liquid receiving vessels, oscillating means supporting said vessels in counterpoise relation, valve means for supplying liquid to and for emptying it from said vessels alternately, means for inhibiting movement of said oscillating means whereby to define a predetermined weight difference between said vessels at the time movement thereof takes place, automatic means for regulating said valve means to reduce the velocity of liquid entering and leaving said vessels immediately prior to the filling and emptying of said vessels to a degree attaining said predetermined weight difference, and means independent of said automatic means and actuated subsequently to actuation of said automatic means by movement of said vessels for shifting the valve means.



2,104,611
RADIO SIGNALING SYSTEM
Edwin H. Armstrong, New York, N. Y.
Application September 14, 1935, Serial No. 40,547
8 Claims. (Cl. 250—6)

1. The method of transmitting a radio signal which consists in producing a frequency modulated wave the frequency of which is above audibility and the frequency variations of which correspond to the modulations of the signal to be transmitted, amplifying said wave, frequency-modulated wave to frequency-modulate

a wave of still higher frequency to an extent that the frequency deviations of the second wave are greater in extent than the frequency deviation of the first wave and transmitting the second wave.



2,104,612
MULTIPLEX RADIO SIGNALING SYSTEM
Edwin H. Armstrong, [illegible], N. Y.
Application September 24, [illegible] Serial No. 40,548
8 Claims. (Cl. [illegible])

1. A frequency-modulated multiplex signaling system comprising a plurality of channels, each channel consisting of a separate band of frequencies, said system comprising means for causing the said channels to frequency-modulate the transmitted wave, and means for causing the frequency deviation of the transmitted wave produced by each channel to be substantially greater than the frequency range of audibility, so as to reduce cross-modulation between the channels.

2,104,613
METHOD OF FORMING A FUEL CHARGE FOR INTERNAL COMBUSTION ENGINES
Arthur R. Eaton, Indianapolis, Ind., assignor, by mesne assignments, to Standard Oil Engineering Company, a corporation of Delaware
Application November 20, [illegible] Serial No. 676,172
2 Claims. (Cl. [illegible])

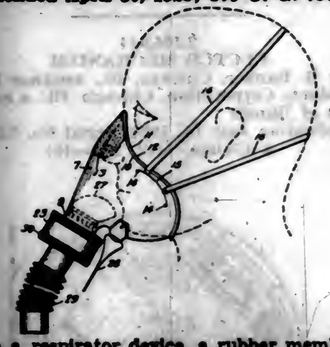
1. The method of [illegible] charge for internal combustion [illegible] consists in drawing air through a [illegible] engine section to saturate said air with [illegible] to form a carbureted [illegible] rich to fire, heating this [illegible] of mixture to a temperature above the [illegible] point of a normal charge of the fuel to form an appreciable amount of free hydrogen and free carbon monoxide gas and thereafter mixing relatively cold air with the resulting mixture whereby a

slow burning fuel charge is formed having a mixture of highly inflammable free gas therein, substantially as set forth.

2,104,614
CLUTCH MECHANISM
Oscar H. Banker, Chicago, Ill., assignor to New Products Corporation, Chicago, Ill., a corporation of Illinois
Application July 16, 1934, Serial No. 735,411
8 Claims. (Cl. 192—48)

1. In a clutch mechanism, the combination of a rotatable drive member, a rotatable driven member, an internal expanding clutch including clutch elements connecting said members together in driving relation, centrifugally operable means for controlling said clutch elements, an automatic overrunning clutch connection between said members permitting the drive of said drive member by said driven member, and a manually releasable jaw clutch of the overrunning type for releasing said driven member from driven relation with said drive member.

2,104,615
SPADE FOR A GUN TRAIL
Otis L. Beardsley, Gary, Ind.
Application November 22, 1935, Serial No. 51,625
2 Claims. (Cl. 89—42)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

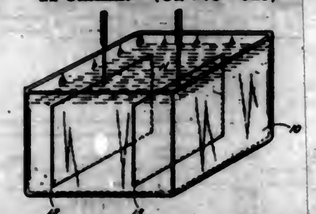


A gun trail, a spade member for the trail comprising a segmental plate fixed to the trail, said plate disposed transversely of the trail and extending laterally beyond the opposite sides of

the trail, a spade coextensive with the segmental plate and attached to the chord thereof and an

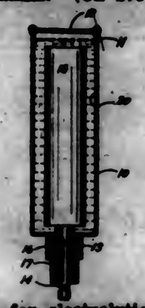
arched plate attached to the circular margin of the segmental plate and to the sides of the spade.

2,104,016
RESPIRATORY DEVICE
William P. Biggs, Washington, D. C.
Application October 16, 1935, Serial No. 45,197
9 Claims. (Cl. 128—146)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



1. In a respirator device, a rubber member to inclose the nose, mouth, and chin of a wearer, said member having a free edge with halves that are symmetrical on opposite sides of a central plane, said free edge being permanently overturned to form an outwardly facing channel, the line defined by the base of said channel on each side being substantially an ogee curve, the base of said channel being relatively rigid and serving as a hinge about which a considerable area of the side of said member is swung bodily inwardly when pressure is applied adjacent the base of said channel by positioning the member on the face of a wearer, thus increasing the area of contact of the member with the face and augmenting the gas-excluding seal, a pair of spaced fastening elements carried by each side of said member and approximately equidistant from the said free edge, and a rigid element secured to each pair of said fastening elements, said rigid elements serving to attach head-straps to said member and also to prevent flexure of said member about an axis transverse to said free edge, which flexure would decrease the sealing effect.

2,104,017
CELLULOSE ETHER PURIFICATION
Russell E. Bradshaw, Midland, Mich., assignor to The Dow Chemical Company, Midland, Mich., a corporation of Michigan
No Drawing. Application January 18, 1937, Serial No. 121,169
12 Claims. (Cl. 260—153)

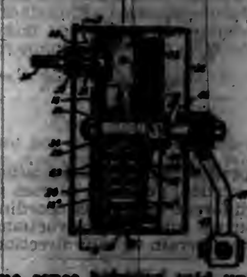


1. The method of purifying crude cellulose ethers which comprises dissolving the crude ether in a non-aqueous solvent therefor, and treating the solution with chlorine.

2,104,018
ELECTROLYTIC DEVICE AND METHOD OF MAKING SAME
Joseph B. Brennan, Fort Wayne, Ind.
Application March 22, 1933, Serial No. 662,107
11 Claims. (Cl. 175—315)

1. An electrode having a surface of film forming metal and a dielectric film thereon, the surface comprising a great number of minute particles of film forming metal deposited to form a porous or spongy mass, the dielectric film conforming to the surfaces of the particles whereby the area of dielectric film on the electrode is many times greater than the plane area thereof.

2,104,019
ELECTROLYTIC CONDENSER
Joseph B. Brennan, Fort Wayne, Ind.
Application July 20, 1935, Serial No. 32,416
14 Claims. (Cl. 175—315)

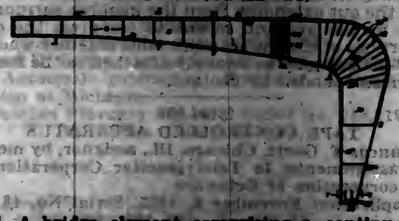


1. A cathode for electrolytic condensers and the like comprising a can of material which is corrodible by the electrolyte employed therein, and a protective coating of copper deposited on the internal surface thereof, the copper having a rough surface and comprising a great number of minute particles making electrical contact with each other and with the can.

2,104,020
RHEOSTAT
Addi Benjamin Gudmann, Beloit, Wis.
Application March 9, 1935, Serial No. 10,147
4 Claims. (Cl. 201—62)

1. A rheostat comprising, in combination, a resistance unit and a cooperating contactor mechanism mounted for movement relative to each other, a plurality of separate resistance elements carried by said resistance unit and arranged in spaced groups, means including a contact device carried by said contactor mechanism and movable into contact with said resistance elements in one of said groups for connecting the same in common circuit relation in response to a predetermined relative movement between said unit and said mechanism, and means including a second contact device carried by said contactor

mechanism in spaced relation to said first named contact device for subsequently connecting said resistance elements of another of said groups in common circuit relation with said first named group in response to further relative movement

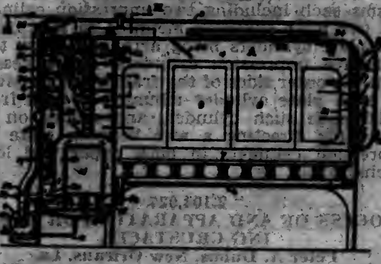


in the same sense between said unit and said mechanism, said first named contact device having a sufficient contact area to remain in contact with said first named group of resistance elements during said further relative movement.

2,104,021
FUEL
Conrad Cleo Callis, Oakmont, Pa.
No Drawing. Application April 24, 1935, Serial No. 17,027
13 Claims. (Cl. 44—9)

1. A liquid motor fuel for internal combustion engines comprising a non-benzenoid petroleum distillate boiling within the gasoline range and a substantial quantity of a low molecular weight alcohol, and as a stabilizing agent therefor in a small quantity sufficient to maintain a homogeneous admixture at sub-zero temperatures, a saturated aliphatic ether containing at least five carbon atoms and a gasoline miscible mono-hydric alcohol having a higher molecular weight than the alcohol admixed, said fuel having a water tolerance of about 12%.

2,104,022
BRIDGE CONSTRUCTION
Everett Chapman, Coatesville, Pa.
Application December 14, 1935, Serial No. 753,286
Renewed September 6, 1936
13 Claims. (Cl. 14—24)



1. A bridge element comprising a continuous member consisting of a central section and haunches connected thereto in spaced relation and constituting an inherently stable structure; each of said elements comprising a central web in continuous alignment and continuous flange members to which the central webs of said central section and haunches are welded; the central webs of said haunches including substantially horizontal portions aligned with the central web of the central section, and the flange members of said central section forming the upper and lower chords of the central section and being continuous with the flanges forming the intrados and extrados of said haunches, respectively.

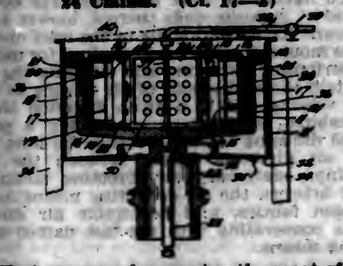
2,104,023
MANUFACTURE OF CELLULOSE ESTERS
Louis Etienne Clement, Meudon, France, assignor, by mesne assignments, to Eastman Kodak Company, Jersey City, N. J., a corporation of New Jersey
No Drawing. Application February 25, 1930, Serial No. 431,244. In France October 7, 1929
2 Claims. (Cl. 260—101)

1. The process of producing cellulose acetate which comprises acetylating the cellulose in the presence of methylene chloride at a temperature which will vaporize sufficient of the methylene chloride to prevent a rise of the reaction temperature substantially above 50° C., collecting methylene chloride vapors given off, condensing them and returning the methylene chloride to the acetylating process.

2,104,024
AIR CONDITIONED SLEEPING CABINET
Joseph A. Cambata, San Francisco, Calif.
Application December 9, 1935, Serial No. 53,487
6 Claims. (Cl. 98—1)

1. In an enclosed cabinet of the character described having air inlet and discharge openings formed at opposite ends thereof, blower actuated means for delivering air to the inlet openings, means mounted in the inlet openings for uniformly distributing, directing and diffusing the air to maintain the entire body of air flowing at a uniform velocity and in a given direction through the cabinet, said means comprising a pair of spaced diffusing fabrics covering the inlet openings, air directing means between the fabric coverings, stationary air directing means disposed between the air delivering means and the diffusion fabrics, and adjustable air directing means cooperating with the last named air directing means.

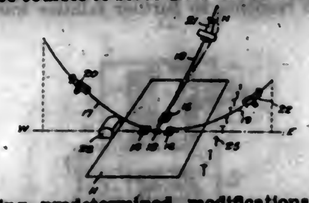
2,104,025
DECALCOMANIA PAPER
Lewis Davis, Worcester, Mass., assignor to McLaurin-Jones Co., Brookfield, Mass., a corporation of Massachusetts
Application August 23, 1934, Serial No. 741,121
9 Claims. (Cl. 41—33)



1. A decalcomania paper comprising a suitable backing sheet, an outer waterproof coating carried by said sheet to take decalcomania printing, and a protective coating of a rubbery nature between the first mentioned coating and said sheet.

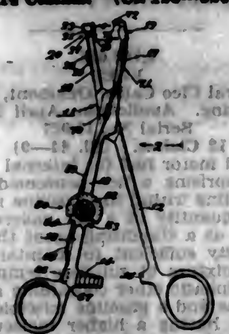
2,104,626
ROTARY PRESS UNIT
Arthur R. Dowell, Washington, D. C., assignor to The Duplex Printing Press Company, Battle Creek, Mich., a corporation of Michigan
Application July 11, 1934, Serial No. 734,673
7 Claims. (Cl. 101—180)

1. A double perfecting printing unit for a multi-unit rotary printing press; said unit comprising a unit frame, upper and lower printing mechanisms each including two impression cylinders and two plate cylinders mounted in said frame, said plate cylinders being arranged below their respective impression cylinders, and accessible from the outer sides of the frame, inking devices for each plate cylinder mounted in said frame underneath such cylinder, and guides on the frame for directing a web between plate and impression cylinders in both upper and lower mechanisms.



2,104,627
PROCESS OF AND APPARATUS FOR TREATING CRUSTACEA
Peter A. Dubos, New Orleans, La.
Application March 31, 1934, Serial No. 718,509
24 Claims. (Cl. 17—2)

1. That process of preparing the meat of crustacea comprising subjecting a crustacean to centrifugal action to separate the meat from the shell and utilizing the same centrifugal action to effect washing of the separated meat.



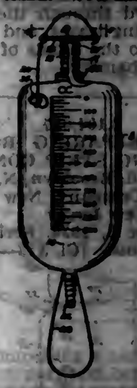
2,104,628
AIRCRAFT BLIND LANDING BEAM SYSTEM
Francis W. Dunmore, Washington, D. C., assignor to The Government of the United States of America, as represented by the Secretary of Commerce
Application March 3, 1936, Serial No. 66,977
32 Claims. (Cl. 250—11)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. In a method for vertical guidance of aircraft with respect to a terrain including a landing area, the improvement which consists in propagating a radiated field providing vertical guidance courses to serve different directions, and

imparting predetermined modifications to the slope of the vertical guidance courses propagated in serving different directions coordinating said guidance courses with the obstructional characteristics of the terrain in said directions.

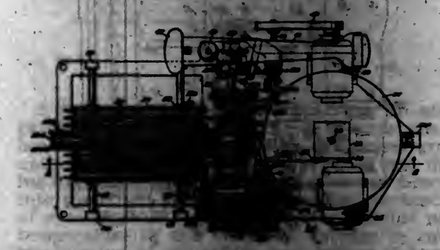
2,104,629
HEMOSTAT
Louis A. Eshman, Los Angeles, Calif.
Application May 12, 1936, Serial No. 79,513
14 Claims. (Cl. 128—326)

1. A hemostat comprising an instrument having stems pivotally connected, each with a jaw thereon, a feeding device for gut mounted on one of the jaws, a resilient jaw connected to the second jaw and adapted to retain the end of the gut on bringing the jaws together so that on separation of the jaws a strand of gut extends between said jaws whereby each strand may be looped around a member to be surgically ligated, means on the said jaws to align the end portions of the gut extending from the member surrounded by the gut and means to compress the end portions of the gut to secure same together whereby the gut may be securely attached to the member surrounded by the gut.



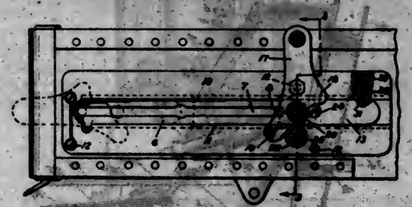
2,104,630
TAPE CONTROLLED APPARATUS
Maurus T. Goetz, Chicago, Ill., assignor, by mesne assignments, to Teletypesetter Corporation, a corporation of Delaware
Application November 6, 1935, Serial No. 48,474
31 Claims. (Cl. 199—18)

3. In a tape controlled apparatus, a plurality of elements to be individually and selectively



conditioned, a set of code bars variously presentable having notch and tab distribution for affording a selective clearance to each of said elements individually in accordance with a permutation signal, a set of tape sensors, and means for transferring a signal from said tape sensors to said set of code bars including a [illegible] set of connector bars and an element [illegible] operated by a dormant condition of said connector bars.

2,104,631
CONTAINER
Christian Lee Gauhe, Ashtabula, Ohio
Application April 20, 1933, Serial No. 15,660
5 Claims. (Cl. 128—214)



5. A flask or container for medical solutions used in intravenous therapy comprising a body portion having an opening at the upper end, a closure member for the upper end of said body portion, a reduced extension or neck at the lower end of said body portion adapted to have a delivery tube attached thereto, and a closure for said reduced extension or neck comprising an elastic tubular-shaped member closed at the lower end and adapted to fit over said extension or neck and flexible means adapted to be grasped so that the same can be removed from the extension or neck by being at least partially rolled or pulled back on itself and without the hands coming in contact with the extension or neck.

2,104,632
AUTOMATIC PHONOGRAPH
Clifford H. Green, Grand Rapids, Mich., assignor to Automatic Instrument Company, a corporation of Michigan
Application February 20, 1934, Serial No. 712,218
15 Claims. (Cl. 274—10)

15. In a multiple record disc phonograph, a selector, a transfer including a shaft rotatable less than one complete turn forwardly to move a selected disc into playing position and reversely to return the disc to storage position, a cam mounted on the shaft, a selector clutch having radial operative projections which are alternately depressible to engage and disengage the clutch, a shifter shaft spring-pressed into contact with the cam in the normal position of the transfer shaft and thereby held in normal position, and a shifter element normally latched to the shifter shaft and having a flange which is then positioned to contact the projection for engaging the selector clutch, said element being unlatched by the selector and spring-pressed into position for engaging the projection for releasing the clutch and stopping the selector, said shifter shaft being released for movement to relatch with said element when the cam is moved away by rotation of the transfer shaft, and the shifter shaft being moved back to normal position when the cam and transfer shaft returns to normal position to restore said element to normal position for re-engaging the selector clutch.

2,104,633
BOLT OPERATING MECHANISM FOR MACHINE GUNS
Samuel M. Green, Cape, Ga.
Application October 11, 1933, Serial No. 44,572
4 Claims. (Cl. 89—27)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

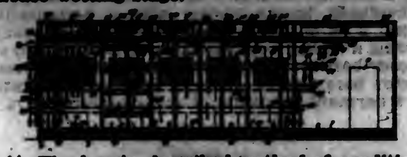
1. In a machine gun, a casing having a side plate provided with a slot, a breech bolt reciprocally mounted in the casing and having a stud extending through the slot, a frame on the outer side of the side plate, a slide reciprocally mounted in the frame and engaging the forward face of the stud on the bolt, a lever having a toe and a heel and pivotally mounted on the slide between the toe and heel, a stop pin carried by the slide in front of the pivot of the lever, a spring normally acting to rotate the lever to a vertical position with its heel engaging the stop pin, and a member serving both as a fulcrum and a stop carried by the frame below the pivot of the lever and engageable by the toe of the lever.

2,104,634
COIN CONTROLLED VENDING APPARATUS FOR ICE CREAM PACKAGES
Wilhelm Hamel, Rotterdam, Netherlands, assignor to Carp's Handelsmaatschappij voor Automatiek en Scheepsgoederen, N. V., Amsterdam, Netherlands, a Dutch company
Application December 23, 1935, Serial No. 55,914
In Germany April 8, 1935
18 Claims. (Cl. 62—61.5)

5. In a vending machine for packages of ice cream or the like, a cabinet having a compartment for solid carbon dioxide and a package delivery duct extending downwardly toward a package delivery port, means located above said delivery

port for delivering packages singly into said duct, and a relatively restricted conduit for leading

gaseous carbon dioxide from said compartment and delivering it into said duct above said port.

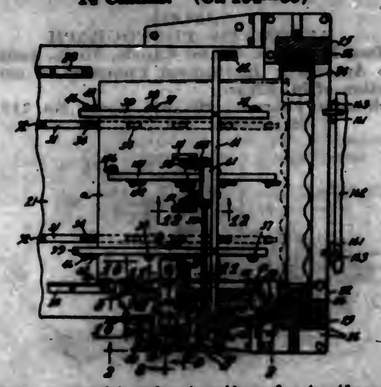


2,104,035
STOKER FOR LOCOMOTIVES
William Thompson Hanna, Cincinnati, Ohio
Application April 5, 1930, Serial No. 443,761
Renewed November 21, 1935
11 Claims. (Cl. 110—101)

10. In a stoker mechanism, the combination with a fire box having a firing opening of a conduit for conveying fuel from a source to said firing opening, the upper end of said conduit embracing said opening and having adjacent the lower edge of the firing opening a horizontal ledge over which fuel flows through said firing opening, means for distributing fuel fed to said opening upon and over the fire, and fuel conditioning and regulating means mounted in said conduit including a rotary tapered worm extending from a position at the rear wall of said conduit not above the horizontal line of the ledge of said conduit to a position immediately adjacent said ledge.

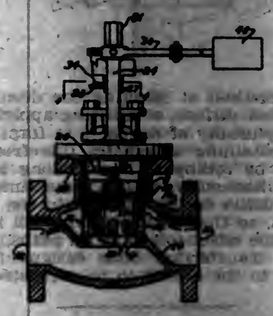
2,104,036
CONTINUOUS TREATMENT OF MATERIALS
Gordon D. Harris, Stamford, Conn., assignor, by mesne assignments, to Wurton Machine Company, Philadelphia, Pa., a corporation of Pennsylvania
Application July 22, 1929, Serial No. 379,964
46 Claims. (Cl. 131—65)

1. A tobacco-treating process comprising subjecting dry tobacco to a priming treatment with moisture-saturated air, conveying the tobacco to a casing stage in which the tobacco is subjected to moisture-saturated air at approximately 70° to 80° F., and subjecting the tobacco to a surface-wetting stage.



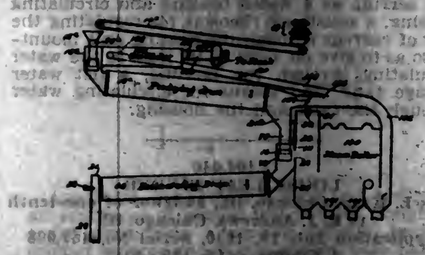
44. The herein-described method of conditioning cigar wrapper leaf tobacco to render the leaves soft and pliant, which consists in continuously passing suspended hands of leaves through a conditioning chamber, causing humid air to pass upward through the chamber and through the traveling leaves, and in imparting a swinging motion to the hands of leaves as they pass through the chamber.

2,104,037
METHOD OF PREPARING BODY BLANKS FOR TEARING STRIP CONTAINERS
John M. Hothersall, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a corporation of New Jersey
Application June 2, 1936, Serial No. 83,379
9 Claims. (Cl. 112—15)



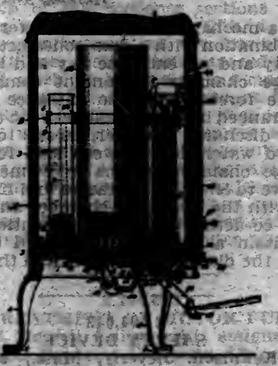
1. The method of preparing a container body blank having a removable tearing strip, which comprises forming a tongue in said blank which is integral with a tearing strip formed in the blank, said tongue being disposed at an angle to the tearing strip, and bending the tongue into longitudinal alignment with the tearing strip.

2,104,038
SHEET GAUGING DEVICE
Wilson R. Hull, East Orange, N. J., assignor to American Can Company, New York, N. Y., a corporation of New Jersey
Application September 6, 1935, Serial No. 39,496
14 Claims. (Cl. 164—59)



1. In a machine for treating sheets, the combination of work elements for performing an operation thereon, means for feeding a sheet to said work elements, separately movable gauging members having a plurality of gauge contact points, and means for moving the contact points of said gauging members independently of one another in a direction transverse to the line of feeding and into engagement with the same side edge of the sheet for aligning them therewith.

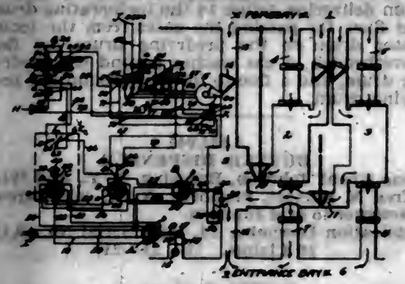
2,104,039
VALVE
William L. Hunter, Erie, Pa., assignor to Northern Equipment Company, Erie, Pa., a corporation of Pennsylvania
Application September 26, 1935, Serial No. 41,972
2 Claims. (Cl. 251—167)



1. A valve comprising a casing having an inlet and an outlet, a partition between the inlet and the outlet and having an opening therethrough, the outer wall of the casing having an opening therethrough facing the partition opening, a cage with its ends fixed in the respective openings, and a plunger movably mounted in the cage, the cage having a flexible flange projecting angularly around one end by means of which that end of the cage is fixed in the casing opening.

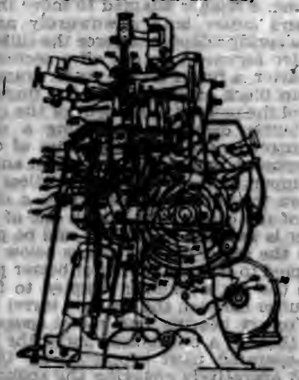
2,104,040
REFUSE INCINERATION
George F. Hurt, New York, N. Y.
Application August 27, 1934, Serial No. 741,539
9 Claims. (Cl. 110—14)

1. In refuse incineration apparatus, an elongated rotary drum enclosing a furnace chamber through which the refuse progresses gradually from the inlet end to the outlet end during its treatment, a fuel injecting burner directed into the outlet end of the drum for combustion of auxiliary fuel when required to provide high temperature in the chamber, thereby to cause the burning of the refuse and driving of passible components therefrom, and the drying of the refuse, as the combustion gases traverse the furnace chamber counter to the progress of the refuse, means for maintaining flow of the gases through the furnace chamber, a combustion chamber to which the gaseous products flow from the furnace chamber inlet, a burner for introducing fuel and air to the combustion chamber adapted to maintain therein combustion temperatures to consume unburned gaseous products received from the furnace chamber, a predrying drum delivering refuse to the incinerating drum, and flues for passing the gases from the incinerator drum to the predrying drum for flow therethrough, a gas washer beyond the predrying drum, and a flue to by-pass around the predrying drum.



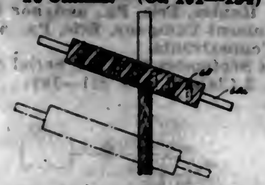
2,104,041
BUTTER DISPENSER
Irene Grant Johnson, Brooklyn, N. Y., and Winfred N. Larcott, Elizabeth, N. J.; said Larcott assignor to said Johnson
Application December 24, 1935, Serial No. 56,110
16 Claims. (Cl. 31—21)

1. A butter dispenser, including a casing, means for projecting a bar of butter through the bottom of the casing, a cutter frame, a cutter in said frame, a trigger adapted to move the cutter frame and cutter both downwardly and rearwardly, a spring adapted to force the cutter frame and cutter forwardly to cut off a section of the bar of butter, a finger on the cutter frame, and a fixed cam block around which the finger moves to control the path of movement of the cutter.



5. A butter dispenser, including a casing, a rotary turret in the casing, a series of channel-like receptacles mounted in the turret and adapted to support bars of butter in vertical position resting on the bottom of the casing, a die in the bottom of the casing with which one of the bars of butter is adapted to register and be projected through the same, cutting means below the casing adapted to sever a section of butter projected through the die, a plunger adapted to force the bar of butter through the die, said turret having a central rotary bearing and radial spokes in the bottom thereof, a crank arm under the turret, a gravity-operated pawl supported on the crank arm and operatively engaging the spokes, a second crank arm operatively connected with the first-mentioned crank arm, and a sliding bar projecting beyond the wall of the casing and operatively engaging the last-mentioned crank arm to swing the same a predetermined distance to cause the turret to turn a distance equal to that between the butter receptacles.

2,104,942
AUTOMATIC CONTROL MECHANISM FOR FISH LOCK DRAINAGE
John P. Jolliffe, Portland, Oreg., assignor to the Government of the United States of America, represented by the Secretary of War
Application May 25, 1937, Serial No. 144,615
10 Claims. (Cl. 61—21)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



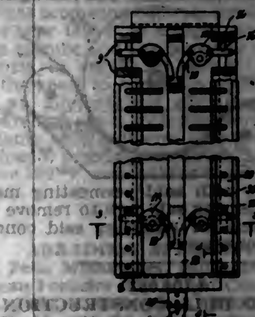
1. In a mechanism of the character described, the combination with a dam construction having a forebay and an entrance bay and including a discharge chamber in conduit communication with the forebay and the entrance bay; of a valve arranged in the conduit between the forebay and the discharge chamber, means to provide a regulated water flow between said forebay and discharge chamber, means in connection with said valve to effect its operation and means associated with the discharge chamber and entrance bay and co-acting with the first mentioned means to maintain a predetermined head differential between the discharge chamber and the entrance bay.

2,104,943
SAFETY DEVICE
Frank Kennison, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a corporation of New Jersey
Application October 30, 1936, Serial No. 108,383
7 Claims. (Cl. 12—14)

2. In a machine for applying pressure to shoe parts, a motor, a countershaft driven by the motor, a cam on the countershaft, a clutch between the countershaft and the cam, pressure-applying means operated by the cam, a clutch-tripping rod, a treadle connected thereto, a switch for controlling the motor, and means for opening the switch to stop the motor and for simultaneously rendering the treadle inoperative to trip the clutch.

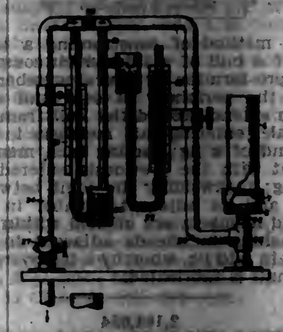
2,104,944
METHOD AND APPARATUS FOR THE DECORATION OF ELONGATED SURFACES
Orville Deering Kling, Dayton, Ohio, assignor to Oxford Varnish Corporation, Detroit, Mich., a corporation of Michigan
Application July 16, 1936, Serial No. 90,887
16 Claims. (Cl. 101—154)

1. The method of effecting the decoration of an elongated surface, comprising applying a design to a plurality of members to form patterns thereon, obtaining a transfer therefrom on an offset roll by rolling such roll along both patterns simultaneously, at the same time moving the roll relative to the patterns in the direction of its axis, so that both patterns will be transferred to the offset roll in spiral paths, and subsequently transferring both designs from the offset roll to the article to be decorated.



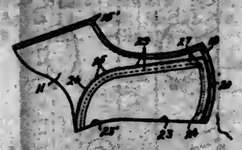
2,104,945
ELECTRIC HOT WATER RANGE
Otto A. Klopp, Oakland, Calif.
Application November 19, 1934, Serial No. 753,611
Renewed March 8, 1937
6 Claims. (Cl. 219—37)

4. In a heating apparatus of the character described a plate having an electric resistance heating unit mounted therein, a housing disposed in heat conducting engagement with said plate and serving as a water heating and circulating housing, a resistance rheostat for regulating the flow of current through the heating unit mounted so as to give off most of its heat to the water circulating through the housing, a hot water storage tank, and means for circulating water through the tank and the housing.



2,104,946
LOOSE LEAF BINDER
Erik L. Krag, Chicago, Ill., assignor of one-tenth to R. J. Andrews, Chicago, Ill.
Application July 10, 1930, Serial No. 467,096
4 Claims. (Cl. 129—6)

2. In a loose leaf binder, a base plate, a pair of prong bars, means for mounting said prong bars on said plate for movement transversely of said plate and also for movement longitudinally of said plate a distance equal to the entire length thereof, means for operating said bars transversely, means for preventing longitudinal movement of one of said bars when said binder is closed, said latter means comprising a stop fixed with reference to said base plate and a finger adapted to coact with said stop and with said prong bar to prevent movement of said prong bar.



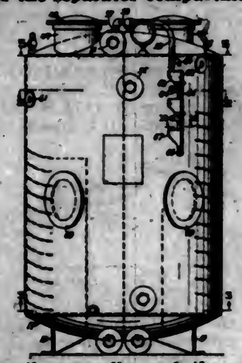
4. In a loose leaf binder, a base plate, a pair of prong bars, means for mounting said prong bars on said plate for movement transversely of said plate and also for movement longitudinally of said plate a distance to the entire length thereof, and means for operating said bars transversely, said operating means comprising a bar slidably mounted with reference to said plate, levers pivoted to said plate, and links pivotally connecting said operating bar and said prong bar mounting means with said levers.

2,104,947
APPARATUS FOR PRESHRINKING AIR RESISTANCE OF FIBROUS ARTICLES
Ernest Kendall Long, Baltimore, Md.
Application April 28, 1936, Serial No. 77,830
1 Claim. (Cl. 73—51)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

Apparatus for rapidly drying and testing the air resistance of sample test pads of fibrous material comprising a suction conduit having a ground tapered end, a cup-shaped base having a correspondingly ground tapered opening in its bottom for air-tight fit over the end of said conduit, a mesh screen extending across the rim of said cup-shaped base and adapted to hold the wet pulp for drying into a test pad and the test pad, a pipe threaded on said cup-shaped base and holding said screen over the rim of the cup-shaped base, a manometer connected to said suction conduit for measuring air flow therethrough, a second manometer for measuring the resistance to air flow of said test pad, and means to adjust the flow of air through said conduit and test pad.

2,104,948
SHOE CONSTRUCTION
James F. Marshall, Auburn, N. Y.
Application December 20, 1934, Serial No. 758,280
14 Claims. (Cl. 36—45)

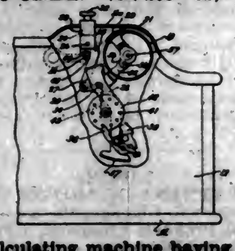
1. In a shoe structure of the class wherein a pair of complementary outer quarter sections are secured to each other at their rear ends by a back seam with the edges of said seam facing inwardly, in combination, a counter stiffener composed of two individual complementary sections, each of said stiffener sections being arranged in overlying relation with a respective one of the quarter sections, the rear ends of the counter stiffener sections being spaced from each other and receiving the inwardly facing edges of the back seam therebetween, means firmly securing each counter stiffener section to said respective one of the outer quarter sections, a reenforcing element composed of counter stiffener material arranged to extend across said seam and in over-lying relation with the adjacent ends of said stiffener sections, and means securing the reenforcing element to the counter stiffener sections independently of said outer quarter sections.



2,104,949
TREATMENT OF MOTOR FUEL
Jacque C. Morrell, Chicago, Ill., assignor to Universal Oil Products Company, Chicago, Ill., a corporation of Delaware
No Drawing. Application July 29, 1932, Serial No. 626,178
9 Claims. (Cl. 44—9)

5. In the treatment of cracked hydrocarbon distillates of the type obtained by cracking hydrocarbons which produce substantial quantities of phenolic substances in the cracked distillate, the steps of extracting the crude phenolic substances, converting the same to more highly effective inhibitor bodies, and readding the same to the distillate in quantity sufficient to stabilize the distillate against gum formation.

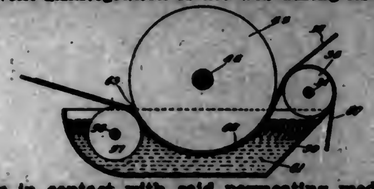
2,104,950
OIL AND WATER SEPARATOR
Paul R. Nibecker, United States Navy, and Rob Roy McDonald, Oakland, Calif.
Application January 2, 1936, Serial No. 57,950
12 Claims. (Cl. 210—51)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



1. An oil and water separator unit comprising an oil and water entrance compartment, a separator compartment, means in the separator compartment for separating the oil and water into a plurality of spirally ascending, parallel strata permitting the clear water to collect by gravity at the bottom of each strata, the length of the strata being substantially greater than the maximum width of the separator unit but less

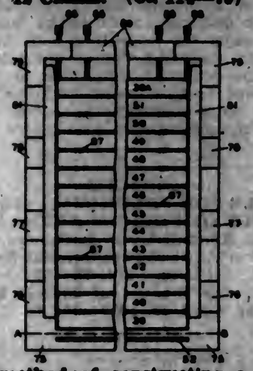
than the outer periphery thereof, means at the upper end of the separator compartment for de-

flecting the oil upwardly and the clear water downwardly.



2,104,051
CALCULATING MACHINE
Frederick A. Niemann, Chicago, Ill., assignor to Felt & Tarrant Mfg. Co., a corporation of Illinois
Application May 16, 1935, Serial No. 21,734
5 Claims. (Cl. 235—62)

2. In a calculating machine having denominational orders of accumulator registering mechanisms including numeral wheels, sight openings through which said numerals may be viewed and devices for transferring a carry from lower to higher denominational orders of accumulator registering mechanisms; means for preventing said carry transfer devices from effecting said carry transfer in selected orders, and means actuated by said preventing means for concealing the numeral wheels of said selected orders from view.



2,104,052
APPARATUS FOR MAKING SATURATED, SIZED, FILLED, OR COATED PAPER OR FIBREBOARD
Isador J. Novak, Bridgeport, Conn., assignor to Raybestos-Manhattan, Inc., Bridgeport, Conn., a corporation of New Jersey
Application July 19, 1933, Serial No. 681,056
4 Claims. (Cl. 92—40)

1. The combination with a paper forming machine having means for felting aqueous fibrous pulp into the form of a continuous wet web, of a vat containing a bulk supply of selected permeating medium in liquid condition, a hollow roll having a foraminated surface rotatably positioned in said vat, means, separate from and independent of the web felting means, for passing said continuous wet web into contact with said permeating medium, comprising, an endless foraminated conveyor for confining the wet web between its surface and the foraminated surface of the roll to prevent disintegration of the web during its pas-

sage in contact with said permeating medium, means for condensing said web to remove excess liquid and means for removing said condensed web from the conveyor.

2,104,053
WELDED HULL CONSTRUCTION
John H. Odenbach and John Cattanach, Rochester, N. Y., assignors, by direct and mesne assignments, to Dolomite Marine Corporation, Rochester, N. Y., a corporation of New York
Application October 28, 1935, Serial No. 47,006
12 Claims. (Cl. 114—79)

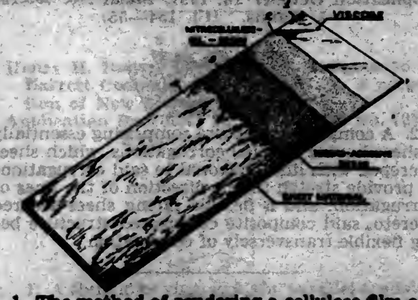
7. The method of constructing a transverse section of a hull of a ship which comprises the steps of pre-forming structural members to conform to the periphery of said hull and of a length to extend around the hull from gunwale to gunwale; entering said members individually at one end of a jig; forcing each member into alignment with the previously entered member in the jig; tackwelding the joint between each member and its adjacent member in said jig, while said members are aligned within said jig; and attaching bulkheads adjacent to the end members in said jig, whereby a transverse section of said hull is fabricated.

2,104,054
BACTERIA-YEAST PROCESS OF BREAD MANUFACTURE
William L. Owen, Baton Rouge, La., assignor to The Lummus Company, New York, N. Y., a corporation of Delaware
No Drawing. Application November 23, 1934
Serial No. 754,497
4 Claims. (Cl. 99—90)

1. A bacteria-yeast process of bread manufacture comprising, continuously propagating a yeast culture which retains its leavening and reproducing powers through repeated cycling, simultaneously acclimatizing the yeast culture to a menstruum similar in composition to the composition of the dough in which it is to be employed,

isolating a culture of mesophilic bacteria of the *Clostridium butyricum* type in a cereal infusion under semi-anaerobic conditions, isolating a thermophilic gas producing bacteria incubated at temperatures near 130° F. in a sugar solution, mixing the yeast culture and the bacterial cultures at a temperature in excess of 100° F. and thereby causing the yeast to stimulate the bacterial cultures in an alleocatalytic effect, combining the mixed leavening agent with flour and other bread constitutents at a temperature above 100° F. to form a dough, proofing the dough at a temperature above 100° F. and baking the dough.

2,104,055
ABRADING APPARATUS
Louis D. Felk, Mishawaka, Ind., assignor to The American Foundry Equipment Company, Mishawaka, Ind., a corporation of Delaware
Application August 25, 1932, Serial No. 630,262
2 Claims. (Cl. 51—9)

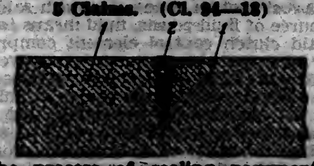


1. In a metal cleaning and tumbling apparatus, in combination, side walls, an endless conveyor belt adapted to describe an arc of a cylinder in its line of travel, said arc forming a chamber with said side walls, means for driving said belt and an abrasive throwing wheel above the chamber formed by said belt and side walls, said wheel being rotated in a plane transverse of the direction of motion of said belt, whereby abrasive will be distributed over the entire width of said belt from one of the side walls to the other.

2,104,056
LUBRICATED, SPLIT RING, STOPCOCK
Frank J. Schweitzer, Brea, Calif., assignor of one-half to William D. Shaffer, Brea, Calif.
Application September 23, 1936, Serial No. 102,197
11 Claims. (Cl. 251—102)

1. A stop-cock having a shell with a bore and ports leading therefrom, an expansive, helically split closure ring seated in the bore and having ports registerable with the shell ports, and operative means engageable with the split ring whereby to move either of diagonally opposite corners of the split side into engagement with, and slide it on, the opposite split surface to effect a contractive release of the ring from its seat in the bore.

2,104,057
METHOD OF APPLYING FILMS MADE FROM VISCOSE TO PAPER AND THE LIKE
Clyde Scott, Newark, N. J.
Application April 14, 1933, Serial No. 666,212
29 Claims. (Cl. 154—40)



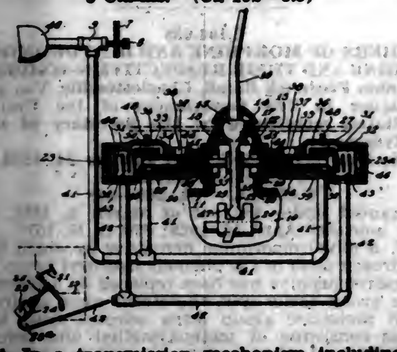
1. The method of rendering a cellulose film adherent which consists in coating the film with a lacquer solution of nitro-cellulose and linseed oil, drying said coating and then applying a coating of resinous material, said resinous material having the property of becoming adherent under the influence of heat.

2,104,058
ETHERS OF MORPHINE AND DIHYDROMORPHINE AND THEIR RESPECTIVE N-OXIDES
Lyndon Frederick Small, Charlottesville, Va., assignor to The Government of the United States, represented by the Secretary of the Treasury
No Drawing. Application October 24, 1936, Serial No. 107,468
7 Claims. (Cl. 260—25)
(Granted under the act of March 2, 1883, as amended April 30, 1928; 370 O. G. 757)

7. A dihydromorphine derivative in which the hydrogen atom of the phenolic hydroxyl group of dihydromorphine has been replaced by a protective group easily split therefrom when desired, said protective group being selected from the class consisting of methoxymethyl and benzyl radicals and their analogs, as well as the salts of such derivative.

2,104,059
METHOD OF SEALING EXPANSION JOINTS
Walter O. Snelling, Allentown, Pa.
Application June 28, 1934, Serial No. 732,745
5 Claims. (Cl. 94—18)

1. The process of sealing pavement joints which comprises filling a homogeneous material selected from the group of vulcanizable but substantially unvulcanized products and polymerizable but incompletely polymerized products into



the open space defining such joint and thereafter heating the surface portion of such material to harden it and render it non-plastic without similarly heating the material filling the lower portion of such joint.

2,104,059
CORRUGATED STRUCTURE
Allen L. Spafford, Clequet, Minn., assignor to Wood Conversion Company, Clequet, Minn., a corporation of Delaware
Application October 16, 1931, Serial No. 569,198
5 Claims. (Cl. 154—55)

2. A composite structure comprising essentially a sheet having parallel corrugations, which sheet is creped with lines diagonal to said corrugations to provide stretch in the direction of the lines of corrugation, and a flexible facing sheet secured thereto, said composite corrugated structure being flexible transversely of corrugation.

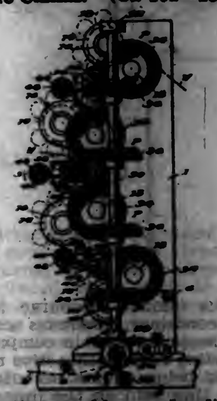
2,104,061
TRANSMISSION CONTROL MECHANISM
Charles J. Surdy, Tuckahoe, N. Y., assignor to Bendix-Westinghouse Automotive Air Brake Company, Pittsburgh, Pa., a corporation of Delaware
Application April 5, 1935, Serial No. 14,929
5 Claims. (Cl. 192—3.5)

1. In a transmission mechanism including a clutch control element and a casing adapted to house a plurality of gear trains, the combination including means arranged to selectively actuate such gear trains to operative positions, such means comprising a shiftable member arranged to engage at least one of said gear trains and an actuator for shifting said member, said actuator having a lost motion connection with said member, a source of fluid power, fluid means for actuating said clutch control element comprising a cylinder having a piston therein operatively connected to said clutch control element, means providing a passage between the source of fluid power and the cylinder for operating said piston, and a valve device interposed in said passage for controlling the flow of fluid power from said source to said cylinder, said valve device including an element in contacting relation with said actuator and resilient means tending to move said valve device to a position for interrupting communication between the source of fluid power and said cylinder, said actuator being arranged, upon initial actuation thereof in the course of its gear train selecting movement but prior to movement of said shiftable member by said actuator, to move said valve device against the tension of said resilient means for establishing communication between the source of fluid power and the cylinder.

2,104,062
SURFACING MACHINE
John C. Temple, New York, N. Y.
Application October 28, 1935, Serial No. 46,995
10 Claims. (Cl. 29—81)

1. A surfacing machine for use upon metallic surfaces comprising in combination, a chassis, a magnetic traction roller mounted on said chassis, said traction roller including two roller sections, means for simultaneously magnetizing both of said roller sections, means for releasably clutching said roller sections together to turn as a unit or to cause a differential turning movement between said roller sections, rotatable surfacing means on said chassis, and motor driven means for simultaneously rotating one of said magnetized roller sections and said rotatable surfacing means.

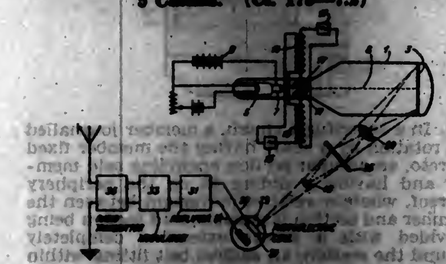
2,104,063
BIFOCAL SPECTACLE BRIDGE
Frederic Whitney, Los Angeles, Calif.
Application May 18, 1935, Serial No. 22,245
7 Claims. (Cl. 88—40)



1. In a spectacle, a pair of bifocal lenses, a bridge fixedly secured adjacent its ends to the nasal sides of said lenses, an auxiliary bridge having depending legs, superposed combined couplers and guideways on each nasal side of a lens adjacent each of the respective ends of said first mentioned bridge substantially encircling and slidably retaining the respective legs of said auxiliary bridge, relative to the nasal sides of the lenses, and nose pads mounted on said auxiliary bridge for sliding movement therewith.

2,104,064
SENSITIZING OF SILVER-HALIDE EMULSIONS
Walter Zeh, Dessau in Anhalt, Germany, assignor to Agfa Ansco Corporation, Binghamton, N. Y., a corporation of New York
Application October 10, 1933, Serial No. 667,121
In Germany July 22, 1931
7 Claims. (Cl. 95—7)

5. A photographic material comprising a silver-halide emulsion containing a sensitizing material



which comprises a pentamethinecyanine, the pentamethenyl chain of which is substituted by an alkyl radical.

2,104,065
MULTICOLOR PRESS ARRANGEMENT
Adolph M. Ruckgaber, New York, N. Y., assignor, by mesne assignments, to R. Hoe & Co., Inc., New York, N. Y., a corporation of New York
Application July 16, 1934, Serial No. 735,458
15 Claims. (Cl. 101—181)

1. In a printing machine, a plurality of printing couples constructed and arranged to print successively on the same side of a web, a drive shaft common to the printing couples, a driven gear operably secured to a similar component of each printing couple, and aligned drive gears carried by the drive shaft and each drive gear meshing with the driven gear of each printing couple, the driven gears being positioned at opposed sides of the drive shaft and the drive gears positioned axially beyond the driven gears and disposed perpendicularly thereto.

2,104,066
TELEVISION SYSTEM
Vladimir K. Zworykin, Haddonfield, N. J., assignor to Radio Corporation of America, a corporation of Delaware
Application August 5, 1933, Serial No. 684,566
5 Claims. (Cl. 178—7.2)

1. In television scanning systems, an electron tube having a fluorescent screen, means for producing over substantially the entire area of the screen a series of like intensity light spots each of a predetermined elemental area and traversing the screen according to a predetermined scanning pattern, a subject of which the image is to be transmitted positioned adjacent the tube and upon the side of the screen adjacent the light generating means, an adjustable optical system for directing the light spot intensities having a predetermined ratio to the area of the original spot to coordinated areas of the subject to test the elemental area light values thereof, a light translating element, and adjustable optical means for focusing light of intensity varying with the variations in intensity of light and shadow on elemental areas of the subject tested upon the light sensitive element.

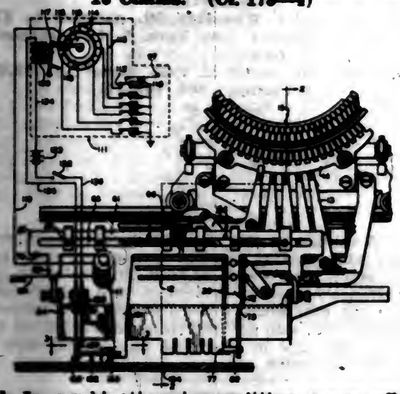
2,104,067
SHINGLE
Henry H. Bailey, Riverside, Ill., assignor to The Barrett Company, New York, N. Y., a corporation of New Jersey
Application December 22, 1933, Serial No. 703,525
5 Claims. (Cl. 189—7)

1. A shingle having straight parallel transverse edges and parallel angular shaped forward and rear edges, the width of said shingle being approximately equal to its length, said shingle having a slit extending inward from one transverse edge thereof, said slit beginning at a point on the transverse edge in line with the remote side of the forward edge.

2,104,068
QUATERNARY AMMONIUM SALTS OF MERCAPTO-ARYLENETHIAZOLES
William Baird, Blackley, England, assignor to Imperial Chemical Industries Limited, a corporation of Great Britain
No Drawing. Application March 15, 1934, Serial No. 715,780. In Great Britain March 15, 1933
7 Claims. (Cl. 260—44)

1. Benzyltrimethylammonium 1-benzothiazyl sulphide.

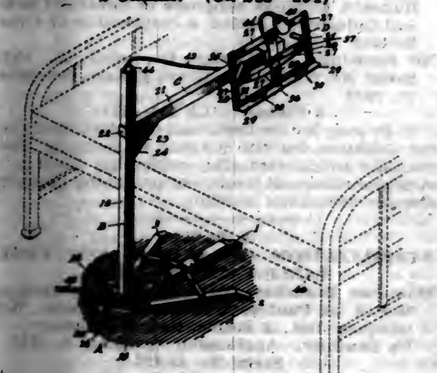
2,104,069
PROCESS FOR TREATMENT OF SOLUTIONS OF CHLORINATED RUBBER
John Philip Baxter, Widnes, Terrance Neil Montgomery, Lancaster, and Joseph Grange Moore, Runcorn, England, assignors to Imperial Chemical Industries Limited, a corporation of Great Britain
No Drawing. Application December 23, 1935, Serial No. 55,988. In Great Britain December 27, 1934
6 Claims. (Cl. 134—17)



1. Process for the treatment of chlorinated rubber solutions for the purpose of reducing their viscosity which comprises subjecting them to a violent mechanical treatment producing shearing stresses within the solution.

2,104,070
STABILIZATION OF ANIMAL AND VEGETABLE FATS AND OILS
Hamilton Bradshaw, Wilmington, Del., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware
No Drawing. Application November 6, 1935, Serial No. 48,497
19 Claims. (Cl. 87—12)

1. Animal and vegetable fats and oils normally tending to become rancid having incorporated



therein, in an amount sufficient to inhibit rancidity development, a phenol having at least one alkoxy group in at least one of the positions ortho and para to a phenolic hydroxyl group and at least one carboxyl group directly bonded to a carbon of the aromatic ring, said phenol consisting of carbon, hydrogen and oxygen.

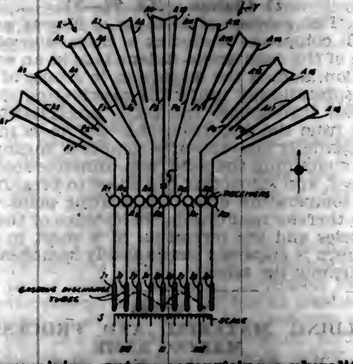
2,104,071
PRINTING TELEGRAPH APPARATUS
Charles W. Burcky, Chicago, Ill., assignor to Teletype Corporation, Chicago, Ill., a corporation of Delaware
Application May 25, 1936, Serial No. 81,580
16 Claims. (Cl. 178—4)

1. In combination, transmitting means effective under the control of a signal storing medium, a distributor having a normal rest position, a recorder responsive to signaling conditions from said transmitting means, tabulating mechanism, and means in said recorder controlled by said tabulating mechanism for controlling the arrest of said distributor in its normal rest position.

2,104,072
COLLAPSIBLE UNIVERSAL BOOK SUPPORT
Sidney Lee Carr, Palo Alto, Calif., assignor of one-half to Julia Larsen, San Francisco, Calif.
Application December 2, 1935, Serial No. 52,533
2 Claims. (Cl. 248—194)

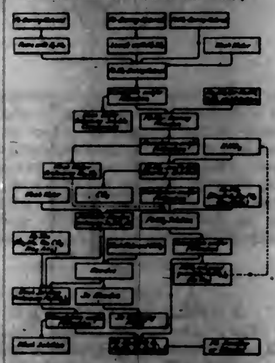
2. In a device of the type described, a base, a supporting member hinged to the base, an upright rotatably supported by the member, and means for securing the member to the base and for limiting the rotative movement of the upright with respect to the member.

2,104,073
GASEOUS ELECTRIC DISCHARGE DEVICE
Mari J. Druyvesteyn and Nicolaas Warmoltz, Eindhoven, Netherlands, assignors to General Electric Company, a corporation of New York
Application July 28, 1936, Serial No. 93,113
In Germany August 6, 1935
4 Claims. (Cl. 176—122)



1. A gaseous electric discharge lamp device comprising a container, electrodes sealed therein, a gaseous atmosphere therein comprising a discharge supporting chemically active metal vapor, said container being subject to attack by said vapor, and a thin skin on the inner surface of said container to protect said container from the deleterious effects of the metal vapor discharge, said skin consisting of the oxide of that metal the vapor of which constitutes part of the gaseous atmosphere of the device.

2,104,074
AUTOMATIC CLUTCH FOR MULTIPLE V-BELT DRIVES
Fred R. Erbach, Beloit, Wis., assignor to General Refrigeration Corporation, Beloit, Wis., a corporation of Delaware
Application June 26, 1935, Serial No. 28,299
8 Claims. (Cl. 74—219)



1. In a centrifugal clutch, a member journalled for rotation by a shaft having the member fixed thereto, an annular section encircling said member and having a sliding fit on the periphery thereof, whereby relative movement between the member and section is possible, said section being provided with a groove extending completely around the section, an endless belt fitting within the groove and having operative connection with a source of power for rotating the section, and instrumentalities having rotation with said section and operative when said section attains a definite speed to cause rotary movement of said section to be transmitted to the member.

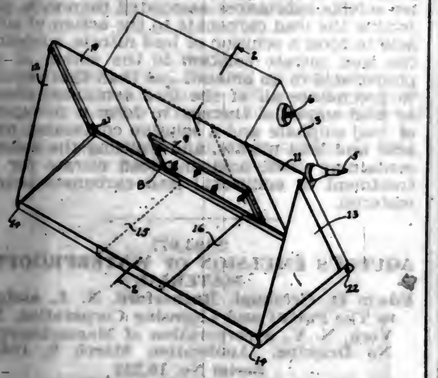
2,104,075
RADIO DIRECTION FINDER
Charles Samuel Franklin, Feltham, near Mullion, England, assignor to Radio Corporation of America, a corporation of Delaware
Application January 16, 1935, Serial No. 2,044
In Great Britain January 27, 1934
7 Claims. (Cl. 250—11)

1. A receiving system comprising a plurality of directional receiving aerials arranged in pairs, each pair having its axis of maximum directivity response oriented at an angle to such axes of the other pairs, means including luminous discharge tubes arranged in order for indicating different directions from which signals may be received on said aerials, said tubes having the characteristic that a column of light of variable length may be produced therein, operating circuits connecting each pair of said aerials with an appropriate one of said luminous discharge tubes, and a power supply connected to said operating circuits, said circuits being arranged to feed potentials to said discharge tubes proportionately to the amplitudes of the signaling energy collected by said aerials.

2,104,076
LEAD RECOVERY
Frederick F. Frick and John P. Cooper, Anaconda, Mont., assignors to Anaconda Copper Mining Company, New York, N. Y., a corporation of Montana
Application November 5, 1934, Serial No. 751,448
10 Claims. (Cl. 75—99)

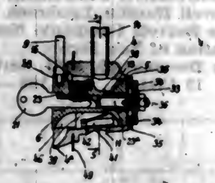
1. The method of recovering lead from slime produced in an electrolytic operation and containing tin in the oxide form and lead in the sulphate form, which comprises subjecting the slime to the action of an aqueous solution of sodium carbonate to convert the lead sulphate contained therein to lead carbonate, treating the resulting product to separate the lead carbonate from water soluble substances associated therewith, subjecting the lead carbonate to the action of nitric acid to form a solution of lead nitrate, subjecting the lead nitrate solution to the action of sulphuric acid in an amount less than that required to precipitate all of the lead contained therein as lead sulphate, thereby to form a precipitate of lead sulphate and a solution containing nitric acid and lead nitrate, and utilizing the solution containing nitric acid and lead nitrate for the treatment of additional lead carbonate-bearing material.

2,104,077
AQUEOUS EMULSION OF WATERPROOFING MATERIAL
Edwin O. Groskopf, Rutherford, N. J., assignor to The Patent and Licensing Corporation, New York, N. Y., a corporation of Massachusetts
No Drawing. Application March 9, 1935, Serial No. 10,325
12 Claims. (Cl. 134—1)



1. An aqueous emulsion comprising waterproofing material dispersed in an aqueous vehicle containing bentonite-like material as emulsifying agent, said emulsion containing a reaction product of the bentonite-like material and an amount of alkaline earth reactant, sufficient to effectively render the bentonite-like material in the water-free film of the emulsion incapable of re-emulsifying the waterproofing material upon long contact with water, said emulsion also containing the reaction product of said reactant and casein in an amount varying from 12.5 to 50% by weight of the bentonite-like material, whereby the emulsion remains indefinitely suspendable and relatively highly bodied.

2,104,078
INTERLOCKING FLEXIBLE SHINGLE
Marston Lovell Hamlin, Lynbrook, N. Y., assignor to The Barrett Company, New York, N. Y., a corporation of New Jersey
Application December 9, 1931, Serial No. 579,885
19 Claims. (Cl. 108—7)



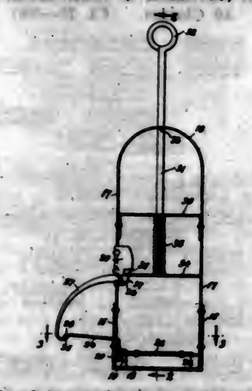
1. A flexible shingle adapted to be laid with other like shingles in overlapping courses, said shingle having in the neighborhood of the opposite lower corners thereof interlocking projections spaced from the sides of said shingle and defined by slits, the projection of one shingle being arranged to lock with the projection of an overlapping shingle in the same course and being so disposed that the forward edges of adjacent shingles occur in substantially the same straight line, the projections being spaced from the side edges a distance such that the interlocking projections of a pair of adjacent interlocked shingles lie approximately midway between the overlapping edges of said adjacent shingles.

2,104,079
FRAUD DETECTOR
Julian Seth Kahn, New York, N. Y.
Application September 29, 1934, Serial No. 746,058
2 Claims. (Cl. 88—14)

1. A fraud detector comprising a casing, an electric light bulb enclosed within said casing, a window in said casing, a piece of optical nickel-cobalt glass in said window, a pair of wing members slidably mounted in said casing, and a pair of base members secured to said wing members and adapted to be opened to form a surface partially enclosed by said wing members on which an object may be placed for inspection.

2,104,080
TAPPING AND REFILL-CONTROLLING DEVICE
Christoph Karageorgieff, Vienna, Austria
Application November 9, 1935, Serial No. 49,107
In Austria March 29, 1934
6 Claims. (Cl. 217—108)

1. A tapping and refill-controlling device for a container of marketable liquid, comprising in combination a tapping cock consisting of a casing and a fitted plug, ports in said casing and said plug adapted to be brought freely into and out of registry by rotation of said plug to permit unrestricted draining and closure of the container by said plug, an outwardly opening check valve interposed in the outflow path of said cock to prevent filling of the container through said plug, disengageable retaining means associated with said plug and casing for normally retaining said plug against withdrawal from said casing, and a lock built into said cock in operative association with said retaining means for permitting the withdrawal of said plug from said casing and the use of the latter as a refill aperture only by the disengagement of said retaining means in dependence on the operation of said lock.



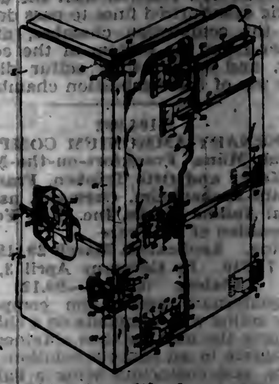
2,104,081
LAMINATED SHEET AND PROCESS OF MAKING SAME
John A. Kenney, Plainfield, N. J., assignor to The Barrett Company, New York, N. Y., a corporation of New Jersey
No Drawing. Application January 20, 1934, Serial No. 707,530
11 Claims. (Cl. 92—21)

11. The process of forming a fibrous product which comprises producing a dispersion of hard resin of the coumarone-indene type in an aqueous solution, adding the dispersion to a pulp of fibers and substantially uniformly distributing the dispersion throughout the pulp, precipitating the resin from the dispersion onto the fibers in solid, substantially non-adhesive condition, forming the pulp containing the solid, non-adhesive resin into a sheet, and subjecting the sheet to pressure and to a temperature above the melting point of the resin thereby resulting in coalescence of the resin particles and the formation of a sheet in which the resin is dispersed substantially homogeneously throughout the same.

2,104,082
BUILDING MATERIAL AND PROCESS OF MAKING SAME
Lester Kirschbraun, New York, N. Y., assignor, by mesne assignments, to The Patent and Licensing Corporation, New York, N. Y., a corporation of Massachusetts
No Drawing. Continuation of application Serial No. 615,472, June 4, 1932, which is a division of application Serial No. 519,432, March 2, 1931. This application March 27, 1935, Serial No. 13,967
4 Claims. (Cl. 91—68)

1. In the process of producing shingles of the asbestos-Portland cement composition type, the improvement which comprises the steps of applying to a surface of the formed composition a coating layer comprising an aqueous dispersion of bitumen, partially embedding comminuted surfacing material in said layer, and drying the thus coated composition to remove the water of said dispersion layer and thereby bind the said comminuted material to said surface.

2,104,083
TRAP FOR RODENTS
Steve Krahl, Weimar, Tex.
Application February 23, 1937, Serial No. 127,012
2 Claims. (Cl. 43—78)

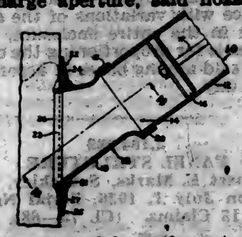


1. An animal trap comprising a base, a raised open frame thereon, a lure carrying platform

hinged at one edge to one of the sides of said frame, an arm on said platform extending outwardly beyond the frame, a lever pivoted to the frame above said platform and having a part engageable with said arm, an upright rod slidable centrally through said frame, means to retain said rod in a raised position, a plate fixed on the lower end of said rod, said plate normally resting on an inreaching projection of said lever, and a spring coiled around said rod to press said plate downwardly.

2,104,084
STABILIZATION OF ANIMAL AND VEGETABLE FATS AND OILS
George H. Latham, Wilmington, Del., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware
No Drawing. Application November 6, 1935, Serial No. 48,496
10 Claims. (Cl. 87—12)

1. Animal and vegetable fats and oils normally tending to become rancid having incorporated therein, in an amount sufficient to inhibit rancidity development, a phenol having at least one alkoxy group in at least one of the positions ortho and para to a phenolic hydroxyl group and at least one hydroxy aliphatic group in which at least one carbon atom is directly bonded to a carbon atom of the aromatic ring, said phenol consisting of carbon, hydrogen and oxygen.

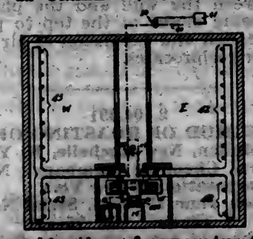


2,104,085
MOUNTING MEANS FOR GLASS VENEER
Ira S. Leland, Milwaukee, Wis.
Application March 4, 1936, Serial No. 2,225
19 Claims. (Cl. 72—24)

1. The combination with glass veneer comprising a plurality of glass sheets arranged substantially edge to edge, of means for mounting said veneer over a supporting structure, and concealed means disposed wholly behind said veneer for securing said mounting means to said structure, said mounting means having a thin projection engaged with and between edges of adjacent sheets to secure the same against displacement.

2,104,086
JOINT FILLING DEVICE
Vance Linse, Pasadena, Calif.
Application April 17, 1937, Serial No. 137,499
12 Claims. (Cl. 72—120)

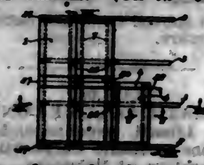
1. In a joint filler, a cylinder, a discharge nozzle on said cylinder, said nozzle having an elongated discharge aperture, said nozzle having a



flange thereon spaced from the outer end of the discharge aperture.

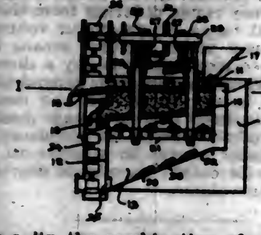
2,104,087
AUTOMATIC VOLUME CONTROL
Alfred Aubyn Linsell, Sydenham, London, England, assignor to Radio Corporation of America, a corporation of Delaware
Application September 13, 1934, Serial No. 743,788
7 Claims. (Cl. 250—20)

6. In a superheterodyne receiver of the type including a first detector network having a tunable signal selector circuit, a local oscillator network having a tunable circuit which is adjustable over a frequency range differing from the signal selector circuit range, an automatic volume control arrangement which includes means for deriving from received signal energy a direct current voltage whose magnitude is dependent solely on the signal carrier amplitude, and means responsive to said direct current voltage magnitude, for automatically adjusting the frequency of the tunable oscillator circuit in a sense to reduce the first detector output thereby to decrease the receiver output volume.



2,104,088
TIME CONTROLLED MEANS FOR DISTRIBUTING AIR
Samuel E. Lyman, Elizabeth, N. J., assignor, by mesne assignments, to Carrier Corporation, Newark, N. J., a corporation of Delaware
Application October 2, 1933, Serial No. 691,957
12 Claims. (Cl. 98—39)

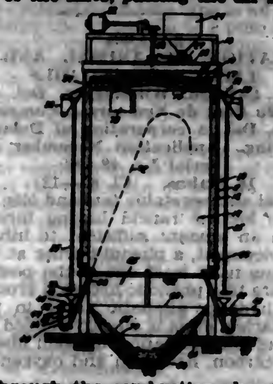
1. In a combination of apparatus for controlling atmospheric conditions within a zoned enclosure, a mixing box for each zone of said enclosure, means for supplying conditioned air to said mixing boxes, means for supplying return air to said mixing boxes, means for supplying air from said mixing boxes to the zones of said enclosure, means for varying the total amount



of conditioned air supplied to said mixing boxes in accordance with variations of the average air temperature in the entire enclosure, and clock-operated means for proportioning the conditioned air between said mixing boxes in accordance with the time of day.

2,104,089
PANEL STRUCTURE
Herbert E. Marks, Sewickley, Pa.
Application July 1, 1936, Serial No. 88,370
13 Claims. (Cl. 72—68)

1. A structural panel unit comprising an elongate supporting member and a pair of slabs spaced apart by said member and secured thereto, said member projecting outwardly beyond one of the slabs.

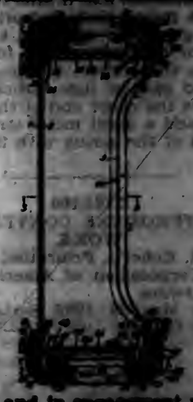


2,104,090
JIG
James A. Montgomery, Birmingham, Ala., assignor of one-half to Howard Moss, Birmingham, Ala.
Application April 24, 1936, Serial No. 76,130
4 Claims. (Cl. 209—457)

1. In a jig, the combination of a screen, a reciprocable plunger for effecting upward pulsations of water through the screen and having valved controlled openings therein, means defining a hutch in which the plunger reciprocates including a wall having valved controlled openings for admitting water to the hutch, and an air compression chamber communicating with the hutch between the wall and the plunger, said chamber being closed at the top to provide for the compression and expansion of air therein as the plunger reciprocates.

2,104,091
METHOD OF ROASTING ORE
Edwin J. Mullen, New Rochelle, N. Y., assignor to General Chemical Company, New York, N. Y., a corporation of New York
Application June 27, 1935, Serial No. 28,599
1 Claim. (Cl. 75—9)

The method of roasting finely divided metal sulfides which comprises introducing sulfide fines at the lower periphery of an elongated unobstructed combustion chamber of height sufficient to permit substantially complete desulfurization of fines while passing from the bottom to the top of said combustion chamber, introducing said fines by means of a stream of gas of such superatmospheric pressure and so directed as to cause said stream of gas to carry the fines upwardly and away from the combustion chamber walls to substantially the top of the combustion chamber and to cause the fines to pass subsequently downwardly through the combustion chamber while out of contact with the walls of said combustion chamber, introducing into the bottom of the combustion chamber a stream of air in quantity to supply oxygen enough to effect roasting of the fines, passing the air stream upwardly through the combustion chamber at velocity less than the initial rate of movement of the fines and not sufficient to substantially interfere with free gravity fall of fines, substantially completely desulfurizing the fines while passing the same to the top of the combustion chamber in co-current flow relation with the air stream, permitting desulfurized fines to pass downwardly through the combustion chamber, discharging the cinder from the bottom of the combustion chamber, and withdrawing sulfur dioxide gas from the top of the combustion chamber.



2,104,092
QUATERNARY AMMONIUM COMPOUNDS
Ferdinand Mitsu, Frankfort-on-the-Main, and Karl Keller and Otto Trieschmann, Frankfort-on-the-Main-Fechenheim, Germany, assignors to General Aniline Works, Inc., New York, N. Y., a corporation of Delaware
No Drawing. Application March 28, 1936, Serial No. 71,510. In Germany April 3, 1935
3 Claims. (Cl. 260—96.12)

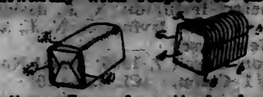
2. A quaternary ammonium compound obtained by acting with ammonia on a chlorhydrine and treating the mixture thus obtained with dimethyl-sulfate in an aqueous solution of sodium carbonate, said compound being a light-colored resin-like substance characterized by the property, on after-treatment therewith of dyeings on cellulose material by means of substantive dyestuffs, of substantially improving the fastness of such dyeings to water, perspiration, boiling acids and washing.

2,104,093
CARRIER FOR PNEUMATIC DISPATCH TUBE APPARATUS
John T. Needham, North Plainfield, N. J., assignor to Lamson General Conveyors, Limited, Montreal, Quebec, Canada, a corporation of Canada
Application September 23, 1935, Serial No. 41,642
18 Claims. (Cl. 243—34)

1. A carrier comprising a pair of tubular shells fitted one within the other and each having an

entrance opening in its side, said shells being relatively rotated to bring said openings into and out of register with each other to open and close the carrier, characterized in that the inner shell has an inwardly extending annular transverse abutment at its inner end, a retaining ring within

the inner shell and in engagement with the said annular flange, and releasable retaining means extending through the outer shell and engaging the retaining ring to hold the two shells against endwise displacement, said releasable retaining means being accessible from the exterior of the carrier.



2,104,094
PHOTOGRAPHIC CAMERA
Hubert Nerwin, Dresden-Blasewitz, Germany, assignor to Zeiss Ikon Aktiengesellschaft, Dresden, Germany
Application July 30, 1936, Serial No. 93,267
In Germany June 8, 1935
11 Claims. (Cl. 95—11)

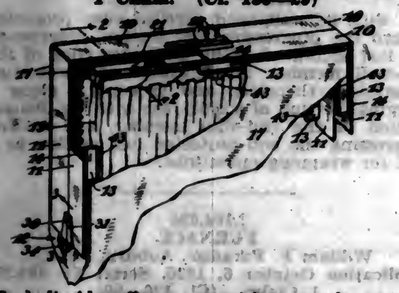
1. In a rollfilm camera, a camera casing provided with an aperture adapted to receive a lens system, a shutter with means for tensioning the same, means for conveying the film past said aperture, means for releasing said shutter, and means arranged coaxially with respect to said aperture and rotatable about the center point of the same for simultaneously operating said shutter tensioning means and said film conveying means, said operating means being provided with a manually operable projection terminating adjacent said shutter release means.

2,104,095
BAKED LOAF FRACTION PACKAGE AND PACKAGING
Gustav C. Papendick, Kansas City, Mo.
Application December 12, 1936, Serial No. 115,455
2 Claims. (Cl. 99—171)

1. That method of packaging a sliced baked loaf of bread which comprises progressing the sliced loaf over a conveyor table between a plurality of spaced partitions whereby to sub-divide the loaf into a plurality of fractional loaf-sections each having a soft crustless end-face, disposing a flanged end-wall member flatwise against the partition with its flange portion projecting outwardly with respect to the partition

and with its unflanged vertical edge presented toward the progressing loaf section, progressing the loaf section over the unflanged edge of the end-wall member into flatwise end-protecting registration therewith and in contact along a marginal portion of a side-face with the flange-portion of the end-wall member, and further progressing the end-protected loaf section as a unit for wrapping operations.

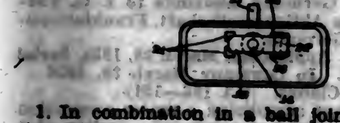
2,104,096
FURNACE
William F. Paradise, Auburn, Nebr.
Application October 6, 1936, Serial No. 104,277
1 Claim. (Cl. 126—99)



In a furnace, the combination of an inner and outer shell having parallel longitudinally-extending side walls, said shells being spaced apart to form an air chamber therebetween, a grate in the inner shell, a fuel spreader within the inner shell, said spreader being spaced above said grate and from the longitudinal walls of the inner shell, an opening in the inner shell above the spreader through which fuel is placed on the spreader or permitted to fall therefrom to the grate, the longitudinal side walls of said inner shell having their top portions inwardly curved, longitudinal baffle members overlying said spreader and integral with said top portions, said members being spaced apart and forming downward continuations of the curved top portions whereby to direct downwardly towards the fuel on said spreader the hot gases arising between the spreader and side walls, and a flue outlet between the baffle members at the top of the inner shell.

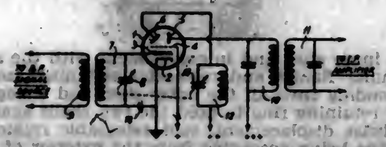
2,104,097
LUBRICATING OILS
Mathias Pier, Heidelberg, and Willy Hirschberger and Heinz Lemme, Ludwigshafen-on-the-Rhine, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany
No Drawing. Application March 28, 1935, Serial No. 12,478. In Germany March 29, 1934
4 Claims. (Cl. 196—151)

1. A lubricant comprising a major proportion of a lubricating oil and a minor proportion of a



residue which is solid at ordinary room temperature and which is derived by vacuum distillation from a deasphalted destructive hydrogenation product of a coaly material.

2,104,098
HANDBAG FRAME
Edward Foster, Irvington, N. J., assignor to E. Foster & Co. Inc., Irvington, N. J., a corporation of New Jersey
Application March 7, 1936, Serial No. 67,618
1 Claim. (Cl. 150—29)



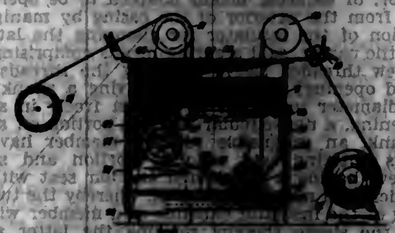
In ladies' handbags comprising complementary frame sections and flexible bag material held thereby forming substantially parallel walls from the frame sections to the bottom of the bag, the combination of flat plates of inverted U-shape, said flat plates being the same in width, length, and thickness, the inward edges of which abut each other forming an unbroken exterior surface save for the butt joint therebetween, said flat plates forming the body members of the frames of the aforesaid complementary frame sections, means on the upper exterior surfaces of said plates at the abutting edges thereof for locking said plates together, members one for each plate having a slot engaged by such member, a pivotal connection for said slotted members below both of said plates, a bag material retaining member extending along the length of each of said flat plates at the interior surface and the exterior edges thereof, said retaining members having an open space facing laterally outwardly from the outer edges of the flat plates, the bag material extending therefrom downwardly and inwardly of the outer edges of said flat plates substantially parallel therewith, said retaining members being disposed apart from each other at the interior of the flat plates, and providing a space below the flat plates to enable a cigarette and a vanity case to be positioned within the bag immediately below the bag retaining members and extending within said space without bulging the flexible sides of the bag when the bag is closed.

2,104,099
BALL JOINT FOR A REAR VIEW MIRROR
Lucien G. Pence, Follansbee, W. Va., assignor to Liberty Mirror Works, a corporation of Pennsylvania
Application November 11, 1936, Serial No. 110,348
Renewed November 26, 1937
4 Claims. (Cl. 287—21)

1. In combination in a ball joint for a rear view mirror, a sheet metal plate having a perforation therethrough surrounded on one side of the plate with a ball seat, a ball stud extending through the perforation and comprising a stem with a ball at its inner end which engages the seat, a leaf spring forward of the ball for applying pressure thereon, and means for securing the spring to the metal plate comprising a pair of triangular lugs struck up from the metal plate at one end of the spring and forming pockets which receive the corners of the spring at such end, a second pair of lugs struck up from the metal plate at the other end of the spring forming pockets, and a sheet metal strap lying above such last end of the spring with its ends in such last pockets.

2,104,100
SUPERHETERODYNE CONVERTER NETWORK
Walter van B. Roberts, Princeton, N. J., assignor to Radio Corporation of America, a corporation of Delaware
Application May 29, 1936, Serial No. 82,511
2 Claims. (Cl. 250—20)

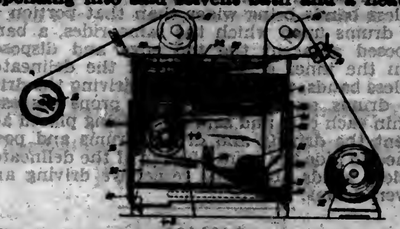
1. In a superheterodyne converter network, an electron discharge tube provided with at least a cathode, a signal input electrode, an output electrode and an auxiliary electrode, means for maintaining the output electrode at a more positive potential than the auxiliary electrode, and both said auxiliary and output electrodes being at a positive potential with respect to the input electrode and cathode, said auxiliary electrode being geometrically arranged with respect to the control electrode and output electrode in such a manner that secondary electrons are emitted from the auxiliary electrode, said geometric arrangement being such as substantially to oppose the flow of electrons from the cathode direct to the output electrode whereby the output electrode current consists chiefly of secondary electrons from the auxiliary electrode, a signal input circuit connected between the cathode and control grid, a local oscillator circuit connected to the auxiliary electrode, and an intermediate frequency output circuit connected to the output electrode.



2,104,101
JOINTED COUPLING
Kurt Rosenbaum, Rheinhausen/Lower Rhine, Germany, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany
Application June 26, 1937, Serial No. 150,421
In Germany July 2, 1936
4 Claims. (Cl. 64—16)

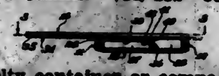
1. A coupling of the class described comprising a shell rigid to one of the parts to be coupled, a journal on the other part to be coupled, a link member immediately lodged in said shell and having a pressure-transmitting surface, a companion surface in said shell co-operable therewith, another link member immediately lodged in said first-named link member and having said journal rigid to it and having a pressure-transmitting surface, a companion surface in said first-named link member co-operable therewith, the axes of rotation of said two link members extending normally to one another, said pressure-transmitting surfaces being cylin-

drically curved about the axis of rotation of the respective link member.



2,104,102
METHOD FOR DEGREASING
Frederick Francis Ruthven, Toronto, Ontario, Canada, assignor, by mesne assignments, to Aluminium Laboratories Limited, Montreal, Quebec, Canada, a corporation of Canada
Application May 4, 1935, Serial No. 19,869
5 Claims. (Cl. 87—6)

1. In the method of removing oily or greasy material from articles, the steps comprising subjecting an article to be degreased to the action of a liquid solvent bath, passing the article from the liquid solvent bath into a vapor bath of said liquid solvent, heating the article to a temperature above the temperature of said vapor bath while the article is within said vapor bath, and removing the article from the vapor bath before the temperature of the article drops down to the temperature of the vapor bath.



2,104,103
DEGREASING APPARATUS
Frederick Francis Ruthven, Toronto, Ontario, Canada, assignor, by mesne assignments, to Aluminium Laboratories Limited, Montreal, Quebec, Canada, a corporation of Canada
Original application May 4, 1935, Serial No. 19,869. Divided and this application October 8, 1935, Serial No. 44,675
9 Claims. (Cl. 87—6)

1. Degreasing apparatus of the class described, comprising a container for solvent, means for continuously vaporizing and condensing solvent contained in the bottom of said container, a solvent bath removed from the solvent in the bottom of said container and containing condensed solvent, cooling surfaces on the upper portion of said container for condensing solvent vapor, means for conducting condensed vapor to said solvent bath, and means for guiding sheet material into and out of said container and through said solvent bath, said means including a roller depending into said solvent bath and a heating

roller in the vapor atmosphere above the solvent contained in the bottom of said container.

2,104,104
COMPACT OR THE LIKE
Theodore Schlegall, New York, N. Y.
Application May 22, 1935, Serial No. 22,703
2 Claims. (Cl. 132—33)

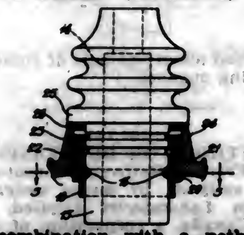
1. A novelty container or compact of a depth and width fitting comfortably in the hands of a user and capable of being spanned by the thumb and fingers of one hand, comprising in combination, a primary shallow receptacle and a cover member, guiding means on said container for slidingly mounting said cover member and operable for sliding by the relative movement of the thumb to the fingers when the container is held by the fingers, a partition within said container, a hingeable closure serving as a mirror connected with said partition member, spring means for urging said closure to the open position, said closure lying in the path of movement of said cover member to urge said closure member to the covering position upon movement of said cover member towards the aligned position of said cover member and receptacle, and frictional latching means in the path of movement of said cover member operable by the positive relative sliding movement of the cover member and receptacle for maintaining said cover member and receptacle in aligned position against accidental displacement.

2,104,105
ADVERTISING SIGN
Frank E. Schmidt, Tigard, Oreg.
Application December 11, 1936, Serial No. 115,292
5 Claims. (Cl. 40—32)

1. In a device of the class described, the combination of a case, a sub-frame disposed within the case with one end of the sub-frame being adjustable relative to the case, pairs of driving and driven drums disposed within the case, bearings for each end of the respective driving and driven drums, with the bearings for one end of the respective drums being adapted for being placed into and out of registry with the bearing end of the respective drums, delineated endless

bands trained about the respective pairs of driving and driven drums, with the said delineated endless bands being wider than that portion of the drums upon which the same rides, a band disposed adjacent the top edge and disposed upon the inner side of each of the delineated endless bands, power means for driving the driving drums and a plurality of props disposed within each case and said props being placed adjacent the driving and driven drums and positioned to hide the point of wrap of the delineated endless bands about the respective driving and driven drums.

2,104,106
FRICTION CLUTCH PLATE
Benjamin A. Swennes, Rockford, Ill., assignor to Borg-Warner Corporation, Chicago, Ill., a corporation of Illinois
Application September 12, 1936, Serial No. 100,508
6 Claims. (Cl. 192—68)

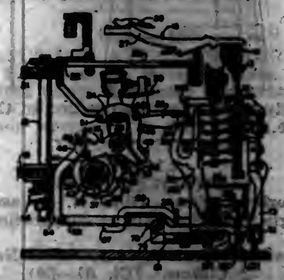


1. A friction clutch plate comprising, a hub member, a metal disk having friction facings fixed upon its peripheral portion, a resilient cushion interposed between overlapping portions of said hub member and said disk and bonded permanently thereto whereby to establish a shear drive connection between the disk and hub, and means associated with the hub and the disk and responsive to relative rotational movement therebetween to place said cushion under compression thereby to increase the pressure between the cushion and the hub member and disk at the bonded interfaces thereof.

2,104,107
AUTOMATIC GAIN CONTROL
Adrianus Johannes Heinz van der Ven, Eindhoven, Netherlands, assignor to Radio Corporation of America, a corporation of Delaware
Application February 18, 1931, Serial No. 516,539
In the Netherlands April 15, 1930
7 Claims. (Cl. 250—20)

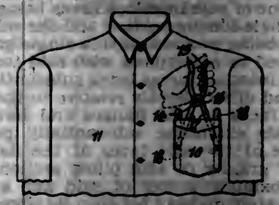
4. In a signalling system including an amplifier having a vacuum tube provided with a control grid, and operating to amplify signals at frequencies above audibility, and a grid-leak detector, the method of controlling the degree of amplification in said amplifier which comprises utilizing current flowing through said grid-leak to vary the bias on the control grid of said amplifier.

2,104,108
POTHEAD FITTING
John R. Webb, Dobbs Ferry, N. Y., assignor to Anaconda Wire & Cable Company, New York, N. Y., a corporation of Delaware
Application July 14, 1936, Serial No. 90,475
4 Claims. (Cl. 247—6)



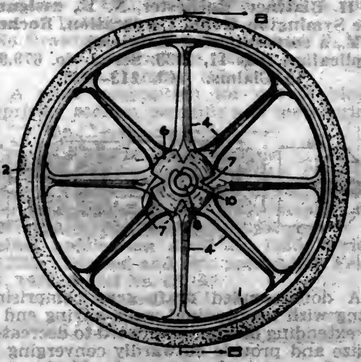
1. The combination with a pothead casing having a screw threaded opening and an insulator, of securing means adapted to be operated from the exterior of the casing by manipulation of the insulator for clamping the latter to the casing, said securing means comprising a screw threaded sleeve engaging the threads of said opening, said insulator having a shank of a diameter to permit it to turn freely in said opening, a non-circular notched portion on said shank, an expansible resilient member having lugs entering said notched portion and said sleeve having a shouldered annular seat within which said member is seated, whereby the turning of the insulator expands said member within the sleeve thereby rotating the latter and screwing it along said threaded opening, thus clamping the insulator against the casing or retracting it depending upon the direction of rotation.

2,104,109
APPARATUS FOR FACSIMILE RECORDING
Charles J. Young, Haverford, Pa., assignor to Radio Corporation of America, a corporation of Delaware
Application July 17, 1934, Serial No. 735,655
2 Claims. (Cl. 178—14)



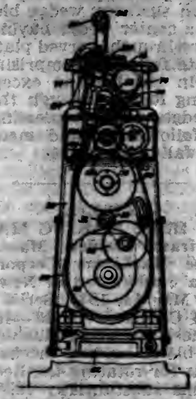
1. In facsimile recording apparatus, a rotatable member provided with a helical edge extending around its axis of rotation through an angle of the order of 900 degrees, an element provided with a substantially straight edge and supported with said straight edge substantially parallel to the axis of rotation of said member and for movement toward and away from said spiral edge, means for feeding a record strip through said apparatus and between said edges in a direction perpendicular to the axis of rotation of said member, means for rotating said member, and means for imparting operating movement to said element in accordance with incoming picture signals to produce at all times one complete record and a partial additional record of said signals.

2,104,110
PRINTING TELEGRAPH APPARATUS
Raymond E. Zenner, Brookfield, Ill., assignor to Teletype Corporation, Chicago, Ill., a corporation of Delaware
Application May 25, 1936, Serial No. 81,543
13 Claims. (Cl. 178—4)



1. In combination, a recorder responsive to signaling conditions, a transmitting apparatus comprising a tape transmitter, a distributor having a normal rest position, a set of tape controlled contacts normally effective to control the operation of said recorder, another set of tape controlled contacts effective in response to a predetermined signal record in the tape to control the arrest of said distributor in its normal rest position, and means in said recorder effective under certain operating conditions for restarting said start-stop distributor.

2,104,111
POCKET SHAPER
Arthur J. Barnett, Buffalo, N. Y.
Application September 26, 1935, Serial No. 42,291
1 Claim. (Cl. 223—61)



A pocket shaper of the character described, comprising a pair of flat levers disposed side by side in the same plane in opposing edgewise relation and pivotally connected intermediate their ends and terminating at their upper ends in handles, said levers having hub-plates thereon, one plate projecting from one face of its companion lever and the other plate projecting from the opposite face of its lever, whereby the plates are disposed in axially-spaced relation with the free face of one plate constituting a facial bearing for the contiguous side of the other lever, a pivot pin engaging said hub-plates, a spring coiled about said pin and housed between said hub-plates and having its ends in bearing contact with the respective levers, and pocket-engaging elements pivotally connected to the lower ends of said levers to swing transversely thereof.

2,104,112
VEHICLE WHEEL
Arthur Charles Barratt, York Township, York County, Ontario, Canada
Application May 24, 1935, Serial No. 23,273
In Canada May 28, 1934
1 Claim. (Cl. 301—64)

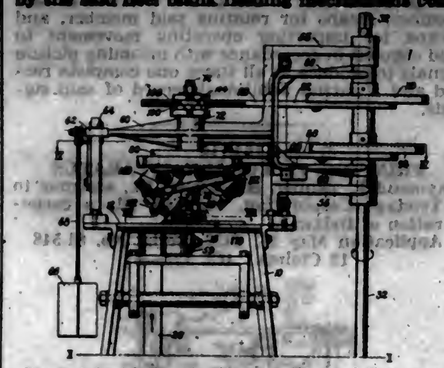
In a spoked wheel, independent pairs of diametrically opposed spokes, the diametrically opposed spokes of each pair being of substantially V-shaped cross-section and including a joining central cup-shaped boss, the respective pairs of spokes being disposed at an angle to each other with the boss of the underlying pair of spokes nesting into the boss of the overlying pair of spokes, and the boss of the overlying pair of spokes having opposed V-shaped indentures extending radially inward from its periphery and adapted to straddle the spokes of the underlying pair.

2,104,113
SHOE SOLE FITTING MACHINE
Lewis J. Bamoni, Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a corporation of New Jersey
Application October 18, 1935, Serial No. 45,638
16 Claims. (Cl. 12—17)

1. A machine for roughing the margins of unattached shoe soles, comprising, in combination,

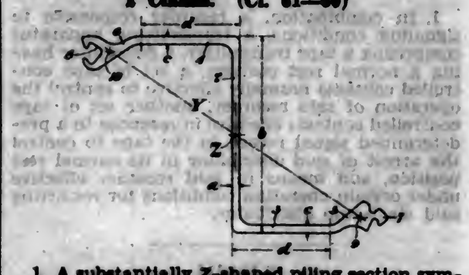
a work support having a sole engaging surface, a sole roughing cutter constructed and arranged to operate upon a face of the sole, said cutter being disposed at an acute angle to said surface of the work support, and a cutter mounting which is angularly variable with respect to the work support to permit the angular relation between the cutter and said surface to be changed.

2,104,114
DRAFT RIGGING
Emil H. Blattner, Rochester, N. Y., assignor to The Symington-Gould Corporation, Rochester, N. Y., a corporation of Maryland
Application July 11, 1933, Serial No. 679,951
15 Claims. (Cl. 213—26)



1. A double-ended draft gear comprising a housing with longitudinal walls having end portions extending diagonally inward to decrease the end size and provide outwardly converging friction surfaces at both ends, wedge blocks at each end of the housing with outer faces frictionally engaging said surfaces and also provided with surfaces inwardly converging with respect to one another, a spreader wedge at each end of the housing acting between said blocks and having corresponding friction faces engaging said inwardly converging friction faces on the blocks, a set of nested plate springs adjacent each end of the housing, concavely curved toward and supported by portions adjacent the center thereof, and an intermediate follower disposed between each set of springs and the adjacent wedge blocks with its inner surface concave about radii larger than the normal curvature of said springs and engaging the convex outer surface of the outer one of said springs, and its outer surface frictionally engaged by the inner surface of said wedge blocks.

13. The method of assembling the elements of a friction draft gear involving a housing with a restricted outer opening providing outwardly converging friction surfaces, wedge blocks engaging said surfaces, a center wedge having an aperture extending therethrough, curved plate springs and an intermediate follower, comprising positioning of the parts in the housing except the center wedge, inserting means through the aperture in the center wedge, and compressing the springs through the follower by said means until said center wedge falls into place.



2,104,115
WOOD HEEL MAKING MACHINE
Hugo A. Bertram, Malden, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a corporation of New Jersey
Application May 14, 1931, Serial No. 537,371
21 Claims. (Cl. 12—46)

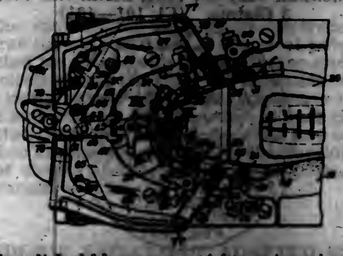
1. A wood heel concaving machine having two opposite heel blank holding mechanisms, a cutter, and means for rotating the heel blank holding mechanisms substantially 180° during each operative cycle of the machine about an axis perpendicular to the attaching face of a heel blank in one of said holding mechanisms, whereby the said heel blank holding mechanisms come

alternately to the starting position of the operative cycle.

2,104,116
PILING SECTION
Adolf Berberé, Short Hills, N. J., assignor to Carnegie Steel Company, a corporation of New Jersey
Application March 2, 1935, Serial No. 9,695
2 Claims. (Cl. 61—66)

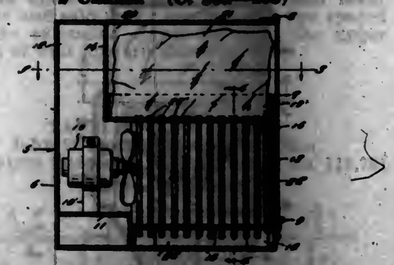
1. A substantially Z-shaped piling section symmetrical about its central axis and comprising a web, a flange extending angularly from each of the edges of said web, and an interlock area extending from the outward edge of each of said flanges, one of said interlock areas being provided with a single tongue portion and the other interlock area being provided with a single groove portion shaped to correspond with said tongue portion, said interlock areas being substantially equal in size and offset slightly relative to the plane of the side faces of said flanges and having their major axis extending substantially parallel to the plane of the side faces of the flanges, the center of gravity of said piling section being at the approximate center of said web at a point approximately midway between its edges, and the center of gravity of said interlock areas being substantially equi-distant from their center lines of interlock and from the outside faces of the flanges from which they extend.

2,104,117
GUIDE DEVICE
Stevenson Findlater, McKeesport, Pa., assignor to National Tube Company, a corporation of New Jersey
Application September 12, 1936, Serial No. 100,536
2 Claims. (Cl. 90—51)



1. A guide for metal working mills comprising at least one rotatable element having its axis

at an angle of approximately 45 degrees with respect to the pass line of said mill, said rotatable element having a plurality of different sized guide troughs on its periphery, and disposed at



an angle of approximately 45 degrees with respect to the axis of said rotatable element, each of said guide troughs being capable of movement into longitudinal alignment with the pass-line of said mill.

2,104,118
APPARATUS FOR ATTACHING SHOE SOLES
Charles F. Blanchard, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a corporation of New Jersey
Application November 16, 1935, Serial No. 50,174
7 Claims. (Cl. 12—33)

1. A welt holddown comprising a toe piece having a shoe engaging face disposed transversely of the holddown, transversely movable side members having their forward extremities abutting the shoe engaging face of the toe piece, and means for guiding the forward extremities of the side members for transverse adjustment relatively to the toe piece along said shoe engaging face of the toe piece.

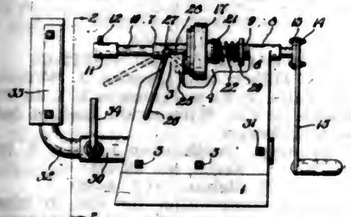
2,104,119
AIR COOLER
Augustus D. Farnham, Pueblo, Colo.
Application April 24, 1936, Serial No. 76,226
2 Claims. (Cl. 261—128)

1. In an automobile, in combination with the cowl thereof and a ventilator formed therein, an air cooler positioned below said cowl, said air cooler comprising a casing having an outlet opening in the wall thereof, a storage compartment formed within said casing, a fluid cooling medium enclosed by said compartment, absorbing means cooled by the cooling medium, an air duct leading from the ventilator of the automobile to the interior of the casing, and directing the air received through the ventilator into direct contact with the cooled moist absorbing means and thence through the opening in wall into the passenger compartment of the automobile which is to be cooled.

2,104,120
BLEACHING COMPOSITION
Harvey N. Gilbert and Ignatius J. Wernert, Niagara Falls, N. Y., assignors to E. I. du Pont de Nemours & Co., Wilmington, Del., a corporation of Delaware
No Drawing. Application January 9, 1936, Serial No. 58,437
3 Claims. (Cl. 8—2)

1. A solid composition for use in bleaching comprising sodium peroxide and metaboric acid.

2,104,121
MANUFACTURE OF FLEXIBLE CONDUIT
George A. Gleason, Worcester, Mass., assignor to The American Steel and Wire Company of New Jersey, a corporation of New Jersey
Original application April 10, 1935, Serial No. 17,325. Divided and this application February 21, 1936, Serial No. 65,167
3 Claims. (Cl. 140—71)



1. A method of making a flexible conduit, including coiling half-round wire into a helix, winding T-wire over said helix so that the stem portions of said T-wire extend inwardly between the convolutions of said half-round wire and applying sufficient inwardly directed force to said T-wire to cause it to flow at least slightly, whereby the head portion of said T-wire is thinned and its stem portion is elongated.

2,104,122
ENGINE VALVE ACTUATING DEVICE
Lafayette T. Genter, Tulsa, Okla.
Application March 25, 1936, Serial No. 70,279
2 Claims. (Cl. 121—164)

1. The combination with a steam engine comprising adjacent cylinders, pistons slidably mounted in the cylinders and alternately moved in opposite directions, slide valves controlling the flow and exhaust of steam for alternately moving the pistons in opposite directions, a rock lever connection between the slide valves, push rods carried by the lever connection, push rods extending into the cylinders into the path of the pistons, a tubular member in which the push rods are slidably mounted, a plurality of engaged longitudinally movable members within the tubular members and forming means whereby when the rock lever carried push rods are alternately moved in one direction the push rods extending into the cylinders will be alternately moved inwardly into the cylinders into the path of the pistons.

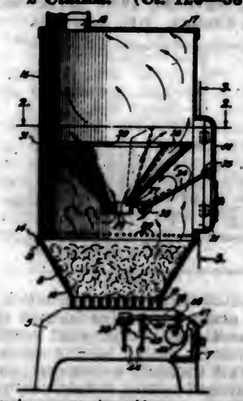
2,104,123
AUTOMATIC FEED DRILL
Nelson O. Grosser, Prince Albert, Saskatchewan, Canada
Application July 28, 1936, Serial No. 93,110
1 Claim. (Cl. 77—34)

A drilling machine comprising in combination, a framework, a pair of bearings mounted thereon, a rotatable element threadably received upon one of said bearings, a rotatable shaft mounted within said bearings, a collar threadably secured upon said shaft, a spring member engageable with said element and adapted to exert pressure against said collar, a friction disc slidably mounted upon the other of said bearings, a lug protruding therefrom adapted to engage with a portion of said framework to prevent rotation of said disc, manually operable lever means for urging said disc into engagement with said collar, said lever means being adapted when in a selected position to permit complete disengagement of said disc from said collar.

2,104,124
DOOR STOP AND CHECK
Alfred H. Haberstump, Detroit, Mich., assignor to The Murray Corporation of America, a corporation of Delaware
Application August 11, 1934, Serial No. 739,395
6 Claims. (Cl. 16—85)

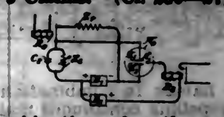
1. The combination in a double acting door check, of an arm movable with said door into a more effective position to act when spring pressed to resist the closing of the door, spring means acting on said arm under its greatest stress when the arm is in its least effective position, the arm and spring providing a variable resultant force balancing the closing moment of the door in any of its open positions.

2,104,125
ELECTRIC VACUUM SWEEPER NOZZLE ATTACHMENT
Clifford E. Hain, Omaha, Nebr.
Application March 23, 1936, Serial No. 70,439
3 Claims. (Cl. 15—13)



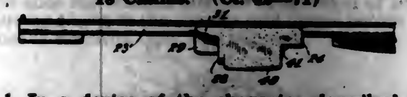
1. A vacuum sweeper attachment adapted to be secured in the nozzle of a vacuum sweeper having an intake opening therein, a frame, said frame including end plates, means for removably attaching a bearing to each end plate, a shaft rotatably mounted in said bearings, an eccentric on each end of the shaft adjacent the respective bearings, an oscillatable member adjacent each end plate, said members having notches in which are operatively received the respective eccentrics, said oscillatable members being operatively mounted on their respective end plates, a pair of laterally spaced, longitudinally extending substantially parallel beater bars attached adjacent their ends to the respective oscillatable members, and brush means secured in fixed relation relative to the beater bars, said brush means being received longitudinally between said bars.

2,104,126
PLANOGRAPHIC PRINTING PLATE AND METHOD OF USING SAME
William T. Hagelin, Cleveland, Ohio, assignor, by mesne assignments, to Addressograph-Multigraph Corporation, Cleveland, Ohio, a corporation of Delaware
Application May 25, 1934, Serial No. 727,461
3 Claims. (Cl. 101—401)



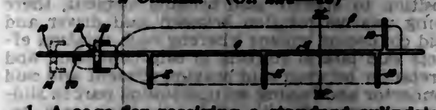
1. A planographic printing plate comprising a rolled zinc foil having minute tears or pits fortuitously formed in one surface thereof by the action of the rollers, such surface constituting the printing face of the plate and consisting of mutually isolated pits separated from each other by smooth intervening surfaces at the same general level.

2,104,127
AIR DRAFT AND SMOKE CONSUMER
William B. Hickman, Kansas City, Mo.
Application June 22, 1936, Serial No. 86,488
2 Claims. (Cl. 126—58)



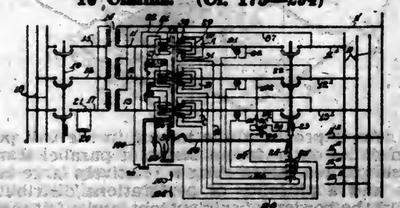
1. A heater construction comprising a fire chamber, a heater drum mounted over said chamber and provided with a fire door, a deflector member of substantially inverted-cone shape within the lower portion of said drum and having a central opening for the escape of fumes and gases to the upper portion of the drum, said deflector member having a movable section opposite said door, and connections between said door and movable section of the deflector member operated by opening of the door for swinging the section inward away from the door.

2,104,128
GAS DISCHARGE TUBE DELAY CIRCUIT
Richard Karl Honaman, Bloomfield, and Leland Kassen Swart, Mountain Lakes, N. J., assignors to American Telephone and Telegraph Company, a corporation of New York
Application December 27, 1935, Serial No. 56,395
9 Claims. (Cl. 250—27)



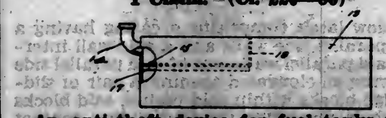
1. The combination of a three-electrode gas discharge tube, a condenser, a source of potential connected in series with the condenser and two of the electrodes of the tube, the potential of said source being greater than that required to ionize the gas between said two electrodes, a work circuit connected between the third electrode and one of the other electrodes, and means for varying the state of charge of the condenser to operate the work circuit.

2,104,129
HANDGRIP ESPECIALLY ADAPTED FOR GUNS
Claude W. Kress, New York, N. Y.
Application August 25, 1937, Serial No. 160,744
13 Claims. (Cl. 42—71)



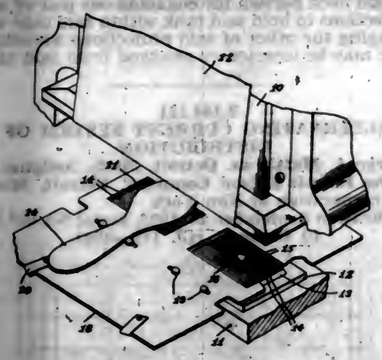
1. In a device of the character described, in combination, an elongated lower member, an upper elongated member carried by said lower member, an extended flange member abutting upon the rear ends of said lower member and said upper member, an extended flange member abutting upon the forward ends of said lower member and said upper member and two spaced members extending forwardly from the upper portion of said forward flange member.

2,104,130
TANK HOLDING CAGE
John D. Lewis, Youngstown, Ohio
Application November 25, 1936, Serial No. 112,791
2 Claims. (Cl. 224—45)



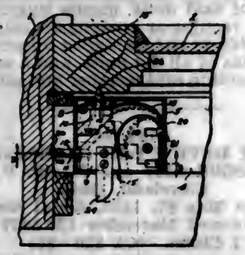
1. A cage for receiving a standard cylindrical tank adapted to carry highly compressed substances and provided with a reduced neck portion, said cage including a frame longitudinally outlining and extending from said tank, an integral semi-circular band on each side of said frame at the base thereof for holding the end of said tank therein, at least one integral semi-circular band spaced from the base of said frame and on one side thereof for supporting said tank in said cage, spaced pairs of projections on said neck portion of said frame and a locking-ring slidable on said neck portion for engaging one pair of said projections to hold said tank within said cage and engaging the other of said projections whereby a tank may be inserted or removed from said cage.

2,104,131
ALTERNATING CURRENT SYSTEM OF DISTRIBUTION
George A. Matthews, Detroit, Mich., assignor to The Detroit Edison Company, Detroit, Mich., a corporation of New York
Application September 25, 1933, Serial No. 690,787
10 Claims. (Cl. 175—294)



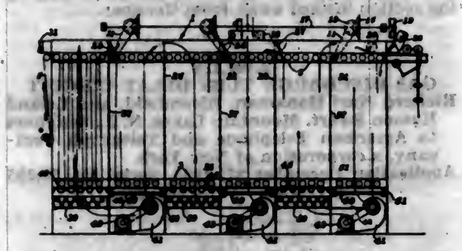
1. A protective device for a three-phase circuit comprising a three-phase circuit breaker, a latch for preventing movement of the circuit breaker in one direction, and tripping mechanism for actuating said latch; said mechanism including a plurality of units to individually produce a shifting magnetic field, each unit being connected to one phase of said circuit for potential and current energization, a member common to all of said units, means supporting said member for rectilinear movement, said member being subjected to the combined influence of the magnetic fields of all the units, and a mechanical linkage connecting said member and said latch.

2,104,132
ANTITHEFT DEVICE FOR GASOLINE TANKS
Frank E. McGilliceddy and Martin P. Meckler, Cleveland, Ohio
Application May 27, 1935, Serial No. 23,772
Renewed November 12, 1937
1 Claim. (Cl. 220—86)



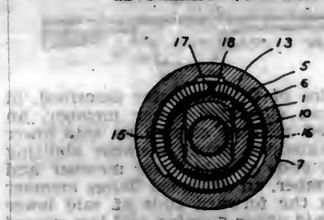
An anti-theft device for fuel tanks provided with a filling opening in an end wall thereof, said anti-theft device being in the form of a perforated plate arranged within the tank and having longitudinal flanges on its opposite side edges for securing to the walls of the tank at opposite sides of the tank, said plate having an end edge in abutting relation with the end wall of the tank equipped with the filling opening, and a flange extending at right angles from the plate at the end thereof remote from said end wall and filling the space between said plate and the top wall of the tank said longitudinal flanges being curved transversely and said last-named flange having its upper edge curved longitudinally and all of the curved portions of said flanges conforming to the curvature of the walls of the tank to snugly contact the tank throughout the entire perimeter of the plate.

2,104,123
INSOLE
Frank S. Moss, Lynn, Mass.
Application June 11, 1935, Serial No. 25,976
5 Claims. (Cl. 36—43)



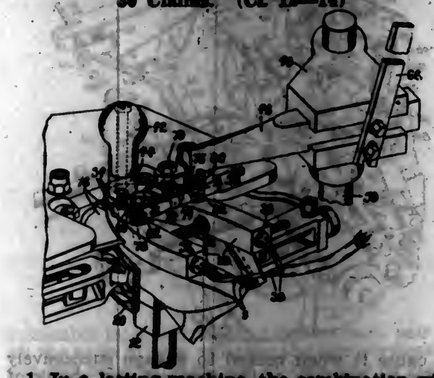
1. An improved insole having in the ball portion of its outer face a series of parallel transverse grooves intersecting a relatively large cut-out and a plurality of perforations distributed about the borders of said cut-out, and a felt insert in said cut-out.

2,104,124
WINDOW LATCH
Ferdinand Mollebrand, Detroit, Mich.
Application January 29, 1937, Serial No. 123,016
1 Claim. (Cl. 292—57)



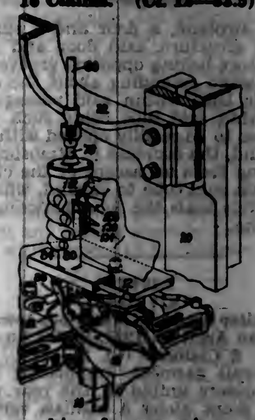
A window latch comprising a casing having a bottom, parallel side walls and a side wall intersecting said parallel walls, one of said parallel side walls having an elongated opening, a pair of slidable wedge blocks within said casing, said blocks having their respective faces in sliding contact with each other, a latching pin projecting from one of said blocks through one of said parallel walls and a latching pin projecting from the other of said blocks through said intersecting wall, said latching pins being at right angles to each other, means for exerting pressure on said blocks for projecting the pins carried thereby through the wall through which said pins respectively project, one of said blocks having sliding engagement on the bottom and said intersecting side wall, and the other block having sliding engagement on the bottom and on the parallel side wall having the elongated opening, and a handle secured to said last mentioned block projecting through said elongated opening having sliding movement in said last mentioned parallel wall, whereby the blocks may be retracted against said pressure exerting means.

2,104,125
CARBONIZING DRIER
Frank B. Morrill, North Adams, Mass., assignor to The James Hunter Machine Company, North Adams, Mass., a corporation of Massachusetts
Application October 17, 1932, Serial No. 638,136
12 Claims. (Cl. 34—46)



1. A drier having in combination a housing, means for propelling continuous material therethrough, baffle means sub-dividing the housing interior into a plurality of sections through which the material passes in sequence, a plurality of means for exhausting air from and supplying air to the sections, and means for putting one of such sections optionally into or out of communication with the rest in respect of its air without interrupting the air-supply to the rest.

2,104,126
RETARDING MECHANISM
William T. Murdock, Bristol, Conn., assignor to General Motors Corporation, Detroit, Mich., a corporation of Delaware
Application March 14, 1935, Serial No. 11,121
11 Claims. (Cl. 192—6)

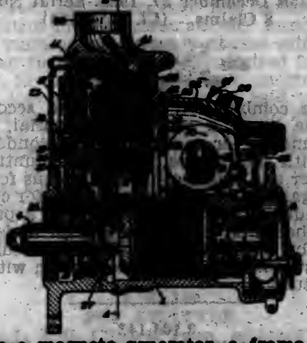


1. In a device of the character indicated, the combination of a rotatable driver, a driven element, a non-rotatable braking element shiftable axially to effect braking of said driven element, means to prevent rotation of said braking element, a laterally-shiftable connector adapted in one lateral position to make driving connection with said driven element and in another lateral position to operate said braking element, there being relative rotation between said driver and said connector, means whereby such rotation effects said lateral shifting of said connector, and a retarder between said braking element and said connector and having an upstanding part in sliding engagement with said connector, said retarder being spaced from said braking element at the point of said connector-engaging part, slidingly engaging said brake element at a point removed from said connector-engaging part, and smoothly extending between said points; substantially as described.

2,104,127
MEANS FOR OPERATING ON SHOES
Charles F. Fyre, deceased, late of Beverly, Mass., by Arthur F. Fyre, executor, Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a corporation of New Jersey
Application February 20, 1935, Serial No. 7,434
30 Claims. (Cl. 12—14)

1. In a lasting machine, the combination with a support for a last and shoe, and means for laying the marginal portion of the upper of a shoe on said support inwardly over a sole on the last around an end of the shoe bottom, of a device for applying pressure and heat to the overlaid marginal portion of the upper around the end of the shoe bottom while the shoe is on said support, said device having heated portions arranged to engage the upper along the opposite sides of the end of the shoe bottom and movable toward each other laterally of the shoe to subject the upper to an inward wipe while applying pressure and heat thereto, and means supported independently of the shoe for terminating the application of pressure and heat to the shoe by said device before the shoe is removed from said support.

2,104,128
TRIMMING MACHINE
Richard H. Seer, Danvers, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a corporation of New Jersey
Application March 13, 1936, Serial No. 68,746
16 Claims. (Cl. 12—33.5)



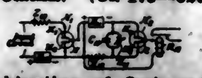
1. In a machine for removing surplus upper material from shoes, a pair of cutters comprising a stationary cutter jaw, a handle therefor, a movable cutter jaw mounted in the handle for reciprocating movement toward and from the stationary cutter jaw, a driven member mounted in the handle and operatively connected to the movable cutter jaw, a driving member mounted in the handle, means in the handle for connecting the driving member and the driven member, and means in the handle for disengaging said members with the cutter jaws in their open position.

2,104,139
CANDLE HOLDER
Frank D. Sherwood, Beaver Dam, Wis.
Application December 3, 1935, Serial No. 52,737
1 Claim. (Cl. 67—25)

As a new article of manufacture, a holder for candles and the like, comprising a piece of sheet material shaped to form an annular body adapted to be placed over and about a cake or the like and having a channel opening through its lower side, the top wall of the body and channel being provided with a plurality of scorings to form seats for the candles, the portions of said top wall between the scorings being bent inwardly of the said channel when the candles are selectively and forceably engaged in said seats, and out-turned flanges formed at opposite edges of the open side of said channel to increase the footing of the holder.

2,104,140
MAGNETO GENERATOR
Walter J. Spengler, Sidney, N. Y., assignor to Bendix Aviation Corporation, South Bend, Ind., a corporation of Delaware
Application November 29, 1935, Serial No. 52,219
14 Claims. (Cl. 171—252)

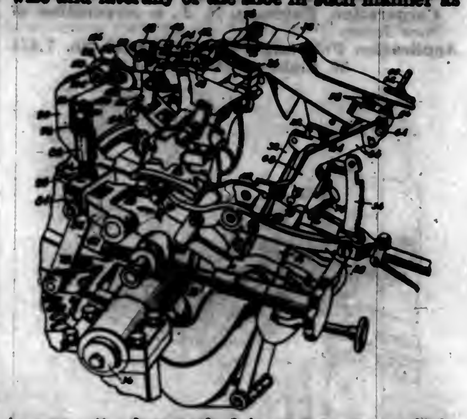
13. In a magneto generator, a frame of non-magnetic metal, a magnetic rotor journalled therein, a distributor rotor journalled in said frame, means including gearing for driving the distributor rotor from the magnetic rotor, housing means of non-magnetic metal cooperating with the frame to provide an oil-tight chamber for the gearing, a distributor terminal block, a casing section for housing the same, a high tension coil, a casing section for housing said coil,



means for conducting current from said coil through the distributor block to the distributor rotor, and means for preventing escape of lubricant from said chamber into said casing sections, said casing sections and said housing means cooperating with said frame to completely enclose and shield the elements of the magneto.

2,104,141
METHOD OF MANUFACTURING COMMUTATORS
Brooks Stevens, Jr., Concord, Mass.
Application September 9, 1936, Serial No. 99,905
5 Claims. (Cl. 29—155.54)

1. Method of making a commutator comprising forming a metal tube with a cylindrical outer surface and with an inner surface provided with a plurality of elongate ribs parallel to the axis of the tube and disposed uniformly thereabout with their radially inward parts of greater cross section than their radially outward parts, forming a plurality of disks of insulating material with similar central openings and with peripheral recesses to interfit with said ribs, assembling the disks in superposed relation with their recesses in alignment, causing the superposed disks to fit firmly within the tube with the ribs interfitting with the recesses by subjecting the tube to endwise pressure at room temperature to cause cold flow of the metal inwardly, while confining the tube against circumferential expansion, and then cutting the wall of the tube between the ribs to provide a plurality of separate commutator bars each having a rib interfitting with each of the disks.



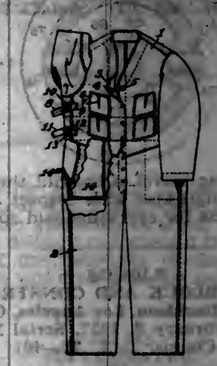
2,104,142
GAS-FILLED TUBE CIRCUITS
Leland Kasson Swart, Mountain Lakes, N. J., assignor to American Telephone and Telegraph Company, a corporation of New York
Application December 27, 1935, Serial No. 56,396
8 Claims. (Cl. 175—320)

1. The combination of first and second gas discharge tubes, a source of potential, a condenser, means for connecting said condenser in series with said source, a resistor shunting said condenser and said second tube, means for ionizing the gas within the first tube and for charging said condenser, means responsive to a predetermined charge on said condenser for ionizing the gas of the second tube, and a load circuit operated in response to gaseous ionization within the second tube.

2,104,143
METHOD OF AND MEANS FOR SHAPING THE BOTTOMS OF SHOES
Erastus E. Winkley, Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a corporation of New Jersey
Application September 25, 1935, Serial No. 42,071
24 Claims. (Cl. 12—34)

1. That improvement in methods of shaping or leveling the bottoms of shoes which consists in applying over the bottom of a shoe a form arranged to extend from the toe end to the heel end of the shoe and having a sole-pressing face portions of which opposite the forepart and shank portions of the shoe bottom are curved lengthwise and laterally of the shoe in such manner as

to cause it when rocked to engage successively different portions of the forepart and shank of the shoe sole, and applying rolling pressure to said form to level the forepart and shank portions of the sole.



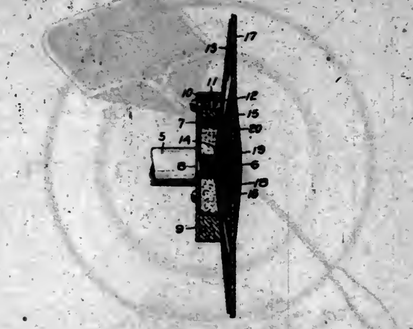
2,104,144
AIRPLANE DOOR CONSTRUCTION
Stephen J. Zand, Forest Hills, N. Y., assignor to Sperry Gyroscope Company, Inc., Brooklyn, N. Y., a corporation of New York
Application September 26, 1935, Serial No. 42,221
6 Claims. (Cl. 244—129)

6. In an airplane, a door and a surrounding door frame structure, said door and said door frame structure having opposing grooves for providing a passage extending about the door, and a pneumatic tube within said passage, the air pressure within said tube being such as to enable the door to be readily opened with the craft on the ground, the decrease in atmospheric pressure resulting from an ascent of the craft causing air within said tube to expand, whereby said tube effectively seals the joint between the door and its frame.

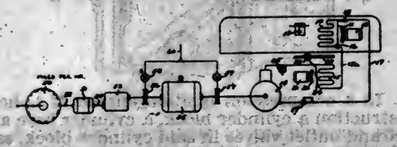
2,104,145
COVERALL
Walter L. Abel, Waterloo, Iowa
Application April 12, 1937, Serial No. 136,264
2 Claims. (Cl. 2—79)

2. A coverall garment, comprising a sleeved vest and trousers united in the rear with both opening in front along a median vertical line, both having releasable fastening means between their respective parts, the vest having a horizontally arranged pair of tabs at each of its sides below the sleeves thereof, and also having horizontally arranged tabs at its sides spaced below the first mentioned pairs of tabs, and adjustable

releasable fastening means between each pair of all the pairs of tabs, whereby the side portions of the vest between each pair of tabs may be gathered adjustably, to cause the vest to fit the wearer while preventing gathering of the vest at its front and rear parts.



2,104,146
LUBRICATING APPARATUS
Daniel G. Adams, New York, N. Y., assignor to Adams Grease Gun Corporation, New York, N. Y., a corporation of New York
Original application December 31, 1928, Serial No. 329,961. Divided and this application July 13, 1932, Serial No. 622,962
4 Claims. (Cl. 184—105)



1. A grease cup for use in connection with a coupler for detachably connecting a grease gun to the cup, said cup comprising in combination a tubular member adapted to have its rear end attached to a part to be lubricated, the forward portion of the tubular member being provided with a sealing tit of smaller diameter than the main portion of the tubular member for sealing entry into a coupler and with a sealing shoulder for sealing engagement with the end of the coupler, said main portion of the tubular member being provided with a circumferential locking groove for cooperation with the coupler to draw the said tit and sealing shoulder into said sealing positions with respect to the coupler.

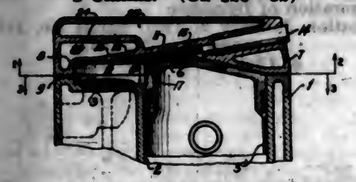
2,104,147
GRINDING APPARATUS
Vern E. Anderson, Lansing, Mich.
Application June 13, 1935, Serial No. 26,286
8 Claims. (Cl. 51—197)

1. An article of the class described comprising an abrasive disk, a flexible supporting disk and means for flexing said supporting disk whereby its peripheral edge only is held in contacting relation with the marginal edge portion of the abrasive disk.

2,104,148
REFRIGERATING APPARATUS
Donald F. Alexander, Charles F. Heuney, and Charles L. Paulus, Dayton, Ohio, assignors to General Motors Corporation, Dayton, Ohio, a corporation of Delaware
Application January 2, 1937, Serial No. 118,816
Renewed May 21, 1937
38 Claims. (Cl. 62—117)

1. In a vehicle; a live axle assembly; a compressor; a unitary motor-generator; a battery; torque transmitting means from said live axle assembly to said compressor and motor-generator and between said compressor and motor-generator; control means, automatically responsive to vehicle running conditions, to cause said motor-generator to act as a motor, energized from said battery, to drive said compressor independently of said live axle assembly when said vehicle is standing and, when said vehicle is in motion, to cause said live axle assembly to drive, through said torque transmitting means, said compressor and said motor-generator, said motor-generator acting as a generator to charge said battery, and means automatically maintaining the same direction of current generated by said motor-generator when the vehicle travels in either direction.

2,104,149
FLY SWATTER
Charles L. Bell, Clinton, Iowa, assignor to Lubbers & Bell Manufacturing Company, Clinton, Iowa, a corporation of Iowa
Application February 12, 1936, Serial No. 63,524
4 Claims. (Cl. 43—137)



1. In a fly swatter, a blade consisting of a fabric including a plurality of strands, some of which are formed of a rolled and twisted strip of thin, slightly extensible material composed entirely or largely of rubber derivative, said strands

being woven together, and producing a light, pliable, resilient, scratch-proof striking body, the

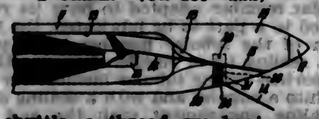
relative rigidity and flexibility of which is substantially unaffected by moisture.

2,104,150
INTERNAL COMBUSTION ENGINE
Albert T. Brenner, Westmont, N. J.
Application November 29, 1933, Serial No. 700,309
2 Claims. (Cl. 123—32)

1. In a compression ignition engine of L-head construction a cylinder block, a cylinder bore and inlet and outlet valves in said cylinder block, said valves mounted on the side of said cylinder, a cylinder head, a first cavity in said cylinder head, adapted to form a chamber about said valves, a second cavity in said cylinder head adjacent said first cavity and adjacent said cylinder bore, a piston in said cylinder bore, a cavity in said piston, said piston adapted to enter said second cavity during the latter part of the upstroke of said piston and said piston cavity to form a mixing space with said cylinder head only while said piston is near and in its top dead center position, a passage between said mixing space and said valve chamber and said piston adapted to partly close said passage when entering said second cavity, and a fuel nozzle adjacent said mixing chamber and opposite said valve chamber in said cylinder head.

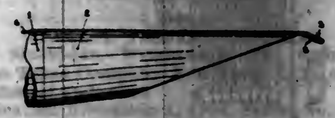
2,104,151
VALVE
Eugene C. Brisbane and Robert Bischoff, York, Pa., assignors to S. Morgan Smith Company, York, Pa., a corporation of Pennsylvania
Application July 25, 1936, Serial No. 92,556
4 Claims. (Cl. 74—99)

1. In a device of the class described, a shaft, a lever operatively connected to said shaft for actuating the same, a screw spindle, a nut pivotally connected to the outer end portion of said lever and mounted on said spindle, means for supporting said spindle whereby the spindle is free to rotate in order to impart lengthwise movement of the nut thereon and is also free to swing inwardly and outwardly with respect to



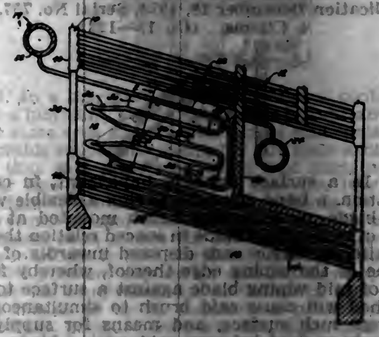
the shaft during travel of the nut thereon without moving lengthwise with respect to its support, and means for operating said spindle.

2,104,152
BUILDING BLOCK AND CONSTRUCTION
Nathan Davidson, Los Angeles, Calif.
Application February 9, 1937, Serial No. 124,825
2 Claims. (Cl. 72—40)



1. A building construction of the class described comprising a plurality of substantially vertical wall sections formed of courses of standard sized bricks, said bricks being joined together with mortar, one or more of said wall sections having a course of rectangular angular blocks provided with outside faces substantially corresponding in size with standard bricks and laid with their angular faces toward the midwidth of the wall, the space thus defined lying between the vertical faces of at least one of said wall sections and being substantially filled with mortar, and a horizontally extending metallic reinforcing rod imbedded in said mortar in said space in vertical alignment with the courses of bricks of one wall section.

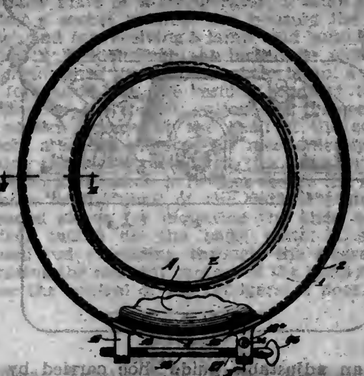
2,104,153
SHUTTLE
Sherwood O. Dodge, Medford, Mass., assignor to Guaranteed Parts, Inc., Allston, Mass., a corporation of Massachusetts
Application October 14, 1936, Serial No. 105,502
1 Claim. (Cl. 139—222)



In a shuttle, a thread eye having an axial thread passage extending therethrough and also having a thread slot communicating with said passage at the top thereof, said slot extending in a continuous straight line lengthwise of said eye and diagonally with respect to said passage and separating the portion of the eye above the passage into oppositely projecting overhanging and overlapping portions at each end of the passage adapted to confine a thread in the passage, one of the side walls of the thread slot being higher than the opposite side wall, thereby providing a shoulder at the top of the eye and at the entrance to the thread slot, whereby a thread will be deflected into said slot.

2,104,154
SACKING INTO VALVE BAGS
Alfred Du Bois, Paris, France
Application February 6, 1936, Serial No. 62,561
In France February 15, 1935
7 Claims. (Cl. 226—43)

1. For filling valve bags a filling spout the cross-section of which progressively varies along the spout and gets both enlarged and flattened towards the delivery end where it is substantially flat so that the flattening of the valve takes place by the withdrawal of the said spout from the valve.



2,104,155
SUPERHEATER
Frederic I. Epley, New York, N. Y., assignor to The Superheater Company, New York, N. Y.
Application September 25, 1934, Serial No. 745,415
1 Claim. (Cl. 122—479)

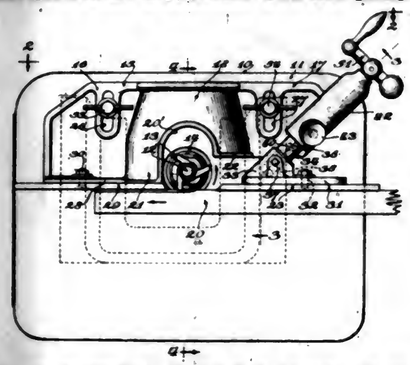
In a superheater having a pair of horizontally spaced, parallel headers and heat absorbing units each comprising vertically spaced pipe runs serially interconnected by return bends to form substantially horizontally extending loops; stiffening means fixed between the pipe runs of the topmost loops of a unit to form a girder thereof which is located intermediate said headers; means for freely suspending the loops below said topmost loop from said girder; and means for supporting said girder from said headers comprising a lead connecting the topmost loop to one of said headers and a connection between the return bend of said topmost loop and a lead extending from the lowermost loop to the other header.

2,104,156
TIRE COVER
Arthur F. Ferguson, Detroit, Mich., assignor to Lyon Cover Company, Detroit, Mich., a corporation of Michigan
Application November 2, 1936, Serial No. 109,979
25 Claims. (Cl. 152—154)

1. A tire cover comprising pliable ungrippable with the side walls of a tire, a radially expansible and contractible ring for disposition about the tire, interlocking means on said ring and plates, a device for expanding said ring to cause said

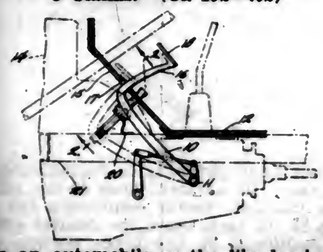
means to interlock and instrumentalities for preventing undesired contraction of said ring.

2,104,157
RAIL JOINT
Pietro Ferrella, Rome, Italy
Application February 21, 1935, Serial No. 7,597
In Italy February 21, 1934
2 Claims. (Cl. 238—164)



1. A rail joint including in combination with aligned rails, the adjacent ends of the rails defining a junction, means connecting the upper portions of the rails above the neutral axis, bar means positioned on the lower portion of the rails below the neutral axis and extending across said junction, said bar means defining a space and weld blocks welded to the rails and bar means within said space and free of said junction.

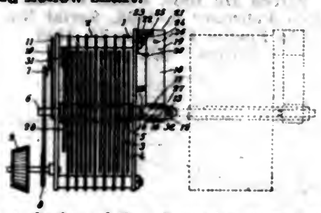
2,104,158
WORK GUIDE FOR WOODWORKING MACHINES
Theren I. Hedgpeth, Oak Park, Ill., assignor to Duro Metal Products Company, Chicago, Ill., a corporation of Illinois
Original application May 9, 1935, Serial No. 19,235. Divided and this application December 31, 1936, Serial No. 118,436
1 Claim. (Cl. 144—253)



In a wood working machine, the combination of a supporting table with a combined cutter guard and fence, said fence having an attaching flange and a guide flange, and having a chip conduit formed adjacent a cutter carried by said table, said attaching flange having adjustable means for securing it to the table, and a plunger housing carried by said attaching flange, said plunger housing having a bore and a counterbore, with an annular shoulder between said bore and counterbore, a plunger slidably mounted in said bore, a screw shaft having thrust bearings on each end of said counterbore, and rotatably

mounted in said counterbore, said screw shaft having threaded engagement with said plunger,

and an adjustable guide shoe carried by said plunger and extending in parallel relation with respect to said other guide flange.



2,104,159
STARTER SWITCH CONTROL
Wilson Hemingway, Jr., Chicago, Ill., assignor to Electroleck Manufacturing Company, Vicksburg, Miss., a corporation of Mississippi
Application January 24, 1936, Serial No. 60,679
5 Claims. (Cl. 192—.02)

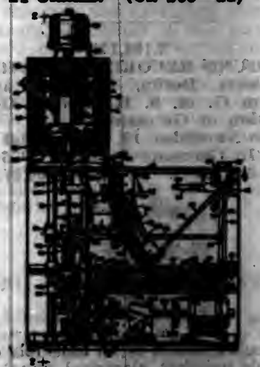
1. In an automobile or the like having a toe board with a clutch releasing lever thereunder and a starter switch with operating means extending through the toe board, the combination of an adapter attached to said switch operating means and having an obstruction under the toe board in the path of movement of and operable by the clutch releasing lever to close the switch.

2,104,160
ADJUSTING DEVICE, IN PARTICULAR ELECTRICAL CONDENSER
Karl Hengel, Berlin, Germany
Application January 23, 1934, Serial No. 707,935
In Germany January 27, 1933
14 Claims. (Cl. 175—41.5)

1. In a device of the class described in combination a primary condenser and a secondary condenser, a frame carrying fixed plates of said primary condenser and a fixed armature of said secondary condenser, a shaft journalled in said frame, a hollow shaft rotatably mounted on said shaft and carrying movable plates of said primary condenser, a sleeve fixed to one end of said shaft, a lost motion connection between said sleeve and said hollow shaft, a support frictionally connected to said sleeve and carrying a movable armature of said secondary condenser, stops on said frame for limiting the movements of said movable armature and an adjusting knob for turning said shaft and said hollow shaft.

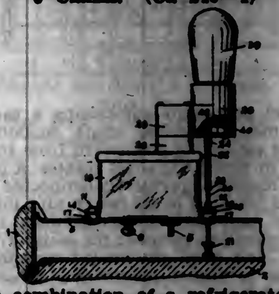
6. In a device of the character described, comprising, a rough adjusting member, a fine adjusting member, coupling means between said rough and fine adjusting members with upper and lower limits to allow of movement of said fine adjusting member between said limits and only within predetermined narrow limits of the range of movement of said rough adjusting member, substantially equally for any position of said rough adjusting member, and a common actuating member for said adjusting members.

2,104,161
WINDOW GLASS CLEANING IMPLEMENT
Louis Kouksal, New York, N. Y.
Application December 18, 1934, Serial No. 757,988
4 Claims. (Cl. 15—123)



1. In a surface washing implement, in combination, a hand squeegee having a flexible wiping blade, an elongated brush mounted at one side of said wiping blade in spaced relation thereto with its bristle ends disposed inwardly of the plane of the wiping edge thereof, whereby flexing of said wiping blade against a surface to be washed will cause said brush to simultaneously engage such surface, and means for supplying a washing fluid between said wiping blade and brush.

2,104,162
CENTRIFUGAL SEPARATOR
William R. Mackland, Chicago, Ill.
Application April 8, 1935, Serial No. 15,179
13 Claims. (Cl. 233—3)

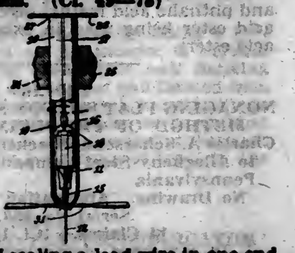


11. In a centrifugal separator, the combination of a rotatable separating chamber provided with a tapered discharge passage, means for continuously supplying material to be separated to said chamber, a flexible diaphragm forming a portion of one wall of said chamber, a ram connected to said diaphragm and located in said chamber, and means for inducing a pressure outside said chamber in excess of the chamber pressure to thereby force said ram during the separating operation of said chamber into said tapered passage to compress separated material therein.

2,104,163
GREASE TESTING MACHINE
Paul McJunkin, Wrightsville, Pa., assignor to The Texas Company, New York, N. Y., a corporation of Delaware
Application November 1, 1934, Serial No. 750,924
14 Claims. (Cl. 265—11)

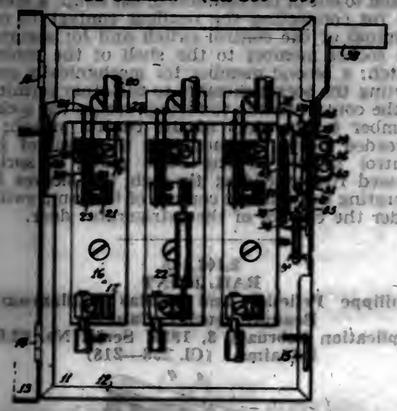
1. In a lubricant testing machine, a container for a lubricant, a perforated plate of substantially the same area and cross section as said container, movable supporting means for said plate arranged so that said plate may enter said container to bear against and be forced into the lubricant contained therein, means for increasing the temperature of said lubricant at a predetermined uniform rate, means for driving said plate into the lubricant in said container, means responsive to the pressure exerted on said lubricant by said plate for controlling the actuation of said driving means so as to maintain a predetermined constant pressure between said plate and said lubricant as the lubricant becomes softened, due to the increasing temperature, and measuring means connected with said driving means for indicating the rate with which said plate moves into and through said lubricant.

2,104,164
REFRIGERATOR DOOR LAMP SWITCH
Frederick H. Osborne, Columbus, Ohio, assignor to Kanco Incorporated, a corporation of Ohio
Application December 28, 1934, Serial No. 759,458
6 Claims. (Cl. 240—4)



1. The combination of a refrigerator control switch having an enclosing shell and a pair of terminals, said control switch being mounted on the baffle plate of a refrigerator; a lamp switch having a socket member for housing the lamp switch and for receiving a lamp, said lamp switch having a resilient contact biased to close the switch to one of the contacts of the lamp; a member for connecting the resilient contact to one terminal of the control switch and for securing the socket member to the shell of the control switch; a second member for mechanically connecting the socket member to the other terminal of the control switch to further secure the socket member to the shell of the control switch; a threaded sleeve for mounting the shell of the control switch on the baffle plate; a spring pressed rod extending through the sleeves for operating the resilient contact of the lamp switch under the control of the refrigerator door.

2,104,165
RAIL JOINT
Philippe Pelletier and Philias Vaillancourt, Beaupre, Quebec, Canada
Application February 3, 1936, Serial No. 62,019
2 Claims. (Cl. 238—213)



1. A rail joint comprising two like pieces adapted to engage opposite sides of the rails to be joined, each piece having at its upper edge a horizontal triangular head adapted to enter the space between the rail ends, oblique cheeks formed on said pieces beneath said heads and engaging one another on their oblique surfaces, said heads forming a rectangle filling said space and constituting a continuation of the heads of the rails, and means for securing said pieces to said rails.

2,104,166
METHOD OF MAKING A GLASS SEAL
Edward A. Pelton, Newark, N. J., assignor, by mesne assignments, to Westinghouse Electric and Manufacturing Company, East Pittsburgh, Pa., a corporation of Pennsylvania
Application May 1, 1934, Serial No. 723,321
8 Claims. (Cl. 49—78)

1. The method of sealing a lead wire in one end of a tubular glass vessel which comprises positioning a portion of the wire in a glass sleeve having an inside diameter only slightly greater than the outside diameter of the wire to provide a friction fit, positioning the sleeve within and adjacent to one end of the vessel to position said sleeve between said wire and the wall of said vessel, heating to soften the said end, and fusing the end to the sleeve and the sleeve to the wire.

2,104,167
ELECTRIC SWITCH BOX
James C. Richardson, Brooklyn, N. Y., assignor to Royal Switchboard Co., Inc., New York, N. Y., a corporation of New York
Application May 8, 1936, Serial No. 78,672
14 Claims. (Cl. 200—50)

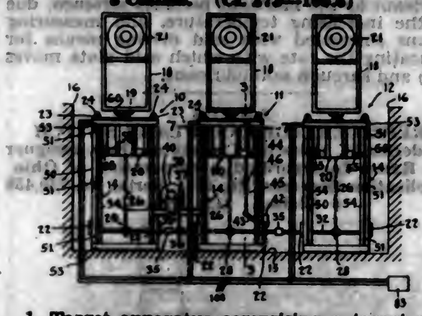
1. An interlock for an electric switch box comprising a box with a cover having a hasp, an electric switch located in said box having an operating mechanism, a handle outside said box for operating said mechanism, a main latch pivoted at one end to said box and engaging said hasp at the other end to hold the cover closed, a second latch pivoted to said main latch and locking said mechanism against movement to close the switch, and a spring normally forcing said latches into the engaging position.

2,104,168
ARTIFICIAL SUBSTANCE
Otto Röhm and Walter Bauer, Darmstadt, Germany, assignors, by mesne assignments, to Röhm & Haas Company, Philadelphia, Pa., a corporation of Delaware
No Drawing. Application May 29, 1930, Serial No. 457,494. In Germany June 1, 1929
15 Claims. (Cl. 106—32)

1. A film formed from a solution of polymeric acrylic acid methyl ester and polymeric vinyl acetate in admixture with phthalic acid amyl ester and phthalic acid methyl glycol ester, the acrylic acid ester being used in excess of the phthalic acid esters.

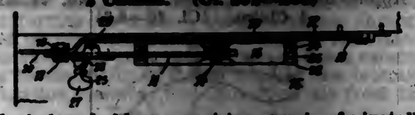
2,104,169
NONAGING FLAT SILICON STEEL STRIP AND METHOD OF PRODUCING THE SAME
Charles A. Scharschu, Brackenridge, Pa., assignor to Allegheny Steel Company, a corporation of Pennsylvania
No Drawing. Application August 3, 1933, Serial No. 683,476
14 Claims. (Cl. 148—12)

1. In a method of making magnetic material in the form of silicon steel strip, the steps which consist in casting a steel ingot having a silicon content of from about .5% to 5%, in reducing the ingot by hot rolling to a strip of intermediate gauge, in annealing the hot rolled strip, in pickling the annealed strip, in cold rolling the pickled strip to finished gauge, in annealing the strip of finished gauge within a temperature range of from 1400–2000° F., in then cooling the strip, then in continuously annealing the strip while flat at a temperature of from 1000 to 1300° F., and then in cooling the strip.



14. As a new article of manufacture, non-aging magnetic material in the form of silicon steel strip free from cold set and having a silicon content between approximately .5% and 4.5% and produced from silicon steel strip having a silicon content within said range which has been subjected to hot and cold roll reductions, then annealed at a temperature between approximately 1400° F. and 2000° F. cooled, then given a continuous anneal while flat at a temperature between approximately 1000° F. and 1300° F. and then again cooled.

2,104,170
SOUND RECORDING DEVICE
Karl Schwarz, Berlin, Germany, assignor to Klangfilm G. m. b. H., Berlin, Germany, a corporation of Germany
Application November 13, 1936, Serial No. 49,465
In Germany April 15, 1935
5 Claims. (Cl. 179—100.2)



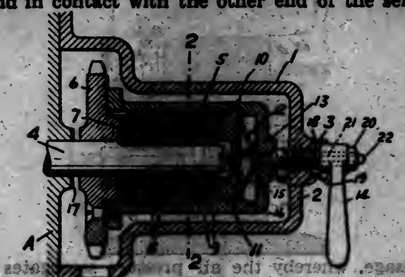
1. The combination of an assembly comprising a vibratable member, electrical signal responsive means operable to vibrate said member about one axis, resilient means supporting said assembly, and electrical signal volume responsive means coupled to said assembly and operable to vibrate said assembly about another axis.

2,104,171
RANGE TARGET
Frank H. Schwerin, Bellevue, Pa., assignor to The Duff-Norton Manufacturing Company, Pittsburgh, Pa., a corporation of Pennsylvania
Application January 22, 1935, Serial No. 2,962
3 Claims. (Cl. 273—105.6)

1. Target apparatus comprising a target-carrying frame, a vertical shaft supporting the frame and extending downward from the frame, a bearing in which the shaft rotates, a motor, an operating member operatively connected with the motor and adapted to be raised and lowered by the motor, and cam means between the shaft and said operating member for causing the shaft to rotate and turn the target-carrying frame in response to vertical movements of said operating member.

2,104,172
DOOR SEAT AND HOLDER
Edwin J. Stiles, Woodbury, N. Y.
Application September 28, 1936, Serial No. 102,063
2 Claims. (Cl. 296—63)

1. A door holder comprising a pair of pivotally connected arms, means for pivotally connecting the free end of the one arm to the door frame, a channel fixed to the door, a stop fixed with relation to the door and extending into the said channel, a plate, abutments on said plate extending into said channel in interlocking relation therewith, said plate and abutments being capable of movement longitudinal of said channel, springs within the channel between the said fixed stop and the said abutments to cushion movements of the said plate in two directions parallel to the plane of the door, means for pivotally connecting the free end of the other arm to the said plate and a slidable turnable bolt for locking the two arms together in open position.



2,104,173
BAKING MACHINE FOR TEXTILE MATERIALS
Walter W. Sibson, Philadelphia, Pa., assignor to The Philadelphia Drying Machinery Company, Philadelphia, Pa., a corporation of Pennsylvania
Application October 10, 1935, Serial No. 44,360
3 Claims. (Cl. 34—23)

1. In a machine for baking articles coated with a suitable preservative, an enclosure subdivided by partitions into successive compartments, means for progressing the articles, rotary fans for circulating heated air through the machine with alternately-reversed individual diagonal circulation through the successive compartments, means controlling variable communication between adjoining compartments to effect a generally spiralled circulation of the air through the machine, and separator means movable in vertical planes whereby the articles are prevented from contacting and are aligned-guided through the machine in spacial relation.

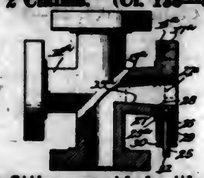
2,104,174
CLUTCH
John C. Simons and Harold S. Swope, Philadelphia, Pa.
Application July 3, 1937, Serial No. 152,730
3 Claims. (Cl. 192—69)

1. A clutch comprising the combination of a fixed housing having an end portion and having a screw arranged thru its end portion, a power transmission shaft substantially devoid of endwise motion and aligned with the screw and projecting into the housing, a hub provided with a power transmission device and mounted for rotation in respect to the shaft and to the end of the screw and for endwise motion, a series of friction drive clutch elements operatively arranged between the hub and shaft and at one end in contact with the hub, a disk rotatably mounted at the end of the shaft and arranged in the hub and in contact with the other end of the series of friction elements, and spring means interposed between the end of the hub and the disk to exert compression on the clutch elements, the screw operating to shift the hub in respect to the disk to control the compression of the spring.

2,104,175
INSEAM MEASURING DEVICE
James Turpan, Paterson, N. J.
Application February 1, 1937, Serial No. 123,404
2 Claims. (Cl. 33—3)

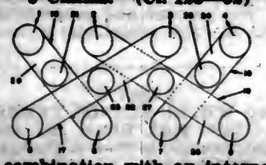
1. A tailor's measuring device including a hollow stand affording at its interior a vertical guideway and having an upright wall flanking the guideway at one side thereof and formed with a vertical slot, a plunger movable vertically in the guideway, and a substantially horizontal bar carried by the plunger and protruding through the slot and movable lengthwise of itself in the plunger.

2,104,176
RAIL AND WHEEL FLANGE LUBRICATOR
Harold G. Warr, Park Ridge, Ill., assignor, by mesne assignments, to Peer & Company, a corporation of Delaware
Application July 10, 1936, Serial No. 89,946
16 Claims. (Cl. 184—3)



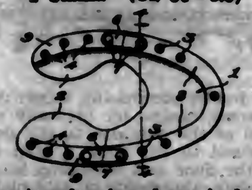
1. A rail and wheel flange lubricator comprising a lubricant discharger adapted to be positioned adjacent the gauge side of a rail and having a passage therein for containing lubricant to be discharged and an air duct communicating

with said passage at a location intermediate its ends, and means operable at intervals to introduce air under pressure into said duct and said



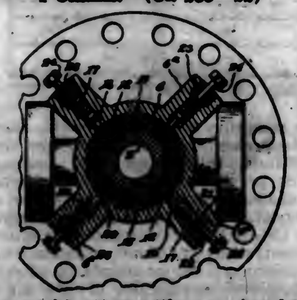
passage, whereby the air pressure segregates a quantity of lubricant from the main body in said passage and discharges the segregated lubricant as a body onto the side face of the rail head.

2,104,177
PIPE FITTING
John E. Yancey, Houston, Tex., assignor to Gray Tool Company, Houston, Tex., a corporation of Texas
Original application December 2, 1935, Serial No. 52,535, now Patent No. 2,077,507, dated April 20, 1937. Divided and this application November 11, 1936, Serial No. 110,366
2 Claims. (Cl. 138—89)



1. A pipe fitting provided with a bore and including an inlet and a pair of outlets, each outlet having a radially and outwardly extending flange provided with bolt apertures to enable piping elements to be connected thereto, the bore of each outlet including an outwardly flared seat portion, a tapered plug adapted to seat in said seat portion to form a seal therein, and means outward of said seat portion and forming no part thereof to hold said plug in said seat portion.

2,104,178
MANIFOLD CONSTRUCTION
David E. Andersen, Detroit, Mich., assignor to Bohn Aluminum and Brass Corporation, Detroit, Mich., a corporation of Michigan
Application February 25, 1935, Serial No. 8,136
9 Claims. (Cl. 123—52)

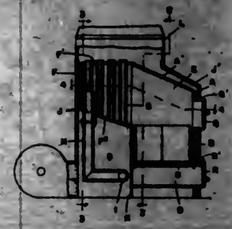


1. The combination with an internal combustion engine having eight cylinders arranged in pairs with the cylinders in each pair having suction periods 360° apart, and a manifolding system comprising a plurality of non-communicating passages corresponding in number to the number of pairs of cylinders and each passage connecting the cylinders in a pair.

2,104,179
TAP FOR TAP-DANCING SHOES
Corrado Agosta and Frank Notarangelo, Bristol, Conn.
Application May 4, 1936, Serial No. 78,361
1 Claim. (Cl. 36—8.3)

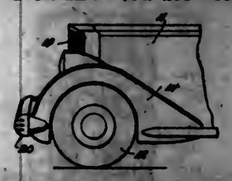
A tap for tap dancing shoes, including a substantially U-shaped toe member having a plane upper face inclined downwardly and inwardly from its outer edge and having each of its legs formed with a flat end face, an elongated side member alined with each leg of the toe member, and having a flat end face disposed in abutting relation to the end face of said toe member, each of said elongated side members having plane upper faces inclined downwardly and inwardly from their outer edges and alined with the upper face of the toe member, and flat springs disposed along said inclined upper faces of the toe and side members and beneath the outer edges of the latter for connecting the same together, so as to permit relative flexing movement between the toe and side members only in an upward direction.

2,104,180
TUBING HEAD OR HANGER
Ernest L. Barber, Houston, Tex.
Application April 10, 1937, Serial No. 136,300
4 Claims. (Cl. 285—22)



1. The combination with a casing head having an internal annular groove, and a tubing hanger having an external annular groove, of a locking ring mounted in the groove in the hanger and comprising a plurality of segments and springs between the ends of the segments tending to expand the same into locking engagement with the groove in the casing head.

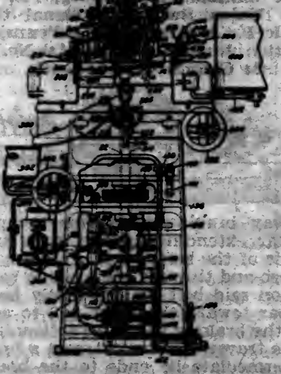
2,104,181
WARM AIR FURNACE
Harry A. Bertsch, Detroit, Mich., assignor of one-half to James Rodney Weeks, Birmingham, Mich.
Application February 24, 1936, Serial No. 65,518
3 Claims. (Cl. 126—110)



1. In a furnace, a fire box, a combustion chamber extending upwardly from said fire box, a chamber extending laterally from said combustion chamber, an enclosing jacket for the fire

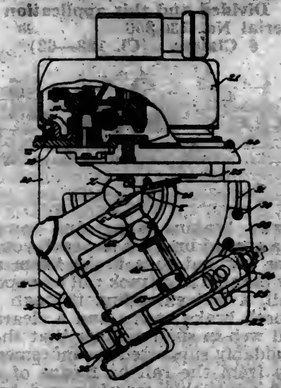
box and chambers aforesaid providing air spaces above and below said laterally extending chamber, a wall of said jacket having an opening constituting an air inlet for the space below the laterally extending chamber aforesaid, a blower for forcing air from a suitable source through said opening into the air space below said laterally extending chamber, a series of tubes extending substantially vertically through the laterally extending chamber for conducting air from the

air space below to the air space above said laterally extending chamber, a down draft flue having its inlet between the tubes just mentioned above the bottom of the laterally extending chamber and having a portion within the air space below said laterally extending chamber opposite the air opening in the jacket so as to be impinged upon by air from the blower for preheating the air before it is conducted by said tubes to the air space above said laterally extending chamber.



2,104,182
MOTOR VEHICLE
Frank C. Best, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a corporation of Michigan
Application June 26, 1934, Serial No. 732,316
4 Claims. (Cl. 293—55)

4. In a motor vehicle, the combination with a streamlined body panel disposed at one end of the vehicle and comprising fenders at either side and an intermediate apron portion, of a bumper extending transversely of the vehicle and disposed in close proximity to said panel, said panel terminating in an outwardly and downwardly directed curved portion approaching the horizontal, said bumper being generally U-shaped in vertical section with the upper leg of the U forming in effect a continuation of the panel, said bumper being provided adjacent each side with an upstanding climb guard receiving a forwardly directed extension of the adjacent fender.



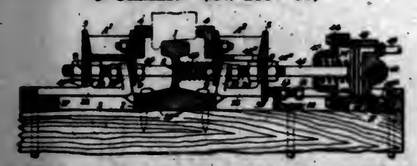
2,104,183
MACHINE FOR OPERATING UPON SHOE-HEELS
Charles G. Bivetrum, Peabody, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a corporation of New Jersey
Application May 28, 1934, Serial No. 727,209
171 Claims. (Cl. 12—77)

1. In a machine for operating upon shoe-heels, a plurality of traveling heel-holders, and a mov-

able tool for operating simultaneously upon the heels in plural holders.

2,104,184
METHOD OF AND MACHINE FOR PRODUCING GEARS
Allan H. Candee, Rochester, N. Y., assignor to Gleason Works, Rochester, N. Y., a corporation of New York
Application November 16, 1935, Serial No. 50,325
27 Claims. (Cl. 90—9)

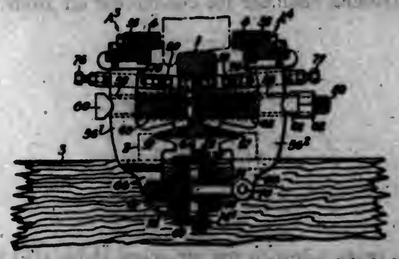
1. The method of generating irregular gears which comprises imparting a cutting motion to the tool while producing a relative rolling motion between the tool and blank as though the gear being cut were rolling without slipping with a basic gear, other than its mate, represented by the tool and having identical teeth, uniformly spaced.



12. In a machine for generating irregular gears, tool mechanism, means for actuating the tool mechanism, means for rotating the blank on its axis and simultaneously effecting a relative movement of translation between the tool mechanism and the blank to generate the tooth profiles, and means for varying the ratio of said rotary and translatory movements for generation of different teeth of the blank and during generation of each tooth and means for indexing the blank periodically but through different distances for successive teeth of the blank.

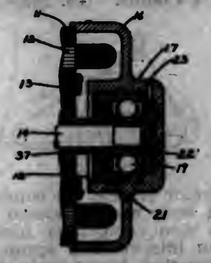
2,104,185
RAILWAY BRAKING APPARATUS
Harold C. Clausen, Wilkinsburg, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a corporation of Pennsylvania
Application June 16, 1936, Serial No. 85,506
24 Claims. (Cl. 188—62)

1. Railway braking apparatus comprising a braking bar extending parallel to a track rail on one side of the rail, a bolt extending through the rail web and through the braking bar, means mounted on said bolt for constantly biasing the braking bar toward the track rail to a position in which the braking bar will frictionally engage car wheels traversing the rail, and a bracket secured intermediate its ends to the braking bar and slidably supported at one end and slidably cooperating with the underside of the rail at the other end, whereby rotation of the braking bar in response to the couple of forces which is exerted on it when it is engaging a car wheel is prevented by said bracket.



2,104,186
RAILWAY BRAKING APPARATUS
Harold C. Clausen, Wilkinsburg, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a corporation of Pennsylvania
Original application June 16, 1936, Serial No. 85,506. Divided and this application April 14, 1937, Serial No. 136,866
6 Claims. (Cl. 188—62)

1. Railway braking apparatus comprising a first and a second braking bar each comprising a brake shoe secured to a brake beam and each extending parallel to a track rail on opposite sides of the rail, a bolt extending through clearance holes in both brake beams and a clearance hole in the rail web in such manner that the braking bars are slidably supported for movement toward and away from the rail by means of said bolt, means for adjustably securing said bolt to the one brake beam, a fluid pressure motor connected with said bolt and with the other brake beam and effective when supplied with fluid pressure for biasing the braking bars toward the track rail to positions in which the brake shoes will frictionally engage the opposite side faces of car wheels traversing said rail, and means for limiting the movement of said braking bars toward the track rail.

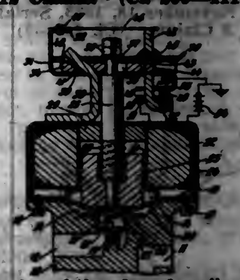


2,104,187
RAILWAY BRAKING APPARATUS
Harold C. Clausen, Wilkinsburg, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a corporation of Pennsylvania
Original application June 16, 1936, Serial No. 85,506. Divided and this application April 16, 1937, Serial No. 137,317
3 Claims. (Cl. 188—62)

1. Railway braking apparatus comprising two levers disposed on opposite sides of a track rail and slidably supported adjacent their lower ends on the rail flanges, braking bars secured to the upper ends of the levers, a bolt extending with clearance through an opening in each lever and an aligned opening in the track rail and provided at one end with a head and at the other end with a washer and a nut, a shoulder formed on said bolt between the one lever and the rail, a first

compressed coil spring surrounding said bolt between said one lever and said shoulder, a second compressed coil spring surrounding said bolt between the rail and the other lever, and a fluid pressure motor connected between the lower ends of the levers for rotating the levers about the bolt head and said washer as fulcrums to positions in which the brake shoes will frictionally engage the opposite side faces of car wheels traversing the track rail.

2,104,188
SEAL FOR BALL BEARING STRUCTURES
Frederick W. Cotterman, Dayton, Ohio, assignor to Bessie D. Apple, Dayton, Ohio
Application January 7, 1935, Serial No. 674
4 Claims. (Cl. 288—1)



1. For pressing into and sealing the space between the outside of a shaft and the inside of a bearing supporting hub which surrounds the shaft at some distance therefrom, an oil seal comprising two axially spaced apart metal plates slightly smaller in diameter than the inside of said hub and having central openings slightly larger in diameter than said shaft, a cork washer concentrically positioned between said plates having an outer diameter slightly larger than the inside of said hub, a felt washer concentrically positioned in said cork washer between said plates having an inner diameter slightly smaller than said shaft, and a spacing tube extending from one plate to the other between said cork and felt washers holding said plates spaced and in frictional contact with said cork washer, whereby adhesion of said cork to said bearing supporting hub comprises the sole means to prevent the rotation of said shaft from rotating said oil seal.

2,104,189
METHOD OF MOLDING THERMOPLASTICS
Frederick W. Cotterman, Dayton, Ohio, assignor to Bessie D. Apple, Dayton, Ohio
Application April 27, 1935, Serial No. 18,531
8 Claims. (Cl. 18—59)

1. The method of making a dynamo electric machine stator which comprises placing a winding on the stator core with winding heads extending axially beyond the ends of the core, filling the voids in the winding with a fluid insulation, holding the winding heads to a definite size and shape in a forming envelope while partly drying out said insulation, removing the forming envelope, cold-molding shells of thermoplastic compound under intense pressure, assembling the shells around the winding heads, placing the assembled structure in a close fitting baking envelope, baking the envelope and contents, then removing the baking envelope.

2,104,190
CIRCUIT BREAKER
Steve Dotter, Detroit, Mich.
Application January 2, 1935, Serial No. 57,149
12 Claims. (Cl. 200—111)

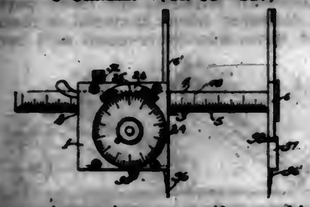
1. In a device of the class described, a solenoid including a reciprocating plunger, a guide mounted on said plunger, a slide in said guide, a cam on the housing of said solenoid adapted to cooperate with said slide and impart a sliding movement thereto during the reciprocation of said plunger, a stationary contactor on said guide, a second cam formed on said slide, a movable contactor adapted to follow said second cam into and out of contact with said stationary contactor, and means for imparting rapid break action to said contactors.

2,104,191
MIXING APPARATUS
Joe M. Flynn, Bessemer, Ala.
Application February 16, 1937, Serial No. 126,095
5 Claims. (Cl. 259—4)

1. Mixing machine comprising a frame, a plurality of hoppers arranged in side by side relation toward one end of said frame, an upwardly inclined screw conveyor for each hopper, a trough inclined upwardly in the same direction as said screw conveyors having its lower end beneath the high ends of said screw conveyors, a belt conveyor in said trough, a chute flaring upwardly toward said screw conveyors and embracing the discharge ends thereof, converging downwardly toward said trough and communicating therewith adjacent the lower portion of said belt conveyor where material is discharged from said screw conveyors upon said belt con-

veyor, and transverse mixing troughs, arranged in superposed serial relation toward the opposite end of said frame beneath the upper end of said belt conveyor in communication with the upper end of said chute for receiving material from said belt conveyor, and a final discharge for the lowermost of said mixing troughs.

2,104,192
ORTHODONTIC APPLIANCE
James W. Ford, Chicago, Ill.
Application August 19, 1935, Serial No. 36,803
9 Claims. (Cl. 32—14)



2. In an appliance of the character described, the combination with a tooth band, of an anchoring device carried by said tooth band and adapted to receive an arch-bar, a locking device carried by and rotatably mounted within said anchoring device and adapted also to receive the arch-bar, and means carried by the locking device and overlying the arch-bar at a point in its range of movement to hold the arch-bar within the anchoring and locking devices.

2,104,193
CHAIN CONNECTER
Oscar L. Gerwig, Pittsburgh, Pa.
Application January 22, 1937, Serial No. 121,775
4 Claims. (Cl. 24—236)

1. In a chain connecter of the class described, a hook-member comprising a hook at one end for detachably securing thereto a link of one end of a chain and a shank-member having at the outer end means for permanently attaching thereto a link of the other end of a chain; a pliable sleeve-member cored to two diameters, the larger core enclosing said hook and the smaller core enclosing part of said shank-member, and means to hold said sleeve-member on said hook-member.

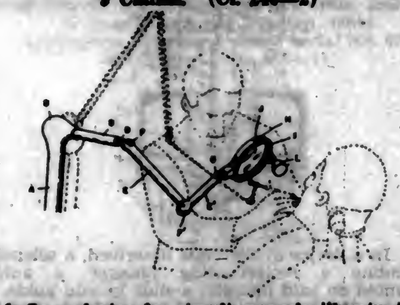
2,104,194
MICROMETER GAUGE
Paul Gleaston, Philadelphia, Pa.
Application August 20, 1934, Serial No. 740,549
9 Claims. (Cl. 33—147)

1. In a micrometer gauge, the combination of a member providing a slideway and having a caliper element connected therewith, a slide movable along said slideway and having a second caliper element connected therewith, a cam for exerting pressure against said slide to produce relative movement between the cam and slide and vary the distance between said elements, and means including a toothed member for detachably connecting said second caliper element and slide.

2,104,195
CARTON
Charles Greeling, Chicago, Ill., assignor to Parke, Davis & Company, Detroit, Mich., a corporation of Michigan
Application November 25, 1935, Serial No. 51,517
3 Claims. (Cl. 229—33)

1. A carton comprising a fashioned and scored blank foldable to form a rectangular receptacle and including a hinged cover, a segmental end flap on said cover movable therewith and concentric with the hinge, a concave segmental stationary end flap also concentric with said hinge and cooperating stops on said segmental flaps for limiting the outward swinging movement of said cover.

2,104,196
DISPOSABLE DUSTER BRUSH
Dewey E. Harmon, Dallas Center, Iowa
Application April 3, 1936, Serial No. 72,550
3 Claims. (Cl. 300—21)

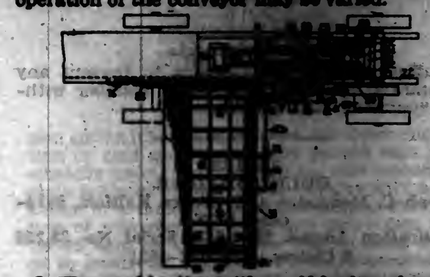


1. The method of making a disposable brush, comprising, the taking of a plurality of uncut rectangular sheets and imposing one on top of the other, the gathering and puckering of all of said sheets along one of their marginal edges, the tightly rolling of said sheets along their gathered and puckered edges to provide an uncut spiral extended brushing edge, and lastly the holding of said sheets by suitable means to prevent their unrolling.

2,104,197
SCREW PRESS
Michal Arnt Johansen, Oslo, Norway
Application February 8, 1934, Serial No. 710,218
In Norway September 12, 1933
1 Claim. (Cl. 100—48)

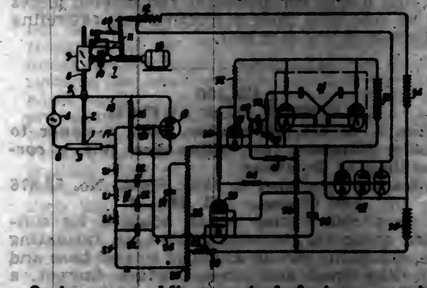
A screw press comprising an interiorly cylindrical perforate housing of uniform cross section throughout and having an inlet or feed opening through which material may be fed into the housing and an outlet or discharge opening from which the material may be discharged from said housing, a solid imperforate shaft rotatable within the housing and tapering in varying manner from a large end at the discharge opening of the press to a small end at the feed opening, and a continuous integral screw upon said shaft fitting within said cylindrical housing and having a pitch which increases in variable manner in the direction extending from said feed opening toward said discharge opening, the diameter of the shaft remaining approximately uniform at least along the portion thereof which is opposite said feed opening.

2,104,198
MAGNIFYING AND ILLUMINATING DEVICE
Cleve Jones, Detroit, Mich., assignor to Detroit Dental Manufacturing Company, Detroit, Mich., a corporation of Michigan
Application November 12, 1935, Serial No. 50,454
9 Claims. (Cl. 240—2)



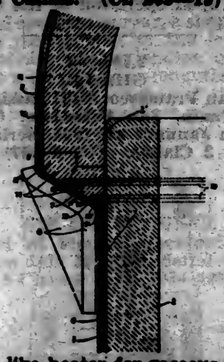
1. In a device for simultaneously illuminating an object and affording magnified vision thereof, a lens, an annular frame in which said lens is mounted, a lamp casing pivotally attached to said frame to be angularly adjustable relative thereto, an electric lamp in said casing, a second annular frame in which said lens frame is revolubly mounted, an adjustable support for said second frame, a conductor for conveying electric current through said adjustable support and second frame, and a ring and brush contact connection between said frames for supplying current from said conductor to said lamp in all positions of relative adjustment of said frames.

2,104,199
BALING PRESS
Frank D. Jones, Ottumwa, Iowa, assignor to Dain Manufacturing Company of Iowa, Ottumwa, Iowa, a corporation of Iowa
Application September 19, 1932, Serial No. 633,764
13 Claims. (Cl. 100—35)



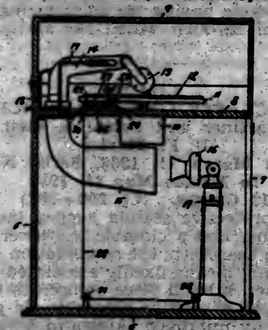
1. The combination with a baling press com-

prising a baling chamber, a feed conveyor for delivering material to be baled to the baling chamber, and a vertically reciprocating feeder head mechanism for feeding the material into said baling chamber, of a driving mechanism for said conveyor, a motion transmitting connection between said feeder head mechanism and said driving mechanism for intermittently operating said driving mechanism by power derived from the movement of said feeder head mechanism in one direction, and means whereby said motion transmitting connection may be adjusted to regulate the extent of operation of each movement of said driving mechanism to control the amount of advance of said conveyor whereby the amount of material delivered to said baling chamber at each operation of the conveyor may be varied.



5. The combination with a self feed mechanism having a frame and an endless conveyor supported in said frame, of a driving mechanism adapted to intermittently drive said conveyor, said means comprising a driving arm pivotally mounted on said frame for swinging movement in a vertical plane, a dog pivoted on the free end of said driving arm and adapted to have driving engagement with the conveyor when said arm is swung in one direction, means for swinging said arm in said one direction to advance said conveyor, means for returning said arm to its former position, and operator controlled means for locking said arm against movement.

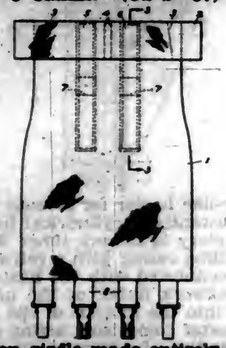
2,104,200
WELDING CONTROL APPARATUS
Carl J. Kopp, Wauwatosa, Wis., assignor to A. O. Smith Corporation, Milwaukee, Wis., a corporation of New York
Application May 25, 1936, Serial No. 81,557
5 Claims. (Cl. 219—8)



2. An arc welding control device comprising an electrically controlled device for feeding a welding electrode, an impedance, means responsive to the voltage across the welding arc for passing a unidirectional current through said impedance, a second impedance in series with the first impedance, means for passing a fluctuating current through the second impedance, and means responsive to voltage fluctuations produced by the currents passing through said impedances to actuate the electrically controlled device for feeding a welding electrode.

2,104,201
HEATER FOR GASEOUS MEDIA
Heinrich Koppers, Essen, Germany, assignor, by mesne assignments, to Koppers Company, Pittsburgh, Pa., a corporation of Delaware
Application September 3, 1936, Serial No. 99,126
In Germany September 4, 1935
3 Claims. (Cl. 263—19)

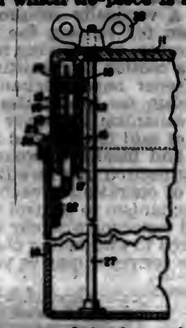
1. A tower-like heater for gaseous media comprising a substantially cylindrical heater casing with a refractory brickwork inner lining and a dome-like ceiling casing with a refractory brickwork lining connected with the heater casing so that the brickwork lining of the heater casing may project into the interior of the ceiling, said tower-like heater comprising a ring shaped base for supporting the refractory lining of the ceiling and separable therefrom for expansion independently thereof, the brickwork lining of the dome-ceiling being supported on said base independently of the brickwork lining of the heater casing, and the ring shaped base being supported on the heater casing independently of the brickwork lining of the heater casing so that the upper part of the refractory lining of the cylindrical heater that projects into the ceiling may expand and contract freely of the dome-like ceiling lining and its supporting base into the interior of the ceiling.



2,104,202
ALARM
George Kratz, Jamaica, N. Y.
Application April 1, 1937, Serial No. 134,390
5 Claims. (Cl. 179—5)

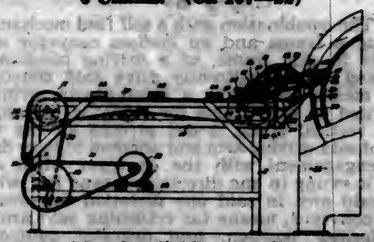
1. In combination, a phonograph including a turntable, a motor for driving the turntable, an

electric circuit including the motor and a manual switch for initially controlling operation thereof, a shunt circuit around the said switch, a turntable operated switch in the said shunt circuit for closing the shunt circuit upon operation of the turntable for subsequently controlling operation of the motor, a telephone instrument including a transmitter and receiver hook, said transmitter being in sound receiving relation with the phonograph, and means between the turntable and the receiver hook for releasing the receiver hook upon operation of the turntable.



2,104,203
GIRDLE
Sid Levy, San Francisco, Calif., assignor to John Heffman, San Francisco, Calif.
Application January 24, 1935, Serial No. 3,303
3 Claims. (Cl. 2—37)

1. A slip-on girdle made entirely of one piece of two-way stretchable material and being unbroken throughout the length and the circumference thereof and being form fitting to extend from the waist line downward over the hip portion of the body, the girdle having a straight unbroken upper edge, reinforcing means of elastic material overlying the front portion of the upper edge and arranged to leave the rear portion of the upper edge free to respond to bending movements of the body and pockets extending downwardly from the front portion of the upper edge of the girdle on the inside thereof and having staves therein extending vertically downward below the reinforcing means over the abdominal region, the said means bearing on the upper extremities of the staves for exerting gentle pressure on their lower extremities for urging the free ends thereof upon the abdominal region and the pockets having openings facing the girdle material through which the staves may be removed.

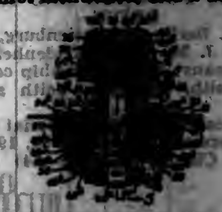


2,104,204
SECURITY LOCKING DEVICE
Juan J. Martinez and Dante S. Cusi, Mexico, D. F., Mexico
Application March 11, 1936, Serial No. 68,245
In Mexico May 21, 1935
12 Claims. (Cl. 292—307)

1. In a protective sealing agency including a cover member and a closable container member cooperating therewith, the combination of chambered housing means fixedly associated with one such member, a latch piece secured to the other member, and a readily severable tie-piece extending as an unbroken safeguard between said housing and the latch piece, the tie-piece when operatively installed to seal the cover being mounted wholly within the interior of the covered container, and which tie-piece is suspended with

a sufficient degree of tautness to prevent any substantial opening of the cover member without rupturing said tie-piece.

2,104,205
DOUGH DIVIDER
Joseph C. Menapace and George Kalfelz, Syracuse, N. Y.
Application August 28, 1935, Serial No. 38,252
6 Claims. (Cl. 107—22)



1. A machine for dividing a roll of dough into a plurality of pieces, including a suitable frame, a pair of spaced apart rollers journalled in said frame, an endless conveyor belt operable about said rolls, a plurality of spaced apart cutters mounted on the frame above the plane of the upper run of said belt, means for transferring the roll of dough through said cutters with the axis of the roll extending transversely of the conveyor belt, and means for arranging the severed pieces side by side with their respective axis extending lengthwise of the said belt.

2,104,206
ELECTRIC SNAP SWITCH
George J. Meuer, Milwaukee, Wis., assignor to Cutler-Hammer, Inc., Milwaukee, Wis., a corporation of Delaware
Application December 3, 1935, Serial No. 52,676
20 Claims. (Cl. 200—8)

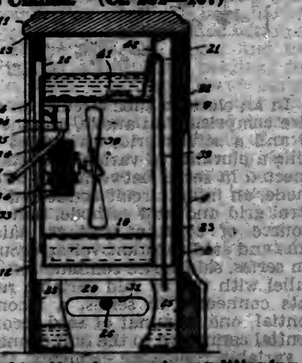
1. In a rotary snap switch adapted for concealed mounting, in combination, an insulating base, a bushing rigidly attached to said base and projecting from the upper surface thereof, a spindle rotatably supported by said bushing, a bridging contactor rotatable in opposite directions about said spindle, means for effecting rotation of said contactor in either direction with a snap action from a given position thereof, said means comprising a cam plate rotatable with said spindle, a second cam plate rotatable with said contactor, a flat insulating plate to which said contactor and said second cam plate are rigidly attached in

insulated relationship to each other, a lug associated with said second cam plate and resiliently biased upwardly toward said base, means comprising a plurality of pairs of shoulders associated with the lower surface of said base, said lug being normally positively engaged with the shoulders of any pair to restrain said contactor and said second cam plate against rotary movement pending release of said lug from said pair of shoulders as an incident to axial movement of said contactor and said second cam plate by said cam plate first mentioned, and a coiled compres-

sion spring interposed between the lower end portion of said spindle and said second cam plate, whereby upon release of said lug said second cam plate is biased by said spring to move with a snap action in a direction corresponding to the direction of movement of said cam plate first mentioned, said lug upon release thereof being adapted to positively engage the next succeeding pair of shoulders, whereby said second cam plate is restrained against additional rotary movement in either direction pending a predetermined degree of rotary movement of said cam plate first mentioned.

2,104,207
AIRCRAFT PROPELLER
Loren L. Miller, Los Angeles, Calif.
Application April 4, 1936, Serial No. 72,720
8 Claims. (Cl. 170—159)

1. A propeller having a hub of distinctly conical form larger at the rear, and blades having each a leading edge disposed to overlap the larger rear end of the hub and a trailing edge joining the larger part of the hub in such a manner as to form clear volute channels from the front end of the hub to curve around the hub under the overlapping leading edges of the blades towards the trailing edges, each of the trailing edges having a channeled portion with forwardly projecting deflecting and guiding edges forming continuing channels in communication with said volute channels and extending radially along the trailing edges of the blades to points where the linear velocity and the form of the blades are such that surplus air received from the center of the propeller along the volute and continuing channels can advantageously be made effective and beyond which points any deflecting edges would create excessive and useless drag.



2,104,208
REGISTER
Frederick C. Otterson, Waterloo, Iowa, assignor to Waterloo Register Company, Waterloo, Iowa
Application April 27, 1936, Serial No. 76,541
1 Claim. (Cl. 98—114)

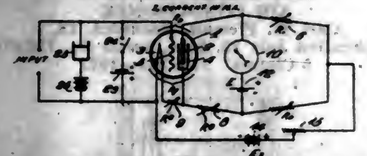
In a device of the character described, a register having an outwardly bent margin, a frame surrounding and seating therein said register and bent in its inner part with a forwardly directed open trough thereabout closed forwardly by said bent margin of the register to be a concentric dead air chamber, the frame having without said chamber a concentric forwardly closed dead air

chamber and open at the rear, a supporting structure closing the opening of the last-mentioned dead air chamber and extending outwardly beyond it, and a plaster layer mounted on the outwardly extending forward face of the supporting structure to be in edge contact with and with its forward face flush with the outer faces of said frame and register.

2,104,209
AIR CONDITIONER
Carl W. Pierson, Rockford, Ill.
Application July 23, 1934, Serial No. 736,474
5 Claims. (Cl. 261—107)

1. The combination in an air conditioning apparatus of an upper tank adapted selectively for the reception of a liquid and a cooling medium, an air channel of highly conductive material disposed through said tank, the walls thereof being cooled by said cooling medium, an absorbent wick adapted in the humidifying function of the device to be partially immersed in said tank and trained over the edge thereof and in the dehumidifying function of the device to be placed out of contact with the fluid in said tank, said wick being disposed across said air channel, means for impelling air through said channel and said wick to cause moisture to be absorbed from said screen in the humidifying function of the device and to cause the air to be cooled in the air channel and moisture therefrom to be deposited upon said wick in the dehumidifying function of the device, and a lower tank disposed below said wick to receive the drip from the wick.

2,104,210
SAFETY SYSTEM OF WATER SUPPLY FOR BIDETS AND THE LIKE
Ippolito Salvesi, New York, N. Y.
Application August 29, 1936, Serial No. 98,619
7 Claims. (Cl. 4—7)

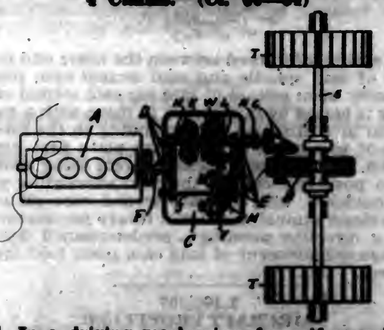


1. A bidet of the character described, adapted to be pivotally mounted on top of a water closet bowl provided with a seat, and to rest upon said

seat, said bidet having a bottom outlet for discharging its contents through the opening in said seat, directly into the bowl, said outlet re-

maining above the level of the rim of said bowl, when the bidet is moved to its operative position upon said seat.

2,104,211
BALANCED ELECTRON TUBE CIRCUITS
Walter Geller, Tucson, Ariz., assignor of one-half to William H. Woodin, Jr., Tucson, Ariz.
Application September 9, 1933, Serial No. 688,833
17 Claims. (Cl. 175—183)



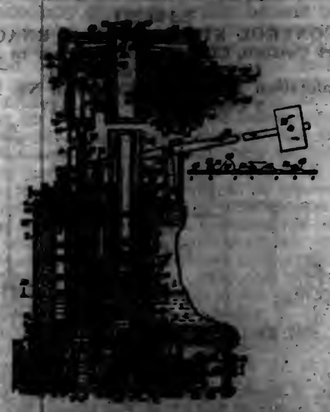
1. In an electron tube circuit, an electron tube device comprising an anode, a cathode, a control grid and a screen grid, an output circuit comprising a plurality of variable resistance elements connected in series between said anode and said cathode, an input circuit connected between said control grid and said cathode, indicating means, a source of constant voltage, said indicating means and said constant voltage source connected in series, said series combination connected in parallel with two of said variable resistance elements connected in series, a second source of potential, one terminal of said second source of potential connected to the mid connection of said two variable resistance elements, the other terminal of said second source of potential connected to said cathode, means for externally varying the potential on said control grid through said input circuit, and means including said source of constant voltage for normally maintaining a balance of potential across said indicating means.

2,104,212
HEATING STOVE
Guy M. Tayler, Houston, Tex.
Application April 13, 1936, Serial No. 74,160
2 Claims. (Cl. 299—20)

1. In a humidifier a water reservoir, an opening in the top of said reservoir, a wick holder adapted to operate through said opening, a wick in said holder, an open work frame adapted to hold said wick in place, the free end of said wick extending down into said water reservoir, rack faces on said wick holder, a rod extending lengthwise of said holder having gear teeth adapted to mesh with said rack faces, means for turning said rod to move said wick holder.

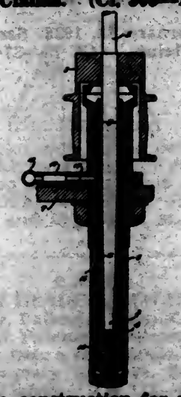
2,104,213
HYDRAULIC FORWARD AND REVERSE DRIVE
Karl Umlauff, Berlin-Charlottenburg, Germany, assignor to J. M. Voith, Heidenheim-an-the-Brenz, Germany, a copartnership composed of Walther Voith, Hermann Voith and Hanns Voith
Application December 24, 1936, Serial No. 117,633
In Germany December 21, 1935
4 Claims. (Cl. 60—54)

1. In a driving mechanism for self-propelling carriers driven by internal combustion engines, an engine shaft, a pair of intermediate shafts operatively connected to said engine shaft for rotation thereby, a propelling shaft, a hydraulic torque converter on each intermediate shaft, and each having its input side connected to its respective intermediate shaft, and means connecting the output sides of said hydraulic torque converters with said propelling shaft and arranged to rotate said propelling shaft in opposite directions relatively to said engine shaft, one of said torque converters being connected to drive said propelling shaft forwardly from said engine shaft up to a predetermined speed and having a hydraulic coupling associated therewith, said hydraulic coupling being connected to selectively take over the drive from said associated torque converter beyond said predetermined speed.



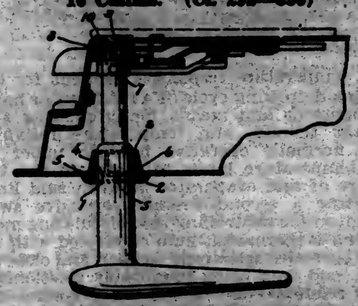
2,104,214
SHOWCASE
Raoul J. Vesino, Springfield, Mass.
Application March 26, 1936, Serial No. 69,927
3 Claims. (Cl. 312—128)

2. A combination case for store merchandise having both open display shelves and concealed storage space comprising, a supporting frame divided into a plurality of compartments, each compartment having an open front for the reception of a drawer horizontally slidable thereinto, said compartments being successively deeper from the top to the bottom of said supporting frame, and a plurality of box-like drawers slidable into said compartments each having a front wall the upper edge of which is substantially flush with the upper front of its compartment when the drawer is in its place in the compartment and the lower edge of which is back from the lower front of said compartment, said drawer having a display shelf which is substantially an extension of the bottom of said drawer



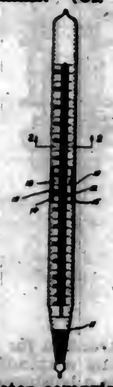
extending forwardly of the front wall of the drawer over the lower front of the compartment and slightly beyond, the combined result of all the display shelves being to provide terraced open display shelving.

2,104,215
METHOD AND APPARATUS FOR FEEDING MOLTEN GLASS
Frank L. O. Wadsworth, Pittsburgh, Pa., assignor to Ball Brothers Company, Muncie, Ind., a corporation of Indiana
Application March 21, 1934, Serial No. 716,636
24 Claims. (Cl. 49—55)



5. A feeder for plastic material such as molten glass, comprising a container for such material, a supplemental supply chamber having a flow orifice communicating therewith, a collecting chamber between said supply chamber and said container, means for establishing and cutting off communication between said collecting chamber and said container, a counterbalanced implement extending into and floating on the material in said supply chamber and means for periodically moving said implement toward the orifice to force the material contained therein through said orifice.

2,104,216
BOLSTER
George Frederic Albrecht, Saco, Maine
Application June 6, 1935, Serial No. 25,379
5 Claims. (Cl. 308—155)

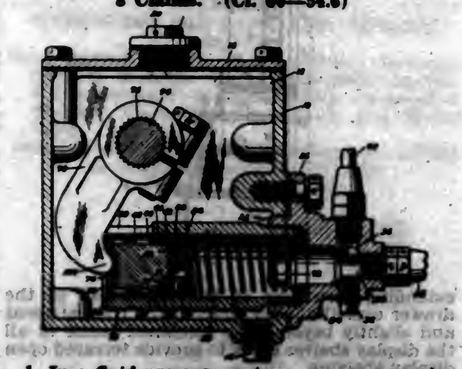


1. A spindle construction for spinning frames or the like comprising a spindle base having a bolster-receiving bore, a bolster seated within said bore in the spindle base, the upper and lower parts of the bolster constituting bearings for a rotary spindle, such upper and lower parts at least of the bolster being of a substantially rigid, oil-absorbent, metalliferous material having a porous structure including a multitude of microscopic capillary passages, and means for delivering oil to the bore in the spindle base for absorption by said bearing portions of the bolster, the bolster being closed at its lower end, the capillary passages in the material of the bolster constituting the only means of ingress for oil from the exterior to the interior of the bolster.

2,104,217
HANDLE ASSEMBLY ESCUTCHEON
Stuart C. Barnes, Detroit, Mich.
Application July 1, 1935, Serial No. 29,237
16 Claims. (Cl. 292—356)

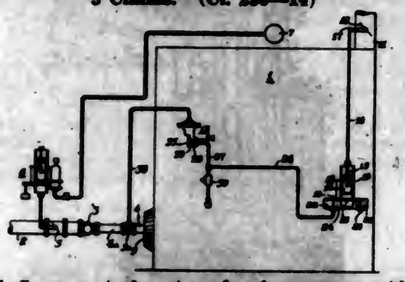
1. In a handle assembly, a handle bushing in combination with a door panel having an aperture and a fixed lock with an outside handle stem and a roll-back having an aperture therein for the said handle stem and comprising a sleeve arranged to rotatably support the handle stem in its various positions of misalignment with respect to the center of the door aperture and surrounded with resilient means capable of yieldingly floating and anchoring the bushing in the door panel and in which the yieldable portion is distortable to compensate for the misalignment.

2,104,218
THERMOMETER
Max F. Retzold, Charles Rassbach, and Charles A. Terp, Chicago, Ill., assignors to Rassbach & Retzold, Inc., Chicago, Ill., a corporation of Illinois
Application February 18, 1936, Serial No. 64,479
2 Claims. (Cl. 73—374)



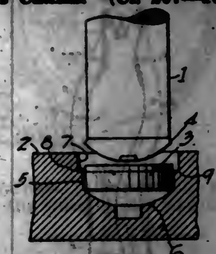
1. A thermometer comprising temperature-indicating means, a glass chamber enclosing said temperature-indicating means and a layer of tough transparent coating material over the outer surface of said glass.

2,104,219
FROST CONTROL
Abraham Biezen, Plainfield, N. J., assignor to Nowak Refrigeration and Appliance Co., Plainfield, N. J., a corporation of New Jersey
Application September 26, 1935, Serial No. 42,191
6 Claims. (Cl. 62—4)



2. A temperature responsive element for controlling a defrosting cycle of a refrigerator having an evaporator and means for circulating a refrigerant therein, and temperature responsive means normally operative between upper and lower temperature limits to maintain the temperature of said evaporator between said limits, comprising a second thermo-responsive switch mechanism for controlling said circulating means including a thermostat bulb connected with said switch operative selectively to open and close said switch, said bulb being immovably positioned in spaced relation close to the lower portion of a surface of the evaporator so as to be flooded with ice water during a defrosting cycle, said second thermo-responsive means operating to render said refrigerant circulating means ineffective when the layer of frost on the evaporator approaches and reduces the temperature of said thermostat bulb to a predetermined value, a metal plate member integral with said bulb, said plate member extending parallel to the plane of the surface of the evaporator, and a series of metal fin members projecting laterally from said plate into the surrounding air for collecting and transmitting to said plate and bulb the temperature of said air upon the cessation of flow of ice water over said plate.

2,104,220
HYDRAULIC BRAKE SYSTEM
Herbert C. Bowen, Detroit, Mich., assignor to Hydraulic Brake Company, Detroit, Mich., a corporation of California
Application February 4, 1935, Serial No. 4,790
2 Claims. (Cl. 60—54.6)



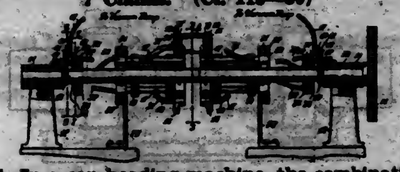
1. In a fluid pressure system, a compressor including a cylinder and a piston reciprocable therein, said piston comprising relatively movable parts, a sealing cup on the piston distortable into fluid passing condition upon relative movement of the parts in one direction, mechanical means for relatively moving said piston parts to distort said cup to permit flow of fluid therepast, and means for effecting relative movement of the parts in the opposite direction.

2,104,221
CONTROL SYSTEM FOR FURNACES
Robert Colston, Chicago, Ill., assignor to John M. Heywood, Dermont, Pa.
Application June 22, 1935, Serial No. 27,962
5 Claims. (Cl. 236—14)

1. In a control system for furnaces provided with a supply of fluid fuel and means for supplying air thereto for combustion of the fuel, a metering device including spaced orifices, one fixed and one adjustable, connected to pass one of the fluids—air or fuel—essential to combustion at a rate that varies with the rate of supply of the other of them, means responsive to the pressure between said orifices for regulating the rate of flow of the one of said elements to the furnace in accordance with the rate of flow of the other thereto, and means for varying the rate of flow through the metering device in accordance with the rate of supply of the other of said elements to change the pressure between said orifices.

2,104,223
METHOD OF EXTENDING METAL CONTAINERS
Henry Deaker, Bayonne, N. J., assignor to Aluminum Company of America, Pittsburgh, Pa., a corporation of Pennsylvania
Application September 27, 1932, Serial No. 635,007
2 Claims. (Cl. 207—10)

1. The method of producing, in a single operation, a tubular metal article having a varying wall thickness and having a constant internal diameter throughout a substantial portion of its length, which comprises placing a metal blank within a die cavity open at one end and at least substantially closed at the other end, said cavity having a portion adjacent the open end with a diameter substantially equal to the largest external diameter of said tubular article and having a portion disposed inwardly therefrom with a uniform diameter substantially equal to a smaller external diameter of said tubular article and having a shoulder between the two said portions, said blank having a maximum diameter not greater than that of the said portion of the cavity of smaller diameter and being disposed in said portion and having sufficient depth to extend outwardly past said shoulder into the portion of the cavity of larger diameter, applying pressure to the outwardly disposed surface of said blank through the open end of said cavity by means of a punch having near its pressure-applying end a diameter substantially equal to the internal diameter of said tubular article, and continuing to apply pressure by moving said punch into said die cavity to first force metal in excess of that required to fill said inner portion of the cavity toward the wall of the larger outer portion of the cavity and outwardly along said wall in a direction opposite to the direction of movement of the punch, thereby extending a thickened wall portion of said tubular article between the punch and the wall of the larger portion of the cavity, and to secondly extrude a tapered wall portion of said tubular article integral with the thickened wall portion through the narrowing orifice between the punch and the shoulder in the die cavity and to then extrude a thinner wall portion of said tubular article integral with said tapered wall portion, the movement of the extruded metal being in a direction opposite to the direction of movement of the punch with respect to the die throughout all stages of the process.



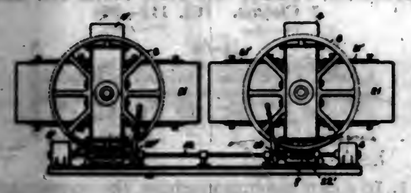
2,104,222
UTILITY CABINET
Herman Feinburg, San Francisco, Calif.
Application April 7, 1936, Serial No. 73,121
3 Claims. (Cl. 248—2)

1. A utility cabinet of box-like form, one of the lateral side walls of said cabinet being slanted and having an opening therein fitted with a substantially similarly slanted glass panel, a supply of writing paper within the cabinet adjacent said panel, an electric bulb in an electric circuit behind said panel and adjacent thereto, means formed in the wall fitted with said panel for passing paper from said supply over the outer side of said panel and means for securing said paper

against the outer side of the panel for writing thereon, a switch in said electric circuit for turning said bulb on and off, the top of said cabinet having an opening therein for obtaining access to said paper and light bulb, and a removable closure.

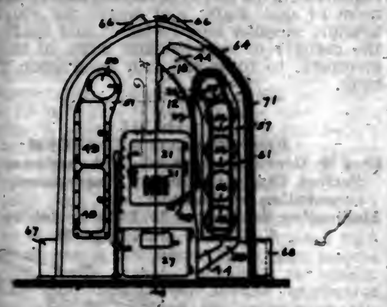
2,104,224
CAN HEADING MACHINE
Adam J. Fisher, Palisades Park, N. J., assignor to International Patents Development Company, Wilmington, Del., a corporation of Delaware
Application January 31, 1935, Serial No. 4,299
7 Claims. (Cl. 113—30)

1. In a can heading machine, the combination of a rotating shaft; can supporting means on the shaft and rotatable therewith comprising a supporting abutment member for one end portion of the can body and a heading member for supporting the other end of the can body and the head to be applied thereon, there being a vacuum duct opening through a portion of the heading member in close relation to the can head supported thereon; a valve element having a fixed position on said shaft and rotatable therewith and formed with a vacuum duct; a tubular connection between said last named duct and the vacuum duct in the heading member; a non-rotating valve element arranged against the rotating valve element and having an elongated vacuum duct with which the duct in the rotating valve element registers during a predetermined rotational movement of said shaft; and means for moving the heading member lengthwise of said shaft, during the registry of said vacuum ducts of said valve members, to force the can head upon the can body.



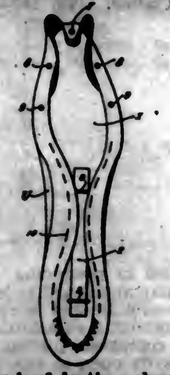
2,104,225
PISTON RING EXPANDER
Fred H. Given, Hagerstown, Ind., assignor to The Perfect Circle Company, Hagerstown, Ind., a corporation of Indiana
Application September 23, 1935, Serial No. 41,743
5 Claims. (Cl. 309—43)

5. An integral piston ring expander which includes a supporting band adapted to be mounted



in a piston ring groove behind a piston ring therein, a spring member having an intermediate portion of substantial length and of a width throughout substantially equal to the width of said band, a neck portion extending substantially the length of said intermediate portion and supporting the latter from one edge of said band, similarly-shaped spring arms carried by and extending from the opposite ends of said intermediate portion in overlying spaced relation to the outer face of said band, said spring arms being so shaped that their outer ends are of substantially the width of said band, neck and intermediate portion, and the cross-sectional area of each said arm is gradually and uniformly reduced from said intermediate portion to the outer end thereof.

2,104,226
GYRO STABILIZER
Miguel S. González, Mexico D. F., Mexico
Application January 26, 1934, Serial No. 708,460. Renewed November 16, 1937. In Mexico January 25, 1933
1 Claim. (Cl. 74—5)



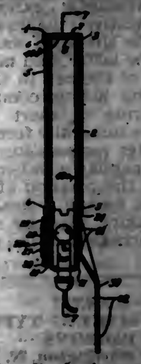
A gyro stabilizer comprising a plurality of gyroscopic units, a common shaft for precessing both of said units, a plurality of precession motors mounted on said shaft, gearing connecting each stabilizer with said shaft, and a clutch connecting each of said gears with said shaft, whereby one or more of said stabilizers may be disconnected from said shaft when desired.

2,104,227
FURNACE
Gene J. Judd, Indianapolis, Ind.
Application January 20, 1936, Serial No. 59,830
6 Claims. (Cl. 126—99)

1. In a furnace, a combustion chamber, a plurality of vertically disposed fins about the exterior of the chamber, a heat radiator positioned across the fins whereby air passageways are defined between the chamber and the radiator and adjacent fins and straps securing the radiator to the fins.

2,104,228
PROCESS OF LASTING FOOTWEAR
Jacob S. Kamberian, West Newton, Mass., assignor to Northern Machine Co., Inc., Boston, Mass., a corporation of Massachusetts
Application July 19, 1932, Serial No. 623,068
10 Claims. (Cl. 12—145)

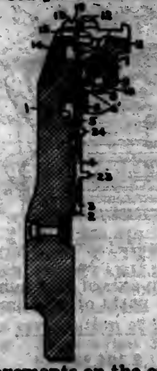
1. That method of lasting shoes which comprises as steps assembling an upper and an insole upon a last, pulling the upper over the forward part of the last, mounting the last in a bed-lasting machine having wipers capable of wiping the margin of the upper over the bottom of the insole at the toe and along the sides of the forepart substantially as far back as the shank, advancing said wipers so as to wipe said marginal material over onto the bottom of the insole, moving the wipers outwardly but without withdrawing their inner edges beyond the edge of the insole, thereby to free the edge of said marginal material while holding the upper in lasted position on the last by means of the wipers, introducing rubber latex between the freed edge portion of the marginal material and the bottom surface of the insole, again advancing the wipers to press said edge portion against the insole, lifting the wipers and introducing a heated presser device between the wipers and the marginal material, said presser device being of such dimensions as to cover substantially all of said marginal material at the toe portion and along the sides of the forepart, moving the wipers downwardly thereby to apply pressure to said presser device, and holding the parts in said position until the latex has set.



2,104,229
BOILER
Joseph F. Kelly, Arlington, Mass., assignor to Kelly Oil Sales Corporation, Arlington, Mass., a corporation of Massachusetts
Application September 23, 1935, Serial No. 42,662
12 Claims. (Cl. 122—170)

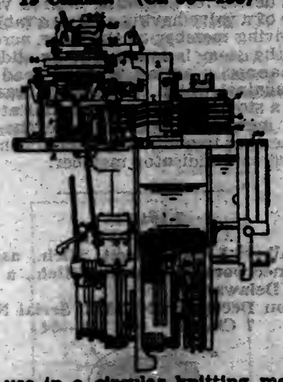
1. The combination with a boiler having a combustion chamber, a water space about said chamber and an opening from the exterior to said chamber, of a subsidiary water unit comprising upper and lower manifolds disposed laterally of the center of said chamber, each manifold being connected to said water space and disposed horizontally within said combustion chamber, and a plurality of pipes, each coiled about a vertical axis and each communicating at its upper and lower ends, respectively, with said upper and lower manifolds, the outer radius of each coil being less than the distance from its said axis to said manifolds, the terminal portions of each pipe being generally horizontal and sloping horizontally toward the inlet ends

of said manifolds, said terminal portions being attached to the sides of said manifolds.



2,104,230
LICENSE PLATE CARRIER
John Kiss, Cleveland, Ohio
Application April 16, 1937, Serial No. 137,366
3 Claims. (Cl. 40—133)

2. A device for displaying conventional opaque license plates for vehicles, comprising a generally rectangular flat casing which is open at the back for substantially its full height and breadth, means to removably support such license plate at the rear portion of the casing so that it is exposed through said back, the top and side walls of the casing relatively overhanging the plate adjacent its identifying face, a sub-casing portion below the plate having front, rear and bottom walls connected to lower portions of the rectangular casing, the sub-casing being open at the top, means for mounting a light in the sub-casing, some of the wall surfaces of the sub-casing being of light reflective character to direct rays from such light upwardly for illuminating the plate, and a bracket for supporting the device on a vehicle, said bracket being secured rigidly to a wall portion of the sub-casing.

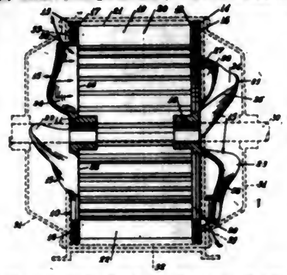


2,104,231
KNITTING MACHINE
Robert H. Lawson, Pawtucket, R. I., assignor to Hemphill Company, Central Falls, R. I., a corporation of Massachusetts
Application October 19, 1936, Serial No. 637,664
4 Claims. (Cl. 66—107)

1. A needle bed having needles, instrumentalities for cooperating with the needles in the drawing of stitches and jacks for actuating said instrumentalities, the jacks being mounted in the same slots as companion needles and supported

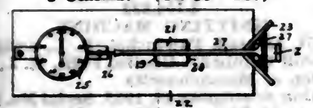
for sliding movements on the outer edges or faces of the companion needles.

2,104,232
KNITTING MACHINE
Robert H. Lawson, Pawtucket, R. I., assignor to Hemphill Company, Central Falls, R. I., a corporation of Massachusetts
Application September 14, 1933, Serial No. 689,449
19 Claims. (Cl. 66—125)



3. For use in a circular knitting machine of the independent needle type, a head consisting of a rotary cylinder within which are mounted vertically slidable guides, and a relatively stationary cam mechanism adapted to impart sliding movements to the thread guides, the said vertical movements of the thread guides assisting in effecting the wrapping of closely adjacent groups of needles with different wrap threads.

2,104,233
BLOWER
William H. Leinweber, Chicago, Ill.
Application July 29, 1936, Serial No. 93,377
7 Claims. (Cl. 230—119)

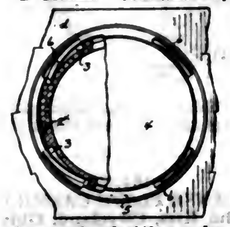


1. A blower comprising a pair of air impellers each having a hub member aligned co-axially with the other and each having blade members attached to their respective hub members and having formations extended axially in advance of said hub member, each said impeller having an annulus extended around and attached to the radial extremities of said blades, each of said

blades having an opening adjacent its said radial extremity, and a plurality of vanes arranged

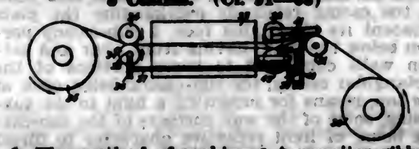
around the common axis of said hubs between the respective annular parts of said impellers.

2,104,234
VALVE STEM CLEARANCE CHECK
August C. Linne, Indianapolis, Ind.
Application May 22, 1936, Serial No. 81,180
3 Claims. (Cl. 33—147)



1. In a device for obtaining desired valve stem clearance of a valve having a stem, a table, a valve stem receiving member on the table, across which member the stem is longitudinally slidable in a guided manner, a spring, a valve head abutting member against which the head is urged by the spring to a stopped position, and indicator means having a member directed toward the stem receiving member to abut the end of a stem extending toward said indicator member.

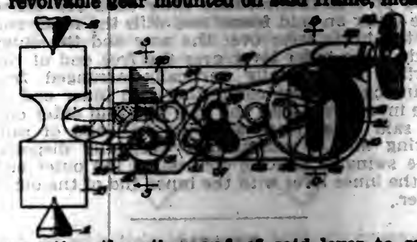
2,104,235
TIRE COVER
George Albert Lyon, Detroit, Mich., assignor to Lyon Incorporated, Detroit, Mich., a corporation of Delaware
Application December 24, 1935, Serial No. 56,066
7 Claims. (Cl. 150—54)



1. A cover formed to shield the outer side of a tire and provided with an annular reentrant groove for enhancing the appearance of the cover and for providing the cover with a rearwardly projecting annular flange adapted to be engaged by cover-retaining means, said cover having an outer peripheral means of such diameter as to engage guidingly the tire for guiding the cover into engagement with the retaining means.

2,104,236
INDICATING CLOSURE FOR BOTTLES
Irving L. Mermer, Yonkers, N. Y.
Application April 6, 1936, Serial No. 72,957
1 Claim. (Cl. 215—7)

A safety closure for bottle necks and the like, comprising a caplike member having an upper wall and a downwardly extending annular threaded wall, a relatively narrow annular skirt depending from the threaded wall and extending angularly of the latter, and means for bonding the skirt area of the cap to the neck of the bottle, said bonding means comprising a normally horizontal ring of short closely spaced prong-like members integrally formed in the skirt and adapted to enter recesses formed in a bottle neck to which the caplike member is applied and to act as pawls in the rotation of the cap, each prong-like member having a weakened wall attaching it to the skirt, whereby rotation of the closure will effect breaking of the pawls from the skirt.



2,104,237
METHOD OF MAKING TYPEWRITER RIBBONS
Samuel A. Neidich, Burlington, N. J., assignor, by mesne assignments, to Underwood Elliott Fisher Company, New York, N. Y., a corporation of Delaware
Original application February 28, 1936, Serial No. 66,239. Divided and this application June 30, 1936, Serial No. 88,124
8 Claims. (Cl. 91—68)

1. The method of making a typewriter ribbon which comprises subjecting a cellulose acetate weave at spaced regions to the action of a solvent such as acetone and subsequently passing the weave through an ink bath.

2,104,238
LATHE TOOL
Kenneth N. Nichols, Chicago, Ill.
Application April 20, 1936, Serial No. 75,276
7 Claims. (Cl. 82—12)

1. A lathe tool comprising a frame, a longitudinally movable member mounted on said frame, a transversely movable member mounted on said first named member, a cutting tool carried by said last named member, a lever pivoted to said first named member, one end of said lever being operatively connected to said second named member, a revolvable gear mounted on said frame, means

connecting the other end of said lever to said gear, and manually operable means connected to said gear for transmitting an arcuate movement of a perfect circle to said tool.

2,104,239
SPRING FASTENER
Bion C. Place, Detroit, Mich., assignor of one-half to George E. Gagnier, Detroit, Mich.
Application August 7, 1935, Serial No. 35,169
1 Claim. (Cl. 85—5)

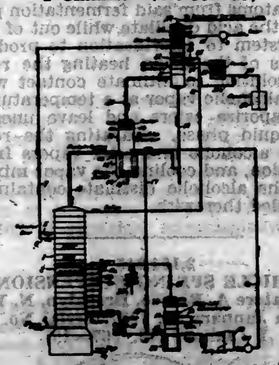
A one-piece spring stud fastener complete in itself and designed to be sprung into a perforation in a sheet metal structure, comprising a head and a shank consisting only of a pair of resilient legs disposed directly opposite each other with the ends of the legs remote from the head in close proximity, said legs having smooth edge surfaces that diverge from the end of the shank toward the head, and recesses formed in said legs from said edge surfaces of a width exceeding the thickness of said structure and providing sharply defined holding shoulders approximately normal to the length of said shank.

2,104,240
LACQUER-UNDERCOAT PROTECTIVE COATING
William L. Pringle, Chicago, Ill., assignor to United States Gypsum Company, Chicago, Ill., a corporation of Illinois
No Drawing. Application July 29, 1931, Serial No. 552,070. Renewed April 7, 1934
16 Claims. (Cl. 91—68)

15. A finishing system comprising a bare plaster or like base having adhering thereto at least one coat of a casein-containing undercoating, the last coat of said undercoating containing at least 15% casein, and said undercoating having adhering thereto at least one coat of a nitrocellulose brushing lacquer.

2,104,241
PHONOGRAPHIC TURNTABLE
Barton A. Frazier, Lansdowne, N. Y., assignor to R. A. Frazier Company, Inc., New York, N. Y., a corporation of New York
Application July 5, 1934, Serial No. 733,733
6 Claims. (Cl. 274—39)

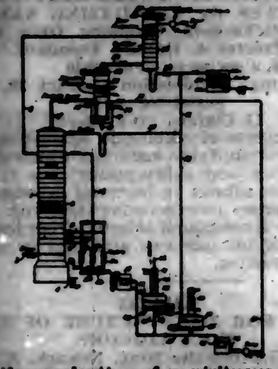
1. The combination with a phonograph turntable comprising a flexible platen and means for effecting a fixed adjustment of the platen fixing the margin of the platen in a different plane from the central portion thereof, of a phonograph disk,



and pressing means cooperative with the platen for flexing said disk to effect a planar adjustment of said disk.

2,104,242
COMPOSITION OF FATTY MATTER AND PROCESS OF STABILIZING SAME
Albert S. Richardson, Wyoming, Ohio, assignor to The Procter & Gamble Company, Cincinnati, Ohio, a corporation of Ohio
No Drawing. Application January 30, 1935, Serial No. 4,124
15 Claims. (Cl. 87—9)

1. The process of stabilizing against rancidity due to oxidation, fatty materials which are substantially dry and substantially free from organic matter subject to bacterial decomposition, which comprises incorporating therewith a small quantity of a compound selected from the group consisting of phosphorous acid and its acid reacting derivatives.



2,104,243
PROCESS FOR MANUFACTURE OF SPIRITUOUS LIQUORS
Frederick Garthewaite Bing, Newark, N. J., assignor to Semet-Solvay Engineering Corporation, New York, N. Y., a corporation of New York
Application May 26, 1934, Serial No. 727,616
4 Claims. (Cl. 99—48)

1. In the manufacture of spirituous liquors by the distillation of a beer containing fatty acids in a continuous column still wherein the beer flows downwardly in the column countercurrent to a rising current of aqueous vapors and is distilled to a residual slop and alcoholic distillate vapors are produced containing around 50% alcohol, the improvement which comprises removing a part of the distillate in vapor form from the column still at a point where acids are near their maximum vapor concentration and intermediate the introduction of the beer and withdrawal of slop, subjecting said distillate to a fractional distillation treatment so as to obtain a liquid acid concentrate containing aliphatic acids having more than four and less than

eleven carbon atoms in the acid molecule and freed from fusel oil and the major part of the water contained in the distillate, and refluxing said alcoholic distillate in intimate association with said acid concentrate.

2,104,244
PROCESS FOR MANUFACTURE OF SPIRITUOUS LIQUORS
Frederick Garthewaite Ring, Newark, N. J., assignor to Semet-Solvay Engineering Corporation, New York, N. Y., a corporation of New York
Application August 1, 1935, Serial No. 34,161
7 Claims. (Cl. 99—48)

1. In the production of a spirituous liquor in a distillation system wherein a stream of alcoholic vapor is distilled from a fermentation product, the improvement which comprises separately distilling off aliphatic acids containing between 2 and 11 carbon atoms from said fermentation product, subjecting the acid distillate while out of the distillation system to esterification to produce the ethyl esters of the acids, heating the resultant esterified solution in intimate contact with the stream of alcoholic vapor at a temperature sufficient to vaporize esters and leave unesterified acids in liquid phase, separating the resultant mixture of alcoholic and ester vapors from the liquid solution, and cooling the vapor mixture to condense the alcoholic distillate containing the esters blended therewith.

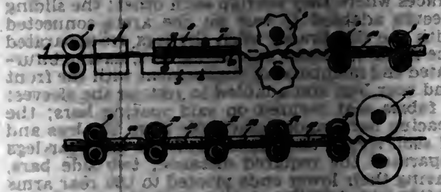
2,104,245
VEHICLE SPRING SUSPENSION
Salvatore A. Romeo, Brooklyn, N. Y.
Application January 19, 1937, Serial No. 121,249
1 Claim. (Cl. 267—19)

A vehicle spring suspension, comprising in combination with vehicle frame, axle and supporting spring, said spring being connected intermediate its ends with said axle and connected at one end with said frame and means for connecting the other free end of said spring with the frame, including two substantially straight and generally parallel levers in end-to-end relation pivoted intermediate their ends one above the other on said frame and with the inner end of the inner lever over the axle and the outer end of the outer lever over the free end of the spring, substantially vertically arranged free swinging shackles connecting said inner end of the inner lever with the axle and said outer end of said outer lever with the free end of said spring and a substantially vertically disposed free swinging shackle connecting the outer end of the inner lever with the inner end of the outer lever.

2,104,246
CENTRIFUGAL VACUUM PUMP
Morris A. Schwartz, Los Angeles, Calif.
Application June 22, 1935, Serial No. 27,990
13 Claims. (Cl. 103—83)

1. In a device as described, a rotary structure having an open front channel and a face for flow of a first fluid under the influence of a centrifugal force over the channel, the channel having an elongated exposed opening to the first fluid, a conduit inserted in the channel for flow of a second fluid into the channel under the influence of a vacuum created in the channel, the second fluid being discharged from the channel in part by centrifugal force developed by the rotation of the structure and in part by the flow of the first fluid.

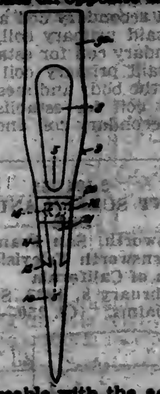
2,104,247
LOADING MACHINE
William W. Sloane, Chicago, Ill., assignor to Goodman Manufacturing Company, Chicago, Ill., a corporation of Illinois
Application May 8, 1936, Serial No. 78,669
10 Claims. (Cl. 198—8)



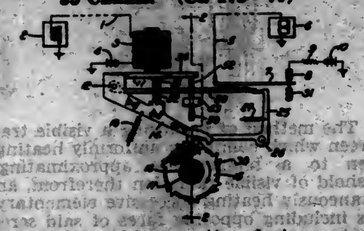
1. In a loading machine, an inclined conveyer, an apron disposed above and parallel to said conveyer and extending along each side of said conveyer, and gathering mechanism on said apron and movable along opposite sides of said conveyer for gathering and moving material onto said conveyer, said apron having portions extending along opposite sides of said conveyer and having a forward end extending across the front of said conveyer and downwardly and forwardly therefrom to the ground at a steeper angle than the angle of the portion of said apron which extends along said conveyer, and said gathering mechanism being guided to travel in planes parallel to the upper plane surfaces of said apron.

2,104,248
ORNAMENT
Joseph W. Hauck, [illegible], assignor to General Ribbon Corporation, New York, N. Y., a corporation of [illegible]
Application February 10, 1936, Serial No. 63,157
2 Claims. (Cl. 41—10)

2. As an article of manufacture, an ornament comprising a strip of ribbon formed into a bow or rosette having between its ends a normally irregular and uneven intermediate surface portion and other portions which are flat and provided with means on the outer side thereof covering said irregular surface portion and not substantially larger than the latter and forming a substantially flat and smooth surface to facilitate the adhesive attachment of said intermediate surface portion of the bow directly to an article to be ornamented thereby, said means comprising a flat piece of material adhesively attached to the "wrong" side of the bow.



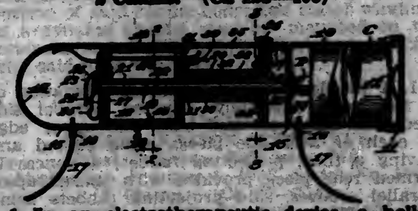
2,104,249
MANUFACTURE OF EXPANDED METAL
Michael G. Vass, Maywood, Ill., assignor to United States Gypsum Company, Chicago, Ill., a corporation of Illinois
Application February 9, 1935, Serial No. 5,624
33 Claims. (Cl. 164—0.5)



16. A method of expanding sheet material comprising slitting and corrugating the material to provide it with a plurality of series of offset portions having cut edges formed by the slitting operation, some of said series being spaced a substantial distance from the side edges of the sheet, and causing lateral pressure to be exerted on the cut edges of said plurality of series to cause them to travel in diverging directions to expand the slitted material.

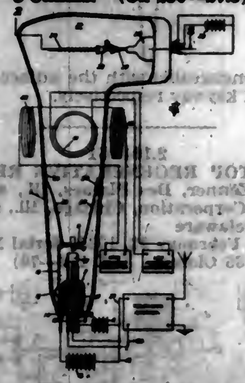
2,104,250
AX
John M. Williams, Marion, Mont.
Application August 14, 1936, Serial No. 96,035
3 Claims. (Cl. 145—2)

2. In a structure of the class described, an ax head bifurcated at one end to form an open-ended channel constituting a keyway, a renewable bit fashioned at one end with a rib constituting a key, and said key being removably fitted in said keyway, the depth of said channel being such as to space the bottom of the channel from the adjacent parallel inner surface of said rib to define a bolt accommodation space, a bolt located in said space between the bottom of the channel and the adjacent surface of said rib, and retaining cleats on opposite ends of said bolt releasably engageable with the adjacent ends of the key and keyway respectively.



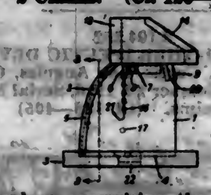
2,104,251
START-STOP REGENERATIVE REPEATER
Walter J. Zenner, Des Plaines, Ill., assignor to Teletype Corporation, Chicago, Ill., a corporation of Delaware
Application February 23, 1934, Serial No. 712,461
25 Claims. (Cl. 178—70)

7. In a telegraphic repeating device, an armature controlled by successive received signals, a contact member elastically articulated to said armature for electrically retransmitting received signals therefrom, and cam controlled mechanism rendering said contact member responsive to said armature at successive instants of beginning of a plurality of electrical retransmission time intervals.



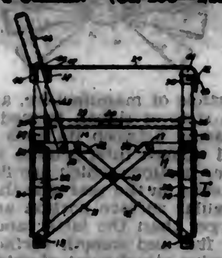
2,104,252
ELECTRO-THERAPEUTIC DEVICE
Thomas J. Curtis, Los Angeles, Calif.
Application September 23, 1936, Serial No. 101,052
2 Claims. (Cl. 128—405)

1. In an electrotherapeutic device, a hollow body comprising a pair of spaced metal shells, a battery cell removably positioned in one of said shells, a metal rod axially disposed within said body, one end of which rod contacts with the post



of said battery, a primary coil carried by said rod, a vibrator arranged between said primary coil and said rod, a secondary coil arranged to move lengthwise of said primary coil, means movable with said secondary coil for establishing connection between said primary coil and one of the metal shells of the body and means movable with said secondary coil for establishing connection between said secondary coil and the other shell of the body.

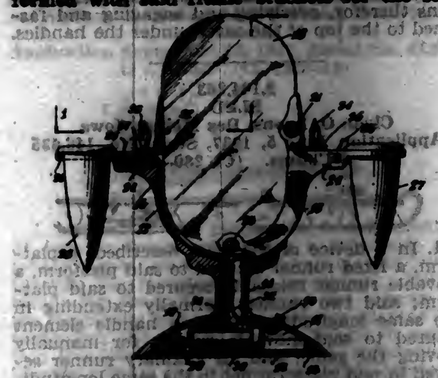
2,104,253
LUMINESCENT SCREEN AND METHOD OF USE
Philo T. Farnsworth, San Francisco, Calif., assignor to Farnsworth Television Incorporated, a corporation of California
Application February 8, 1933, Serial No. 655,784
8 Claims. (Cl. 250—27.5)



1. The method of producing a visible trace on a screen which comprises uniformly heating said screen to a temperature approximating the threshold of visible radiation therefrom, and simultaneously heating successive elementary volumes including opposing faces of said screen to incandescence.

2,104,254
FIREPLACE
Esther Worth Fogarty, Clinton Gordon Fogarty, and Clifford Worth Fogarty, Hialeah, Fla.
Application October 17, 1936, Serial No. 106,170
2 Claims. (Cl. 126—120)

1. A fireplace comprising the combination of a flat base, oppositely disposed parallel side pieces mounted on said base, the upper edge of each of said side pieces being curved and having a thin, projecting rabbet; a concavely formed rear piece provided with spaced apart parallel grooves, said projecting rabbets being seated with cement and being seated in said respective grooves; a support spaced from said rear piece and having its ends secured to the upper portions of said side pieces and a hollow hood having a flat base engaging the upper ends of said side pieces and said rear piece, the rear wall of said hood being vertical and the side and front walls thereof converging upwardly into a flat top portion adapted to support a chimney.

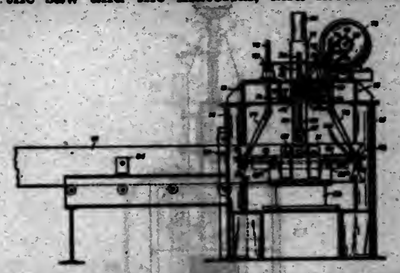


2,104,255
COLLAPSIBLE ARMCHAIR
Leto J. Gattuccio, North Bergen, N. J.
Application June 19, 1937, Serial No. 149,193
4 Claims. (Cl. 155—142)

4. A collapsible chair of the class described comprising four leg members; crossed braces secured on opposite sides of the chair, the lower ends of said braces pivoted near the lower ends of the legs and the upper ends to arms also pivoted to the legs; the crossed braces pivoted at the points where they overlap each other; detents formed on the arms for engagement with the braces when the front and rear legs are separated the desired distance; crossed braces secured to the front and rear legs with their lower ends pivoted near the lower ends of the legs and their upper ends pivoted to sleeves slidingly mounted on the legs; pivots likewise inserted in these braces where they overlap each other; the sliding sleeves adapted to rest on the arms connected with the side braces when the legs are separated the required distance; spacing bars, having bifurcated end members for engagement with the front and rear legs and adapted to rest on the sleeves; a fabric seat secured on said spacing bars; the spacing bars made detachable from the legs and of such length as to hold the front and rear legs separated the required distance; two side bars, having their lower ends pivoted to the rear arms on the sides of the chair and their upper ends secured to a fabric back-rest, adapted to be held in an inclined position in slotted fittings secured on the upper ends of the rear legs; two straps, attached to said slotted fittings and clamped to fittings secured on top of the front legs, for forming a pair of arm rests; and the fabric seat and back rest so proportioned to the size of the chair that they will act as a cover for all the parts of the chair when the seat and spacing bars are removed, the back-rest side bars folded down, and the other parts of the chair collapsed.

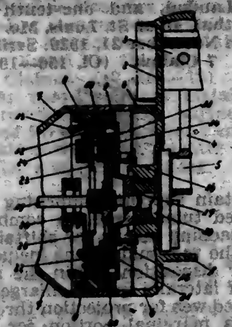
2,104,256
PICTURE STAND
Joseph Hamsbeck, New York, N. Y.
Application December 9, 1936, Serial No. 53,564
1 Claim. (Cl. 40—152.1)

In a combined picture stand and flower holder, a base, a frame, a neck connecting the frame with the base, means for holding a picture within the frame, laterally extending brackets formed with said frame, and holders for flowers turnably attached by means of pivot bolts to said brackets at one end, and rings formed with said holders at their other outer ends for the suspension of flower vases, said holders adapted to be turned about their pivot bolts to flank the picture in approximately the front channel, ring-sockets formed with said frame brackets for the support of lamps of a size sufficient to illuminate the flowers in said vases, and means for connecting said lamps to a source of electricity.



2,104,257
VALVE GAP
Ralph M. Heinds, Palo Alto, Calif., assignor, by mesne assignments, to Bendix Aviation Corporation, South Bend, Ind., a corporation of Delaware
Application February 25, 1935, Serial No. 6,640
2 Claims. (Cl. 123—171)

1. In combination with a cylinder and piston, said cylinder having an aperture therein, parallel cooling fins extending from the top of said cylinder, said fins being cut away above said aperture to form a recess, a closure cap having a basal portion cooperating with said cylinder to close said aperture, a column extending into said recess from the center of said basal portion, spaced fins extending across said recess laterally from said column, and a plurality of spaced uprights attached to the basal portion near the edge thereof and contacting the edge of each fin.

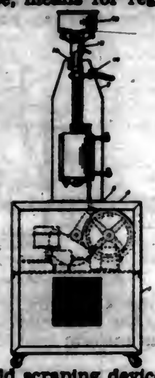


2,104,258
SAWING APPARATUS
Percy E. Hunter, Pittsburgh, and Edward Nightingale, Etna, Pa., [illegible] Cleveland and Fidelity Trust Company, administrators of said Percy E. Hunter, deceased, assignors, by direct and mesne assignments, to Hunter Steel Company, Pittsburgh, Pa., a corporation of Pennsylvania
Application April 2, 1936, Serial No. 72,324
12 Claims. (Cl. 90—62)

1. Sawing apparatus comprising a saw blade and means for imparting sawing movement thereto, means for imparting relative feeding movement to the saw and the material to be cut, a device for imparting relative skewing movement to the saw and the material, and means con-

trolled through the operation of said skewing device, for varying the said relative rate of movement, to maintain uniform rate of cutting.

2,104,259
GENERATOR AND/OR STARTING MOTOR FOR MOTOR VEHICLES
Josef Kalex, Stuttgart, Germany
Application April 18, 1936, Serial No. 74,618
In Germany December 21, 1934
2 Claims. (Cl. 290—1)



1. In combination with an engine having a main body portion and an integral annular member extending therefrom, an engine shaft coaxial with said annular extending portion, a cup-shaped flywheel connected for rotation with said shaft, rotor windings of a dynamo electric machine mounted on the periphery of said cup-shaped flywheel, clutch elements mounted on the web of said cup-shaped flywheel, a driven shaft having clutch elements mounted thereon for cooperation with said first clutch elements, an annular ring having the same outer radius of and interengaging with the extending annular portion of said engine body, and stator windings of a dynamo electric machine mounted on the inner surface of said annular ring for cooperation with said rotor windings.

2,104,260
REFRIGERATION APPARATUS
Jabez P. Kemp, Baltimore, Md.
Application January 5, 1935, Serial No. 506
7 Claims. (Cl. 62—114)

1. In a refrigeration apparatus provided with a spraying device, means for operating the spraying device to spray over a surface adjusted to the operation thereof, a surface to be sprayed, means for scraping said surface of the deposit thereon,

means for regulating the temperature of the spraying device, means for regulating the tem-

perature of said scraping device, and means for regulating the temperature of said surface.

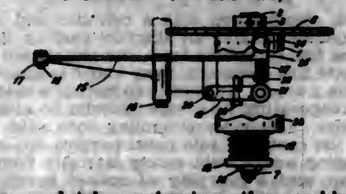
2,104,261
CURTAIN SUPPORT
Charles Landau, Cleveland, Ohio, assignor of one-tenth to Ralph Kalish, eight-tenths to Morris Landau, and one-tenth to Alex M. Frankenthal, all of St. Louis, Mo.
Application November 21, 1936, Serial No. 112,030
7 Claims. (Cl. 156—19)

1. A curtain support comprising a longitudinally slotted tubular rod, in combination with curtain attaching means for shiftable co-operation with the rod, said means including a body-portion for disposition within the rod having a plurality of laterally spaced enlargements thereon, a reduced web for projection through the rod-slot, and a marginal portion for presentation outwardly of the rod for curtain attachment.

2,104,262
BASKET COVER
Carl G. Leigh, Chicago, Ill., assignor to Leigh Banana Case Company, Chicago, Ill., a corporation of Delaware
Application December 22, 1934, Serial No. 758,799
19 Claims. (Cl. 217—124)

1. In a basket top cover, a handle strip therefor adapted to engage the handles of the basket, said strip comprising superposed flat relatively long and short sections, fastened together, with the short sections extending a distance over the web of said cover and spaced apart at their inner ends at the middle of the cover, providing a relatively flexible middle portion for the handle strip, and relatively stiff multi-ply projecting end portions therefor, overlying and engaging and fastened to the top of the cover, under the handles.

2,104,263
SLED
Clyde O. Lyons, Des Moines, Iowa
Application June 5, 1937, Serial No. 146,635
6 Claims. (Cl. 280—16)

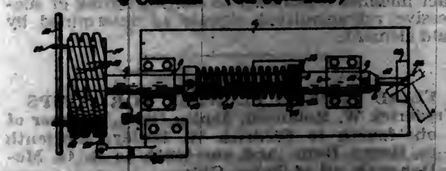


1. In a device of the class described, a platform, a fixed runner secured to said platform, a movable runner rotatably secured to said platform; said two runners normally extending in the same longitudinal plane, a handle element secured to said movable runner for manually moving the same, and an auxiliary runner secured to said platform not in the same longitudinal plane of said first mentioned runners and terminating in a plane above the bottom plane of said first mentioned runners.

2,104,264
PAINT COMPOSITION
Paul La Frese Magill and Charles Dangelmajer, Niagara Falls, N. Y., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware
No Drawing. Application November 8, 1934, Serial No. 752,116
5 Claims. (Cl. 134—54)

1. A water paint containing water, pigment, casein and 10 to 60% by weight of formamide.

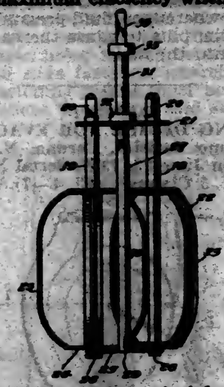
2,104,265
CLUTCH MECHANISM
George P. Maradeu, San Jose, Calif., assignor to Food Machinery Corporation, San Jose, Calif., a corporation of Delaware
Application December 24, 1934, Serial No. 759,073
7 Claims. (Cl. 192—24)



1. In a clutch mechanism, the combination of a pair of rotary inter-engageable driving and driven clutch members, a clutch spring normally holding said clutch members in driving engagement, a cam carried by one of said clutch members, a clutch lever, a cam follower mounted on said clutch lever for movement thereby into and out of the path of said cam and co-operable with said cam to separate and disengage said clutch members, and a spring carried by said clutch lever and associated with said cam follower to exert a thrust against the latter in a direction longitudinally of the clutch axis, said spring being compressible by engagement of said cam and follower and operable to expand in opposition to said clutch spring upon disengagement of said clutch members whereby to effect a positive clearance therebetween.

2,104,266
MEANS FOR THE PRODUCTION AND INHALATION OF TOBACCO FUMES
William J. McCormick, Toronto, Ontario, Canada
Application September 23, 1935, Serial No. 41,656
12 Claims. (Cl. 131—18)

1. Means for the production and inhalation of tobacco fumes comprising a receptacle for tobacco; an air conduit whereby air may be drawn through the receptacle for inhalation; electric means for conductively heating the tobacco in the receptacle; and automatic means adapted for controlling the electric heating means to maintain the tobacco at a temperature sufficient to liberate volatile constituents but below the temperature for initiating combustion.



2,104,267
FIXTURE FOR MILLING MACHINES
William Motta, Detroit, Mich.
Application June 12, 1936, Serial No. 85,163
4 Claims. (Cl. 90—13.9)

1. A milling machine fixture comprising a base plate, bearings on said base plate, a spindle supported in said bearings for rotary and lengthwise movement, means for causing lengthwise movement of said spindle, means for causing rotary movement of said spindle incident to lengthwise movement thereof, means on one end of said spindle for supporting work, a pair of spring abutments on said spindle, one of said abutments being fixed and the other being movable lengthwise of the spindle, a spring between said abutments, and stationary means on said base adapted to be engaged by the movable abutment upon lengthwise movement of said spindle to cause compression of said spring.

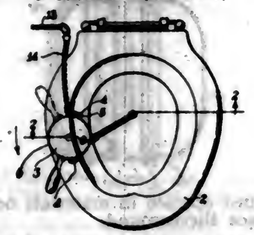
2,104,268
FOOD MIXER
Emanuel Nielsen, Racine, Wis., assignor to Scovill Manufacturing Company, Waterbury, Conn., a corporation of Connecticut
Application April 8, 1937, Serial No. 136,021
9 Claims. (Cl. 259—108)

1. An agitator assembly for a food mixer, comprising a pair of rotatable beater shafts, beater elements on said shafts, a cross piece connecting the shafts in spaced relation adjacent their upper ends, a guard member comprising a relatively rigid rod connected to said cross piece and having an intermediate portion of its length bowed outwardly to extend substantially parallel with the sides of the beater elements, and the lower end of said guard rod being turned inwardly in substantially the plane of the lower ends of said beater elements and having a flattened forked end portion connecting the lower ends of said shafts in spaced relation, whereby to provide maximum efficiency when said beater

elements must operate in materials occupying a shallow space therearound.

2,104,269
METAL PLATING
Floyd F. Oplinger, Niagara Falls, N. Y., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware
No Drawing. Application April 17, 1934, Serial No. 721,009
6 Claims. (Cl. 204—12)

1. A process for decorating metal surfaces comprising providing a metal surface with a coating of fused tin and thereafter electroplating said fused coating with a sufficiently thin layer of tin to develop a spangled coating.

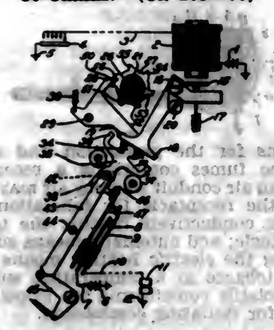


2,104,270
CEMENTING EQUIPMENT FOR WELLS
William D. Owsley, Duncan, Okla., assignor to Halliburton Oil Well Cementing Company, Duncan, Okla.
Application May 24, 1937, Serial No. 144,399
7 Claims. (Cl. 166—1)

1. Apparatus for use in the cementing of oil wells or the like which includes a cementing head adapted to be connected to the casing of the well, a plug supported in the head, said plug having a passageway therein, means for conveying cement slurry under pressure into the head above the point where the plug is supported therein to cause the same to flow through the passageway in said plug, a valve body adapted to seat upon

the plug to close the passageway and control means for causing the seating of the valve body on said plug whereupon fluid pressure may be exerted upon the plug to cause the same to follow the slurry into the well.

2,104,271
SPRAYING DEVICE FOR EVACUATION
Primo Parisini, Corona, N. Y.
Application June 23, 1937, Serial No. 149,867
5 Claims. (Cl. 4—7)

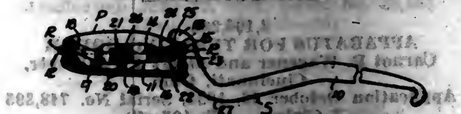


1. A spraying device for evacuation in connection with a toilet bowl having the combination of means for feeding fluid to the device, a valve mechanism for said fluid, an extensible tube for conveying said fluid being actuable from a position clear of the middle of the bowl to a location at the middle of the bowl, said extensible tube being connected to said valve mechanism so as to be actuable by the mechanism, said mechanism when operated to open the valve actuating and projecting said tube and conveying said fluid, and said mechanism when operated to close the valve actuating and withdrawing said tube.

2,104,272
WASHING MACHINE FOR TUMBLERS AND SIMILAR TABLEWARE
Arthur F. Partridge, St. Paul, Minn.
Application November 12, 1934, Serial No. 752,600
4 Claims. (Cl. 15—76)

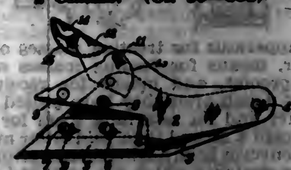
1. A machine of the class described having in combination, a support, a motor movably attached to said support, means for securing said support on a container for cleaning fluid, a shaft operatively connected to said motor, a cleaning member mounted on said shaft and formed to fit within receptacles to be cleansed, said cleaning member being arranged to be submerged in cleaning fluid in said container and raised above the surface thereof by appropriate movement of said motor a switch in circuit with said motor for controlling the same and a member movable with said motor and positioned to engage said switch to start and stop said motor respectively upon movement of said cleaning member to and from submerged position.

2,104,273
START-STOP REGENERATIVE REPEATER
Louis M. Potts, Evanston, Ill., assignor to Teletype Corporation, Chicago, Ill., a corporation of Delaware
Application February 16, 1934, Serial No. 711,479
20 Claims. (Cl. 178—70)



2. In a telegraphic repeating device, a contact member for retransmitting received signals, an element controlled by successive received signals, a locking member restraining said contact member in its set position, and a timing cam cooperating with said element and operating said contact member repeatedly to control timing of successive retransmitted signals as determined by said element.

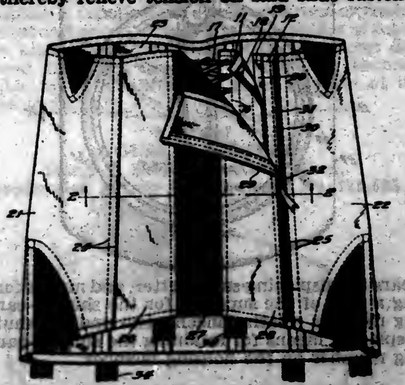
2,104,274
FLUID PACKED PLUNGER FOR PUMPS
Frederick W. Robinson, Jenks, Okla., assignor of one-fourth to Fredrick W. Bailey, one-tenth to Henry Heme, and one-tenth to R. G. McDonough, all of Tulsa, Okla.
Application January 7, 1935, Serial No. 720
4 Claims. (Cl. 309—23)



1. In a fluid pump plunger, a head comprising spaced end plates rigidly mounted on a connecting rod extending axially therethrough, each of said plates being provided on its inner face with a socket, the sockets being disposed in alignment, a hollow tubular spacer sleeve disposed between said plates and seated at each end in said socket, said plates being provided with ports extending from their outer faces in axial communication with said spacer sleeve, a valve member slidably mounted within said sleeve for reciprocation therein, the length of said valve member being appreciably less than the length of said sleeve, the walls of said sleeve being formed to provide ports extending therethrough adjacent each end thereof, and an expandible ring disposed between said end plates in concentric relation with said connecting rod and being disposed outwardly of said spacer sleeve, and a fibrous packing material supported on and carried by said ring between said plates.

2,104,275
PESSARY APPLICATOR
Lawrence Schleicher, Los Angeles, Calif.
Application May 11, 1937, Serial No. 141,940
10 Claims. (Cl. 128—127)

1. An applicator of the class described comprising a support insertable into the vagina; a cervix-actuated member movably mounted on the support to occupy holding and releasing positions; means on the support co-actable with one end of said member to retain a pessary on the support; means for urging said member to holding position; and means on the support disposed to co-act with said end of the member in preventing disengagement of the pessary therefrom so long as the member occupies holding position.



2,104,276
FURRIER'S KNIFE
Edward A. Schmitt, Ridgewood, N. Y.
Application July 7, 1937, Serial No. 152,243
2 Claims. (Cl. 30—331)

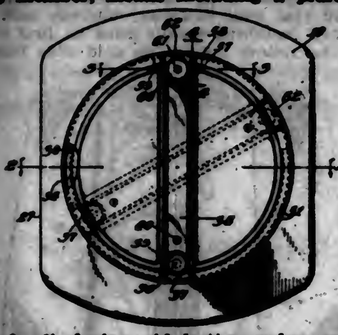
1. A furrier's knife having the combination with a pair of separable plates adapted to hold a cutting blade between them of means for locking said plates to each other for retention of the blade including an arm hinged to one of said plates having a wing disposed between and in frictional contact with the inner surfaces of said plates, said arm having a clamp for engaging the exterior side of one of said plates and a clamp for engaging the exterior side of the other of said plates, and said plates when operatively held by the user exerting pressure upon the opposite surfaces of said wing.

2,104,277
CORSET
Charles H. Schopbach and Lillian Babcock, Aurora, Ill., assignors to International Corset Company, Aurora, Ill., a corporation of Illinois
Application December 31, 1936, Serial No. 118,453
2 Claims. (Cl. 2—37)

1. A corset having a body of substantially non-stretchable material including a center front section comprising two panels provided with eyeletted strips at their proximate edges, lacings for adjustably connecting said panels together, a third panel, fastening means on one of the first mentioned panels and on said third panel for detachably connecting the proximate edges of said panels together, an apron comprising two non-elastic and an intermediate transversely elastic panel stitched together at their longitudinal edges, the free longitudinal edge of one of said non-elastic panels of the apron being permanently secured to the outer surface of the corset body near one side of said center front section, and the free longitudinal edge of the other non-elastic panel of the apron being provided with fasteners of the slide fastener type, a narrow strip having slide fasteners stitched to the corset body near the other side of said center front section, said first mentioned fastening means being located between said lacings and said slide fastener, whereby said first mentioned fastening means must be first closed to thereby relieve tension on said slide fastener

during operation thereof, and said fastener devices on the apron and on the narrow strip being adapted for engagement with each other for drawing the apron taut in a position overlying the center front section of the corset body and concealing said lacing and the fastening means connecting the panels which constitute said center front.

2,104,278
BREAD SLICER GUIDE
Michael C. Schultz, Green Bay, Wis.
Application September 12, 1936, Serial No. 100,455
1 Claim. (Cl. 146—150)



In a device of the character described, parallel bed plate members provided with transverse bores, spiral tension springs extending through said bores and secured to said bed plate members adjacent their outer margins, a guide rod fitted in one of the spiral springs whereby to maintain the bed plate members in parallel relationship, loaf engaging uprights secured to said bed plate members and provided with knife guiding surfaces, said bed plate members being separable in parallelism to provide space between said uprights for the reception of a loaf to be sliced.

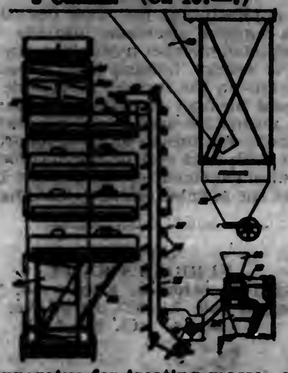
2,104,279
AIR DISTRIBUTING MEANS
Philmore F. Sperry, Chicago, Ill., assignor, by mesne assignments, to Excel Auto Radiator Company, Chicago, Ill., a corporation of Delaware
Application June 10, 1935, Serial No. 25,961
1 Claim. (Cl. 98—101)

Apparatus for directing the flow of air comprising a housing member having an aperture therein, a shutter-carrying member rotatably journalled on said housing member, a gear segment carried by one of said members, a gear

carried by the other of said members and meshing with said gear segment, means for rotating said gear to rotate said shutter-carrying member, a shutter movably mounted on said shutter-carrying member, means including a plurality of

gears for displacing said shutter, and means forming a part of the supports for the shutter-carrying member rotating mechanism and the shutter displacing means for retaining the shutter-carrying member on the housing member.

2,104,280
SIGN
Henry C. Spratley and Arthur L. Spratley, Providence, R. I.
Application November 21, 1933, Serial No. 699,015
Renewed July 12, 1935
1 Claim. (Cl. 40—125)

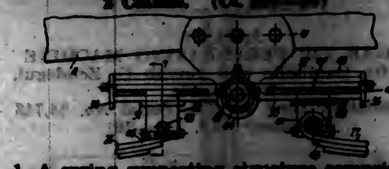


A sign comprising a transparent front plate, a coating on a part of the plate leaving other parts uncoated, whereby to provide characters of the desired shape, a translucent plate back of said front plate, a strip of tape along the marginal edges of said plates and located between them and providing an air space between the plates, an additional piece of tape bridging the tape between the plates and overlapping on the front and back surfaces of both of said plates and a frame about the edges of the plate whereby the plates are held together.

2,104,281
SPRINKLER
Walter Van B. Thompson, Los Angeles, Calif., assignor to Thompson Manufacturing Company, Los Angeles, Calif., a corporation of California
Application May 24, 1935, Serial No. 23,296
3 Claims. (Cl. 216—106)

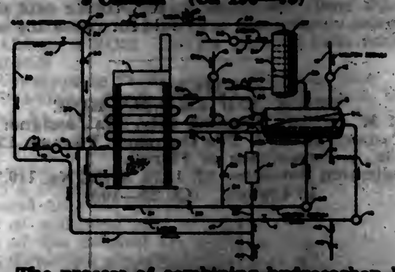
1. In a sprinkler, the combination of: a body providing a downwardly facing cavity, an outlet passage connected to the upper part of said cavity, and a spray opening at the outlet end of said outlet passage; and valve and strainer means positioned in said cavity for forming a relatively narrow strainer opening and including means for adjusting its position for restricting said outlet passage upon upward movement.

2,104,282
APPARATUS FOR TREATING DOUGH
Carnot R. Wagner and Albert J. Fankhaber, Cincinnati, Ohio
Application October 15, 1934, Serial No. 748,395
8 Claims. (Cl. 107—7)



1. In apparatus for treating masses of dough, a proofer, means for feeding masses of dough to said proofer, and means for receiving the masses of dough after they have passed through the proofer and for returning them for passage therethrough a second time, said latter means including conveyor belts having dough-gripping and conveying stretches which are arranged to alternately compress and permit the masses of dough to expand to thereby subject the latter to a kneading and degassing action.

2,104,283
AGITATING OR MIXING APPARATUS
Robert A. Webster, Santa Monica, Calif.
Application October 18, 1934, Serial No. 748,940
10 Claims. (Cl. 172—126)

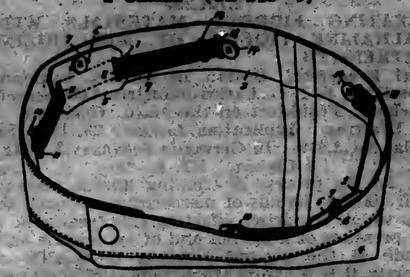


5. An electric motor for transmitting oscillatory motion to an agitating or mixing device comprising a vertical motion transmitting shaft, an electromagnet, an oscillating armature influenced by the magnet for oscillating the shaft, a resilient reaction element acting on the armature to arrest its motion at the end of a stroke and to impart to the armature a return motion as an initiatory part of its opposite or reverse stroke, and a switch device controlled by the armature and including contacts brought into engagement on such initiatory part of the return motion of the armature to supply current to the magnet for a power impulse in continuation of the return motion to impel the armature on the return stroke.

2,104,284
TRUCK
Walter W. Wakefield, [illegible], Calif., assignor to Al Tool [illegible], both of Fresno, Calif.
Application June 22, 1937, Serial No. 149,466
2 Claims. (Cl. 287—20)

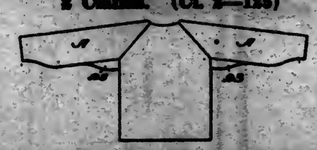
1. A spring supporting structure comprising a bracket securable to a supporting frame and having a shaft extending therefrom substantially transversely to and beyond said frame, a spring hanger member mounted at about its middle for rotation on said shaft with said hanger member extending on each side of said shaft substantially parallel to said frame, said member having an elongated planar bottom face on each side of said shaft with grooves formed in the opposite sides of said hanger member, a spring support member positioned on each side of said shaft, each support member having a face complementary to and slidable along said planar bottom face and arms extending upwardly from said face along the sides of said hanger member and fitting slidably in said grooves.

2,104,285
PROCESS FOR COMBINING HYDROCARBON GASES WITH HYDROCARBON LIQUIDS
Malcolm P. Kemler, Bartlesville, Okla., assignor to Phillips Petroleum Company, Bartlesville, Okla., a corporation of Delaware
Application September 14, 1934, Serial No. 744,073
3 Claims. (Cl. 196—78)



1. The process of combining hydrocarbon liquids with hydrocarbon gases which comprises circulating an endless stream of hydrocarbon liquid, circulating an endless stream of hydrocarbon gas, contacting the two streams at one point and activating the stream of hydrocarbon gas with a catalyst comprising molten sodium in the immediate vicinity of said point to effect combination between said hydrocarbon liquid and said hydrocarbon gas.

2,104,286
PHOSPHOROUS ACID [illegible] OF HYDROXY-ALKYLAMINO ANTHRAQUINONES
Fritz Baumann, Leverkusen-I. G. Werk, Germany, assignor to [illegible] Works, Inc., New York, N. Y., a [illegible] of Delaware
No Drawing. Application [illegible], 1936, Serial No. 66,921. In [illegible] 4, 1935
6 Claims. (Cl. [illegible])

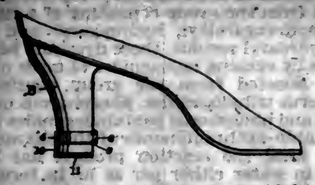


1. Acid wool dyestuffs of the anthraquinone series having the probable constitution of phosphorous acids and phosphoric acids which are partly esterified with amino-anthraquinones containing attached to the amino group a substituent selected from the group consisting of a hydroxyalkyl, hydroxyaralkyl, hydroxyaryl and a hydroxyhydroaryl residue, these dyestuffs being obtainable by causing halogenides of acids of phosphorus selected from the group consisting of phosphorus trihalogenides, phosphorous oxyhalogenides and phosphorus pentahalogenides to react upon amino-anthraquinones of the character described until the reaction product has become soluble in water either per se or in form of its alkali metal salt.

2,104,287
TROUSERS SUPPORT
Harry P. Beck, Lake City, Minn.
Application March 1, 1937, Serial No. 128,463
1 Claim. (Cl. 241—9)

A support for trousers comprising a flat substantially rectangular plate of heavy gauge leather having a slit along one longitudinal edge thereof mid-way of its ends and a pair of transversely extending slits at its opposite ends, respectively, located well below said first-mentioned slit, an elastic band threaded through said end slits and looped over one side of said plate, a hook on one free end of the band, the other free end of said band being looped and provided with a buckle, and a hook through which said looped end of the band extends.

2,104,288
RAGLAN SLEEVE GARMENT
Richard E. Blood, Amsterdam, N. Y.
Application February 24, 1937, Serial No. 127,549
2 Claims. (Cl. 2—125)



2. The method of fabricating a raglan-sleeved garment such as a shirt which comprises cutting substantially V-shaped pieces of material from the cuff end of material blanks constituting the sleeves of the garment to form sleeves having reduced cuff portions, attaching the shoulder portions of the garment sleeves in the garment body, and securing said V-shaped pieces in the armpits of the garment with the apices of said pieces disposed away from the arm-pits.

2,104,289
DETACHABLE SHOE HEEL PLATE DEVICE
James W. Bowman, Bellingham, Wash.
Application July 31, 1937, Serial No. 156,738
1 Claim. (Cl. 36—72)

In combination, a plate adapted to bear on the bottom of a shoe heel, a spring metal clamp fas-

tened to the said plate adapted to embrace the rear and sides of the said shoe heel having a hinge eye on one end and a catch on the other

end, and a latch pivoted to the said hinge eye and engageable with the said catch to releasably fasten the said clamp and the said plate to the said shoe heel.

2,104,290

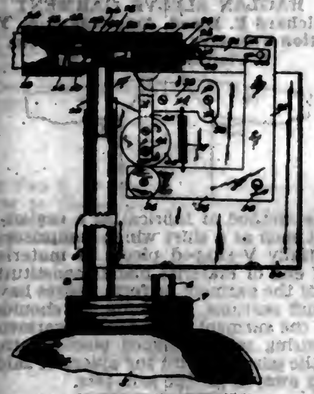
TREATING FIBROUS MATERIALS WITH ALKALINE LIQUIDS OF MERCERIZING STRENGTH

Karl Brodersen, Dessau in Anhalt, Germany, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany

No Drawing. Application January 29, 1935, Serial No. 3,979. In Germany February 2, 1934

6 Claims. (Cl. 8—20)

1. In the process of treating fibrous material with alkaline liquids of mercerizing strength the step which comprises effecting this treatment in the presence of a phenol and of an organic sulfamide of the general formula $R—SO_2NH—A$, wherein R is a hydrocarbon radicle of the group consisting of radicles of the benzene series and of the aliphatic series containing up to 6 carbon atoms and A is a member of the group consisting of alkyl and hydroxyalkyl.



2,104,291

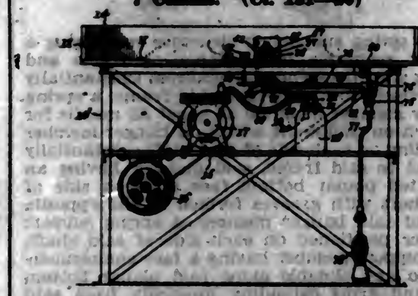
DEVICE FOR PERFORATING THE ENDS OF CIGARS

Martin Carabello and Joseph G. Zendegui, Tampa, Fla.

Application April 22, 1935, Serial No. 17,703

3 Claims. (Cl. 131—80)

2. In a device for perforating the closed tips of cigars, a stationary member having a concavity for receiving the closed tip of the cigar and for holding the cigar in a stationary position with the walls of its tip backed by the walls of said concavity, a hollow perforating needle movable back and forth with respect to said stationary member and having a cutting end portion movable into and out of said concavity wherein to pierce the closed end of the cigar, and means connecting with the hollow interior of the needle for withdrawing the cut portions of the cigar through the hollow portion of the needle.



2,104,292

CIGAR TIP PERFORATING MACHINE

Martin Carabello and Joseph G. Zendegui, Tampa, Fla.

Application June 3, 1935, Serial No. 24,743

7 Claims. (Cl. 131—80)

3. A cigar perforating machine comprising a table having a cigar receiving groove and a slot adjoining the groove, guides in the slot, a support movable in the guides, adjusting means to raise and lower the support in the guides, and cigar perforating means carried by said support.

7. A cigar perforating machine comprising a table for supporting the cigars, hollow cigar tip perforating means vertically adjustable through said table, suction means connected to said perforating means to withdraw the cigar cuttings a rock shaft connected to reciprocate said perforating means, and a treadle for operating said rock shaft.

2,104,293

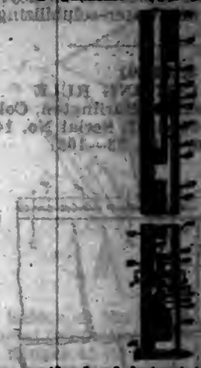
BRICK AND TILE MACHINE

Pitt M. Carlisle, Panama City, Fla., assignor to Panama Brick & Tile Company, Panama City, Fla., a corporation of Florida

Application November 12, 1936, Serial No. 110,729

16 Claims. (Cl. 25—160)

1. In a machine of the class described a plurality of parallelly disposed endless chains of pallets, sprocket shafts common to all chains, a bed bottom over and along which said chains pass, the pallets of each chain comprising a flat plate with an upright wall at its rear edge, a hopper for the mix located on the bed and over the pallets, floating trowels at the sides of said chains of pallets and constituting with the pallets molds into which the hopper delivers mix as the pallets pass beneath the hopper, a rammer cooperating with the molds after they have passed the hopper for condensing the mix and forming the articles in the molds, and means to discharge the contents of the molds from the machine.



2,104,294

METHOD OF WASHING WELLS

Roy G. Cullen, deceased, late of Houston, Tex., by Katherine T. Cullen, administratrix, Houston, Tex.

Application December 11, 1935, Serial No. 114,434

3 Claims. (Cl. 166—20)

1. The method of bringing in a well of the type having a tubing therein with a screen at its lower end and a packer above the screen, which comprises washing the well with a current of liquid flowing downwardly through the tubing and upwardly outside the screen and past the packer, and preventing the accumulation of mud and the like around the tubing and above the packer by washing the well with a current of liquid flowing downwardly outside the tubing, past the packer and outside the screen and upwardly through the tubing, and setting the packer.

2,104,295

PROCESS FOR RECOVERY OF CALCIUM PHOSPHATE, ALUMINA AND POTASSIUM VALUES FROM THEIR INSOLUBLE MINERALS

Giuseppe de Vanna, Serravalle Scrivia, Italy

No Drawing. Application October 18, 1934, Serial No. 748,126. In Italy October 18, 1933

3 Claims. (Cl. 23—109)

1. Process of solubilization and recovery of potassium, aluminium, and phosphoric values from a phosphate rock-lavas or from a similar mineral mixture leached with an aqueous solution of sulfurous acid of which the lime in excess of the amount required for the formation of a dicalcium phosphate has been eliminated in the form of [illegible] which causes the separation of the [illegible] phosphorus and [illegible] solution first to about 60° C., at which temperature the precipitation of the aluminum takes place, separating the precipitated aluminum compound from the hot solution and then slowly increasing the temperature to about 80° C., whereby the precipitation of a dicalcium phosphate practically free of sulfur and soluble in ammonium citrate is brought about.

2,104,296

PROCESS FOR CONVERTING HYDROCARBONS

Frederick E. Frey, Bartlesville, Okla., assignor to Phillips Petroleum Company, Bartlesville, Okla., a corporation of Delaware

Application March 26, 1935, Serial No. 12,961

6 Claims. (Cl. 196—49)

1. In a process for producing higher boiling hydrocarbon mixtures containing at least 50 per cent by weight of paraffinic hydrocarbons from lower boiling hydrocarbons, the steps which comprise heating a stream of predominantly paraffinic hydrocarbons to a preheat temperature and then to a reaction temperature by heat exchange with hotter reaction products under a pressure in excess of 1,000 pounds per square inch, adding olefin containing hydrocarbons to the said stream at a plurality of points, the said points being so spaced as to allow appreciable reaction to take place before further subsequent addition of olefins, the

flow of the said reacting stream being so directed that generally concurrent indirect heat exchange takes place between the said reacting stream and a representative portion of the stream after reaction takes place following the last addition of olefin, maintaining the content of unreacted added olefins in the reacting stream at not more than 10 per cent by weight of the hydrocarbons present therein, and separating from the total reacted stream higher boiling hydrocarbons produced.

2,104,297

DOUBLE STROKE COLD HEADER

John H. Friedman, Tiffin, Ohio, assignor to The National Machinery Co., Tiffin, Ohio

Application November 4, 1936, Serial No. 109,196

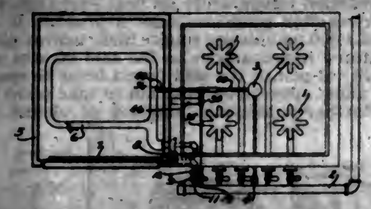
13 Claims. (Cl. 10—20)

1. In a double stroke cold header a heading slide, a carrier mounted for oscillation thereon, adjustable means for limiting the oscillating movement of the carrier, a tool holder mounted on the carrier and including means for supporting a finishing tool and a core tool, and cooperating means on the carrier and tool holder for shifting said holder bodily in any direction along that surface of the carrier engaged thereby.

2,104,298

AUTOMATIC OVEN LIGHTER

Frank A. Gerner, Milwaukee, Wis., assignor, by mesne assignments, to The Cleveland Trust Company, Cleveland, Ohio, a corporation of Ohio



Application January 14, 1936, Serial No. 59,008

Renewed October 2, 1937

16 Claims. (Cl. 158—115)

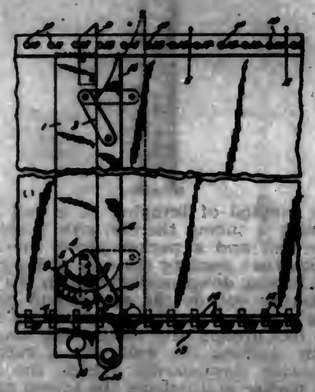
3. An automatic oven burner lighter for a gas stove comprising in combination with a con-

stantly burning pilot light remote from the burner, a flame conducting conduit extending between the oven burner and the remote pilot light, and means for supplying a mixture of gas and

air to said conduit from outside of the oven, whereby the mixture in said conduit will be ignited by the remote pilot light and the flame will be propagated through the conduit to its opposite end for igniting the oven burner.

2,104,200
MACHINE TOOL
Julius Grundstein, Frankfort-on-the-Main, Germany, assignor to Gesellschaft des Lehrer Nasse-Sohnengrün Nasse-Union Sohnengrün-Rumpfwerk, Frankfurt a. M., Julius Pfungst, Frankfort-on-the-Main, Germany
Application March 20, 1935, Serial No. 12,762
In Germany July 17, 1934
6 Claims. (Cl. 266—9)

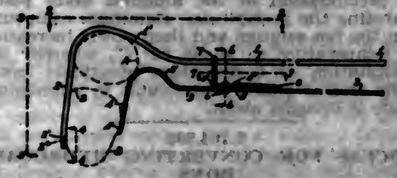
1. Adjustable guide arrangement for reciprocatory elements of machine tools traversing long paths comprising, a bed, a guide rail of considerable length and having appreciable elastic flexibility, vertically and laterally, the reciprocatory element being mounted on and supported by said rail, a plurality of independent adjusting devices provided on the bed spaced apart at a plurality of points along the rail for supporting and securing said rail on said bed and for effecting independent vertical and lateral adjustments of local portions of the rail, utilizing the elastic flexibility of the rail to adjust it to an accurately rectilinear path.



2,104,209
PROCESS FOR OBTAINING COLORED DISCHARGE EFFECTS ON DYEINGS
Robert Haller, Richen, and Charles Graenacher, Basel, Switzerland, assignors to the firm of Society of Chemical Industry in Basle, Basel, Switzerland
No Drawing. Application March 9, 1937, Serial No. 129,956. In Switzerland March 10, 1936
7 Claims. (Cl. 8—5)

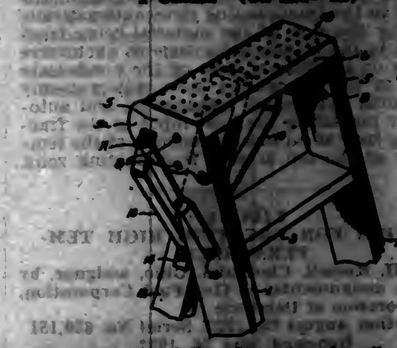
1. Process for obtaining colored discharge effects on vat dyeings capable of being discharged by means of oxidizing agents of which the oxidizing effect takes place in an alkaline medium, by printing these dyeings with such oxidizing agents and developing them with alkalies, comprising applying a discharge paste containing an alkaline oxidizing agent and an ester-like, water-soluble product of the general formula

$$R_1—O—R_2$$



in which R_1 represents the radical of a water-insoluble dyestuff containing at least one hydroxyl group, and R_2 represents an acyl radical containing at least one water-solubilizing group.

2,104,301
GLASS CUTTING RULE
Joshua A. Haughey, Burlington, Colo.
Application May 24, 1937, Serial No. 144,495
1 Claim. (Cl. 33—168)

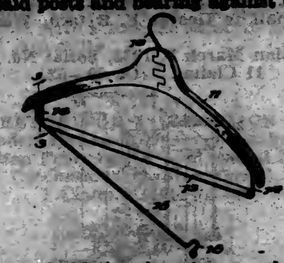


A rule of the class described comprising a stationary section, projections thereon engaging parts of a support to hold the same stationary, a movable section, links connecting the two sections together and permitting movement of the movable section while the same remains parallel to the stationary section, one link having a segmental portion having an arcuate slot therein, a stud projecting from the stationary section and passing through the slot, a nut on the stud for locking the said link in adjusted position and a scale attached to the stationary section and having an arcuate edge abutting the arcuate edge of the segmental part and said segmental part having a mark thereon for cooperating with the scale.

2,104,302
GRAPPLING TONGS
Harry F. Hanley, Richmond, Ind.
Application February 8, 1937, Serial No. 124,555
6 Claims. (Cl. 294—11)

1. In grappling tongs, a pair of members adjustably positioned with relation to each other, with one of said members being freely slidably positioned with relation to the other member, and with a third member pivotally secured to one of said pair of members and providing a guiding means for the other member of the pair.

2,104,303
LADDER CONSTRUCTION
Paul F. Maxwell, Seattle, Wash.
Application May 16, 1936, Serial No. 735,909
1 Claim. (Cl. 280—23)



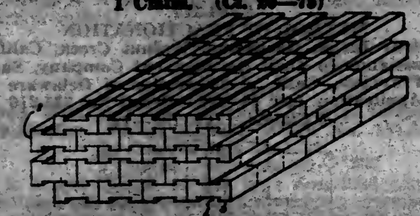
In a ladder of the character described, a one piece metal top plate formed with integral, downturned flanges at its opposite ends and along its opposite longitudinal edges; said end flanges having parts extended rearwardly beyond the top plate, ladder legs fitted at their upper ends against the under side of the plate said against the end flanges thereof and between the opposite edge flanges, bolts securing the legs to said flanges, a cross bar extended between said rearward extensions of the end flanges of said plate and having cut-turned end portions provided with the extensions, bolts pivotally connecting the cut-turned ends with the flanges extensions, a ladder leg attached centrally to said cross bar, brace bars for the leg attached thereto at opposite sides and having ends pivotally mounted on said bolts, and other braces extending from the ladder legs and fixed at their ends to said [illegible].

2,104,304
MANUFACTURE OF HOOK AND EYE
Jacob Kaplan, Boston, Mass., assignment to Bonar Hook, Inc., Boston, Mass., a corporation of Massachusetts
No Drawing. Application July 26, 1935, Serial No. 33,169
1 Claim. (Cl. 99—63)

A process of making a reek and rye liquor, which consists in redistilling rye whiskey to remove its tannin and wood color without appreciably affecting its characteristic rye flavor, then adding pieces of fruit and [illegible] flavoring to the treated whiskey, and adding artificial coloring to restore the characteristic whiskey color, thereby to produce a fruit liqueur in which the fruit pieces will maintain their natural appearance, free from the discoloration which normally results from absorption of coloring matter in ordinary rye whiskey.

2,104,305
GARMENT SUPPORTER
Louis M. [illegible], Chicago, Ill.
Application March 2, 1936, Serial No. 67,889
2 Claims. (Cl. 223—31)

1. An improved [illegible] comprising in combination a slender [illegible] for a coat and provided with [illegible] extending lengthwise under the [illegible], two wire posts fixed to the [illegible] holding the bar at each end, a [illegible] member extending substantially the full length of said bar, a wire coil attached to the clamping member and fitted around and freely turnable upon one of said posts and bearing against the shoul-

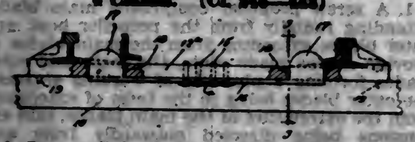


der form to hold the clamping member against the bar at one end and latching means detachably holding the clamping member against the bar at the other end.

2,104,306
SCREW PROPELLER
George Harnett Melland, Auckland, New Zealand
Application June 20, 1936, Serial No. 86,480
In New Zealand July 16, 1935
6 Claims. (Cl. 170—170)

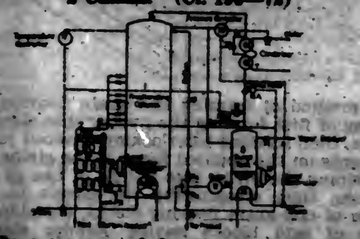
1. A screw propeller comprising main blades extending radially from the propeller boss, and outer blades extending from the main blades to provide duplex blade units, the main and outer blades forming a plurality of working surfaces, the outer blades being in the form of extensions from the extremities of the main blades, said extensions being directed outwardly from and forming angles with the main blades so as to provide working surfaces from the radii of the latter, the extension commencing at the outer extremity of the leading edge of the main blade and increasing in width in a direction towards the following edge of the main blade, the greatest width of the outer blade being at the outer extremity of said following edge.

2,104,307
METHOD OF FORMING END GRAIN FLOORING
Theodore H. Miller, Portland, Oreg.
Application November 4, 1935, Serial No. 48,118
1 Claim. (Cl. 20—75)



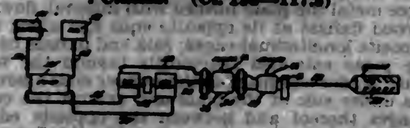
A method of forming end grain flooring consisting of first forming the lumber into elongated strips, then forming interlocking dovetail joinder elements on the opposed faces of the strips, then combining the strips into panels of two or more courses, then crosscutting the panels to form strips of end grain flooring blocks, the sides and ends of said blocks having joinder elements formed thereon whereby they may be united to adjacent faces by a vertical sliding movement.

2,104,208
PRESS MECHANISM
Edward D. Benjamin, Agawam, Mass., assignor of one-half to George E. Eyford, Winchester, Mass.
Application March 9, 1935, Serial No. 10,244
11 Claims. (Cl. 60—52)



1. In a pressure producing device, cylinder and piston mechanism, the cylinder having a port adjacent each end and a port at an intermediate position, located so as to be uncovered by the piston during its travel, a positive acting liquid pump connected between one end port and the intermediate port, and a second positive acting liquid pump connected between the two end ports.

2,104,209
SAFETY LATCH PLATE
Dean R. Richardson, New Kensington, Pa.
Application May 22, 1937, Serial No. 144,253
4 Claims. (Cl. 246—448)



1. In a switch structure, the combination of a fixed rail, a switch-point swingable in a horizontal plane, and in the arc of a circle toward and away from the fixed rail, a rail plate extending transversely of said fixed rail and pivoted switch-point, said plate being provided with an opening adjacent the base flange of the fixed rail, a spring keeper plate having a part thereof anchored to said rail plate, and having a free end provided with a head normally projecting upwardly through said opening for engaging the swingable switch-point to secure the latter in either of two positions relative to the fixed rail.

2,104,210
METHOD OF FRACTIONATION
Petrus Jurjan Roelfsema, Walnut Creek, Calif., assignor to Shell Development Company, San Francisco, Calif., a corporation of Delaware
Application July 14, 1934, Serial No. 735,216
2 Claims. (Cl. 196—73)

1. In a process of fractional distillation, the steps of counterflowing in a fractionating zone a vaporized hydrocarbon mixture and a reflux formed in a condensing zone, automatically maintaining a constant pressure in the fractionating zone by regulating the rate of outflow of vapors in the condensing zone solely as a function of the pressure in the fractionating zone, automatically regulating the flow of the material being fractionated to the fractionating zone as an inverse function of the rate of flow of the condensate formed in the condensing zone, automatically maintaining a constant reflux ratio, and automatically regulating the heat input to the fractionating zone as an inverse function of the temperature at the top of said fractionating zone.

2,104,211
PROCESS FOR CREATING HIGH TEMPERATURES
Robert H. Russell, Cleveland, Ohio, assignor, by mesne assignments, to Gas Fuel Corporation, a corporation of Delaware
Application August 23, 1932, Serial No. 630,151
Renewed May 26, 1937
7 Claims. (Cl. 122—117.5)

1. A process of combustion comprising the steps of atomizing an emulsion of water and hydrocarbon oil and introducing the same under high superatmospheric pressure into a retort, introducing air from an extraneous source into the retort for supporting combustion, effecting combustion within the retort, and radiating heat resulting from the combustion to the zone of atomization for the purpose of rapidly heating the atomized emulsion to a high temperature as it is introduced into the retort.

2,104,212
CLUTCH MECHANISM FOR AUTOMOTIVE VEHICLES
John Stecker, Muscatine, Iowa
Application September 2, 1935, Serial No. 38,917
1 Claim. (Cl. 192—43)

In a clutch mechanism for automobiles, an axle provided at its end with two series of recesses in staggered relation forming oppositely disposed detents, a hub enclosing said recesses provided in its inner face with a pair of dogs for engagement with said series of recesses, plates in said recesses adapted for outward movement to close the same, rods resiliently supported on said axle and connecting said plates in pairs, so as to move one thereof outwardly said the other one inwardly, and vice versa, said a collar loosely mounted on said axle and operatively connected with said rods, to automatically operate the same upon a relative rotation of said collar and the axle.

Henry A. Wise Wood, [illegible], assignor to Wood Newspaper [illegible] Corporation, New York, N. Y., [illegible] Virginia
Original application [illegible] Serial No. [illegible], Sep- [illegible]
June 4, 1[illegible]

1. Apparatus for [illegible] and other purposes, [illegible] material disposed in a [illegible] drive means [illegible] and [illegible] other and [illegible] axial [illegible] An [illegible] means [illegible] strip [illegible] strip [illegible] engagement [illegible] and [illegible] of the first [illegible] and [illegible] parallel [illegible] and returned by [illegible]

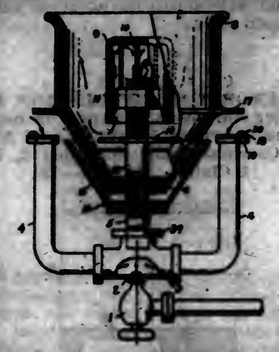
2,104,213
APPARATUS FOR [illegible]
Anthony White Wood, [illegible] Harvard, London, England
Application September [illegible], Serial No. 39,697
In Great Britain [illegible]

2,104,214
APPARATUS FOR THE ADMIXTURE OF FUEL
Alexander Abramson, Prague, Czechoslovakia
Application February 19, 1937, Serial No. 126,162
In Czechoslovakia November 2, 1936
1 Claim. (Cl. 261—78)

In an apparatus for the admixture of fuel, a suction pipe having an orifice therein, a starting and no-load nozzle opening into said orifice, a throttle valve for said suction pipe adapted to form in its starting and no-load position, with the rearward edge of said orifice, a slit for the passage of incoming air, said suction pipe having a narrow, shallow longitudinal groove in the inner wall in alignment with said orifice, said groove running from a point spaced adjacent the orifice in the direction of the gas flow and a baffle at the opposite end of said groove, said baffle being arranged transversely of the groove and projecting from the wall of the suction pipe into the flow area thereof.

2,104,215
CARBURETOR FOR COMBUSTION ENGINES
Alexander Abramson, Prague, Czechoslovakia
Application February 19, 1937, Serial No. 126,163
In Czechoslovakia November 2, 1936
1 Claim. (Cl. 261—78)

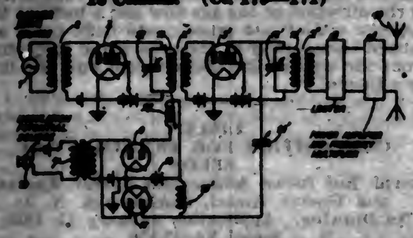
In an apparatus for the admixture of fuel, a suction pipe having an orifice therein, a starting and no-load nozzle opening into said orifice, a throttle valve for said suction pipe adapted to form in its starting and no-load position, with the rearward edge of said orifice, a slit for the passage of incoming air, said suction pipe having a narrow, shallow longitudinal groove in the inner wall in alignment with said orifice, said groove running from a point spaced adjacent the orifice in the direction of the gas flow and a baffle at the opposite end of said groove, said baffle being arranged transversely of the groove and projecting from the wall of the suction pipe into the flow area thereof.



2,104,216
COMPOSITION FOR TREATMENT OF SEEDS
Joseph Roy Boose, Addlestone, Surrey, England, and Gustav Kessel, Hackensack, N. J.
No Drawing. Application January 17, 1936, Serial No. 59,559
6 Claims. (Cl. 167—22)

6. A composition for controlling fungus disease of seeds comprising a mercury compound taken from the class consisting of $RHgNHCOOH$, $RHgNHCONH_2$, $RHgNHCN$, $RHgNH$ aryl, $RHgNH$ alkyl, $RHgNC(NH\ aryl)_2$, $RHgNC(NH\ alkyl)_2$, wherein R is an unsubstituted aliphatic hydrocarbon radical.

2,104,217
GAS BURNER
Fred William Dolan, Calgary, Alberta, Canada
Application August 6, 1937, Serial No. 157,440
In Canada July 22, 1937
2 Claims. (Cl. 158—99)



1. A gas burner of the type described comprising a gas cock, a gas and air mixing chamber to receive the from the said cock, air intake pipes entering said mixing chamber, means for the control of air supply through the said pipes, a [illegible] chamber for conveyance of gases to an outlet port, a [illegible] adjustably [illegible] said [illegible] and envelopping the said outlet port to invert the gas flow for ignition below the gas port level, [illegible] plate [illegible] by the said [illegible] and [illegible] from the said adjustable mantle, an open end [illegible]

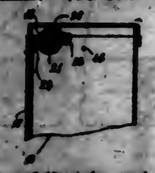
bustion chamber enclosing the terminal burner elements for upward diversion of the gas flame, an outer flange circumventing the said chamber

for prewarming the inflowing air supplies, air passage-ways in the dished bottom of the said combustion chamber, and means for air supply regulation through the said air passage-ways.

2,104,218
MULTIPLE PHASE MODULATION
Murray G. Crosby, Riverhead, N. Y., assignor to Radio Corporation of America, a corporation of Delaware
Application August 16, 1935, Serial No. 36,473
18 Claims. (Cl. 179—171)

2. The method of phase modulating wave energy in accordance with signals which consists in, modulating the phase of said wave at signal frequency, and modulating the phase of the resultant energy at the same signal frequency.

2,104,219
MANUFACTURE OF RIFLED TUBES
Allen A. Dicke, Montclair, N. J., assignor to Remington Arms Company, Inc., a corporation of Delaware
Application February 10, 1934, Serial No. 710,662
2 Claims. (Cl. 29—1.1)



3. The process of rifling the interior surface of thin tubes comprising the steps of reducing the diameter of said tube at one end, placing said reduced end into the chuck of a drawing machine, placing within said tube a mandrel formed with a reversed rifling, and thereupon pulling said tube and mandrel together through a reducing die, whereby the tube is compressed upon the mandrel and its interior surface formed with the desired rifling, removing the mandrel from the tube and cutting off the reduced end portion.

2,104,220
FREEWHEELING CLUTCH
Stefan Fischer, Prague, Czechoslovakia
Application May 12, 1936, Serial No. 79,480
In Czechoslovakia May 12, 1936
18 Claims. (Cl. 192—44)

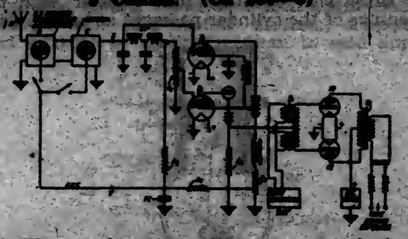
1. A free-wheeling clutch comprising a driving part and a driven part in coaxial arrangement, at least one jamming member between said parts, said jamming member having a free position and one jamming position in front and one jamming position behind its free position in the direction of rotation, a first resilient means arranged in front and a second resilient means arranged in the rear of said jamming member whereby said resilient means counteract each other, and each resilient means tends to urge said jamming member into one of its jamming positions respectively, a supporting member having a supporting surface for one of said resilient means, said supporting member being connected for rotation with one of said parts but movable relatively thereto, the other resilient means being supported by said last mentioned part, and means for moving said supporting member from the outside relatively to said last mentioned part whereby the tension of said resilient means supported by said supporting member may be altered upon a movement of said supporting member.

2,104,221
CABINET
William Gershon, Brooklyn, N. Y.
Application June 28, 1937, Serial No. 150,724
5 Claims. (Cl. 312—190)

1. In an article of the character described, the combination of a box structure having an opening, a curtain guide means mounted along said opening, a flexible curtain adapted to cover said opening, slidably mounted in the guide means, a bracket swingably suspended on the box structure, a roller journalled on the swingable bracket along an axis parallel to the axis along which the bracket is mounted; each end of the curtain being secured to the roller whereby upon rotation of the roller, the curtain will be wound thereon to uncover said opening, means to retain the cover over the opening, a manual member upon release of said curtain retaining means to automatically rotate the roller to wind up the curtain, and further adapted to return to operative condition upon manual sliding of the curtain to cover the

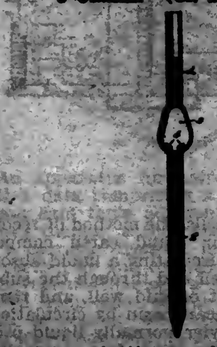
opening, and a brake mounted on the bracket, adapted to act against the roller to retard the movement of the curtain while the latter is being wound up on said roller.

2,104,222
CONTAINER AND METHOD OF MAKING SAME
Jose Guimaraes, Bayside, N. Y., assignor to Ferdinand Guimaraes & Co., Brooklyn, N. Y., a corporation of New York
Application July 17, 1936, Serial No. 91,140
5 Claims. (Cl. 221—60)



1. A container embodying therein a collapsible tubular metallic body having an unconstricted open bottom, a contracted top and a delivery nozzle extending from said top, an inner seal of flexible and ruptureable material extending across said nozzle and bonded about the top thereof by a heat fusible adhesive forming with said inner seal material a gas and liquid tight joint, and a closure cap removably mounted upon said nozzle and engaging said inner seal material.

2,104,223
PORTABLE HEATING RIG
Charles A. Hirschberg, Manasquan Palms, N. J., assignor to Worthington Pump and Machinery Corporation, New York, N. Y., a corporation of Virginia
Application August 10, 1936, Serial No. 745,530
9 Claims. (Cl. 255—53)

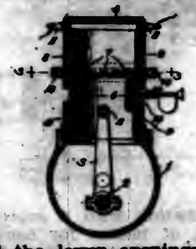


1. In a portable [illegible] of a character described, a handle at the [illegible] ing [illegible] ally [illegible] on said frame [illegible] necting the frame [illegible] movement in an [illegible] of the frame about [illegible] operating with [illegible] adjusted [illegible] justably [illegible] supporting [illegible] carried by said [illegible] to said handle.

2,104,224
SYSTEM OF COMPENSATING AUTOMATIC VOLUME CONTROL
E. Lee Kellogg-worth, Riverhead, N. Y., assignor to Radio Corporation of America, a corporation of Delaware
Application June 27, 1934, Serial No. 732,565
9 Claims. (Cl. 250—8)

1. The combination with a source of signal carrying waves, of means for converting said waves into direct current impulses characteristic of the signals comprising, a rectifier connected to said source, a low-pass filter connected to said rectifier, a discharge tube having its input electrodes connected to the output of said low-pass filter, a utilization circuit connected to the output of said tube, an automatic volume control circuit having two parallel branches, one of which includes said low-pass filter and a resistance, and the other of which includes an additional tube and a resistance, and a connection between said automatic volume control circuit and said source of signal carrying waves.

2,104,225
MIXING PIPETTE
Wilhelm Jaffe, Hannover, Germany
Application January 31, 1936, Serial No. 61,603
In Germany January 23, 1935
2 Claims. (Cl. 23—292)



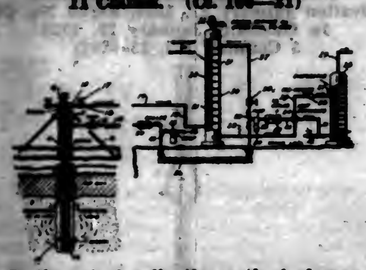
1. A mixing pipette especially a blood mixing pipette, comprising an upper capillary tube, a lower capillary tube, a mixing ampulla arranged between said upper and lower tubes, and at least one movable body accommodated in said ampulla and adapted to be shaken when said ampulla is reciprocated, said movable body having a passage formed therethrough.

2,104,226
TWO CYCLE INTERNAL COMBUSTION MOTOR
Elmer James Knox, Rivera, Calif.
Application November 2, 1936, Serial No. 108,742
3 Claims. (Cl. 123—73)

2. In a gas engine, a cylinder, a piston, the combination of longitudinal passages in the

cylinder external to the bore and communicating with it, at the top, and below the exhaust ports, and other similar passages lower down communicating with the crankcase and the middle openings being adapted to be opened and closed by the reciprocation of the piston, the piston having double opposed combustion chambers located on its sides with openings that register with the openings of the cylinder passages at bottom dead

center, and the lower openings of the piston chambers registering with the lower openings of the upper cylinder passages at about one half stroke, and means of igniting the charge in the upper cylinder passages, with a plurality of packing rings located above, below and between the piston chamber openings, the outer edges of the top and bottom rings located so as to pass slightly beyond the ends of the bore.



2,104,227

METHOD OF RECOVERING EARTH COMPONENTS FROM WELLS

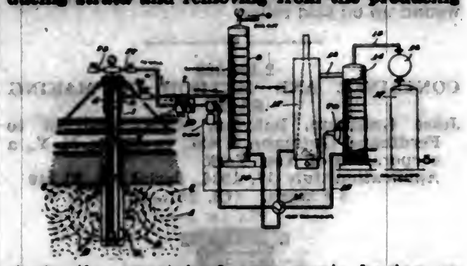
Meinhard H. Kotzebue, Tulsa, Okla.

Application December 6, 1935, Serial No. 53,141

11 Claims. (Cl. 166—21)

1. In the art of wells, the method of recovering selected gaseous or liquid earth components which consists, in circulating a liquid absorption medium into the well and through the subterranean basin and out of said well, and removing from the subterranean basin by circulation and absorption the heavier normally liquid products having higher boiling points from normally gaseous mixtures and at the same time removing but a small proportion of components which are not condensable except under very high pressures and low temperatures.

2,104,228



METHOD OF RECOVERING EARTH COMPONENTS FROM WELLS

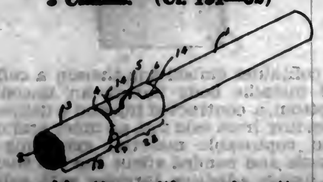
Meinhard H. Kotzebue, Tulsa, Okla.

Application July 12, 1926, Serial No. 90,224

13 Claims. (Cl. 166—21)

1. In the art of oil wells, the method of recovering selected gaseous or liquid earth components which includes, circulating an absorption liquid having a specific gravity greater than the specific gravity of the components to be recovered in and out of a well and through the producing strata and removing from the producing

strata the ascertained components having an affinity for and absorbed by said absorption liquid, and leaving other components in the producing area.



2,104,229

TIP FOR CIGARETTES

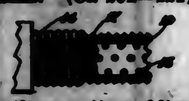
Sidney H. Levy, Baltimore, Md.

Application February 15, 1937, Serial No. 125,880

3 Claims. (Cl. 131—52)

2. In combination with a cigarette shell, a mouth-end encasement having perforations thereon to divide it into a plurality of sections, a portion of the encasement being securely held to the shell and another portion free to be tearably disconnected therefrom, said encasement being disposed on the mouth-end of the shell and within the longitudinal limits of the same.

2,104,230



AERATING DEVICE

James Lockey, Great Burgh, Epsom, England, assignor to Standard Brands Incorporated, New York, N. Y., a corporation of Delaware

Application January 6, 1933, Serial No. 650,516

In Great Britain January 7, 1932

2 Claims. (Cl. 261—121)

1. A device for the aeration of liquids and dispersion of fluids comprising particles in suspension comprising a hollow body screw-threaded on its outer surface, and provided with escape passages formed by suitably disposed perforations, and an enstroling layer wound within the base of the thread so formed, and surrounding said hollow body having spacings therebetween, the spacings being of a width sufficient to permit an atomized stream of the aerating medium to issue but insufficient to permit the entry of suspended particles to said perforations.

2,104,231

MOP HOLDER

Edmund Prohaczy, New Britain, Conn.

Application April 26, 1937, Serial No. 138,286

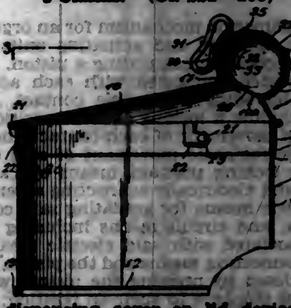
2 Claims. (Cl. 266—3)

1. In a mop holder for adjustably securing the wire frame of a mop at the end of a mop handle,

a pair of similar opposed parti-cylindrical clamping members receiving the end of the mop handle and extending therebeyond, said extended portions terminating in a pair of parallel spaced flanges overlying a portion of the mop frame, opposed clamping jaws frictionally and rotatably receiving said portion of the frame and located between said flanges, said jaws having divergent

spaced side walls interconnected by opposed bottom walls, aligned rivets respectively pivotally connecting the bottom walls and flanges, the axes of jaw movement and frame movement intersecting substantially at right angles, and a bolt removably securing the clamping members to the frame and maintaining the mop frame in any adjusted position.

2,104,232



ROTATABLE DISPENSING AND MEASURING DEVICE

Carles J. Rohde and Marie T. Menier, New York, N. Y., assignors of one-half to Rose O. Rohde, New York, N. Y., and one-half to said Menier

Application January 22, 1935, Serial No. 2,071

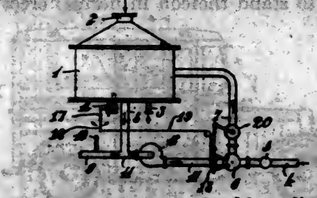
Renewed May 12, 1937

6 Claims. (Cl. 221—106)

1. A dispensing cover or lid device provided with a skirt portion to be telescopically received on the top of a container for granular powdered or divided materials, and also being provided with a rotatable measuring device comprising closely fitting inner and outer spherical shells and adapted to be filled from the interior of the can and also to be turned out of communication with the interior of the can to discharge its contents to a place of consumption, the air being excluded from the container during said dispensing operation.

2,104,233

METHOD AND MEANS FOR REGULATING THE TEMPERATURE OF FLOWING MEDIA



Curt Fredrik Rosenblad, Södertälje, Sweden, assignor to Aktiebolaget Rosenbladz Patenter, Stockholm, Sweden, a corporation of Sweden

Application October 10, 1935, Serial No. 194,956

In Sweden October 12, 1935

7 Claims. (Cl. 257—3)

1. A method of regulating the temperature of media discharged from apparatus for indirect heat transmission, comprising, supplying a gaseous medium to said apparatus, condensing said gaseous medium by indirect heat transmission to a cooling medium also supplied to said apparatus, discharging the condensed gaseous medium and also the warm cooling medium heated by the heat transmission separately from said apparatus, mixing a portion of said warm cooling medium with cold cooling medium, supplying said mixture as cooling medium to said appa-

ratus, the ratio of warm and cold medium in said mixture being controlled automatically so as to keep the temperature of the media discharged from said apparatus substantially constant for any quantity of said gaseous medium supplied per unit of time, and varying the velocity of flow of said cooling medium within the apparatus to decrease and increase continuously, when the quantity of said gaseous medium supplied per unit of time decreases and increases, respectively.

2,104,234

APPARATUS FOR CORRELATING DIETARY AND DIGESTIVE DATA

Oakley Smith, Chicago, Ill.

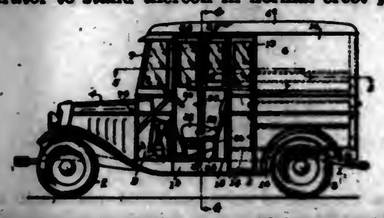
Application July 3, 1926, Serial No. 83,844

6 Claims. (Cl. 281—1)

1. An apparatus for correlating dietary and digestive data comprising a table, rails mounted upon said table adjacent and parallel with the ends thereof, a rod extending between said rails, a carriage disposed longitudinally of said table carried by and co-operating with said rails for movement thereon, a plurality of shields mounted upon said rod for rotative and longitudinal movement with respect to said table, means associated with said carriage for detachably securing an item form thereto and means associated with said table for securing and disposing a symbol receiving form upon said table beneath said shields and said carriage.

2,104,235

VEHICLE



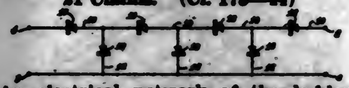
Edward J. Stahl, Lakewood, Ohio, assignor to The Baker-Raulang Company, Cleveland, Ohio, a corporation of Ohio

Application June 20, 1934, Serial No. 731,539

1 Claim. (Cl. 296—24)

In a wheel mounted vehicle having a chassis comprising substantially horizontal continuous side frames each having a running board along a portion and outwardly thereof and a power

plant mounted on said frames at the forward end thereof, a closed body on said frames rearward of said power plant, the opposite sides of said body being formed with alined doorways related to said running boards, a platform mounted on said frames and covering the entire area within said body from the rear sides of said doorways forwardly thereof and between the outer side edges of said side frames, the roof of said body being spaced from said platform to permit an operator to stand thereon in normal erect posi-



tion, a separate platform on said frames extending rearwardly from the rear sides of said doorways and disposed in a plane above said first mentioned platform, storing devices on said last mentioned platform rearwardly of its forward end, whereby the forward end portion of said separate platform forms a step, and a seat on said first mentioned platform adjacent one side edge thereof and mounted to move forwardly thereon to a position substantially forwardly of the adjacent doorway.

2,104,226

ELECTRIC SYSTEM

William Norris Tuttle, Cambridge, Mass., assignor to General Radio Company, Cambridge, Mass., a corporation of Massachusetts

Application July 30, 1932, Serial No. 626,845
21 Claims. (Cl. 178—44)

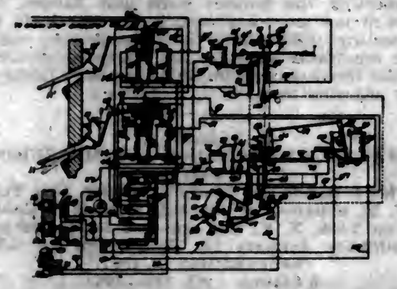
1. An electrical network of the ladder type having a plurality of sections and input and output terminals to operate on direct voltage of specified polarity applied to the input terminals comprising resistive series arms and resistive shunt arms, a plurality of the shunt arms each having a rectifier, the rectifiers being connected in such a sense as to make the direct voltage at the output terminals vary less than in proportion to the direct voltage at the input terminals.

2,104,227

ILLUMINATED SIGN

Charles J. Wanser, Milwaukee, Wis.

Application September 23, 1935, Serial No. 41,771
2 Claims. (Cl. 40—130)



1. In an illuminated sign, a casing including a front wall having an opening, an opaque panel provided with cut-out characters and positioned in said opening, a pan detachably secured to the front wall at its upper and lower edges and to the bottom edge of said opaque panel, the upper edge of said panel being clamped between said front wall and pan, a translucent panel positioned at the rear of said opaque panel, and an illuminated tube carried by said pan in the rear of said translucent panel and comprising strokes conforming to those of the cut-out characters in the opaque panel.

2,104,228

COMBINATION STOP ACTION FOR ORGANS

John H. Wick, Highland, Ill., assignor to Wicks Pipe Organ Co., Highland, Ill., a corporation of Illinois

Application October 8, 1936, Serial No. 104,681
14 Claims. (Cl. 84—244)

1. A combination mechanism for an organ provided with stopkeys and actuating units therefor, said mechanism comprising a piston, a combination switch connected with each actuating unit and including a movable contact, locking means including a locking element positioned in the path of movement of each contact and being yieldable to facilitate movement of said contact toward its locking position, means operable for engaging and electrically connecting several contacts, electric means for actuating said connecting means, and circuit means including switch means associated with said electric means and with the connecting means and the piston, adapted to be closed by pressing the piston, whereby to move the stopkeys to their on position.

2,104,229

GAS SEPARATOR FOR PUMPS

Armais Arutunoff, Bartlesville, Okla.

Application August 7, 1933, Serial No. 683,967
2 Claims. (Cl. 183—2.7)

1. A multistage gas separator adapted for connection to the intake end of a well pump, including an outer member forming a series of superposed co-axial annular deflectors, the walls of which project downwardly and inwardly and terminate in open bottoms, rib means connecting said deflectors in vertically spaced relation so that the corresponding walls of adjacent deflectors form a series of unobstructed parallel downwardly and inwardly directed intake passageways of substantially uniform area throughout and open at their inner and outer extremities, means closing the bottom of the lowermost deflector, and an inner member comprising a delivery tube open at its lower end and adapted to be connected at its upper end to the intake of a pump, the lowermost of said deflectors defining an unobstructed inlet chamber, said tube extending downwardly through the central open-

ings of said deflectors in spaced relation thereto and terminating at the top of said chamber.

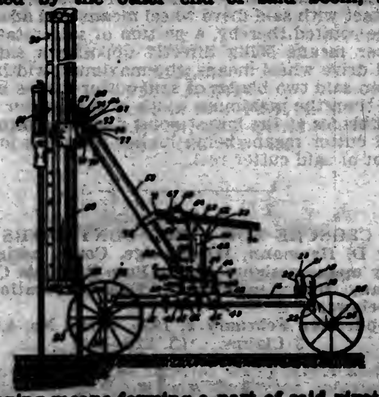
2,104,240

SIGNAL UMBRELLA

Thomas G. Carmody, Providence, R. I.

Application April 22, 1937, Serial No. 138,596
3 Claims. (Cl. 240—6.42)

1. In an umbrella, a tubular stick, a tip upon the stick provided with an orifice, an incandescent lamp in the tip, a battery for the lamp slidably mounted in the stick, a spring engaging the lamp and battery, an internal stop shoulder on the stick below the battery, said stick being provided below the shoulder with a slot, and a plunger including a disk normally resting upon the shoulder and supporting the battery, and a depending rod upon the disk registering in the slot.



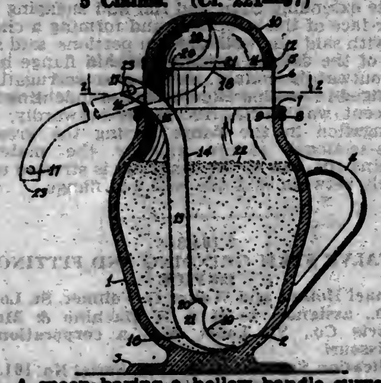
2,104,241

PORTABLE DRILLING RIG

John C. Curtis, Garfield Heights, Ohio, assignor to The Cleveland Rock Drill Company, Cleveland, Ohio, a corporation of Ohio

Application May 21, 1936, Serial No. 81,050
6 Claims. (Cl. 255—61)

1. In a portable drilling rig, the combination of a carrying frame, supporting means for said frame, a boom carried by said frame, means pivotally connecting one end of said boom to said frame for pivotal movement on a horizontal and on a vertical axis relative to said frame, a brace associated with said boom adjustable in length for effecting the pivotal movement of the boom on said horizontal axis, a drill guiding frame carried by the other end of said boom, and



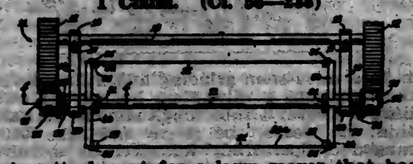
clamping means forming a part of said pivotally connecting means for establishing a rigid connection between said frames in any position assumed by said drill guiding frame due to the pivotal movements of said boom.

2,104,242

TABLE ACCESSORY

Paul G. De Martini, Jr., San Francisco, Calif.

Application March 17, 1937, Serial No. 131,219
5 Claims. (Cl. 221—97)



1. A spoon having a hollow handle curved in one direction at one end, and a ladle at the other end of the handle and curved in the other direction.

2,104,243

ATTACHMENT FOR LAWN MOWERS

Charles T. Fish, Scituate, Mass.

Application January 2, 1937, Serial No. 118,883
1 Claim. (Cl. 56—238)

An attachment for a lawn mower that has a cutter reel and drive wheel means, said attachment comprising rotatable cutter means embody-

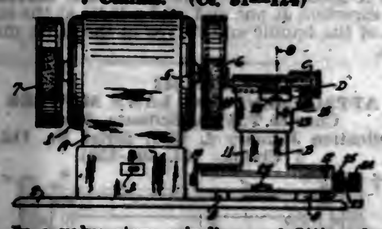
ing two blades spaced apart, supporting means connected to said rotatable cutter means and fastened to said lawn mower, friction wheel means connected to said cutter means and in contact with said drive wheel means and adapted to be rotated thereby, a portion of said rotatable cutter means being directly opposite a side of said drive wheel means, the maximum width between said two blades of said cutter means being less than the maximum width of said cutter reel, said blades at the lowest point during rotation of said cutter means being higher than the lowest point of said cutter reel.

2,104,244

CLOSURE FOR FIBRE CONTAINERS

Roy D. Heymann, Woodbridge, Conn., assignor, by mesne assignments, to Pulp Products Company, Inc., New York, N. Y., a corporation of Delaware

Application February 2, 1935, Serial No. 4,688
3 Claims. (Cl. 229—5.5)



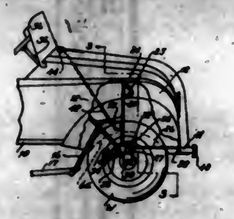
1. The combination with a moulded pulp container having an open mouth, a metal closure comprising a cupped portion fitted in the mouth of the receptacle with the side wall of the cupped portion engaging the inner face of the receptacle, a rim overlying the edge of the mouth, and a flange extending from said rim and engaging the outer face of the receptacle and forming a channel with said side wall and rim portions, said side wall of the cupped portion and said flange having outwardly convex, continuous corrugations arranged in nesting alignment and indenting the adjacent wall of the receptacle outwardly, the corrugation in the flange having the greater cross-sectional radius whereby the material forming the wall of the container is stressed uniformly between said side wall and flange.

2,104,245

VALVE STEM GRINDING AND FITTING DEVICE

Michael Hellat and Walter G. Vollmer, St. Louis, Mo., assignors to H & H Machine & Motor Parts Co., St. Louis, Mo., a corporation of Missouri

Application September 16, 1936, Serial No. 101,005
7 Claims. (Cl. 51—124)



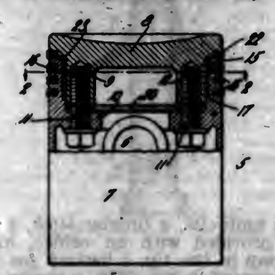
1. In a valve-stem grinding and fitting device, in combination, a valve-stem holding jig comprising a sleeve, a tube longitudinally shiftable within the sleeve, the sleeve and tube being arranged co-operatively for receiving a valve-stem and the sleeve having valve and valve-seat engaging faces, and means for securing the sleeve adjustably to the tube.

2,104,246

JUVENILE VEHICLE

Herman L. Kraeft, Cleveland Heights, Ohio, assignor to The Murray-Ohio Manufacturing Company, Cleveland, Ohio, a corporation of Ohio

Application September 28, 1936, Serial No. 102,833
4 Claims. (Cl. 280—87.5)



1. In a juvenile wheeled vehicle of the type having a pair of steering wheels, sheet-metal body sides having outwardly bulged portions adapted to shroud said wheels, and portions marginally adjacent the same which are substantially planar, and a transverse substantially upright plate having flanges connected to the latter portions of the sides in a manner to cross-brace the sides, the connections being disposed closely adjacent the fender bulges, said plate being adapted and arranged to support the wheels and the steering mechanism therefor.

2,104,247

PISTON

Elwood T. Larkin, Eggertsville, N. Y., assignor to Charles A. Criqui, Buffalo, N. Y.

Application September 16, 1935, Serial No. 40,771
5 Claims. (Cl. 309—15)

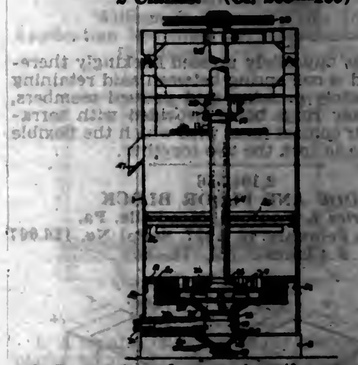
1. A piston having head and body portions of approximately the same outside diameters disposed in end to end relation with an outwardly opening annular peripheral groove separating said portions at their outside peripheries, and also having an endwise elongated neck portion of reduced diameter connecting and coupling said portions and having its peripheral surface spaced from the inner wall of said body to form an annular chamber of substantial length measured endwise of the piston, and opening into said peripheral groove, a radially expansible resilient piston ring disposed in said groove and substantially thinner than the width of said groove so as to be capable of limited movement in a direction endwise of the piston and engageable with one side face only at a time of said groove, whereby heat of said head portion is conducted to the end of said body portion nearest the head portion solely through said neck, and said expansible ring is cooled by contact with the relatively cool adjacent end of said body portion.

2,104,248

INDAZOLONES

John Lee, Zurich, Switzerland, assignor to E. R. Squibb & Sons, New York, N. Y., a corporation of New York

No Drawing. Application June 3, 1933, Serial No. 674,318
4 Claims. (Cl. 260—45)



4. Indazolones of the general 1-R 2-phenyl 4,5,6,7-tetrahydro indazolone-3, wherein R represents a radical of the group consisting of methyl, ethyl, propyl, butyl, amyl, allyl, and bromallyl.

2,104,249

ORE SEPARATOR

Harry J. MacCamy, Spokane, Wash., assignor to Union Iron Works, Spokane, Wash.

Application April 15, 1935, Serial No. 16,378
2 Claims. (Cl. 209—169)

1. In a mineral separator, the combination of an enclosing tank, an interior feed-head having an outlet port in its upper face, a centrifugal impeller having an intake port in its lower face directly over said outlet port, means for supplying air to the impeller, said impeller having lateral discharge ports above its intake port, a baffle ring elevated above the bottom of the tank and supported therein, said ring forming a solid wall and surrounding the impeller, and spaced vertically arranged radially projecting plates on the inner side of said ring forming guide grooves adjacent the lateral discharge ports.

2,104,250

PISTON

Adolph L. Nelson, Detroit, Mich., assignor to Bohn Aluminum & Brass Corporation, Detroit, Mich.

Application July 23, 1936, Serial No. 92,239
6 Claims. (Cl. 309—11)

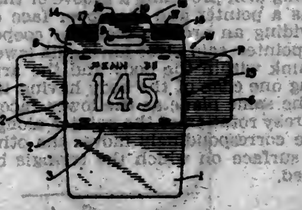
1. A piston comprising a head and a skirt, pin bosses connected to the head, the skirt having thrust faces between the pin bosses, ribs connecting the lower part of the pin bosses to the skirt, the skirt having a slot formed therein below one of the ribs, and having also a pair of closed-end slots formed in one of the thrust faces in the zone of the ribs.

2,104,251

PIPE JOINT

Alden E. Osborn, New York, N. Y.

Application December 24, 1936, Serial No. 117,430
6 Claims. (Cl. 285—193)



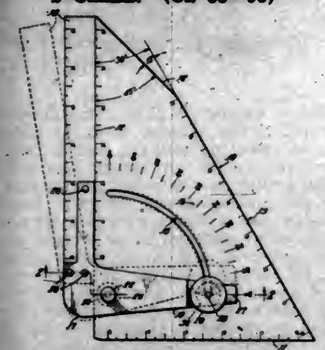
1. A fitting having a socket with a circumferential channel in the interior wall thereof and an aperture intersecting said channel, a deformable ring packing element within said channel, and a means for retaining a member within said fitting and for preventing leakage adjacent said means of retention, comprising a wire of relatively hard, strong material adapted to be wound thru said aperture and into said channel and against said packing by relative rotation between said fitting and said member while a part of said wire first inserted within the channel thru the aperture is held from movement in relation to said member.

2,104,252

MAILING CONTAINER

Elmer G. Overly, Oakmont, Pa.

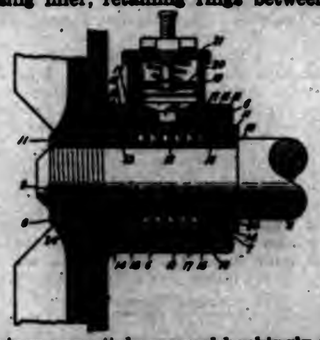
Application January 8, 1936, Serial No. 58,834
2 Claims. (Cl. 229—72)



2. A mailing wrapper for license plates: said wrapper being flat and adapted for sale in that condition to the user; having a central portion and four flap-forming portions extending from the central portion, with score-lines defining the boundaries between the central portion and flaps, and one of the flaps having an address-viewing window in an area adapted to provide, with the underlying flap, a pocket for a license certificate having a mailing legend viewable through said window; said blank having a suitable remoistening adhesive on at least one of said pocket-forming flaps to define the boundaries of said pocket, permitting the enclosure of said certificate; and two of said flaps at opposite side edges of said central portion being of sufficient length respectively to be retained when said side-flaps have been folded over the plates and said pocket-forming flaps have been folded over said side flaps and adhered to each other, confining said side-flaps non-adhesively.

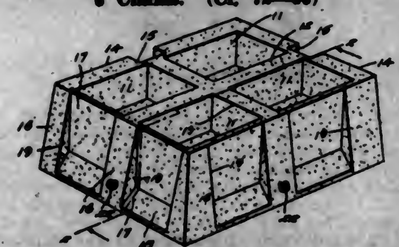
2,104,253
COMPOSITION OF MATTER FOR ARTIFICIAL STONE
Garabed Paghchesian, Waverley, Mass.
No Drawing. Application October 27, 1936, Serial No. 107,262
2 Claims. (Cl. 106—24)

1. A new composition of matter for making stone comprising asbestos fibres, Portland cement, coke ash liquor, and coriander seed.



2,104,254
DRAFTSMAN'S INSTRUMENT
Jack V. Rich, Chicago, Ill.
Application July 23, 1936, Serial No. 92,110
2 Claims. (Cl. 33—93)

1. A drafting instrument of the kind described comprising a triangle body, an elongated member comprising a pair of arms angularly related to each other, one of said arms overlapping and the other extending along one edge of the triangle body, a pivot extending through and connecting the overlapping arm with said body, said overlapping arm providing a groove or the like adapted as a pointer and the upper face of said body providing an arcuate scale for cooperation with the pointer, said pivot having its lower end countersunk within the body and the arm extending along one edge of the body having its lower face in the same plane as the lower face of the body whereby rotation of the pointer along the arcuate scale correspondingly moves the other arm over the surface on which the triangle body is positioned.



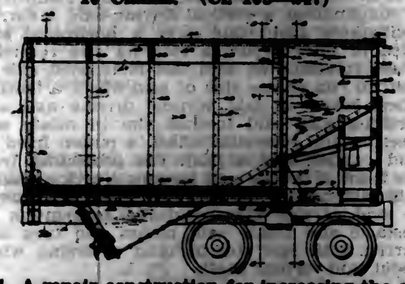
2,104,255
SHAFT SEALING MEANS
Herbert E. Rupp, Springfield Township, Richland County, and James O. Germaan, Mansfield, Ohio
Application December 18, 1936, Serial No. 116,612
4 Claims. (Cl. 286—7)

1. A sealing means for a shaft extending through a housing, comprising, in combination with the shaft and housing, a liner for that part of the housing through which the shaft extends, enlarging shoulders provided on the shaft at opposite ends of the liner, washer rings between and oppositely bearing against said shoulders, a spacing member between said washer rings, the said spacer member, washer rings and shoulder provisions being together rotatable with the shaft, conical wear rings between and oppositely pressed against said washer rings with their conical faces disposed inwardly, opposed conical flexible rings between and oppositely pressed against said wear rings with their conical faces radially overriding and frictionally locking into contact with the conical faces of the former and with their peripheries also fitting and pressed into frictional anti-rotational bind against the inner surface of the housing liner, retaining rings between said

flexible rings oppositely pressed backingly thereagainst, and a coil spring between said retaining rings oppositely pressing said pressed members, the said wear rings being provided with serrations in their conical faces with which the flexible rings engage to lock the two together.

2,104,256
ROOF AND FLOOR BLOCK
Charles L. Sanford, Meadville, Pa.
Application February 16, 1937, Serial No. 126,067
6 Claims. (Cl. 72—66)

1. A floor or roof block having one face at right angles to the bottom of the block and formed with a vertical recess in this face opening on the upper face of the block but terminating short of the bottom face of the block, the opposite face of the block being inclined downwardly and forwardly, and a tie extending through the block having an upwardly extending end disposed in the recess, the opposite end of the tie having an eye exposed on the inclined face of the block.

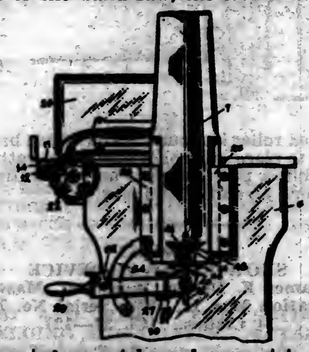


2,104,257
CONVERSION PRODUCTS OF DYESTUFFS AND PROCESS OF MAKING SAME
Fritz Straub and Hans Mayer, Basel, Switzerland, assignors to the firm of Society of Chemical Industry in Basle, Basel, Switzerland
No Drawing. Application August 10, 1936, Serial No. 95,235. In Switzerland August 17, 1935
9 Claims. (Cl. 260—11)

1. Conversion products of dyestuffs containing metal in complex union, obtained by heating in an aqueous medium basic dyestuffs with dyestuffs that contain metal in complex union and are free from sulfo-groups and carboxyl-groups, which conversion products are particularly suitable for dyeing masses varied tints of very good fastness properties.

2,104,258
PRODUCTION OF SOLUTIONS OF RUBBER AND SUBSTANCES SIMILAR TO RUBBER
Jules Trebaux, Basel, Switzerland, assignor to firm J. R. Geigy A. G., Basel, Switzerland
No Drawing. Application June 15, 1935, Serial No. 26,865. In Germany June 29, 1934
7 Claims. (Cl. 134—17)

1. A process for the production of solutions of rubber and substances similar to rubber, such as gutta-percha, balata and the like by causing crude rubber or similar substance to react in presence of a solvent with an acid agent, consisting in carrying out such reaction, with a small proportion of a sulphinic acid at a moderate temperature so as to realise a light to colorless solution of low viscosity.



2,104,259
RAILWAY CAR
William E. Wine, Toledo, Ohio
Application November 20, 1935, Serial No. 50,764
10 Claims. (Cl. 105—247)

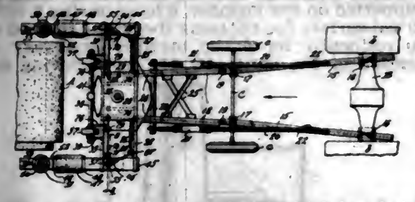
1. A repair construction for increasing the capacity of hopper cars having outside side stakes by providing the existing underframe of such cars with sides having inside side stakes, including in combination, side sills of the existing underframe of the car respectively having substantially vertical portions, a transverse load carrying member of the existing underframe having its ends respectively terminating at the vertical portions of the side sills, side sheets having vertical main body portions disposed outwardly of the ends of the load carrying member and said portions of the side sills, the lower portions of the side sheets being inclined downwardly and inwardly and terminating in flanges secured to the vertical portions of the side sills, and side stakes adjacent the ends of said load carrying member, each of said side stakes having angularly disposed plate portions, one of said plate portions being secured to the vertical and inclined portions of an adjacent side sheet and to the inner face of the vertical portion of the adjoining side sill and the other of said plate portions extending inwardly from the side sheets and being provided adjacent its lower end with an enlargement projecting inwardly beyond the vertical portion of the adjacent side sill and rigidly secured in overlapping relation to one side of said load carrying member.

2,104,260
MEAT CUTTING AND SLICING MACHINE
Carl G. Rice, Marblehead, Ohio
Original application February 27, 1936, Serial No. 66,071. Divided and this application January 28, 1937, Serial No. 122,324
2 Claims. (Cl. 143—27)

1. In a sawing machine, a band saw, a pair of wheels for supporting the band saw, means for rotating one of the wheels to move the saw over the wheels, a base, a member movably supported on the base, one of the wheels rotatably supported in the base, and the other of the wheels rotatably supported on the member, a spring pressed rod supported on the member, a lever having a cylindrical surface for engaging the spring pressed rod to resiliently move the member and vary the tension of the band saw, the lever having gear

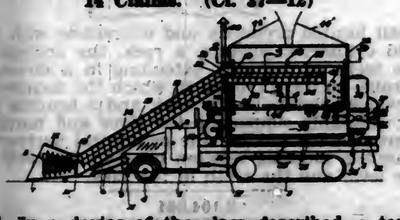
teeth located arcuately and concentric with the said cylindrical surface, a rack, the centers of the teeth of the rack extending in a direction parallel to the direction in which the member is movable relative to the base, and a bearing pin for rotatably supporting the lever and movable therewith for guiding the cylindrical surface to maintain meshing relation between the teeth of the lever and the teeth of the rack.

2,104,261
ENVELOPE VANITY
Beatrice Gwendolyn Bryant, Oklahoma City, Okla.
Application July 1, 1937, Serial No. 151,466
5 Claims. (Cl. 132—32)



1. An envelope made of material that is not porous to face powder, two short lines of stitching across the envelope, each line beginning a short distance above a lower corner and extending downwardly a short distance in a diagonal direction and not to the bottom of the envelope so that a circular puff may be supported upon the lines of stitching within the envelope while a loose powder compartment is formed in the portion of the envelope below the stitching.

2,104,262
PIPE ROLLING DEVICE
William F. Cummings, Buffalo, N. Y., assignor to Great Lakes Concrete Pipe Co. Inc., Buffalo, N. Y.
Application June 9, 1936, Serial No. 84,261
21 Claims. (Cl. 214—1)



2. A device for rolling a pipe including a roller

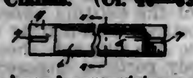
arranged to engage the outer cylindrical surface of a pipe, a roller for engaging the inner cylindrical surface of a pipe, and a movable bracket mounted on said device and on which said last

mentioned roller is mounted and which bracket is movable to place said roller into an operative position within a pipe and into an inoperative position beyond an end of said pipe.

2,104,263
SNOW REMOVAL DEVICE
James E. Devlin, Worcester, Mass.
Application May 11, 1936, Serial No. 78,962
14 Claims. (Cl. 37—12)

4. In a device of the class described, a tank, means within the tank for melting snow, and means for discharging snow and ice in small particles to the tank, said last means including a perforated pipe within the tank, and a feed screw within the pipe.

2,104,264
HOLDER FOR STICK MATERIAL
Charles N. Ceryell, Mamaroneck, N. Y.
Application October 19, 1931, Serial No. 569,662
7 Claims. (Cl. 206—56)

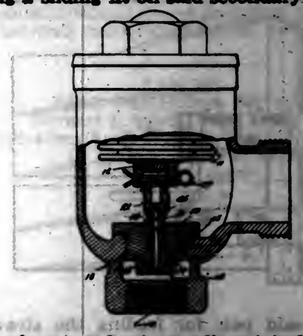


5. In a holder, a holder tube having a bottom end wall provided with an opening, an operating rod passing through said opening and disposed within said holder tube at one side thereof, a U-shaped guide within said holder tube between said operating rod and the other side of said holder tube, a carrier within said guide, a flexible band between said guide and said holder tube and connected at one end to said carrier and at the other end to said operating rod, said band being bent to pass down one side of said guide and up the other.

2,104,265
STEERABLE AND REVERSIBLE TOY VEHICLE
Karl Fuchs, Nuremberg, Germany
Application August 17, 1936, Serial No. 96,449
In Germany August 21, 1935
4 Claims. (Cl. 46—211)

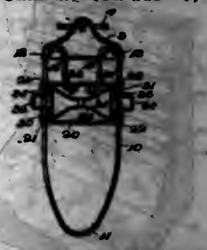
1. A reversible and steerable toy, comprising in combination, a vertical driving axle, a carrier oscillatable about said axle, a horizontal axle fixed in said carrier, a steering and reversing wheel rotatable on said last-mentioned axle, a toothed rim on one side of said wheel, a toothed wheel keyed on said vertical driving axle and meshing with said toothed rim to rotate said steering and reversing wheel, a pinion fixed on said carrier, and a push rod projecting from the front of the toy and forming a rack engaging said pinion, said rod adapted to shift relatively to said carrier when said rod encounters an obstacle and rotate said pinion and turn said carrier with said steering and reversing wheel about said vertical shaft.

2,104,266
BULLETIN BOARD
Tolbert F. Gossett, Birmingham, Ala.
Application August 25, 1936, Serial No. 97,841
2 Claims. (Cl. 40—63)



1. A bulletin board comprising a back board, a notice holder embodying an elongated plate having longitudinally disposed open slots in its opposite end portions, a headed member engaged with the back board, the open slot in one portion of the notice holder allowing said notice holder to be slid into effective engagement with the headed member, a shank extending out from the back board and extending through the slot in the opposite end portion of the notice holder when the notice holder is in effective engagement with the headed member, said shank having a part when in one position holding the adjacent end portion of the notice holder in place upon the back board, said part when in a second position offering no obstruction to the desired passage of the shank through the slot.

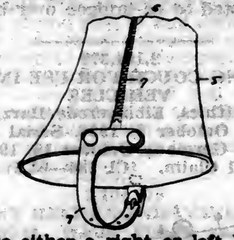
2,104,267
RADIATOR SIPHON TRAP
Edgar N. Grogan, Raleigh, N. C.
Application November 11, 1935, Serial No. 110,382
3 Claims. (Cl. 236—56)



3. In a valve of the character described, a valve seat provided with an axial socket opening at the top of the seat and a threaded opening at the bottom of the seat, a sepondary valve tube having an open end externally threaded and

threadedly engaged in the opening of the valve seat, said tube being closed at its opposite end and provided adjacent said opposite end with a lateral minute intake opening, and a valve stem having a sliding fit on said secondary valve tube,

said valve stem having a diametrically enlarged portion to engage with said seat, and also having a lateral minute port aligning with the port in the secondary valve tube when the valve stem is in seated position.

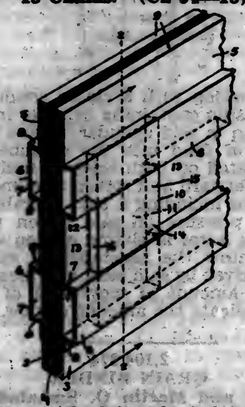


2,104,268
APPAREL SUPPORTING DEVICE
Harry Curtis Guyer, Charleston, W. Va.
Application June 19, 1937, Serial No. 149,240
15 Claims. (Cl. 241—7)

1. An apparel supporting device comprising a head member adapted to be attached to an article of apparel worn by a user, a resilient cord member directly connected to said head member and having an intermediate depending loop portion adapted to be directly attached to a second article of apparel worn by the user, and means directly connected to the two ends of said cord member and operable to move said ends with respect to the head member to thereby vary the distance between the intermediate depending loop portion of the cord and the head member.

2,104,269
ADJUSTABLE STRAP FOR LEGGINGS, GAITERS AND THE LIKE
Louis Horowitz, Brooklyn, N. Y., assignor of one-half to Abraham Wilkow, Brooklyn, N. Y.
Application September 23, 1936, Serial No. 102,180
3 Claims. (Cl. 36—3)

1. In combination, a legging having one part of a pair of snap fastener sets secured thereto adjacent its lower edge, said snap fastener parts being arranged in spaced relation and a strap having one end removably attached to the side of the legging opposite from said snap fastener parts and adapted to extend under the arch of the foot, an angular extension on the other end of said strap and having the other parts of said snap fastener sets secured thereto adjacent the ends of said angular extension, said last mentioned fastener parts being capable of securing



the strap to either a right or left legging each of which has its fastener elements correspondingly arranged for selectively positioning the strap forwardly or rearwardly with respect to the arch of the wearer

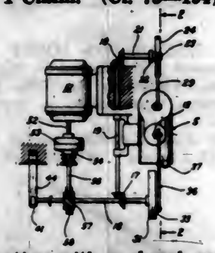
---

2,104,270
METHOD AND MEANS FOR SOLDERING, WELDING AND COATING METALS
Erik Harry Eugen Johansson, Stockholm, Sweden
No Drawing. Application November 15, 1933, Serial No. 698,073. In Sweden October 5, 1932
1 Claim. (Cl. 148—26)

A method of metallizing objects of aluminum or its alloys in which cadmium and zinc are liberated in melted condition during the working process as metallizing metals from a mixture supplied to the surface of the object, said mixture containing haloid salts of cadmium and zinc and a fluoride of an alkaline earth metal, said salts of cadmium and zinc being in such a proportion by weight that the metal melt obtained by reaction contains cadmium and zinc in the approximate ratio 1:3.

2,104,271
EXPANSION JOINT
Herbert C. Jussen and Vincent V. Malcom, Mariemont, Ohio, assignors to The Philip Carey Manufacturing Company, a corporation of Ohio
Application July 7, 1936, Serial No. 89,337
15 Claims. (Cl. 94—18)

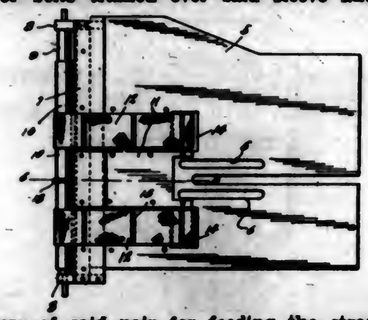
1. An elongated plate adapted to be inserted between a joint strip and a paving section comprising a longitudinally disposed projecting means on one side adapted to contact with the



paving section and a complemental reservoir oppositely disposed to the projection on the other side, a transversely disposed projecting means and a complemental reservoir, both of said reservoirs adapted to be bridged over by the joint strip.

2,104,372
RECLINING COUCH FOR USE IN MOTOR VEHICLES
August Matthies, Elbingerode/Harz, Germany
Application October 6, 1936, Serial No. 104,264
In Germany October 19, 1934
1 Claim. (Cl. 280—81.5)

A reclining couch for motor vehicles, comprising in combination a reclining surface, pairs of mutually displaced swivel rollers mounted one pair on each side of said surface to allow the couch to be moved forwards, backwards and sideways when in use, angle pieces carrying said pairs of rollers adapted to be reversibly secured to said reclining surface to support said surface on one or other of the rollers of said pairs of rollers to adjust the inclination of said surface, a head rest adjustable on one end of said surface, wing nuts adapted to secure said head rest in its adjusted position, and a hitch device secured to the other end of said surface irrespectively of its angle of inclination.



2,104,373
MEASURING APPARATUS
Charles I. McNeil, Bloomfield, and Raymond T. Zwack, East Orange, N. J., assignors to Eclipse Aviation Corporation, East Orange, N. J., a corporation of New Jersey
Application April 6, 1936, Serial No. 73,018
1 Claim. (Cl. 73—194)

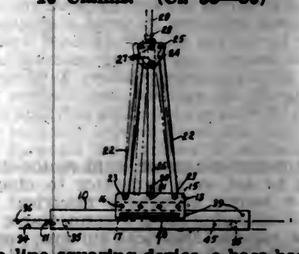
In combination with a closed conduit, a fluid receiving, piston containing cylinder in said conduit, a piston in said cylinder, means for directing a flow of fluid into the chambers of said cylinder located on both sides of said piston, to resist both forward and return movement of said piston, means including a part operable to apply a constant pressure on said piston to tend to continue the latter in sliding motion within said cylinder against the resistance of said fluid, a controller driven by said part, and means responsive to the amount of movement of said controller to indicate the amount of flow along said conduit.

2,104,374
GRAIN BINDER
John Olson and Martin O. Smaaladen, Aneta, N. Dak.
Application April 29, 1937, Serial No. 139,818
3 Claims. (Cl. 56—470)

1. In a grain binder, and in combination, a roller, a laterally shiftable deck, a sleeve mounted on the roller to turn therewith and to shift longitudinally of said roller, a pair of laterally spaced rollers mounted on said deck, endless conveyor belts trained over said sleeve and the

rollers of said pair for feeding the straws of grain evenly to the packers of the binder, and interengaging means on the deck and said sleeve whereby said deck and sleeve will shift laterally in either direction.

2,104,375
DICE GAME ACCESSORY
James M. Perry, Lake Charles, La.
Application June 4, 1936, Serial No. 83,584
8 Claims. (Cl. 273—148)

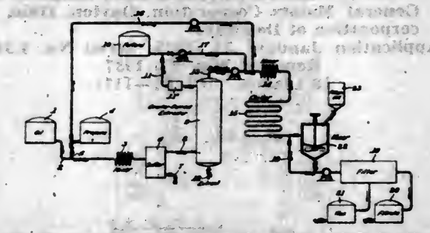


4. A dice table fence having a surface exposed to impact of dice thrown by players; said surface provided with a non-planar surface to vary the direction of rebound of the dice.

2,104,376
MUFFLER
Herbert S. Powell, Utica, N. Y.
Application May 1, 1936, Serial No. 77,410
6 Claims. (Cl. 181—53)

4. A muffler comprising a casing having walls and partitions dividing the internal space in the casing into a plurality of separate compartments, and a plurality of tubes extending through said compartments for directing the exhaust gases through the casing, each of said tubes having a portion thereof formed by a spirally wound sheet having a plurality of projections thereon for spacing apart the overlapping portions of the sheet, said spirally wound sheets providing communication between each compartment and a different tube.

2,104,377
LINE SQUARING DEVICE
Herbert L. Prout, Villa Park, Ill.
Application April 17, 1937, Serial No. 137,538
10 Claims. (Cl. 33—86)

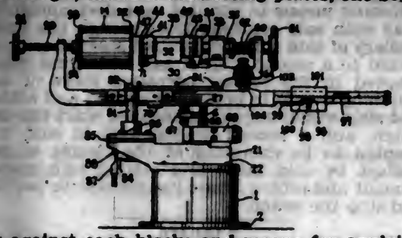


5. In a line squaring device, a base bar, an indicator carriage removably secured to said bar, and an indicator bar movably associated with said carriage by rock bars and adapted to indicate a true right angle between a line secured to said indicator bar and a line secured to said base bar.

2,104,378
OUTPUT DOSE METER
Herbert Pychlau, Freiburg, Germany
Application September 22, 1933, Serial No. 690,703
In Germany September 24, 1932
10 Claims. (Cl. 250—84)

1. An instrument for the determination of the intensity of Röntgen and other ionizing rays, comprising in combination a transformer consisting of two circuits the first including the transformer primary and the second the transformer secondary adapted to be energized by said primary, said transformer secondary consisting of a high voltage section and a low voltage section, a valve in the high voltage section of the circuit including said secondary, a condenser adapted to be charged by said valve, an ionization chamber connected with the high voltage section of said secondary, an electrode extending into said chamber and adapted to receive current from said chamber, an electromagnetic relay comprising two contact plates connected with said electrode and an earthed resiliently mounted rocker blade adapted to be attracted by said contact plates, a contact adapted to be closed by said rocker blade, a switching means connected to the low voltage section of said transformer secondary, a wire connecting said contact with one step of said switching means, an earthing line connected to said switching means, an electromagnetic relay, comprising an armature and adapted to close and to interrupt said earthing line, a stop watch control element adapted in inoperative position to close said earthing line and during the first stage of the operation of said switching means to connect said electromagnetic relay with said earthing line through the intermediary of said wire, an earthed magnet coil connected to a second step of said switching means adapted in the second operation stage of said switching means to become energized and attract said stop watch control element to start the stop watch, and a second magnet coil in said wire adapted to be energized at the closing of said contact by said blade and attract said control element and return it into its inoperative position and stop the watch.

2,104,379
SOLVENT REFINING OF MINERAL OIL
Daniel Stryker, White Plains, and James H. Grahame, Mount Vernon, N. Y., assignors to The Texas Company, New York, N. Y., a corporation of Delaware
Application May 10, 1934, Serial No. 724,852
1 Claim. (Cl. 196—18)

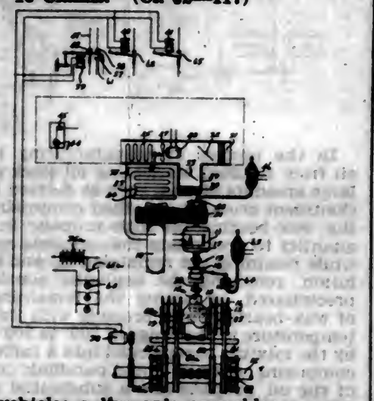


In the process of manufacturing lubricating oil from residual lubricating oil stock containing large amounts of wax, such as derived from Mid-Continent crude, the method comprising diluting the wax-bearing oil with propane in sufficient quantity to precipitate the asphaltic constituents while retaining the remaining oil and wax in solution, removing the asphaltic constituents so precipitated, extracting the remaining solution of wax-bearing oil in propane with furfural at a temperature in the range of 200° to 300° F. whereby the mixture is separated into a raffinate phase comprising wax and liquid paraffinic constituents of the oil, propane and a substantial amount of furfural, and an extract phase comprising naphthenic constituents dissolved in furfural, removing the extract phase, adding a further quantity of a non-hydrocarbon solvent having anti-solvent action for wax, to said raffinate phase to form with the retained furfural and propane a solvent mixture exerting selective action as between wax and oil at a temperature of around 0° F., chilling the resultant mixture to precipitate solid hydrocarbons, removing the solid hydrocarbons so precipitated in the presence of the entire amount of anti-solvent liquid, including that initially contained in the raffinate phase, and recovering the solvent from the resulting dewaxed oil.

2,104,380
CENTRIFUGAL CASTING MACHINE
Enrique G. Touceda, Albany, N. Y., assignor to Consolidated Car-Heating Company, Inc., Albany, N. Y., a corporation of New York
Application May 5, 1934, Serial No. 724,005
5 Claims. (Cl. 22—65.1)

1. In an electric furnace, in combination: a crucible formed as an elongated trough, open at each end and formed of refractory electrical conducting material; refractory electrical conducting blocks, one applied removably to either end of the trough and serving to close the same at one end while the other block has an orifice to

permit discharge of fused material endwise from the trough; metallic conducting plates, one bearing against each block; and means for applying a difference of potential to the metallic conducting plates.



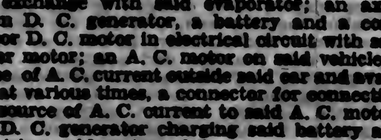
2,104,281

REFRIGERATING APPARATUS

Donald F. Alexander, Charles L. Paulus, and Charles F. Henney, Dayton, Ohio, assignors to General Motors Corporation, Dayton, Ohio, a corporation of Delaware

Application January 31, 1935, Serial No. 4,346
Renewed May 21, 1937
18 Claims. (Cl. 62—117)

1. In a vehicle; a live axle assembly; a compressor; a unitary motor-generator; a battery; torque transmitting means from said live axle assembly to said compressor and motor-generator and between said compressor and motor-generator; control means, automatically responsive to vehicle running conditions, to cause said motor-generator, to act as a motor energized from said battery, to drive said compressor independently of said live axle assembly when said vehicle is standing and, when said vehicle is in motion, to cause said live axle assembly to drive, through said torque transmitting means, said compressor and said motor-generator, said motor-generator arranged to act as a generator to charge said battery, and the generating field of said motor-generator being energized in a circuit in parallel with said battery.



2,104,282

REFRIGERATING APPARATUS

Donald F. Alexander, Charles F. Henney, and Charles L. Paulus, Dayton, Ohio, assignors to General Motors Corporation, Dayton, Ohio, a corporation of Delaware

Application March 4, 1937, Serial No. 129,624
Renewed September 16, 1937
16 Claims. (Cl. 62—117)

1. In a vehicle; a live axle assembly; a compressor; a unitary motor-generator; a battery; torque transmitting means from said live axle assembly to said compressor and motor-generator and between said compressor and motor-generator; control means, automatically responsive to vehicle running conditions, to cause said motor-generator, to act as a motor energized from said battery, to drive said compressor independently of said live axle assembly when said vehicle is standing and, when said vehicle is in motion, to cause said live axle assembly to drive, through said torque transmitting means, said compressor and said motor-generator, said motor-generator arranged to act as a generator to charge said battery, a source of outside electrical current, a current-changing device connectable to said source of outside electrical current, connecting means for connecting said source to said current-changing device and for connecting said current-changing device to said battery and motor-generator, and means for modifying said control means when said current-changing device is operating to cause said motor-generator to act as a motor to drive said compressor when said car is in motion.

2,104,283

REFRIGERATING APPARATUS

Robert E. Cassler and Donald F. Alexander, Dayton, Ohio, assignors to General Motors Corporation, Dayton, Ohio, a corporation of Delaware

Application May 20, 1937, Serial No. 143,843
11 Claims. (Cl. 62—117)

3. In combination, a railway car or the like; an air conditioning system on said car including a compressor, a condenser, and an evaporator in refrigerant flow relationship; a blower and blower motor, said blower circulating air in thermal exchange with said evaporator; an axle-driven D. C. generator, a battery and a compressor D. C. motor in electrical circuit with said blower motor; an A. C. motor on said vehicle, a source of A. C. current outside said car and available at various times, a connector for connecting said source of A. C. current to said A. C. motor; said D. C. generator charging said battery and energizing said motor while said car is enroute and said A. C. connector is not connected and provisions whereby said A. C. motor provides energy for driving the compressor motor intermittently in response to refrigeration demand and energizing said blower motor and for charging the battery independently of refrigeration demand when said connector is connected to said source of A. C. current.

2,104,284

METHOD OF MANUFACTURING ROOFING ELEMENTS

William A. Harris, Overland, Pa., assignor to The Texas Company, New York, N. Y., a corporation of Delaware

Application July 25, 1936, Serial No. 92,475
4 Claims. (Cl. 91—68)

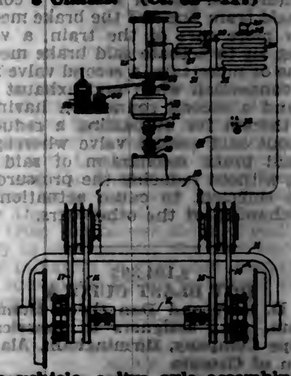
1. A method of manufacturing roofing material which comprises applying a coating of asphalt to one face of a sheet of prepared base material, applying a layer of granular material over said coated face, scoring the surface of said sheet to form furrows therein and expose asphalt in the underlying coating, superimposing a second layer of asphalt upon the layer of granular material, and applying sufficient pressure to the coated surface to force asphalt from the superimposed coating through the furrows to contact and adhere to the asphalt in the underlying coating.

2,104,285

RADIATOR CLEANING COMPOSITION

Walderse B. Hendrey, Beacon, N. Y., assignor to The Texas Company, New York, N. Y., a corporation of Delaware

No Drawing. Application August 27, 1934, Serial No. 741,742
3 Claims. (Cl. 87—8)



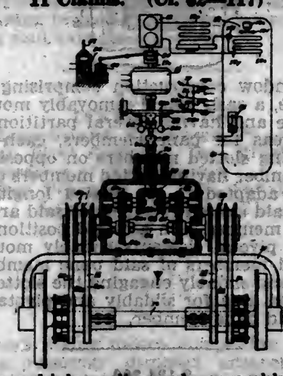
2. A radiator cleaning composition consisting of about equal parts by weight of kerosene and sodium metasilicate, and about 0.5–2% by weight of sodium bichromate on the weight of the said composition.

2,104,286

REFRIGERATING APPARATUS

Harry B. Hull, Dayton, Ohio, assignor to General Motors Corporation, Dayton, Ohio, a corporation of Delaware

Application January 31, 1935, Serial No. 4,344
8 Claims. (Cl. 62—117)



1. In a vehicle, a live axle assembly; a compressor; a unitary motor-generator; a battery; torque transmitting means from said live axle assembly to said compressor and motor-generator and between said compressor and motor-generator; control means, automatically responsive to vehicle running conditions, to cause said motor-generator to act as a motor energized from said battery, to drive said compressor independently of said live axle assembly when said vehicle is standing and, when said vehicle is in motion, to cause said live axle assembly to drive, through said torque transmitting means, said compressor and said motor-generator, said motor-generator arranged to act as a generator to charge said battery, said compressor having a plurality of pistons; and means for varying the number of pistons in operation.

2,104,287

REFRIGERATING APPARATUS

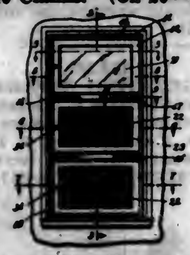
Harry B. Hull and Donald F. Alexander, Dayton, Ohio, assignors to General Motors Corporation, Dayton, Ohio, a corporation of Delaware

Application January 31, 1935, Serial No. 4,345
11 Claims. (Cl. 62—117)

1. In a vehicle, a live axle assembly; a compressor; a unitary motor-generator; a battery; torque transmitting means from said live axle assembly to said compressor and motor-generator and between said compressor and motor-generator; control means, automatically responsive to vehicle running conditions, to cause said motor-generator to act as a motor energized from said battery, to drive said compressor independently of said live axle assembly when said vehicle is standing and, when said vehicle is in motion, to cause said live axle assembly to drive, through said torque transmitting means, said compressor and said motor-generator, said motor-generator arranged to act as a generator to charge said battery; and mechanical means, automatically maintaining the same direction of current generated by said motor-generator when the vehicle travels in either direction.

2,104,338

CUP MOUTHPIECE FOR BRASS INSTRUMENTS



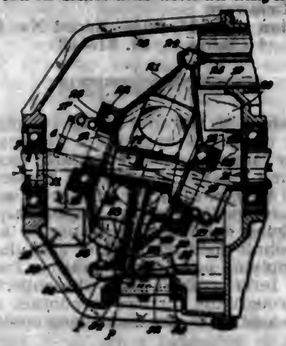
Arthur A. Lanow, Silver Lake, Minn.

Application June 4, 1936, Serial No. 83,463
5 Claims. (Cl. 84—396)

1. A cup mouth piece for wind musical instruments, the interior of which in its upper portion is inwardly bulging so that it comes closer to the rim of the mouth piece than does the lower surface of said cup, the interior of the rim of said cup being circular and concentric to the longitudinal axis of the cup.

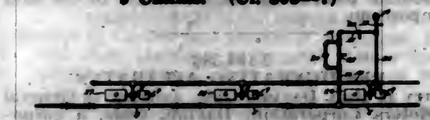
2,104,289
WINDOW CONSTRUCTION
John M. Meck, New York, N. Y.
Application May 18, 1937, Serial No. 143,255
10 Claims. (Cl. 20—42)

1. A window construction comprising a window frame, a sash frame removably mounted in said frame and having several partitions dividing off areas for pane members, each of said areas having slotted members on opposite sides, a pane member having slotted members on opposite sides adapted to be located longitudinally adjacent said slotted members of said area when said pane member is in a closed position in said area, and pivotal elements slidably mounted in the slotted members of said pane members and pivotally and slidably engaging the slotted members of said area for slidably and pivotally supporting said pane member.



2,104,290
LIQUID PRESSURE REGULATING VALVE
Thomas W. Murphy, Bala-Cynwyd, Pa., assignor to Monarch Manufacturing Works, Inc., Philadelphia, Pa., a corporation of Delaware
Application October 2, 1936, Serial No. 103,764
13 Claims. (Cl. 137—153)

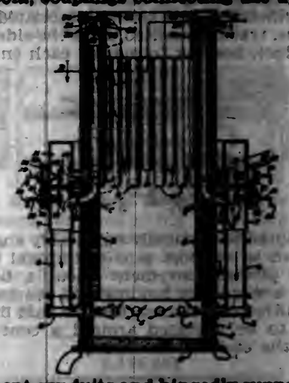
1. A liquid fuel pressure regulating valve comprising a casing, an inlet port, a burner port and a by-pass port, a sleeve removably mounted in said casing and providing an annular space with the casing, a spring depressed piston movable in said sleeve, a valve controlling said burner port and operable through the liquid pressure acting on said piston, and means for by-passing liquid fuel at a predetermined pressure.



2,104,291
SWASH MECHANISM
Charles Benjamin Redrup, Bristol, England, assignor to The Bristol Tramways & Carriage Company Limited, Bristol, England, a British Company
Application December 12, 1936, Serial No. 115,592
In Great Britain December 21, 1935
13 Claims. (Cl. 74—60)

1. Swash-mechanism comprising, in combination, a swash-member borne upon a crank rotatable about a crank-shaft axis, a stabilizer having a part which is constrained always to move in a plane containing the crank-shaft axis, means for oscillating said part of said stabilizer about the point of intersection of the crank-axis and the crank-shaft axis with an amplitude equal

to half the amplitude of oscillation of the swash-member about that point and means for restraining relative rotational movement between the swash-member and said part of the stabilizer about the crank-shaft axis.



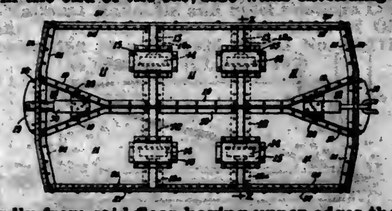
2,104,292
CONTROL FOR AUTOMATIC AIR BRAKE APPARATUS
Michael Reynolds, Ottumwa, Iowa
Application September 26, 1935, Serial No. 42,199
9 Claims. (Cl. 303—7)

1. In an automatic air brake system, the combination with a train line and the brake mechanism of individual cars of a train, a connection between said train line and the brake mechanism of one or more cars of the train, a valve for exhausting air to actuate said brake mechanism of said one or more cars, a second valve for closing said connection when said exhaust valve is opened, and a second connection having a restriction therein for by-passing a reduced flow of air about said second valve whereby to recharge said brake mechanism of said one or more cars without reducing the pressure in said train line sufficient to cause actuation of the brake mechanism of the other cars.

2,104,293
HOT BLAST CUPOLA
Clarence D. Barr and Dan Owen Holmes, Birmingham, Ala., assignors to American Cast Iron Pipe Company, Birmingham, Ala., a corporation of Georgia
Application August 17, 1935, Serial No. 36,744
10 Claims. (Cl. 266—14)

1. In a hot blast cupola having a chamber to receive a charge of materials to be melted therein and tuyères communicating with said chamber adjacent its lower end to deliver blasts of air thereto to create a melting zone at the bottom of the chamber, means to preheat the air delivered by said tuyères to said chamber comprising bustle pipes into which the air is delivered under pressure, conduits leading from said bustle pipes upwardly within the cupola, a second set of conduits leading downwardly in said cupola, couplings connecting the upper ends

of adjacent conduits and hingedly supporting the same at their tops within said cupola, and bustle pipes communicating with said second conduits and said tuyères.



2,104,294
HEATING AND VENTILATING OF PASSENGER CARS
Edward A. Halbleib, Rochester, N. Y., assignor to General Motors Corporation, Rochester, N. Y., a corporation of Delaware
Application March 7, 1935, Serial No. 9,729
3 Claims. (Cl. 98—2)

3. In an automobile body, a dash, front and rear seats, a blower secured to the dash, a housing secured to the blower, a heating element in the housing, shutters on the housing to control the flow of air over the heating element to the blower, a cowl ventilator, a conduit connecting the cowl ventilator with the housing between the heating element and the blower to supply fresh outside air to the blower, a cover to control the flow through the ventilator, a plurality of conduits leading from the blower along opposite sides of the body to substantially the rear seat, and adjustable radiators in each last mentioned conduit at convenient points to control the flow of air therefrom.

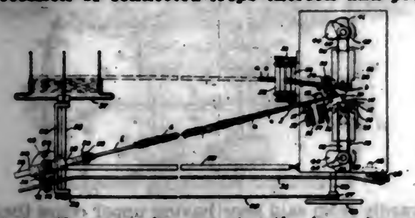
2,104,295
MINE CAR
Wilbur D. Hockensmith, Jr., Irwin, Pa.
Application May 28, 1931, Serial No. 540,610
25 Claims. (Cl. 105—264)

1. A mine car comprising a pair of axles, center sills extending longitudinally of said car and supported on said axles, the ends of said center sills at each end of the car being flared outwardly, a floor suspended from said center sills, wheels on said axles extending through openings formed in said floor, hoods covering the wheel openings on said floor, bumping members between the flared ends of said center sills, a draft bar having its outer end of arcuate section projecting from the end of the car, side walls extending upwardly from said floor having upper edges thereof projecting inwardly, and means for removably securing said axles to said floor.

2,104,296
INKING DEVICE
David Hoppenstand, Pittsburgh, Pa., assignor to Hopkan Rivet Company, Inc., Pittsburgh, Pa., a corporation of Pennsylvania
Application February 11, 1935, Serial No. 6,000
6 Claims. (Cl. 197—171)

2. A web inking device comprising an inking roller, a reservoir disposed adjacent thereto adapted to feed ink to the roller for delivery to a web moving therepast, and means to prevent reverse rotation of the roller on reversal of said web.

2,104,297
CYLINDER LOCK
Norman B. Hurd, Newington, Conn., assignor to The American Hardware Corporation, New Britain, Conn., a corporation of Connecticut
Application May 6, 1937, Serial No. 141,045
10 Claims. (Cl. 70—364)



1. In a cylinder lock, a cylinder body, a rotatable plug therein having a longitudinal key slot in one side, locking tumbler sections in said plug and body, a plug blocking tumbler supported in a passage in said body for reciprocal movement only, the end of said blocking tumbler being beveled off to be engaged by one edge of said key slot to be repressed thereby.

2,104,298
AUTOMATIC LOOP FEED FOR MACHINES FOR APPLYING ORNAMENTATION TO HEADER LOOPS
Hugo A. Klahre, Teaneck, N. J., assignor to Consolidated Trimming Corporation, New York, N. Y., a corporation of New York
Application July 20, 1935, Serial No. 32,289
17 Claims. (Cl. 28—2)

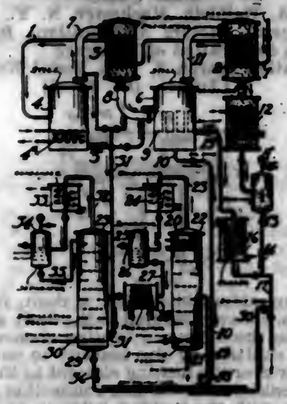
1. An automatic loop feeding member for ornamentation making and applying machines, said

member consisting essentially of an elongated reciprocable rod adapted to support and carry a succession of connected loops thereon and pro-

vided with means for engaging the loops in succession and delivering them to the machine at each forward reciprocation of the feed member, and means for reciprocating said member.

2,104,399
CIRCUIT CONTROLLING DEVICE
Clarence W. Kuhn, Milwaukee, Wis., assignor to Cutler-Hammer, Inc., Milwaukee, Wis., a corporation of Delaware
Application November 26, 1934, Serial No. 754,749
7 Claims. (Cl. 200—111)

1. In a starting relay for alternating current motors, in combination, an insulating support comprising a horizontally arranged body portion having an associated vertically arranged spool on the under side thereof, cooperating stationary and movable contacts mounted upon the upper side of said body portion, said movable contact being movable between given extreme positions, a winding carried by said spool, a plunger for said winding movable vertically within an opening in said spool, said plunger having an enlarged weight projection on the lower end thereof and being suspended from said movable contact to normally hold the latter in one extreme position, means for moving said movable contact into its other extreme position prior to full movement of said plunger into a given attracted position, said plunger being movable with respect to said contact to permit full movement thereof into its attracted position and a plurality of removable shims associated with said plunger and arranged between the weight projection on the lower end thereof and the lower end of said spool, said shims providing for adjustment of the attracted position of said plunger.



2,104,400
DUST SUCTION DEVICE FOR CLEANING FUR CLOTHING, ETC.
Stephen Lanyi, Passaic Park, N. J.
Application May 23, 1936, Serial No. 81,349
3 Claims. (Cl. 15—6)

1. In a dust suction device for furs, clothing, etc. including an inverted saucer-like casing adapted to be attached on a table and having a top opening, a plate having a longitudinal slot closing said opening, an air duct within said casing and extending across said slot, a blower mounted within the casing, a combination brush and vibrator within said duct and adjacent said slot for brushing and beating furs, clothing, etc. passed over the top of said casing, and a means for driving said combination brush and vibrator; means for adjustably mounting the brush and vibrator, comprising a shaft, a pair of spaced hollow cylindrical end sections mounted on said shaft ends, tracks mounted upon the side walls of said air duct, bearing frames at each end of said

shaft adapted to vertically adjustably engage said tracks and to support said cylindrical end sections for pivotal movement about a horizontal axis, and a means for holding said bearing frames in their adjusted position to allow said brush and vibrator to be adjusted around a center intermediate the ends of the brush.

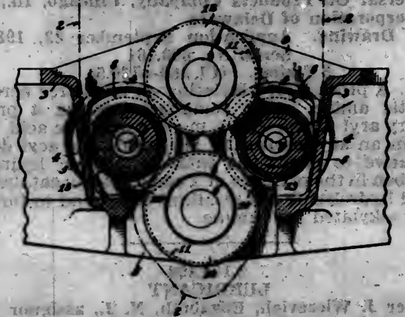
2,104,401
PROCESS FOR SOLVENT TREATING OILS AND RECOVERING SOLVENT
Eger V. Murphree and Edward D. Reeves, Baton Rouge, La., assignors to Standard Oil Development Company, a corporation of Delaware
Application July 14, 1934, Serial No. 735,142
4 Claims. (Cl. 196—13)

1. In a process for treating mineral lubricating oil with a solvent which is substantially immiscible with and has a lower boiling point than water, the said treatment being carried out at temperatures below the freezing point of water, the improved method of recovering solvent substantially free from water which comprises distilling the major portion of the solvent from the oil, then steam stripping the distillation residue to recover the remaining solvent, retaining the second distillate separate from the first, condensing the second distillate obtained from the steam stripping, separating the solvent layer from the water layer, passing the solvent layer which still contains some water into a stripping column, introducing a dry gas into the said stripping column and stripping the solvent therewith, removing vapors of solvent and water from the top of the column, removing residue consisting of substantially dry solvent from the bottom of the column, and combining the so obtained dry solvent with the solvent first obtained by distillation without steam.

2,104,402
STEAMING AND DRYING MACHINE
August Riedel, Philadelphia, Pa.
Application November 2, 1934, Serial No. 752,225
2 Claims. (Cl. 38—63)

2. In a steaming and drying machine, a fixed drum, means for conducting a heating fluid to the drum, a roller mounted to rotate about the drum and provided with axial openings to accommodate the fluid conduit, said openings being larger than the conduit to accommodate yielding movement of the roller.

2,104,403
DOOR HANDLE ASSEMBLY
John H. Recthal, Detroit, Mich.
Application August 2, 1934, Serial No. 738,321
8 Claims. (Cl. 292—357)



3. In a door handle, an escutcheon comprising an elliptical escutcheon support adapted to be secured to a door by screws, and an elliptical escutcheon cap covering said inner escutcheon member and concealing the heads of the securing screws and resiliently engaging said support to hold the parts in assembled relation, the cap being adapted to be deformed out of engagement with said support by pressing on opposite points of the periphery thereof.

2,104,404
CAR TRUCK
James A. Shafer, East Cleveland, Ohio, assignor to National Malleable and Steel Castings Company, Cleveland, Ohio, a corporation of Ohio
Application November 6, 1934, Serial No. 751,677
17 Claims. (Cl. 105—197)

3. In a car truck, a side frame having a bolster receiving window and a shelf therebelow, spring means on said side frame below said shelf, a bolster having an end portion extending through said window and provided with means projecting through said shelf for engagement with said spring means, said bolster having a leaf spring seat outwardly of said side frame and being so constructed and arranged as to enable either leaf or coil spring means to be interposed between said shelf and said bolster end portion for supporting the bolster.

2,104,405
CAR TRUCK
James A. Shafer, East Cleveland, Ohio, assignor to National Malleable and Steel Castings Company, Cleveland, Ohio, a corporation of Ohio
Application May 10, 1935, Serial No. 20,711
14 Claims. (Cl. 105—197)

1. In apparatus of the class described, the combination of a side frame having openings therein, depending bolster dowels integral with the bolster projecting into said openings and replaceable means for compensating for wear between said dowels and said side frame, said means comprising removable members interspersed between said dowels and the walls of the openings in said side frame inward of said dowels.

2,104,406
APPARATUS FOR CASTING
Charles E. Sorensen, Detroit, and Russell H. McCarroll, Dearborn, Mich., assignors to Ford Motor Company, Dearborn, Mich., a corporation of Delaware
Application September 7, 1935, Serial No. 39,534
2 Claims. (Cl. 22—209)

1. In combination, an electric furnace, a closed type holding furnace of substantially twice the capacity of said electric furnace, a ladle, a plurality of molds, means for mixing successive batches from said electric furnace in said holding furnace, means associated with said holding furnace for adding heat to said metal to maintain same at a uniform temperature substantially above its melting temperature, a trough extending between said holding furnace and said ladle, a fixed metering jet disposed between said holding furnace and said trough whereby metal is continuously drawn from said holding furnace and deposited in said ladle, said metering jet being of such size that a quantity of metal equivalent to one of said batches will be deposited in said ladle in the time taken to heat and pour said batch, means for conveying molds continuously past said ladle, means for reciprocating said ladle in a path parallel to the path of said molds and at a similar speed whereby each of the molds will remain fixed relative to said ladle during one stroke

of its reciprocating movement, and means for pouring metal from said ladle into the adjacent mold during said fixed portion of each stroke.

2,104,407
MANUFACTURE OF ARYL AMINES
Charles L. Thomas, Chicago, Ill., assignor to Universal Oil Products Company, Chicago, Ill., a corporation of Delaware
No Drawing. Application September 23, 1933, Serial No. 690,761
5 Claims. (Cl. 260—130.5)

1. A process for alkylating an alkyl-free aromatic amine, which comprises treating a primary aryl amine with a mono-carboxylic acid to form an acyl derivative, subjecting the acyl derivative to treatment with an olefinic hydrocarbon in the presence of a condensation catalyst, and hydrolyzing the resultant compound to form the alkylated aryl amine.

2,104,408
LUBRICANT
Peter J. Wiezevich, Elizabeth, N. J., assignor to Standard Oil Development Company, a corporation of Delaware
No Drawing. Application September 20, 1933, Serial No. 690,234
1 Claim. (Cl. 87—9)

A lubricant comprising a major proportion of a mineral lubricating oil, dibutyl phthalate and a polyvinyl acetate.

2,104,409
LUBRICANT
Peter J. Wiezevich, Elizabeth, N. J., assignor to Standard Oil Development Company, a corporation of Delaware
No Drawing. Application October 3, 1933, Serial No. 692,034
1 Claim. (Cl. 87—9)

A lubricant comprising a mineral oil and 0.2 to 10% of alkylated polychlorprene.

2,104,410
PRODUCTION OF HOT MIX COLD LAID BITUMINOUS PAVEMENTS
Charles M. Baskin, Toronto, Ontario, Canada, assignor to Standard Oil Development Company, a corporation of Delaware
No Drawing. Application August 30, 1934, Serial No. 742,147
3 Claims. (Cl. 106—31)

1. A method of producing a paving mixture which comprises heating a wet mineral aggregate of 150° F., mixing the heated aggregate with a low viscosity priming oil and powdered hard asphalt, and heating the mixture by contacting with a flame while mixing to partially amalgamate and to raise the softening point of the bituminous portion of the mixture to at least 50° F.

2,104,411
METHOD OF PRODUCING A HOT MIX, COLD LAID PAVING MIXTURE
Charles M. Baskin, Toronto, Ontario, Canada, assignor to Standard Oil Development Company, a corporation of Delaware
No Drawing. Application August 30, 1934, Serial No. 742,148
2 Claims. (Cl. 106—31)

1. A method of producing a paving mixture containing as a binder an asphaltic material having a softening point of 170° to 200° F. and adapted to be laid and compacted while cool by application of pressure, which comprises heating a mineral aggregate to a temperature of 150° to 350° F. and mixing therewith a preheated soft bitumen ranging in consistency from 300 seconds viscosity furol at 122° F. to 70° F. softening point and a powdered asphalt.

2,104,412
ALKYL PHENOLS
Hyym E. Buc, Roselle, N. J., assignor to Standard Oil Development Company, a corporation of Delaware
No Drawing. Application December 29, 1931, Serial No. 583,704
7 Claims. (Cl. 260—154)

1. Alkylated hydroxy derivatives of aromatic hydrocarbons containing in the alkyl group a carbon atom attached to the aromatic nucleus and to not less than two other carbon atoms selected from the group consisting of secondary alkyl derivatives of phenols and substituted phenols, and tertiary alkyl derivatives of substituted phenols, and having the following formula:

$$R\diagdown \atop R'\diagup C(C_6H_{4-a})(OH)_a\text{-}R'''$$
$$R''$$

having not less than 5 nor more than 8 carbon atoms in the

$$\diagdown C \diagup$$

alkyl radical, and having valuable therapeutic properties as antiseptics and germicides; R and R' representing alkyl radicals, R'' representing a member of the group consisting of an alkyl radical and a hydrogen atom, R''' representing a member of the group consisting of an alkyl radical containing not more than four carbon atoms and one of the hydrogen atoms normally attached to the aromatic nucleus.

3. Secondary alkyl phenols having the following formula:

$$R\diagdown \atop R'\diagup CH(C_6H_4)(OH)$$

having 6 carbon atoms in the alkyl radicals, and having valuable therapeutic properties as an antiseptic and germicide; R and R' representing alkyl radicals.

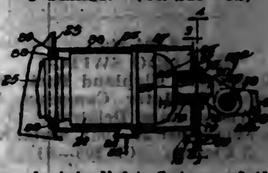
4. Secondary amyl phenols, having the following formula:

$$C_5H_{11}(C_6H_4)OH$$

being colorless liquids boiling at 238 to 244° C., having a refractive index N_D=1.5140 at 26.2° C., and being a valuable therapeutic agent as an antiseptic and germicide.

5. Secondary hexyl phenols having the following formula:

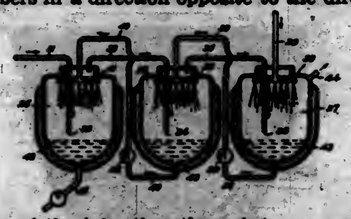
$$C_6H_{13}(C_6H_4)OH$$



being colorless liquids boiling at 250 to 260° C., having a refractive index N_D=1.5189 at 24.5° C., and being a valuable therapeutic agent as an antiseptic and germicide.

2,104,413
CLOSURE FOR CONTAINERS
Brent F. Cahoon, Kew Gardens, N. Y., assignor to Captive Closures, Inc., New York, N. Y., a corporation of Delaware
Application March 5, 1934, Serial No. 714,069
9 Claims. (Cl. 215—43)

3. In combination with a container having a neck, a locking ring below the mouth of said neck, a cup-shaped cap telescoping said neck and having an axial movement thereon, said cap having a centrally located discharge port, said neck having an integral and apertured end wall, a plug-like valve element rising from and integral with said end wall for closing said port in one position of the cap, a permanent attachment on said container neck comprising a portion secured to said locking ring and a downwardly and outwardly extending locking flange, and an upwardly facing stop shoulder on the interior of said cap and located below said flange for engaging the rim of the latter upon a given upward movement of the cap to limit such movement, said flange being flexible inwardly upon the application of pressure from above, thereby to permit the cap to be initially assembled on the container neck.



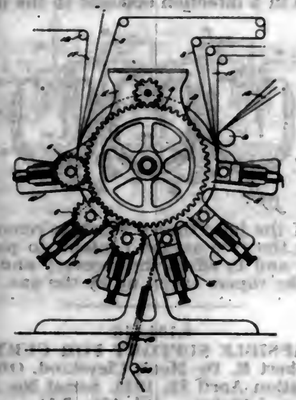
2,104,414
ELECTRIC LIGHT FIXTURE
William P. Crockett and William P. Crockett, Jr., Chicago, Ill., assignors to Hesge, Inc., Chicago, Ill., a corporation of Illinois
Application July 20, 1934, Serial No. 737,500
3 Claims. (Cl. 240—52)

1. In an electric light fixture of the portable type, a holder, a light socket in said holder, said light socket being provided with a pull chain cup, said holder being adapted to receive one end of a light cord, a holder carrier, a cap removably secured to said holder, said holder having a bayonet slot, and also a slot for said pull chain cup, said cap having a stud or punching, said stud or punching being adapted to enter said bayonet slot and operate in a contra-clockwise direction to lock said cap and said holder, said cap also being provided with an integral square boss, said boss having an aperture for the reception of the light cord, a thimble, said thimble being movable in a clockwise direction, a washer, said cord passing through said thimble, washer and boss into said socket, said holder carrier being cut away to enable said carrier to contact with two side walls of said square boss whereby said holder is held in position in said carrier.

2,104,415
PROCESS FOR THE PRESERVATION OF FRUIT JUICES
Austin Morris Davies, Jamaica, N. Y.
Application December 31, 1934, Serial No. 759,895
2 Claims. (Cl. 99—155)

1. A process of treating fresh fruit juice to pasteurize the same and remove the free oxygen therefrom, consisting in passing the juice to be treated successively through a series of chambers of progressively increasing temperatures, passing an inert gas successively through the juice in said chambers in a direction opposite to the direction of flow of the juice therethrough to remove from the juice the free oxygen content, to pasteurize the juice and to effect the recovery and the return of the vapors taken up by the gas.

2,104,416
COLLAPSIBLE SUPPORT FOR CURTAINS
Robert R. De Mont, Cleveland, Ohio
Application April 29, 1935, Serial No. 18,622
4 Claims. (Cl. 135—7.1)



1. A curtain support comprising a plurality of collapsible uprights, said uprights being of duplicate construction independently separate from each other and each comprising telescoping sections, and a collapsible, sectional transverse top bar for suspension of the curtain, the top bar comprising duplicate end sections and duplicate, curved middle sections, means depending from said end sections for supporting engagement within the upper end of the uprights, and means for detachably and adjustably connecting said end and middle sections together.

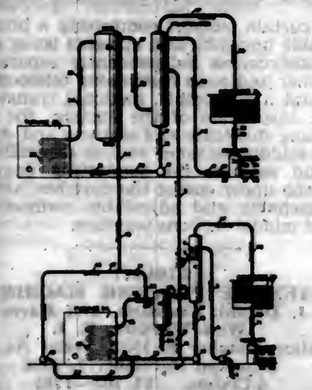
2,104,417
TEXTILE PRINTING MACHINE
James J. Delphi, Cranston, and Harry Hintse, West Warwick, R. I.
Application October 9, 1933, Serial No. 692,808
Renewed November 7, 1936
6 Claims. (Cl. 101—178)

1. In a textile printing machine for simultaneously printing two separate webs of fabric, an impression cylinder, a plurality of plate cylinders spaced circumferentially about the impression cylinder and in frictional contact therewith, said plate cylinders comprising two sets of cylinders, means for causing the cylinders of each set to rotate in synchronism, the cylinders of one set being driven by their frictional engagement with the impression cylinder, means for directing two superimposed webs to be printed between the impression cylinder and said set of frictionally driven plate cylinders, whereby one of the webs is printed, means for guiding the printed web away from the impression cylinder while the unprinted web is directed between the impression

cylinder and the second set of plate cylinders, means for driving said second set of plate cylinders in synchronism with each other, said impres-

sion cylinder being driven by its frictional engagement with said second set of plate cylinders, and means for guiding said second web away from the impression cylinder.

2,104,418



TREATMENT OF HYDROCARBON OILS

Gustav Egloff, Chicago, Ill., assignor, by mesne assignments, to Universal Oil Products Company, Chicago, Ill., a corporation of Delaware

Application February 11, 1931, Serial No. 514,919

Renewed May 15, 1935

4 Claims. (Cl. 196—49)

4. A conversion process which comprises heating hydrocarbon oil to cracking temperature under pressure in a heating coil, separating the heated products into vapors and unvaporized oil in a separating zone maintained under pressure, discharging a portion of said unvaporized oil directly from the separating zone into a low pressure flash still, passing another portion of said unvaporized oil from the separating zone through a second heating coil and thence into the low pressure flash still, fractionating the first-named vapors and the vapors from the flash still, passing resultant reflux condensate through the second heating coil together with said other portion of the unvaporized oil, and finally condensing the fractionated vapors.

2,104,419

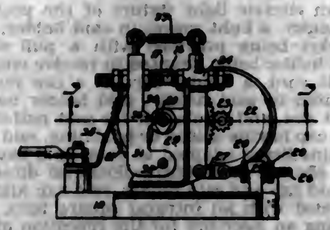
VALVE SEAT STRUCTURE

Charles F. Frye, Chicago, Ill.

Application October 29, 1934, Serial No. 750,538

1 Claim. (Cl. 251—167)

The combination of a valve seat comprising an annular body having an exteriorly threaded portion; a reduced portion at the upper end of said threaded portion; a conical portion above said reduced portion, said conical portion having its larger diameter uppermost, said conical portion extending out to a diameter greater than the maximum diameter of said threads; and an abutment shoulder above said conical portion presenting a surface substantially normal to the axis of said body; with a valve seat support having female threads receiving the male threads on said body, and a flat annular upper surface receiving said shoulder in abutting relation to limit the inward movement of said seat; said support having an annular metal portion adjacent the meeting of said flat annular upper surface and said female screw threads, said annular portion being in an upset condition by reason of displacement by said conical body portion and in direct contact therewith, whereby a complete seal is formed between said conical body portion and said upset annular support portion independently of said threads.



2,104,420

ELECTRIC SWITCH

Fredrick J. Grover, Highland Park, Mich., assignor to Ford Motor Company, Dearborn, Mich., a corporation of Delaware

Application September 20, 1931, Serial No. 566,070

5 Claims. (Cl. 200—91)

1. An interrupter adapted to intermittently break an alternating electrical circuit through a welding transformer comprising, a frame, a cam rotatably mounted in said frame, said cam being mechanically rotated by a synchronous motor and said motor being electrically driven by the current source which energizes said welding transformer, a bracket pivotally mounted upon said frame in position to rotate around the axis of said cam, contact points completing said electric circuit and supported upon said bracket in position to be separated upon rotation of said cam relative to said bracket to thereby break said circuit, and a relatively stationary adjusting device adapted to oscillate said bracket and contact points around said cam whereby the opening of said contact points may be adjusted to occur at zero voltage of the supply current cycle.

2,104,421

PRODUCTION OF AMINES OF HIGH MOLECULAR WEIGHT

Adolf Grün, Basel, Switzerland, assignor, by mesne assignments, to Ruhrchemie-Gesellschaft m. b. H., Chemnitz, Germany, a corporation of Germany

No Drawing. Application March 16, 1935, Serial No. 11,973. In Germany March 17, 1934

8 Claims. (Cl. 260—127)

1. The process of producing amines of high molecular weight which comprises decomposing by the use of heat in the presence of an inert diluent non-volatile at the temperatures employed a substituted α-amino fatty acid containing an acyl radical of more than 8 carbon atoms substantially only into a substituted α-amino alkyl compound in which the alkyl radical contains one less carbon atom than the acyl radical, and into carbon dioxide.

7. The process of producing amines of high molecular weight comprising heating a diethyl alpha-amino fatty acid in which the acyl radical contains more than 8 carbon atoms in the presence of paraffin oil to a temperature at which carbon dioxide is given off.

2,104,422

PLATE GLASS TRANSFER AND TURN-OVER APPARATUS

Herman S. Heichert, Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company, a corporation of Pennsylvania

Application November 22, 1935, Serial No. 51,121

3 Claims. (Cl. 214—1)

1. In glass sheet turnover and transfer apparatus for a grinding and polishing system comprising a pair of parallel work tracks carrying cars on which the glass sheets are ground and polished, a pair of roller runways lying above the work tracks in parallel therewith, overhead vacuum lifting means for transferring the sheets between the tables of each line and the roller runway lying thereabove, a turnover and transfer frame having its axis of rotation intermediate the runways in parallel with the center lines thereof and at approximately the level of the runways and comprising a series of parallel arms spaced to interfit between the rolls of the runways and adapted to pick up a glass sheet from one runway, swing it through an angle of 180 degrees and deposit it upside down on the rolls of the other runway, and means for driving the rolls of the runways so that the rolls of one runway carry the glass sheets toward the turnover and transfer frame and the rolls of the other runway carry the sheets away from such frame.

2,104,423

CATAMENIAL SACK

James L. Hughes, Oklahoma City, Okla.

Application March 21, 1935, Serial No. 12,150

5 Claims. (Cl. 128—290)

1. In an article of the class described, the combination with a catamenial sack or outer container, of a removable absorbent filler for said sack, including: an almost completely moisture-proof inner container adapted to fit within the outer container contiguous with the walls there-

of, an upwardly and outwardly projecting flange integral with the inner container and adapted to lie over the orificial rim of the outer container, and an absorbent mass substantially filling the inner container.

2,104,424

MANUFACTURE OF AROMATIC DERIVATIVES

Vladimir Ipatieff and Aristid V. Grosse, Chicago, Ill., assignors to Universal Oil Products Company, Chicago, Ill., a corporation of Delaware

No Drawing. Application March 7, 1935, Serial No. 2,230

5 Claims. (Cl. 260—168)

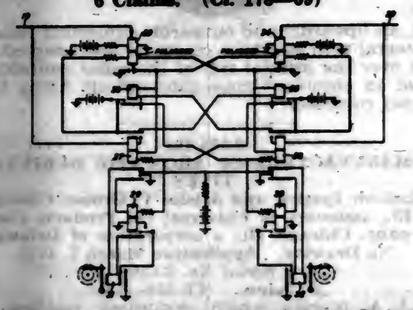
1. A process which comprises reacting a naphthene hydrocarbon with an aromatic hydrocarbon capable of being alkylated in the presence of aluminum chloride and hydrogen chloride and in the substantial absence of added olefins to form a hydrocarbon derivative of the aromatic.

2,104,425

TELEPHONE BOOTH

Frank A. Kuntz, Woodhaven, N. Y., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York

Application August 16, 1934, Serial No. 740,038

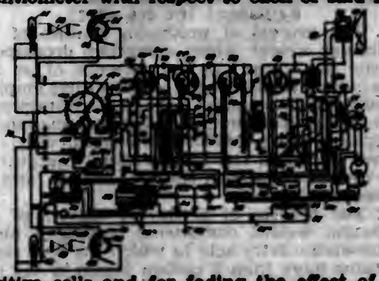


3 Claims. (Cl. 20—3.5)

1. A telephone booth having a rear wall, side walls, a ceiling for holding the walls in angular relation to each other at their upper ends, a base for holding the walls in angular relation to each other at their lower ends, a front wall having a door opening, a door made of two folding sections for the opening, normally folding inwardly of the booth, means for controlling the folding movement of said door comprising an inverted U-shaped guide member secured to the under side

of the ceiling, a slider element normally engaging said guiding member, a plunger on the top of which said slider element is pivoted, a bracket for said plunger carried by the inner face of the free door section, and a handle accessible from the exterior of said free door section, said handle operatively engaging said plunger for disengaging said slider from said guiding member at any point therealong for folding said free door section outwardly of the booth.

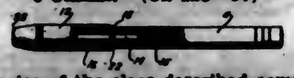
2,104,426
IMPULSE REPEATER
Fullerton S. Kinkead, Ridgefield Park, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application October 16, 1935, Serial No. 45,170
6 Claims. (Cl. 178—69)



4. An impulse repeater comprising a first circuit, a second circuit, relays for repeating impulses from either of said circuits to the other of said circuits, additional relay equipment for counting and recording only the number of momentary circuit disturbances arising in one of said circuits during the transmission of signals to that circuit from the other of said circuits, and circuit means including said additional relay equipment for preventing said means from counting and recording long signal impulses as momentary circuit disturbances.

2,104,427
METHOD OF PRETREATING IRON SURFACES
Alexander Kreidl, Vienna, Austria
No Drawing. Application December 7, 1933, Serial No. 701,341. In Austria December 7, 1932
6 Claims. (Cl. 91—70)

1. Method of pre-treating iron, steel, cast-iron and the like, for enamelling purposes, which method comprises the steps of applying to the metal surface to be pretreated a combination of flux with iron sesquioxide, and a monoxide selected from the group consisting of iron monoxide, nickel monoxide and manganese monoxide, heating said surface in an atmosphere containing such an amount of oxygen that substantially no oxidation of the metal of the said surface proper to iron sesquioxide occurs and cooling the surface, whereby a rough coating is produced which adapts said metal surface for enamelling.

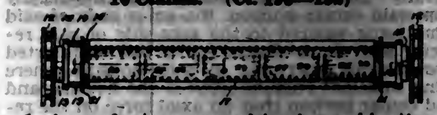


2,104,428
TALKING MOTION PICTURE APPARATUS
Alwyn D. Lassiter, Philadelphia, Pa., assignor, by mesne assignments, to Western Electric Company Incorporated, a corporation of New York
Application April 5, 1932, Serial No. 603,390
22 Claims. (Cl. 179—100.3)

1. Talking motion picture apparatus comprising an amplication system, a sound reproducer connected with said amplification system, a control tube connected with the input of said amplification system, a pair of light sensitive cells subjected to variations of light under control of independent film records, a potentiometer connected between the input circuit of said control tube and said light sensitive cells, and means for variably controlling the effective value of said potentiometer with respect to each of said light

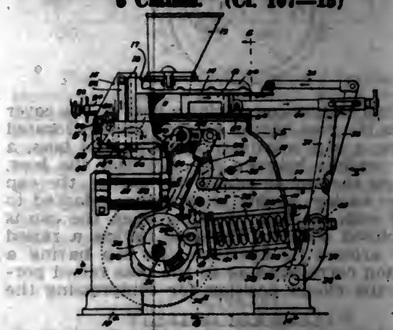
sensitive cells and for fading the effect of the sound record to which one of said light sensitive cells is subjected in, while fading the sound record to which the other of said light sensitive cells is subjected out in said sound reproducer, and a source of rectified and filtered alternating current operatively connected to the aforesaid amplification system, the field of the sound reproducer, and the light sensitive cells.

2,104,429
MASSAGE DEVICE
Benjamin B. Lipman, Chicago, Ill.
Application December 4, 1936, Serial No. 114,104
6 Claims. (Cl. 128—57)



1. A device of the class described comprising a handle, a roller, a shaft secured in said handle and forming a bearing for said roller, said shaft being peripherally grooved adjacent the handle end of said roller and the material of said roller extending into said groove to prevent separation of said roller and handle while permitting free rotation of said roller.

2,104,430
GARAGE DOOR MOUNTING
Warren J. MacIlvey, Newark, N. J.
Application March 21, 1936, Serial No. 70,015
8 Claims. (Cl. 20—16)



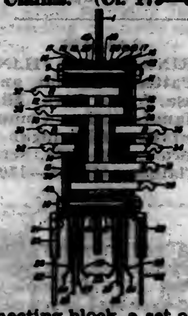
1. In combination with a door and jamb, an apron, hinge means for swingingly connecting said door to said jamb and for permitting vertical sliding movement of said door relative to said jamb, and means located at the inner bottom corner of the door for resting engagement upon said apron for supporting the bottom edge of said door clear of said apron.

2,104,431
PROOFER TRAY
Fred Marasso, Joliet, Ill., assignor to Union Machinery Company, Joliet, Ill., a corporation of Illinois
Application November 26, 1935, Serial No. 51,553
10 Claims. (Cl. 106—158)

1. A proofer tray, comprising in combination, a rotatively mounted plural pocket tray, a sleeve-like liner of greater length than its width, composed of textile fabric surrounding the tray, the circumference of the liner being of sufficient extent to permit it to lie on the bottom of the tray when in upright position, and means on the tray to prevent the liner from creeping beyond the ends thereof.

2,104,432
DOUGH DIVIDER
Fred Marasso, Joliet, Ill., assignor to Union Machinery Company, Joliet, Ill., a corporation of Illinois
Application November 4, 1936, Serial No. 109,102
6 Claims. (Cl. 107—15)

1. In a dough divider, the combination of a frame, a drive shaft journaled therein, a single eccentric having an eccentric block mounted on said drive shaft, and an eccentric strap, a dough charging chamber in said frame, a plurality of reciprocating elements co-operating with said dough charging chamber to measure lumps of dough, and operative connections between said eccentric strap and said reciprocating elements for converting the eccentric movement of the eccentric into the reciprocating movements of said reciprocating elements, one element of said connections being rigid with said strap and one element of said connections being swiveled thereto.



2,104,433
ACOUSTIC DEVICE
Robert N. Marshall, Newark, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application April 25, 1934, Serial No. 722,269
9 Claims. (Cl. 179—115.5)

6. An acoustic device comprising a casing open at each end, a diaphragm in said casing and closing one open end, a partition closing the other end of said casing and having a [illegible] sound wave passing aperture therein, low frequency enhancing means supported on said partition in alignment with the aperture therein, and a cover member forming a chamber with said partition, said cover member containing an aperture con-

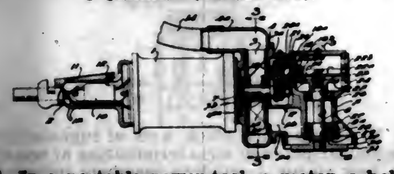
necting the chamber with the air outside the casing.

2,104,434
CONNECTING BLOCK AND JACK ASSEMBLY
Charles G. McCormick, Queens Village, N. Y., and Paul W. Sheatsley, Mountain Lakes, N. J., assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application April 22, 1936, Serial No. 75,724
7 Claims. (Cl. 179—96)

1. In a connecting block, a set of superimposed terminal strips, each strip terminating at one end in a jack spring, insulating members interposed between adjacent strips, and a soldering lug extending at right angles from each strip, said strips and insulating members being slotted whereby the lugs of said strips extend through said block to the outer faces of said terminal set.

2,104,435
MACHINE TOOL SPINDLE
Alfred J. Neel, Stratford, Conn., assignor to The Bodine Corporation, Bridgeport, Conn., a corporation of Connecticut
Application December 14, 1935, Serial No. 54,422
7 Claims. (Cl. 10—129)

1. A tool unit comprising a housing; a quill rotatable therein; a spindle within the quill;



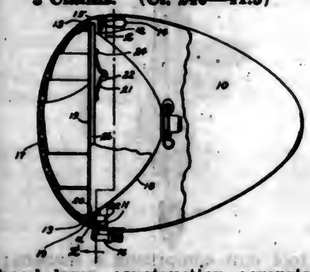
antifriction journalling means for the unit wholly located between the upper and lower limits of the housing; the quill at its upper portion extending above the top of the housing, and the spindle at its upper end extending above the top of the quill; a sleeve carrying at its lower end a spur pinion, said upper portion of the quill being extended into the lower end of the sleeve; a driver head for the spindle sleeving the same and secured thereto and located in the sleeve above the quill, the sleeve being longitudinally slotted opposite the driver head and the latter having a lug extended into said slot; and a superstructure for the sleeve including a shell wholly above the housing and hence wholly above said journalling means, said shell detachably secured to the sleeve, a compression spring in the shell sleeving the spindle and bearing down at its lower end on the top of the driver head, and a tension adjuster in threaded engagement with the upper part of the shell and sleeving the spindle and engaging the upper end of the spring.

2,104,436

PORTABLE GRINDING OR FILING MACHINE

Herbert John Pattison, Detroit, and William K. Barton, Grosse Pointe Park, Mich., assignors to Briggs Manufacturing Company, Detroit, Mich., a corporation of Michigan

Application February 10, 1936, Serial No. 63,046
3 Claims. (Cl. 51—170)



1. In a portable power tool, a motor, a helical pinion on the motor shaft, an intermediate shaft, a helical gear on the intermediate shaft meshing with the helical pinion, a bevel pinion on the intermediate shaft, a tool driving shaft, and a bevel gear on the tool driving shaft meshing with the bevel pinion, the direction of rotation of the motor and the angle of the helical gears being arranged so that the end thrust of the helical pinion on the helical gear is greater than the thrust of the bevel pinion on the bevel gear and tends to hold said bevel pinion in engagement with said bevel gear.

2,104,437

HEADLAMP CONSTRUCTION

William H. Peters, Flat Rock, Mich., assignor to Ford Motor Company, Dearborn, Mich., a corporation of Delaware

Application January 18, 1936, Serial No. 59,715
3 Claims. (Cl. 240—41.5)

2. A head lamp construction comprising, an open-ended housing, a reflector and lamp bulb assembly disposed in said housing, a lens secured over said reflector, and a plurality of flat spring clips disposed around the periphery of said reflector, each of which is formed with a U-shaped center portion and with resilient arms formed integrally therewith extending circumferentially from said center portion, the outer ends of said arms being secured to the rear side of said reflector with the U-shaped center portion inserted into suitable apertures in said housing, there being sufficient friction between the housing and said center portion that an axial force on the reflector caused by the removal of the lamp bulb therefrom will not draw said reflector from the housing, and said circumferentially extending arms resiliently urging said reflector against the lens when the lamp is in its assembled condition.

2,104,438

CAN CLOSURE

Sanford E. Richeson, New York, N. Y.

Application October 6, 1936, Serial No. 104,191
9 Claims. (Cl. 221—19)

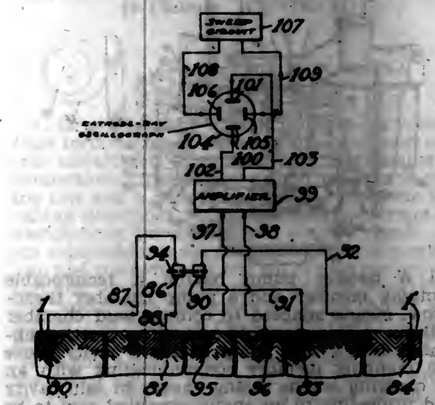
1. A can closure comprising a boss on the cover of a can, the boss having an eccentrically located aperture, a cap rotatively fitted on the boss, a sealing washer between the cap and the boss, means on the cap to retain the washer, the cap and the washer having an aperture adapted to register with the boss aperture when the cap is in its closed position, the boss having a raised portion around its aperture, the cap having a depression corresponding to the boss raised portion in the closed position for compressing the washer.

2,104,439

COMBINATION POCKET KIT

Morris Schein, Brooklyn, N. Y.

Application July 22, 1936, Serial No. 91,852
2 Claims. (Cl. 150—34)



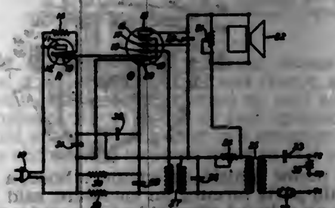
1. A combination pocket kit comprising several superimposed strips of material bent at a transverse line forming several layers, lines of stitches securing the edges of said layers together forming pockets, and auxiliary strips of material secured on one of the walls of one of said pockets forming additional pockets, said auxiliary strips of material being removably secured within said pocket, with hook fasteners along the sides thereof.

2,104,440

METHOD OF GEOPHYSICAL PROSPECTING BY THE COMPARISON OF STEADY STATE POTENTIALS

Louis Statham and Ludwig W. Blau, Houston, Tex., assignors to Standard Oil Development Company, a corporation of Delaware

Application June 6, 1936, Serial No. 83,902
5 Claims. (Cl. 175—182)



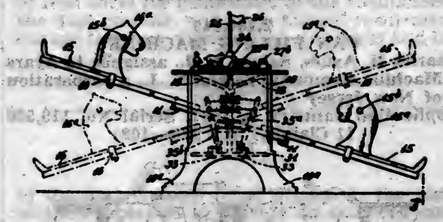
1. The method of determining variations in electrical properties of the earth, which comprises passing an alternating current through two or more sets of primary electrodes in the ground whereby an electromotive force is caused to exist between two secondary electrodes in the ground, and comparing the various phase relations which exist between the current in each set of primary electrodes and its induced electromotive force at the secondary electrodes.

2,104,441

TESTING APPARATUS

Frederick Franklyn Stratford, Glen Ridge, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a corporation of New York

Application August 18, 1936, Serial No. 96,755
11 Claims. (Cl. 175—183)



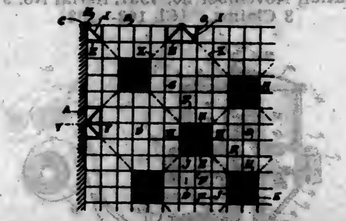
1. A test set comprising a vacuum tube oscillator, means for coupling a circuit to be tested to the output circuit of said oscillator, means for adjusting the loss in said output circuit to prevent oscillations when the impedance of said coupled circuit exceeds a predetermined amount, and a loud-speaker connected in the output circuit of the oscillator for response to oscillations when the impedance of said coupled circuit is less than said predetermined amount.

2,104,442

TWIN ROCKER AND ROTATING TOY DEVICE

Alexander Szabo, Linden, N. J.

Application July 23, 1937, Serial No. 155,196
6 Claims. (Cl. 272—54)



1. A twin rocker and rotary toy device comprising a body for supporting a see-saw board, a see-saw board pivotally mounted on said body, blocks adjustably mounted on said body longitudinally of said board, arms pivotally mounted on said blocks and extending upwards and formed with slots extending longitudinally thereof, pins mounted on said see-saw board and engaging said slots to swing said arms as the said board is rocked, a rotary device mounted on said body and having a drive shaft, drums rotative on said shaft, and ratchets associated with said drums and shaft for driving said shaft in one direction as said drums swing.

2,104,443

FLOOR, ROOF AND LIKE STRUCTURE

Stephan Szagó, Berlin-Johannistal, Germany

Application June 17, 1935, Serial No. 27,044
In Germany February 25, 1935
9 Claims. (Cl. 72—15)

1. A floor or like structure comprising two sets of intersecting beams forming a visible structural grid, main columns for said grid beams arranged at the crossing points of lines which are diagonal to the beams and form between them substantially rectangular bays each embracing a network of beam portions of different lengths, and supporting members extending from each main column towards the beam portions which immediately surround it.

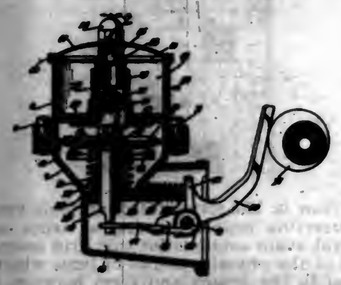
2,104,444

METHOD OF PRODUCING LEAD ALLOYS

Frederic W. Willard, Summit, N. J., assignor to Nassau Smelting and Refining Company, New York, N. Y., a corporation of New York

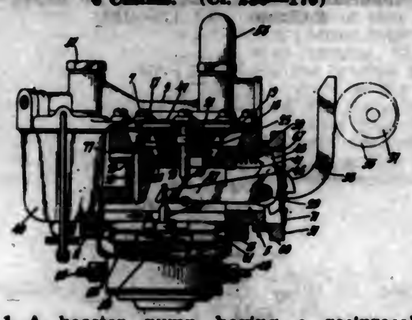
No Drawing. Application December 12, 1934, Serial No. 757,123
9 Claims. (Cl. 75—135)

9. A method of preparing an uncontaminated copper lead alloy comprising subjecting a molten bath of lead to the action of a copper compound of an organic acid under such condition to effect dispersion of the copper throughout said



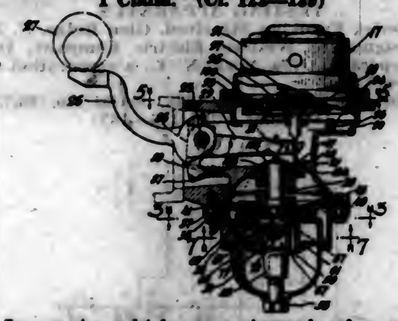
lead without the formation of an oxide of copper and to form an uncontaminated lead copper alloy which is substantially free of any metallic compound of an organic acid.

2,104,445
CAN FILLING MACHINE
Charles H. Ayars, Salem, N. J., assignor to Ayars Machine Company, Salem, N. J., a corporation of New Jersey
Application January 8, 1937, Serial No. 119,550
11 Claims. (Cl. 226—102)



1. In a can filling machine having a hopper, measuring cups adapted to pass under said hopper to receive a charge of material therefrom, a non-rotatable base plate forming the bottoms of said cups and having a discharge opening for discharging the contents of said cups, and a depressed channel in said base plate merging into said discharge opening to permit the contents of said cups to settle therein prior to discharge through said opening.

2,104,446
FUEL PUMP
Abraham M. Rabitch and Gordon W. Harry, Flint, Mich., assignors to General Motors Corporation, Detroit, Mich., a corporation of Delaware
Application November 30, 1931, Serial No. 577,922
3 Claims. (Cl. 103—150)

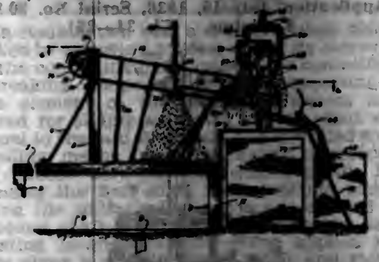


1. In a fuel pump, a pump body, a cover, a diaphragm therebetween, said cover having a partition forming, together with the diaphragm, a pump chamber, means in said pump body and operatively connected with the diaphragm to move the same and thereby operate the pump, said cover having a fuel-receiving chamber, a filter screen dividing said fuel-receiving chamber into first and second parts, said cover having a first valve affording a yielding inlet for the flow of fuel from the second chamber to the pump chamber and said cover having a second valve affording a yielding outlet from the pump chamber, said inlet valve comprising a movable valve disc, a plug extending axially into said cover and secured thereto and having at its end a seat for said valve disc, a closure for said fuel-receiving chamber, fastening means engaging said closure and adjustable on said plug to maintain said closure in position.

2,104,447
VACUUM PUMP
Abraham M. Rabitch and Gordon W. Harry, Flint, Mich., assignors to General Motors Corporation, Detroit, Mich., a corporation of Delaware
Application September 11, 1935, Serial No. 40,625
6 Claims. (Cl. 230—176)

1. A booster pump having a reciprocable pumping member and a pump chamber therebelow, means adapted to connect said chamber with an engine manifold and with a suction-operated device, said pump having a cavity above the pumping member communicating with an oil carrying engine casing, means in said cavity and projecting to an engine-operated cam to be rotated thereby and operably connected to said reciprocable pumping member, conduit means connecting said cavity to the atmosphere, and means to seal the cavity from the engine casing.

2,104,448
FUEL PUMP
Abraham M. Rabitch and Gordon W. Harry, Flint, Mich., assignors to General Motors Corporation, Detroit, Mich., a corporation of Delaware
Application April 24, 1936, Serial No. 76,110
1 Claim. (Cl. 123—139)



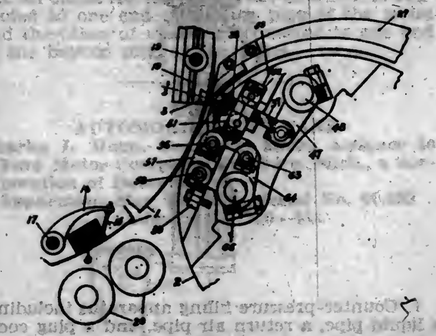
In a motor vehicle, an engine, a hood, a splash pan, said parts forming an enclosure, said engine having an exhaust manifold within said enclosure whereby the temperature within the enclosure is higher than the outside air, a pump to supply said engine with fuel, said pump extending through said splash pan and having its upper part within said enclosure, means driven by the engine and located in said upper part to operate said pump, said pump having a fuel chamber in its lower part and positioned below said splash pan whereby the fuel may not be subject to the heat within said enclosure but may be cooled by the flow of air beneath said pan.

2,104,449
TELEPHONE SYSTEM
Langford J. Bourne, Hammond Beach, Frederick R. Lamberty, Riverdale, N. Y., and Ray L. Stehely, deceased, late of Floral Park, N. Y., by Grace MacDonald Stehely, executrix, Floral Park, N. Y., assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application August 15, 1936, Serial No. 95,530
19 Claims. (Cl. 179—18)

1. In a telephone system, a cross-bar switch, lines terminating in said switch, a common control circuit for controlling the establishing of connections through the switch between a calling line and a called line, means responsive to a calling subscriber removing his receiver from the switch-hook for seizing said control circuit and for establishing a connection between the calling line and the switch by the aid of said control circuit and for thereafter releasing said control circuit, and means responsive when the calling subscriber has dialed a called subscriber's number for again seizing said control circuit and for establishing a connection between the switch and the called line by the aid of said control circuit to connect the calling line with the called line and for thereafter releasing said control circuit.

2,104,450
CASING CONVEYER
Melvin M. Campbell, South St. Joseph, Mo., assignor to Industrial Patents Corporation, Chicago, Ill., a corporation of Delaware
Application November 30, 1934, Serial No. 755,437
14 Claims. (Cl. 17—42)

1. A casing treating machine comprising a frame, a pulley mounted on said frame, a standard, squeezing rollers mounted on said standard, a peripheral recess in one of said squeezing rollers, and an endless conveyer belt mounted on said pulley and on said recessed roller in said recess.

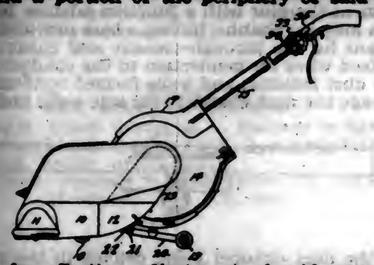


2,104,451
JUNCTION ADAPTER
Alfred Corbett, Irwin, Pa., assignor to National Electric Products Corporation, a corporation of Delaware
Application July 1, 1936, Serial No. 88,488
4 Claims. (Cl. 247—28)

1. The combination of a multiple outlet duct comprising a housing containing longitudinally extended electrical conductors and mounting and longitudinally spaced socket elements therefor and which housing is formed primarily as an elongate metallic channel having a base and side walls formed in one piece and a removable cover element therefor with a junction adapter formed as a metallic channel having a base provided with means for the through-passage and engagement of feed wires for connection to the conductors in the duct housing, and walls formed resiliently to engage the duct channel; the side walls and base

of the duct channel being deleted in the region of the connection to provide an extended opening giving access to the interior of the channel between socket elements and providing clearance for manipulation of the feed wires in making electrical connection, and the base and walls of the adapter being formed in assembly to enclose the deleted regions of the channel.

2,104,452
SHEET CUTTING, STITCHING, AND FOLDING MECHANISM
Curtis S. Crafts, Oak Park, Ill., assignor to The Goss Printing Press Company, Chicago, Ill., a corporation of Illinois
Application January 6, 1936, Serial No. 57,682
25 Claims. (Cl. 1—7)

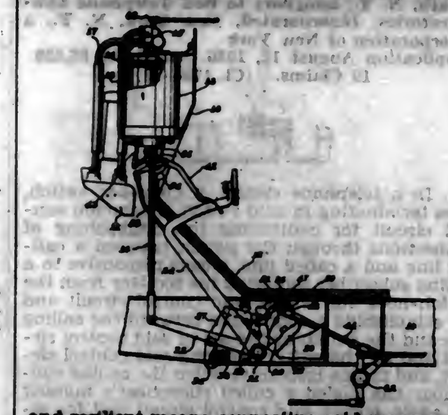


1. A rotary mechanism including in combination two cooperating rotary carriers, a stationary staple former adjacent one of said carriers, a stapling mechanism mounted on said carrier, said mechanism comprising a reciprocable staple forming and guiding plunger, a reciprocable staple driver, said plunger and driver being projectable beyond their carrier to cooperate with said former to form the staple, and means for retracting the driver during the driving of the staple.

2,104,453
VACUUM CLEANER
Dewey M. Dow, Toledo, Ohio, assignor to Air-Way Electric Appliance Corporation, Toledo, Ohio, a corporation of Delaware
Application July 10, 1936, Serial No. 89,965
3 Claims. (Cl. 15—16)

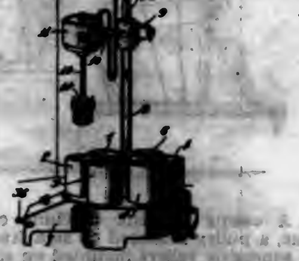
1. In a vacuum cleaner, a body portion, a fan case rotatably attached thereto on a transverse horizontal axis, and disposed in a longitudinal vertical plane, a handle rigidly attached to the fan case, adjustable means supporting said body portion, and control means including a flexible

element extending through the handle and around a portion of the periphery of said fan case, for effecting adjustment of said supporting means.



2,104,454
FILLING DEVICE
Hermann Flise, Worms-on-the-Rhine, Germany, assignor to Eisinger-Union-Werke A. G., Worms-on-the-Rhine, Germany, a German company
Application April 20, 1935, Serial No. 17,510
In Germany April 24, 1934
4 Claims. (Cl. 226—115)

1. Counter-pressure filling apparatus including a liquid pipe, a return air pipe, and a plug cock interposed in and controlling said pipes, said plug cock having within its plug a duct for establishing connection between the parts of said liquid pipe above and below the cock, a second duct for establishing connection between the parts of said return air pipe above and below the cock, and a third duct positioned to establish communication between the part of said return air pipe above the cock with the part of said liquid pipe below it at a time during the closing of the cock when the lower parts of said pipes are cut off from their upper parts and while a filled vessel is still in position.



2,104,455
POWER OPERATED CLUTCH AND BRAKE MECHANISM
Henry Ford, Dearborn, Mich., assignor to Ford Motor Company, Dearborn, Mich., a corporation of Delaware
Application July 27, 1932, Serial No. 625,053
Renewed July 6, 1937
19 Claims. (Cl. 192—.01)

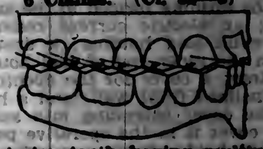
1. A servo-device adapted to operate the clutch of a vehicle comprising, a power actuated member, shiftable means for positively connecting the vehicle clutch with said power member whereby actuation of said member will disengage said clutch, said shiftable means being readily shifted to an inoperative position whereby actuation of said power member will not disengage said clutch,

and resilient means connecting said power member and clutch located so that actuation of said power member when said shiftable member is inoperative will energize said resilient means to thereby partially counteract the force required to manually disengage the vehicle clutch.

2,104,456
WATCH CLEANING MACHINE
Irving Friedman, Newark, N. J., assignor, by direct and mesne assignments, to Efco Manufacturing Company, Newark, N. J., a corporation of New Jersey
Application July 16, 1936, Serial No. 90,529
8 Claims. (Cl. 34—26)

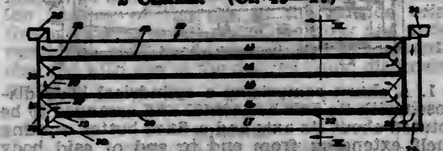
3. In a watch cleaning machine, a base, a post extending up from said base, said post being of uniform, polygonal cross-section except at the upper portion thereof, said upper portion being of a smaller cross-section than the polygonal portion of the post, a collar provided with a polygonal aperture corresponding to the polygonal cross-section of the post slidably arranged on said post and being provided with a vertical shaft adapted to support a basket for watch parts to be cleaned, and a plurality of containers positioned on said base about the post and in alignment with the respective sides thereof, whereby the collar may be rotated on the upper portion of the post and by bringing the collar into engagement with the polygonal portion of the post the basket may be exactly aligned with any predetermined container on the base.

2,104,457
AUTOMOBILE BODY CONSTRUCTION
Joseph Galamb, Detroit, Mich., assignor to Ford Motor Company, Dearborn, Mich., a corporation of Delaware
Application April 20, 1937, Serial No. 138,744
11 Claims. (Cl. 180—82.5)



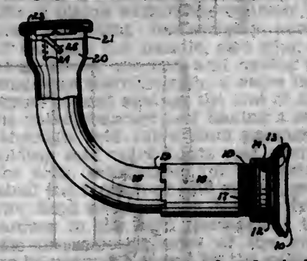
1. A device of the character described comprising, a vehicle dash, a horizontal shelf formed on the forward face of said dash, a vehicle battery supported on said shelf, detachable means coacting with said battery and vehicle dash which in its engaged position retains said battery upon said shelf, and locking means accessible only from the rear face of said dash for locking said detachable means in said engaged position.

2,104,458
ELECTRIC SWITCH
Hugo Goudet and Roger Sénéchaux, Paris, France, assignors to Compagnie Generale de Telegraphie sans Fil, a corporation of France
Application February 19, 1936, Serial No. 64,049
In France February 25, 1935
2 Claims. (Cl. 200—4)



1. In combination with a contact system which is broken by removing at least one of its elements from the contacting plane, means for controlling the breaking comprising a shaft supporting a mobile element of the contacting system and mounted for sliding axially, a second shaft orthogonal to the said first shaft and provided with controlling means, coupling means comprising spiral pinions between both shafts, means for preventing the first shaft from rotating whilst allowing the sliding when a force is applied to the second shaft, means for removing the said preventing means when the force applied increases above a predetermined value, and yielding means opposed to the sliding in the sense determined by the said force.

2,104,459
ARTIFICIAL TEETH
Alfred Gyal, Zurich, Switzerland, assignor to The Dentists' Supply Company of New York, New York, N. Y., a corporation of New York
Application January 14, 1936, Serial No. 59,023
6 Claims. (Cl. 32—8)

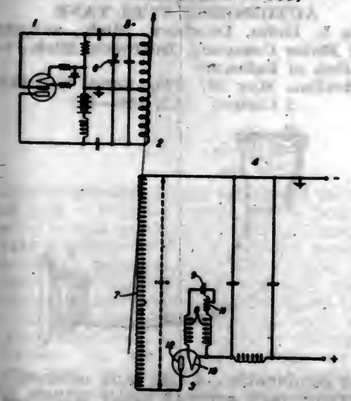


1. A posterior tooth having multiple protrusive facets and in which the protrusive posterior facet has greater angulation than the anterior protrusive facet, and in which the working and balancing facets have their angulations successfully lowered in the same direction.

2,104,460
GLASS DRAWING APPARATUS
Howard L. Halbach, Clarksburg, W. Va., assignor to Pittsburgh Plate Glass Company, Allegheny County, Pa., a corporation of Pennsylvania
Application February 13, 1937, Serial No. 125,689
2 Claims. (Cl. 49—17)

1. In combination in glass drawing apparatus, means for drawing a sheet of glass from a bath, and a cooler above the glass bath adjacent the line of draw of the sheet comprising a series of metal pipes of rectangular cross section one above the other and rigidly secured together along their lengths, communications between each adjacent pair of pipes at one end thereof so that a continuous back and forth passage through all the pipes is provided, and an inlet and an outlet for the cooler, one of which is connected to one end of the top pipe of the series and the other of which is connected to one end of the bottom pipe of the series.

2,104,461
AUTOMOBILE FUEL TANK
Charles L. Holm, Dearborn, Mich., assignor to Ford Motor Company, Dearborn, Mich., a corporation of Delaware
Application May 16, 1936, Serial No. 80,093
3 Claims. (Cl. 220—44)



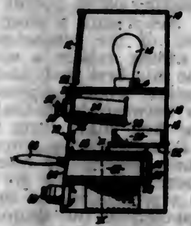
1. In combination, a fuel tank adapted to extend transversely across a motor vehicle, a filler neck extending horizontally from one end of said tank, the outer end of said filler neck being bent upwardly, a cap secured to the upper end of said filler neck, which cap forms an air-tight closure therefor, a vent tube extending through the wall of the upper portion of said filler neck, said vent tube having a portion thereof which extends diagonally downwardly in a plane transverse to the vehicle, a check valve ball disposed in the diagonal portion of the vent tube, and a check valve seat formed in said diagonal portion in position above said ball, the angle of said diagonal portion being such that said ball will be forced by the centrifugal force generated as the vehicle rounds a curve in one direction to coact with said seat, for the purpose described.

2,104,462
CHURN
Albert C. Hoegland, St. Paul, Minn., assignor to Crane Company of Minnesota, St. Paul, Minn., a corporation of Minnesota
Application April 16, 1936, Serial No. 74,703
7 Claims. (Cl. 31—33)

1. A churn comprising a cylindrical body disposed with its axis horizontal and arranged to be rotated about its axis and a fixed butter working shelf extending from end to end of said body along the inner periphery thereof, said shelf having its outer edge extending substantially parallel to the axis of said body and having an inner edge portion adapted to support a mass of butter in said body and sloping from one end of said body toward the other end, obliquely to the axis of said body.

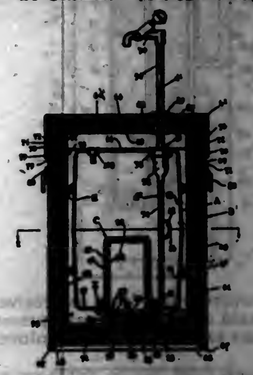
2,104,463
SOURCE OF VARIABLE HIGH DIRECT POTENTIAL
John B. Johnson, Millburn, N. J., and Fred W. Kammerer, New York, N. Y., assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application July 6, 1936, Serial No. 89,662
6 Claims. (Cl. 175—363)

2. The method of generating a continuously variable direct potential which comprises the steps of generating a wave, varying the frequency thereof, converting said variation of frequency into a corresponding variation of potential by transmitting the wave through a circuit tuned to an intermediate frequency in the range of frequency variations, and rectifying said wave.



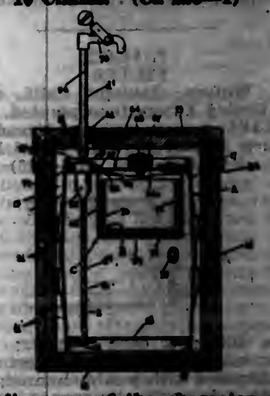
3. A source of high, direct potential comprising in combination, a wave source, a step-up transformer, a rectifier and a filter-like means for smoothing the resultant rectified wave, the voltage step-up as achieved by said transformer being predetermined by the desired ultimate direct potential in the output circuit of the filter means, and the reactive elements of said filter-like means having such electrical dimensions while preserving for said means its desired frequency-pass characteristic as to insure storage capacities so small that the resultant direct potential, however large, may not inflict bodily injury on an operator, any part of whose body is interposed in the circuit.

2,104,464
ROTARY MATCH LIGHTER
Harry George Klassen, Chicago, Ill.
Application September 11, 1933, Serial No. 688,974
10 Claims. (Cl. 206—29)



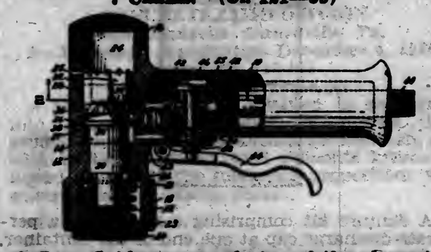
1. In a lighter of the type described: a support, a rotary match unit therein and a bar operating means arranged to operate in conjunction therewith; a match exposing opening in said support; inclined match separators in a side of said opening; a flap bearing means arranged to support said operating bar; inclined ratchets formed on said support to limit the movement of said rotor; said operating bar having inclined abrasive surfaces, a slide bearing means arranged to guide and limit the movement of said bar, said parts being so arranged that when said matches are positioned in the match exposing opening, said opening is simultaneously closed and when said match exposing opening is opened said positioned match is simultaneously ignited.

2,104,465
ELECTRIC COOKER
Elmer Lewis, Kansas City, Mo.
Application May 21, 1937, Serial No. 143,953
1 Claim. (Cl. 219—19)



An electric cooker of the character described comprising a case having an inclined front wall provided with an opening; a vertical rear wall having an opening lower than the opening in the front wall; a housing supported within the case by the said front wall, extending toward and terminating a distance from the said rear wall; a drain tray normally positioned below the inner end of the housing and removable from the case through the opening formed in the said vertical rear wall; an electric current resistance wire wound around said housing; a drain element formed on the inner end of said housing above the said tray; a cover for the opening through the said inclined front wall; and a holder carried by the cover extending into said housing when the cover is in the operative position, the axis of said holder being perpendicular to the inclined plane of said front wall.

2,104,466
REFRIGERATING DISPENSER FOR BEVERAGES
George R. Marseil, St. Paul, Minn., assignor to Farwell Ozmun Kirk & Co., St. Paul, Minn., a corporation of Minnesota
Application August 24, 1933, Serial No. 686,544
20 Claims. (Cl. 62—91.5)



18. In a dispenser of the character described, a heat insulating case, a closed container for a liquid, said container being disposed on end within the case, said case providing an enclosed space about the sides and one of the ends of the container, a closed receptacle for solid carbon dioxide incorporated within the container in the structure of such end thereof, said receptacle being vented into the interior of the container for conducting thereinto a portion of the gas generated from the solid carbon dioxide in said receptacle, and also vented into said enclosed space at the aforesaid end of said container for conducting therefrom another portion of such gas, and a tapping conduit leading from the interior of the container through the wall structures of said container and case.

2,104,467
LIQUID REFRIGERATING DISPENSER
George R. Marseil, St. Paul, Minn., assignor to Farwell Ozmun Kirk & Co., St. Paul, Minn., a corporation of Minnesota
Application April 22, 1935, Serial No. 17,628
10 Claims. (Cl. 225—1)

1. In a dispenser of the character described, a closed liquid container, a conduit leading from the interior of the container for dispensing the liquid therefrom, a receptacle including a body incorporated within the container and opening to the outside through a wall thereof, a removable cover for the receptacle body, a heat insulated receiver for solid carbon dioxide removably disposed within said receptacle, said receiver having portions thereof closely adjacent to the receptacle body and other portions spaced from said body to expose inner portions thereof to the gas generated from the solid carbon dioxide in said receiver, said receptacle structure being vented to release gaseous carbon dioxide into the interior of said container and also to the outside, the venting of the gas to the outside being through a vent in the receptacle cover and under restriction such that the container is constantly charged with gas at the desired liquid dispensing pressure.

2,104,468
PNEUMATIC HAMMER
John W. Osborn, Jackson, Mich., assignor to Hinckley-Myers Company, Jackson, Mich., a corporation of Michigan
Application August 5, 1936, Serial No. 94,377
7 Claims. (Cl. 121—35)

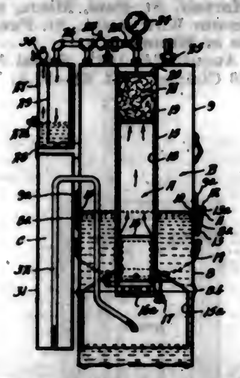
1. In a fluid pressure device of the character described, a casing having a handle and a head portion, said head portion hollowed out to form a fluid cylinder having a fluid outlet, said fluid cylinder having a fluid inlet extending through said handle, a piston within the cylinder, a valve casing plug extending transversely across the fluid inlet through the handle, said plug having a valve chamber at one end and having a valve stem passageway therethrough, a valve having a head adapted to seat against the end of the plug within the valve chamber and having a stem extending through said valve stem passageway, a spring holding said valve to its seat against the end of the plug, mechanism for unseating said valve against the tension of said spring, said plug having two fluid passageways leading from the valve chamber to the fluid passageway through the handle on opposite sides of the plug and adapted to be normally closed by the valve seated against the end of the plug within the chamber.

2,104,469
SUPPLYING INK TO INK TRANSFER MEMBERS
George E. Pelton, Alexandria, Va., and Edward L. Jester, Washington, D. C.; said Jester assignor to said Pelton
Application August 7, 1935, Serial No. 35,213
11 Claims. (Cl. 197—171)

1. In a typing mechanism including a writing ribbon, the combination of a tube containing ink and having a discharge orifice, a plunger in said tube, adjustable yielding means outside of said tube operatively connected to said plunger within said tube for yieldingly urging said plunger

toward said orifice to discharge ink through the same, and a movable member on which ink is

deposited from said orifice and from which ink is transferred to said ribbon.



2,104,470
DENTURE KIT
Orville A. Roland, Quincy, Ill.
Application July 11, 1936, Serial No. 90,219
1 Claim. (Cl. 132—84)

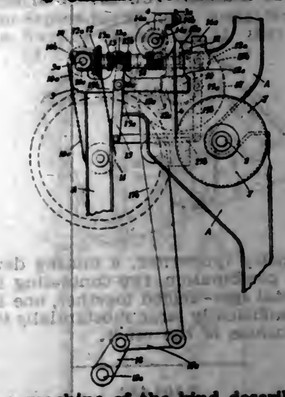
A denture kit comprising a container, a perforate discharge cap at one end of the container, a closure cap frictionally engaging over said discharge cap, and a brush member frictionally engaging said closure cap, said brush member comprising a back contacting with said one end of the container on opposite sides of said closure cap and provided with an outwardly offset central portion overlying said closure cap and bristles secured to said back and said offset portion with the ends of said bristles substantially coplanar from end to end of said brush, said central portion providing a recess in the back to snugly receive said closure cap whereby said brush will be frictionally maintained on said closure cap.

2,104,471
ACETYLENE GENERATOR
Reiland C. Sabins, St. Paul, Minn., assignor to Mechanical Development Co., St. Paul, Minn., a corporation of Minnesota
Application August 29, 1934, Serial No. 741,919
3 Claims. (Cl. 48—22)

2. An acetylene gas generator having in combination a casing closed from the atmosphere and adapted to contain water in its lower portion and forming a pressure accumulating chamber in the upper portion thereof, a second casing forming a gas holding chamber in the upper portion thereof and having communication with said pressure accumulating chamber to cause pressures to equalize in said two chambers, said casings having water communication only between their lower portions and below the operating or contact level of the water, means for holding a quantity of carbide with the lower surface thereof disposed at a predetermined water contact level, and an auxiliary recession chamber independent of said casings and closed from the atmosphere and having only communication with the water in said generator at a point below the

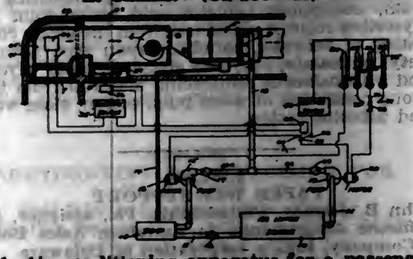
operating contact water level to receive receding water from said casings when gas pressure within said casings exceeds a predetermined amount.

2,104,472
AUXILIARY CHUCK
John A. St. Clair and Dewey R. Gemmel, Indianapolis, Ind.
Application July 19, 1935, Serial No. 32,134
2 Claims. (Cl. 175—367)



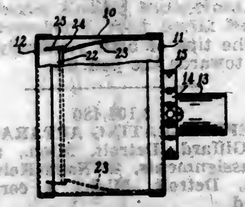
2. An auxiliary chuck adapted to cooperate with a main chuck having a magnetic field, comprising a disk like body portion of non-magnetic material, and a plurality of magnetic flux carrying poles of uniform cross sectional area throughout their length and extending through said body portion in a straight line from end to end, a portion of said poles being at an acute angle to the vertical axis of said body portion, whereby the magnetic field of the main chuck is extended to an area larger than the face of the chuck.

2,104,473
FILTER
Lloyd W. Watson, Oakland, Calif., assignor to Oliver United Filters Incorporated, San Francisco, Calif., a corporation of Nevada
Application August 20, 1935, Serial No. 37,003
3 Claims. (Cl. 210—195)



1. In a filter: a base member; a channel formed in said base member; a section of filter medium disposed within said channel; and a zigzag locking strip resiliently engaged between the walls of said channel and said filter medium.

2,104,474
ACTUATING MECHANISM FOR DOFFING MECHANISM
James Keith Andersen, Leeds, England
Application September 19, 1935, Serial No. 41,343
In Great Britain September 28, 1934
3 Claims. (Cl. 74—1)

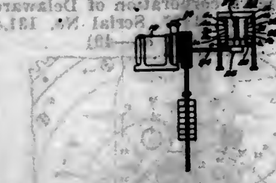


1. In a machine of the kind described having power driven mechanism, a starting lever for controlling the drive of said mechanism, and two reciprocable members; apparatus for imparting movements to said members in a predetermined sequence, and means for interlocking said starting lever and apparatus so that when either is operative the other is locked against operation.

2,104,475
SPRAY TYPE CONDITIONER FOR PASSENGER VEHICLES
Samuel M. Andersen, Sharon, Mass., assignor to B. F. Sturtevant Company, Boston, Mass.
Application November 11, 1936, Serial No. 110,289
12 Claims. (Cl. 236—44)

1. Air conditioning apparatus for a passenger vehicle, comprising a cooler, spray nozzles in said cooler, means for passing outside air through said cooler and for discharging it into the passenger space of said vehicle, circulating means for supplying a liquid to said spray nozzles and for returning the liquid from said cooler, refrigerating means for cooling said liquid, means for routing said liquid through said refrigerating means, by-pass means for by-passing said liquid around said refrigerating means, control means for placing into operation said by-pass means and for rendering inoperative said means for routing said liquid through said refrigerating means when the wet bulb temperature of the outside air is below a predetermined point, and means controlled by said control means and responsive to conditions within the passenger space for controlling the supply of liquid to said nozzles.

2,104,476
CAMERA MODEL
Edward N. Anketell, New Haven, Conn., assignor to The A. C. Gilbert Company, New Haven, Conn., a corporation of Maryland
Application December 11, 1936, Serial No. 115,376
6 Claims. (Cl. 35—49)



1. A camera model comprising a housing equipped with light projecting means and resilient members within the housing for engaging a plate at opposite edges and holding it removably in facing relation to the projecting means.

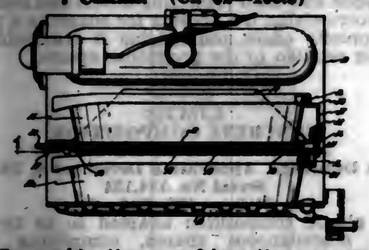
2,104,477
CONCRETE COMPOSITION
John Draugelis, Girardville, Pa.
No Drawing. Application December 4, 1936, Serial No. 114,134
1 Claim. (Cl. 106—24)

A plastic composition adapted to be formed into miscellaneous shapes, comprising 17% ground corn stalk, 33% anthracite coal ash, and 50% Portland cement, said elements intimately mixed in exactly the foregoing proportions with water to form a plastic mass.

2,104,478
ELEVATOR CONTROL SYSTEM
William F. Eames, Edgewood, Pa., assignor to Westinghouse Electric Elevator Company, Chicago, Ill., a corporation of Illinois
Application December 1, 1934, Serial No. 755,578
33 Claims. (Cl. 187—29)

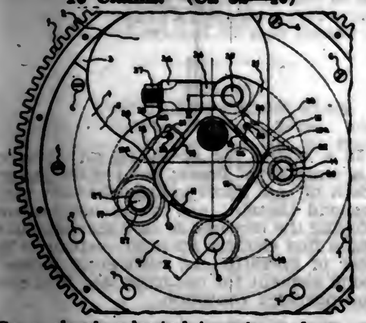
1. In a system for operating an elevator car past a plurality of floors; call registering means for each of said floors and mechanism disposed to respond thereto; and quota mechanism for controlling the response of said mechanism comprising a first element operably responsive to the number of operated call registering means and a second element for restoring said first element to non-operated condition.

2,104,479
QUICK CLEANING FEEDER FOR PENS
Ross F. George, Seattle, Wash.
Application May 24, 1934, Serial No. 81,823
34 Claims. (Cl. 120—114)



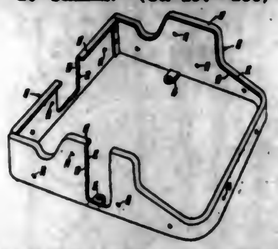
1. In combination with a pen, an underfeeder and an overfeeder pivotally mounted thereon,

and spring means cooperating with said feeders



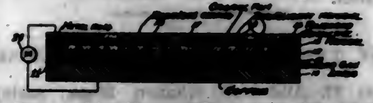
to press the tips of both yieldingly and simultaneously towards the pen tip.

2,104,480
REFRIGERATING APPARATUS
Whitney Gifford, Detroit, Mich., assignor, by mesne assignments, to Nash-Kelvinator Corporation, Detroit, Mich., a corporation of Maryland
Application October 16, 1936, Serial No. 105,851
7 Claims. (Cl. 62—106.5)



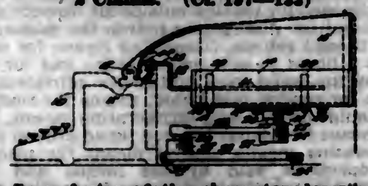
1. In combination, a refrigeration evaporating unit, ice freezing tray supported in said unit, a perimetrical flange formed on said tray, a lever for free engagement with said flange, an arcuate slot formed in said lever, a crank engageable in said slot and operable by an arm extending forwardly of said tray to move said lever in one direction to force a separation between said tray and support.

2,104,481
CRANKSHAFT CHUCK
William F. Greene, Cincinnati, Ohio, assignor to The E. K. Le Blond Machine Tool Company, Cincinnati, Ohio, a corporation of Delaware
Application March 17, 1937, Serial No. 131,459
16 Claims. (Cl. 82—40)



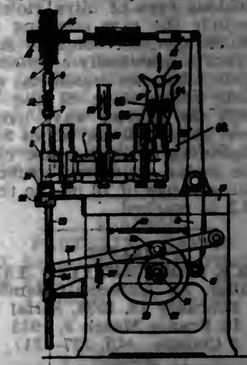
1. In a chuck adapted to grip and support a precentered work piece without distortion by means of irregular rough surfaces on said work piece, a chuck body, a plurality of pairs of clamping jaws pivotally mounted on said chuck body, the jaws of each pair swinging relative to the work in opposed relation to the jaws of said other pairs, and clamping means to maintain engagement of said jaws with said work piece.

2,104,482
TYPEWRITING MACHINE
William F. Heimond, West Hartford, Conn., assignor to Underwood Elliott Fisher Company, New York, N. Y., a corporation of Delaware
Application November 1, 1935, Serial No. 47,731
10 Claims. (Cl. 197—166)



4. In a noisy typewriter, a muting device including, in combination, two contacting laminations of metal spot-welded together, one lamination being sufficiently large substantially to choke the sonorousness of the other.

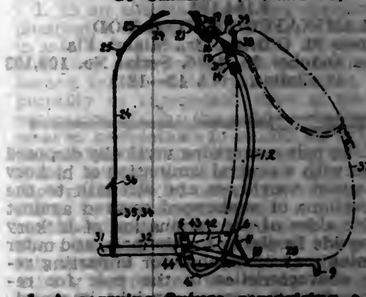
2,104,483
PRESERVATIVE AND CONTACT COAT FOR LIGHT-SENSITIVE DEVICES
George W. Hewitt, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa., a corporation of Pennsylvania
Application March 5, 1936, Serial No. 67,278
6 Claims. (Cl. 136—89)



5. In combination with a translucent metal film, a protective transparent coating therefor comprising a resin from the group consisting of rosin, collophony, abietic acid, ester gum or glycerized rosin, a plasticizer from the group consisting of beeswax, paraffin, Japan wax, normal butyl phthalate, ethylene glycol or other glycol, and a translucent reinforcing material from the group consisting of wood pulp, cotton, glass wool and asbestos cotton.

2,104,484
PAPER WEB SUPPORT
John B. Janney, Philadelphia, Pa., assignor, by mesne assignments, to American Sales Book Company, Inc., a corporation of Delaware
Application January 10, 1931, Serial No. 507,818
2 Claims. (Cl. 197—133)

1. In a device of the character described, an actuating arm comprising an L-shaped bar, a straight bar, and a universal clamp slidable relative to both bars and arranged for rigidly holding the bars in a desired angular relation, and adjustable to permit a change in such angular relation and in the effective length of a bar.

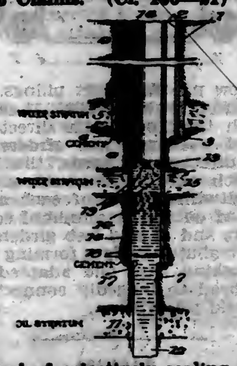


2,104,485
METHOD AND APPARATUS FOR MANUFACTURING COLLAPSIBLE TUBES
Ivar Anders Emil Johnson, Malmö, Sweden, assignor to Aktiebolaget Gurk, Arabins Mekaniska Verkstad, Stockholm, Sweden, a corporation of Sweden
Application September 17, 1934, Serial No. 744,460
In Sweden September 21, 1933
13 Claims. (Cl. 113—1)

1. In the manufacture of collapsible tubes, the method which comprises taking an open ended tube having an irregularity, applying to the tube a cap loosely screwed thereto, rotating the tube and stopping the rotation when said irregularity reaches a position corresponding to the proper angular position for sealing of the tube, sealing the tube by flattening the open end, and utilizing the rotary movement of the tube for screwing the cap tight.

3. In an apparatus having a mechanism for sealing by flattening an end of collapsible tubes provided with an irregularity, the combination of a tube carrier, a driving member having an abutment, means for rotating said driving member to register its abutment with the irregularity of the tube and further swing said irregularity into a predetermined position relative to said carrier, and means for moving said carrier together with said tube into a definite operative position relative to said sealing mechanism.

2,104,486
CARRYING-FIXTURE, ESPECIALLY FOR KNAPSACKS
Rolf Hjerth Johansen, Oslo, Norway
Application December 16, 1935, Serial No. 54,717
In Norway April 3, 1935
10 Claims. (Cl. 224—8)

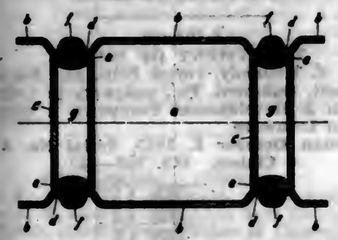


1. A carrying-fixture comprising a frame of rods, a cross member, means connecting said frame and said cross member for universal angular relative movement and carrying straps which are connected to said cross member at each side of the axis of movement thereof.

2,104,487
GARMENT
Frederick Charles Kessler, Rutherford, N. J.
Application December 2, 1935, Serial No. 52,706
2 Claims. (Cl. 2—70)

1. In combination, a top shirt, an undergarment, means for removably securing said top shirt to said undergarment, comprising a plurality of spacedly disposed female snap fastener elements secured to the outer portion of said top shirt at the waist line thereof, tabs secured to said top shirt below said female fastener elements, a plurality of spacedly male snap fastener elements on said undergarment adapted to be received by said female snap elements for removably securing said top shirt to said undergarment, said undergarment adjacent said male fastener elements being provided with finger-receiving apertures permitting of the insertion of a finger, facilitating the connecting of said fastener elements.

2,104,488
TREATMENT OF WELLS
Harvey T. Kennedy, Forest Hills, and Blaine B. Wescott, Oakmont, Pa., assignors to Gulf Research & Development Company, a corporation of Delaware
Application October 3, 1935, Serial No. 43,440
6 Claims. (Cl. 166—21)



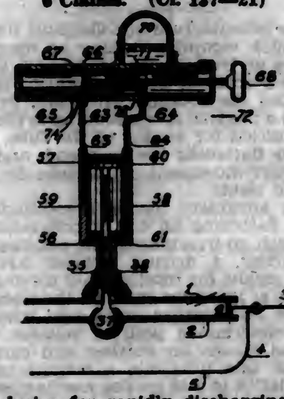
1. A method of selectively sealing or solidifying water-bearing strata by impregnation in wells penetrating such strata and also penetrating lower, oil-bearing strata, which comprises establishing in the well a body of gel extending up adjacent but below the water strata and closing off the oil strata, injecting a liquid sealing agent into the well above the gel body and forcing the sealing agent into the water-bearing strata to impregnate said strata and seal them, the sealing agent being prevented from entering the oil strata by the gel body, and then removing the gel body, leaving the oil strata exposed.

2,104,489
CAN OPENER
Robert Thomas Killman, Nashville, Tenn.
Application August 28, 1935, Serial No. 38,256
5 Claims. (Cl. 30—15)

1. The combination, in a can opener, of a frame; a feed wheel; an operating handle; a blade; a blade actuating member extending into the path of the handle, said blade actuating member having a straight edge adapted to cooperate with a flat surface on said handle; and resilient means urging said straight edge against said flat surface, whereby said blade and said handle are yieldably held in a predetermined can receiving position.

2,104,490
HOLLOW PILE FOR SHEET PILINGS
Willem Coenraad Köhler, Amsterdam, Netherlands, and Arthur Mauterer, Dortmund, Germany
Application January 14, 1937, Serial No. 120,479½
In Germany January 18, 1936
2 Claims. (Cl. 61—60)

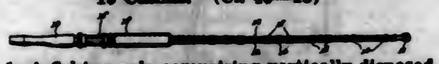
1. A hollow pile for sheet pilings, comprising in combination two parallel U-section outer girders with their open side directed inwards, two parallel U-shaped web girders with their open side directed outwards, the longitudinal edges of each web girder abutting against one of the longitudinal edges of each outer girder, hooks formed on the longitudinal edges of said outer girders and of said web girders, the hooks on every two abutting edges forming a bead, and I-section locking bars one adapted to engage over each bead to hingedly connect said outer girders to said web girders.



2,104,491
ADHESIVE
Robert S. McKinney, Chevy Chase, Md., dedicated to the free use of the People of the United States of America
No Drawing. Application July 12, 1937, Serial No. 153,197
1 Claim. (Cl. 167—42)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

An adhesive adapted for use in combination with insecticides and fungicides containing as its essential active ingredient alpha-eleostearic acid.

2,104,492
LIGHT FILTER
Erich Merkel, Wuppertal-Barmen, and Christian Wiegand, Wuppertal-Elberfeld, Germany, assignors to Winthrop Chemical Company Inc., New York, N. Y., a corporation of New York
No Drawing. Application March 17, 1934, Serial No. 716,172. In Germany March 21, 1933
13 Claims. (Cl. 167—89)



10. A medium which protects the human skin from the noxious rays of ultra violet light but does not exclude the rays effecting tanning of the skin, which medium contains as the light absorbing agent a practically colorless, non-poisonous organic substance which has a high and simultaneously steep slope of the absorption curve towards the shorter wave length in the range between about 320 and about 350 mμ, said slope corresponding to an increase of the logarithm of the molar extinction coefficient by at least 1 within a range of 10 mμ, so that at least the value 3.2 is reached.

2,104,493
DEVICE FOR EMPTYING TANKS
Jacques Muller, La Garenne-Colombes, France
Application February 19, 1934, Serial No. 712,071
In France March 9, 1933
6 Claims. (Cl. 137—21)

1. A device for rapidly discharging the contents of a tank having a discharge opening, comprising a valve seat surrounding said opening on the interior of said tank, a similar valve seat on the exterior of said tank, a valve associated with each valve seat, and fluid-actuated means for effecting simultaneous opening and closing of both valves.

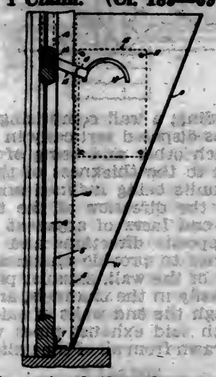
2,104,494
LAMINATED FISHING ROD
Francis M. O'Brien, Jr., Miami, Fla.
Application October 28, 1936, Serial No. 108,103
10 Claims. (Cl. 43—18)

1. A fishing pole comprising vertically disposed laminations with a central lamination of hickory wood to impart toughness and strength to the pole, laminations of snakewood secured against the opposite sides of the lamination of hickory wood to provide flexibility for the pole, and outer lateral laminations of bamboo for imparting recuperative characteristics to the pole for returning the same to normal straight line position after flexing.

2,104,495
REEL SEAT FOR FISHING RODS
Francis M. O'Brien, Jr., Miami, Fla.
Application February 2, 1937, Serial No. 124,873
10 Claims. (Cl. 43—23)

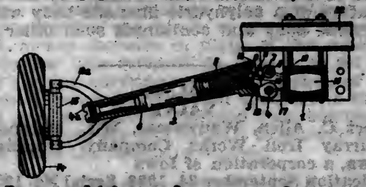
1. In a fishing rod, a reel seat comprising a tubular member having an open end, a ferrule adapted to be fixed upon the inner end of the pole of a fishing rod and removably fitted in said open end of the reel seat, and clamping means between the ferrule and the reel seat for securing the same together against relative rotation and longitudinal movement.

2,104,496
FASTENING DEVICE
Justus J. Schaefer, Great Barrington, Mass.
Application February 28, 1935, Serial No. 8,624
4 Claims. (Cl. 20—92)



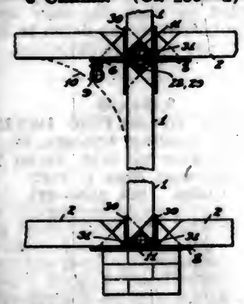
2. A joint including frame members to be secured together and provided with aligned sockets in combination with a helically slit rawhide coupler expanded in said sockets.

2,104,497
AUTOMATIC VENDING MACHINE
Fritz Schulte, Berlin-Halensee, Germany
Application January 12, 1936, Serial No. 59,763
In Germany January 16, 1935
2 Claims. (Cl. 312—97.1)



1. In an automatic vending machine, in combination, a transparent casing, a drum rotatable in said casing and comprising a plurality of immediately superposed goods supporting members having intermediate walls arranged to form a plurality of superposed rows of sector-shaped compartments for the goods connected together so as to be rotatable in unison, an external manual control member for turning the drum, said casing having a withdrawal opening for each superposed row of compartments for permitting access to the compartments, a door for each of said openings, a driving member on each of said doors movable into and out of the path of said intermediate walls, actuating means for said driving member on the casing arranged to protrude the driving member into the path of the intermediate walls on the door being opened, so as to engage one of said walls and move the drum into a position in which one of said sector-shaped compartments coincides with the respective opening and enable the drum to move any open door into the closed position on the drum being turned in the direction to close the door and means operatively connected to the drum to limit rotation thereof in the opposite direction.

2,104,498
CLOSURE OPERATING DEVICE
John Slatinsky, Chicago, Ill.
Application February 25, 1936, Serial No. 65,691
Renewed June 1, 1937
1 Claim. (Cl. 189—69)



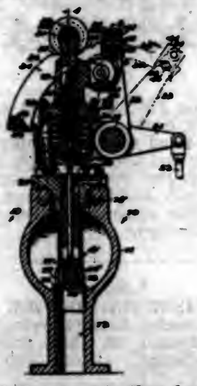
An attachment of the class described comprising a substantially triangular plate formed at one end with an attaching flange for attaching to a window frame and at its opposite end with a stop flange, said plate being further provided with an arcuate slot, a lever having an intermediate offset portion operable in said slot, one end of said lever being provided with an operating device for connection with a hinged closure, a gear connected to the other end of said lever and a hand crank for operating said gear.

2,104,499
RESILIENT SUSPENSION MEANS FOR MOTOR VEHICLES
Jaroslav Svoboda, Ladislav Svoboda, and Karel Bilek, Prague, Czechoslovakia
Application June 16, 1937, Serial No. 148,606
In Czechoslovakia December 19, 1935
14 Claims. (Cl. 267—31)

1. In a vehicle, a frame member, a wheel mounting member, an arm pivoted at one end to one of said members and secured at the other end to the other of said members, said arm having a tapered recess in one end thereof, a tapered mandrel extending into said recess, and a resilient sleeve element interposed between said mandrel and the walls of said recess, the outer end part of said mandrel bearing against the member to which said arm is pivoted.

2,104,500
INSULATED BUILDING STRUCTURE
Charles J. Van Buren, Detroit, Mich.
Application August 10, 1933, Serial No. 684,555
6 Claims. (Cl. 189—1)

1. In a building, a wall comprising a plurality of hollow units disposed vertically in side by side relation to each other and being of a thickness corresponding to the thickness of the wall, end faces of the units being inclined and extending diagonally in the direction of the thickness of the wall, the end faces of adjacent units being inclined in opposite directions and cooperating with each other to provide channels extending longitudinally of the wall, exhaust pipes extending longitudinally in the channels, and pipes extending through the end walls of said units and connected with said exhaust pipes whereby air may be withdrawn from all of the units.



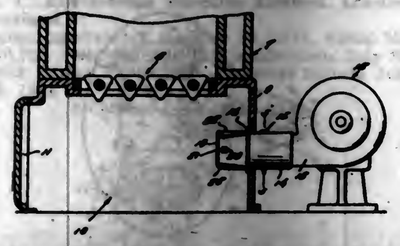
2,104,501
MANUFACTURE AND USE OF SYNTHETIC RESINS
Basil Albert Adams and Eric Leighton Holmes, Teddington, England
No Drawing. Application October 25, 1935, Serial No. 46,823. In Great Britain November 13, 1934
9 Claims. (Cl. 252—2)

1. The process of treating liquids to effect the removal therefrom of particular constituents by adsorption which comprises subjecting the liquid to the action of a synthetic resin obtained by the condensation of a mixture comprising a polyhydric phenolic body and a methylene body.

9. The process of treating aqueous liquids to effect the removal therefrom of particular cations and the replacement thereof with other cations which comprises subjecting the liquid to the action of a synthetic resin obtained by the condensation of a polyhydric phenolic body with a methylene body and containing such other cations.

2,104,502
VALVE
Robert C. Allen, Wauwatosa, Wis., assignor to Murray Iron Works Company, Burlington, Iowa, a corporation of Iowa
Application September 24, 1936, Serial No. 102,422
9 Claims. (Cl. 137—139)

1. In a valve, a casing having a valve seat, a valve body to engage the valve seat, a reciprocatory bar connected with the valve body to move it, a roller attached to the reciprocatory bar, a swinging arm having its axis of turning movement arranged near the casing, a cam bar having an inner circularly curved edge which is concentric with the axis of turning movement of the arm, said cam bar being arranged to engage with the roller and having inner and outer circularly curved cam faces which are concentric with the axis of turning movement of the lever and an intermediate shifting cam face which is disposed substantially at a right angle to the longitudinal axis of the reciprocatory bar when it engages the



roller to shift the same to thereby eliminate substantially all side thrusts upon the reciprocatory bar, means connecting the free end of the cam bar with the free end of the swinging arm, and supporting means engaging the inner circularly curved edge of the cam bar so that the inner circularly curved edge may travel concentrically with the turning axis of the swinging arm.

2,104,503
METHOD OF FORMING CONNECTING MEANS FOR OPHTHALMIC MOUNTINGS
Nelson M. Baker, Southbridge, Mass., assignor to American Optical Company, Southbridge, Mass., a voluntary association of Massachusetts
Application August 15, 1933, Serial No. 685,196
Renewed May 26, 1937
10 Claims. (Cl. 29—20)

1. The method of forming connecting means for the operable and/or separable parts of an ophthalmic mounting comprising forming a connecting member with a recess and a separate connecting member with a projection which may be fitted in said recess by sliding axial movement, providing each of said connecting members with means which during use will positively associate them with the operable and/or separable parts of the mounting so that when the said connecting members are united the said means will hold the operable and/or separable parts together, and associating heat softenable binding means with one of said connecting members so that the other connecting member may be slidably assembled therewith without having to directly engage or traverse the binding means, the said binding means being so located relative to the assembled parts that when heat is applied thereto the binding means will melt and flow between the parts and when allowed to cool will harden and unite the same.

2,104,504
FORCED FEED DRAFT EQUALIZER
William Barenda, New York, N. Y.
Application May 14, 1936, Serial No. 79,794
4 Claims. (Cl. 299—120)

4. In a device of the class described, an adapter sleeve designed to be fitted removably and telescopically on a delivery nozzle, and an air equalizing unit having one end fitted and fastened in the sleeve and the opposite end projecting beyond the sleeve, the projecting end portion embodying outwardly diverging baffle elements and the upper and lower longitudinal edges of said elements being formed with laterally projecting deflector flanges.

2,104,505
DYEINGS ON CELLULOSIC FIBERS
Hermann Berthold, Leverkusen-I. G.-Werk, Germany, assignor to General Aniline Works, Inc., New York, N. Y., a corporation of Delaware
No Drawing. Application April 27, 1934, Serial No. 722,817. In Germany May 10, 1933
6 Claims. (Cl. 8—5)

1. The process which comprises applying to cellulosic fibers an α-hydroxynaphthalene compound with a free vicinal β-position together with an alkaline reacting and an oxidising agent and developing the dyestuff by oxidation.

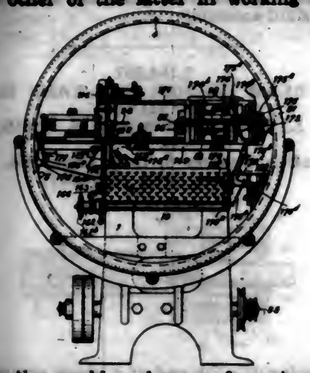
2,104,506
STUD
Edwin D. Coddington, Milwaukee, Wis., assignor to Reynolds Corporation, New York, N. Y., a corporation of Delaware
Application September 2, 1935, Serial No. 39,024
5 Claims. (Cl. 72—115)

4. A composite prefabricated structural member comprising a longitudinally closed tubular casing of relatively thin, nail-penetrable sheet metal, a cementitious nailable core enclosed by the casing, said casing comprising a pair of reversely disposed channel members of slightly different widths having straight flat terminal flanges, the flanges of the wider channel member overlying the flanges of the companion channel member so as to provide a double thickness of metal extending along the top and bottom faces of the structural member, and bonding means between the overlapped flanges to maintain the channel members in rigid assembly.

2,104,507
WARP BEAM HOLDER FOR YARN DRYING MACHINES
Manley L. Crain and Clarence E. Smith, Greer, S. C.
Application October 9, 1935, Serial No. 44,262
1 Claim. (Cl. 308—212)

A bearing for the end of a shaft comprising a stationary support, an axle having an intermediate portion movable axially of and carried by the support, a sectional bearing housing mounted on one end of the axle and hinged one to the other, said housing having an opening remote from its mounting on the axle to receive the end of the shaft, roller bearings carried by each section adapted to surround the periphery of the shaft to provide radial support therefor, and a bearing element in the housing adapted to abut the end of the shaft to prevent axial thrust.

2,104,508
FUSE FOR HAND GRENADES AND PROJECTILES
Ladislaus Demeter, Monor, Hungary
Application April 9, 1936, Serial No. 73,534
In Hungary April 15, 1935
21 Claims. (Cl. 102—39)



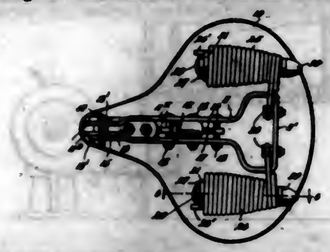
1. Fuse for an explosive missile comprising a container, a fuse composition in such container capable of burning slowly under normal pressure but of exploding under excess pressure, said container having openings therein to permit the fuse composition, when ignited, to burn under normal pressure, means for covering said opening, said means and said container being relatively movable in flight of the missile to uncover said openings, means movable in flight of the missile to ignite the fuse composition, means to set back said opening covering means on impact, or after a time interval, to cover said openings to subject said previously slowly burning fuse composition to excess pressure and cause it to explode and in turn cause the missile to explode.

2,104,509
TYPE CASTING AND SETTING MACHINE
Frederic Devise, Paris, France
Application July 16, 1936, Serial No. 90,964
In France July 19, 1935
13 Claims. (Cl. 199—74)

1. In a machine for casting and setting movable type, a frame carrying a plurality of matrix blocks, means for automatically putting, by

a rotation of the entire group of blocks, one or the other of the latter in working position

opposite the mould, and means for automatically starting this group of blocks.



2,104,510
TOY RAILWAY
Georg Einfalt, Nuremberg, Germany
Application January 25, 1937, Serial No. 122,318
In Germany February 6, 1936
2 Claims. (Cl. 105—29)

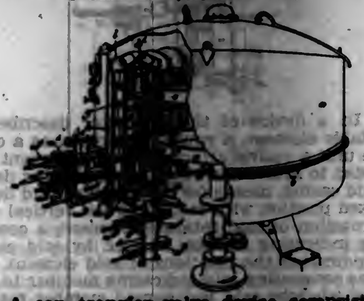
1. A toy railway vehicle in combination with a toothed rail; driving means and automatic locking and releasing means therefor mounted on said vehicle, the said locking and releasing means including a toothed wheel adapted to engage in the teeth of the rail and a pawl guided to move vertically and adapted to come in contact with the teeth of the rail and having a tongue adapted to engage with the teeth of the said wheel to lock the wheel when the pawl is in its lower position and to release the wheel when the pawl is lifted by impinging against the teeth of said rail; a spark producing device consisting of a friction wheel, a spark producing flint abutting against the periphery of the friction wheel, a two-arm lever having a pivot on which the lever is mounted in a non-rigid manner, the said lever carrying at the upper end the said flint and being weighted at its lower end; driving axles and intermediate wheels interposed between the driving means and the friction wheel and adapted to drive the latter at a high speed when the driving means are released; and the track having descending smooth rail sections and ascending toothed rail sections, whereby the spark producing device is rendered operative only while the vehicle moves up the rail.

2,104,511
SADDLE FOR CYCLES
Roland W. Faulhaber, Alma, Mich., assignor to The Lobdell-Emery Manufacturing Company, Alma, Mich., a corporation of Michigan
Application March 23, 1936, Serial No. 70,478
11 Claims. (Cl. 155—5.22)

1. A saddle for cycles comprising a seating member and a reach member disposed in substantial parallelism, one end of the reach member being pivotally attached to the seating member, a torsion spring forming a helix, means carried by one of said members and supporting said spring at the ends of the helix with the axis

thereof in fixed relation to said member and extending longitudinally of said saddle, one end of said spring being fixed against rotation with relation to said axis and means connecting the other end of said spring to the other member.

2,104,512
SADDLE FOR CYCLES
Carl Hansen, Leer, Mich., assignor to The Lobdell-Emery Manufacturing Company, Alma, Mich., a corporation of Michigan
Application May 16, 1936, Serial No. 80,155
3 Claims. (Cl. 155—5.22)



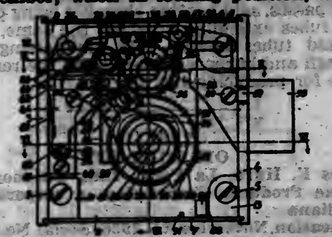
1. In a saddle construction, in combination, a seating member, a reach member having one end pivotally connected to the seating member and its other end free for movement toward or away from said member, a torsion spring located laterally of the reach member and having an arm extending under the free end thereof, and a link detachably connecting the end of said arm and the free end of the reach member, the reach member normally contacting said arm intermediate the link and spring, for limiting the movement of said seating and reach members in directions away from each other, the upper end of said connecting link comprising a short portion extending at an angle with the major portion of said link, and a further portion extending from said short angled portion beyond said major portion and in a direction substantially parallel therewith, said short angled portion of the link extending through an opening in said reach member and detachably retained therein by means of said further extending portion.

2,104,513
BLASTING CAP COMPOSITION
Lloyd H. Fisher, deceased, late of Wilmington, Del., by Ansen B. Nixon, administrator, Holly Oak, Del., assignor to Hercules Powder Company, Wilmington, Del., a corporation of Delaware
No Drawing. Application September 17, 1935, Serial No. 40,977
12 Claims. (Cl. 52—4)

1. A detonating explosive composition for blasting caps consisting of diazodinitrophenol and a heavy metal oxidizing agent.

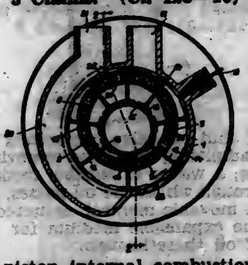
2,104,514
COOKING, HEATING, OR LIKE APPARATUS FOR TREATING THIS OR FOOD OR OTHER ARTICLES
Herbert Ban Galvin, Ewell, England, assignor to L. C. Engineering Supplies Limited, London, England
Original application October 22, 1931, Serial No. 570,722. Divided and this application July 29, 1935, Serial No. 33,769. In Great Britain July 10, 1931
9 Claims. (Cl. 126—272)

1. A can transfer valve device comprising a housing having a vertical conduit therein for the passage of the cans by gravity action, there being an inlet opening for the cans at the top end of this conduit, a pair of vertically spaced valve plates slidable within the housing and across the conduit to define an isolatable portion of the conduit between them, a second conduit formed as a lateral extension of the said isolatable conduit portion, the said isolatable conduit portion having a port in its side wall providing communication between the two conduits and a valve element in the said second conduit for controlling the supply of pressure fluid to the isolatable conduit portion and the exhausting of the fluid therefrom.



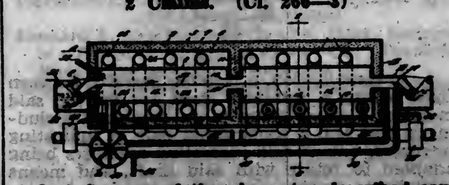
2,104,515
BLACKBOARD INSTRUMENT
Charles Fremont Golden, Denver, Ind.
Application November 20, 1935, Serial No. 50,769
Renewed June 4, 1937
1 Claim. (Cl. 33—75)

An instrument of the class described including a T-square, a tubular stem slidable therethrough, a vacuum cup on the stem, a centering pin normally projected from the cup, said stem being shiftable longitudinally to collapse the cup against a flat surface to create a partial vacuum therein and to retract the pin into the stem and sealing means on the stem shiftable to destroy the vacuum and release the cup.



2,104,516
COMBINATION LOCK
Olof Alfred Hage, Goteborg, Sweden
Application December 17, 1935, Serial No. 54,925
In Sweden June 9, 1935
6 Claims. (Cl. 70—305)

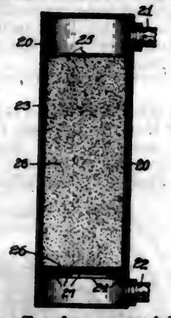
1. In a combination lock, a movable spindle extending through the door, a member rotatable around the spindle and adjustable in different turning positions, a pawl movably mounted on said member and adapted to prevent rotation of said member, when in locking position, a scale



on said rotatable member for determining the turning position of said member, and a member turning together with the spindle and adapted to abut against said pawl and thereby to bring the pawl into locking position.

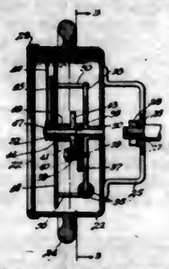
2,104,517
ROTARY ENGINE WITH GYRATORY PISTON
Alfred Heerde, Breslau, Germany
Application April 16, 1935, Serial No. 16,674
In Germany November 4, 1932
3 Claims. (Cl. 123—16)

1. In a piston internal combustion engine, a casing having inlet and exhaust ports, concentric guide drums, a rotating piston arranged between and eccentric to the guide drums, radial sliding vanes rotating between the concentric guide drums and sliding through the rotating piston drum, lateral discs enclosing working chambers formed between the sliding vanes and the said drums, the said discs being rigidly connected to the rotating piston and providing a clearance between said discs and the casing, sealing rings bridging the clearance between the casing, the discs and the sliding vanes, said sealing rings rotating with the discs to take up the centrifugal force of and to guide the sliding vanes across the exhaust port.



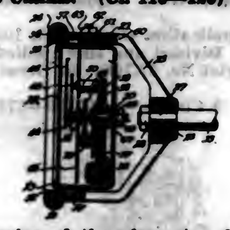
2,104,518
NORMALIZING FURNACE
Clarence B. Hoak, Steubenville, Ohio
Application October 1, 1936, Serial No. 103,595
2 Claims. (Cl. 266—3)

1. A furnace of the character described comprising an elongated hollow structure, a drum extending longitudinally in the hollow struc-



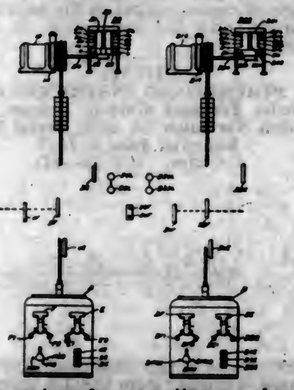
ture, a work traveling passageway through the drum, a protective gas inlet for the drum and means for circulating the gas through the drum, said drum being divided into a heating chamber and a cooling chamber through both of which the work passes, said heating chamber being provided with tubes extending adjacent the same, certain of said tubes having cold air passing therethrough and burners positioned in the remaining tubes for producing hot air.

2,104,519
OIL SHUT-OFF
James E. Hurn, La Porte, Ind., assignor to De Luxe Products Corporation, a corporation of Indiana
Application November 25, 1936, Serial No. 112,817
7 Claims. (Cl. 210—131)



7. An oil shut-off valve comprising a housing, means for admitting oil to and removing oil from the housing, a water expansible medium in the housing through which the oil passes, and means including a movable member actuated by movement of the expansible medium for controlling the flow of oil therethrough.

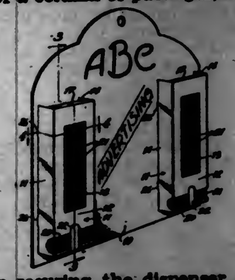
2,104,520
GAUGE
David D. Jackson, Providence, R. I., and Erving W. Tefft, South Attleboro, Mass., assignors to Tefft-Jackson, Incorporated, Pawtucket, R. I., a corporation of Rhode Island
Application March 2, 1934, Serial No. 713,744
4 Claims. (Cl. 116—125)



1. In combination, a member movable between fixed points, a rotatable shaft for moving said member, a gauge mounted on said shaft including a dial and a cooperating pair of indicating members, one of said indicating members being adapted to rotate with said shaft, and means including a gravity responsive member for rotating the other of said indicating members at a predetermined speed to indicate revolutions of said first mentioned indicating member.

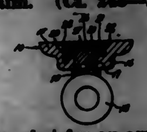
2,104,521
GAUGE
David D. Jackson, Providence, R. I., and Erving W. Tefft, South Attlebero, Mass.
Application October 29, 1934, Serial No. 750,582
8 Claims. (Cl. 116—125)

1. In a device of the character described, a rotatable element, a gauge comprising as a complete unit a casing attached to said element and adapted to rotate therewith, an indicating device in said casing, means for maintaining said device in fixed position with respect to the vertical during rotation of said rotatable element, a cooperating indicating member carried by said casing for indicating the rotations of said element, and means connecting said indicating member to said casing whereby said last named member may be moved with respect to said casing to adjust the position of the same without dismantling said gauge or removing the same from said element.



2,104,522
ELEVATOR CONTROL SYSTEM
Richard W. Jones, Chicago, Ill., assignor to Westinghouse Electric Elevator Company, Chicago, Ill., a corporation of Illinois
Application November 27, 1934, Serial No. 754,967
45 Claims. (Cl. 187—29)

1. In a system for operating an elevator car past a plurality of floors, mechanism associated with said car comprising a control for each of said floors, means for controlling said car disposed to respond to said controls, and means to modify the response to said controls by said first mentioned means in accordance with the number of operated controls.

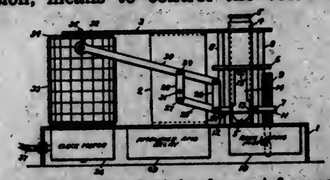


2,104,523
PACKAGE DISPENSING DEVICE
Leo Lichtenstein, Chicago, Ill.
Application August 3, 1937, Serial No. 157,145
1 Claim. (Cl. 312—42)

In a dispensing device, the combination of a backing panel adapted to display advertising matter, and a dispenser chute mounted thereon and adapted to contain a column of packages, the dispenser chute comprising a front wall, top and bottom walls and side walls, and being provided near the base with a dispensing slot to permit removal of the packages one at a time, the rear of the dispenser chute being open to permit the insertion of a column of packages, and attaching

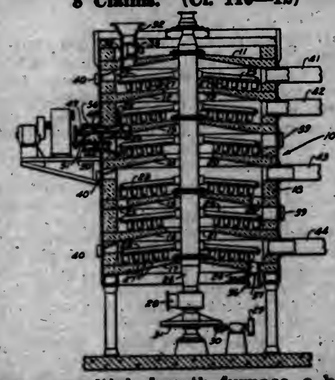
means for securing the dispenser chute to the backing panel after being filled with packages, the backing panel after attachment affording a rear closing wall for the chute, the top wall of the dispenser chute extending inwardly and downwardly at an acute angle between the side walls to exert temporary pressure upon the column of packages to prevent displacement thereof before attachment of the dispenser chute to the backing panel.

2,104,524
COMBINATION BOOK HOLDER, WRITING AND STUDY BOARD
George J. Porter, Watrous, Pa.
Application July 2, 1936, Serial No. 88,603
1 Claim. (Cl. 248—278)



A supporting bracket for an arm to be attached thereto comprising a base, a boss integral therewith, a bore extending through said boss and base, a circular recess in said base in concentric relation to said bore, an annular eye-element, a stem integral therewith and provided with a threaded extension adapted to rotatably fit within said bore, a circular nut seated in said circular recess having threaded engagement with said threaded extension, a pin extending transversely through said nut and threaded extension to prevent disengagement of the same, screw means in engagement with said base and nut to lock said eye-element against rotation and in one of a plurality of pre-determined angular positions relative to said bracket, and an eyebolt adjustably secured to said annular eye-element and to which said arm is attached.

2,104,525
RECORDING APPARATUS FOR BLOOD SEDIMENTATION TESTS
Avenir F. Prochazkalieff, Lansdowne, Pa.
Application April 2, 1937, Serial No. 134,893
4 Claims. (Cl. 234—1.5)

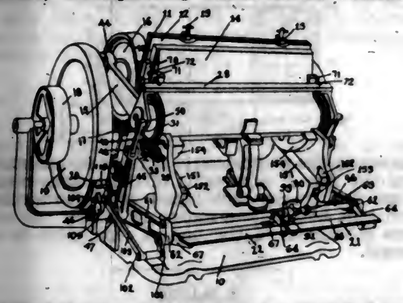


1. A recording apparatus for sedimentation test of liquids containing an opaque matter in suspension, comprising a vessel for the liquid to be tested, means to movably support the vessel, a photoelectric element supported at the side of

the vessel, means to produce a narrow beam of light, means to direct the beam of light through the vessel on the photoelectric element, means to move the vessel in a substantially vertical direction, means to control the vessel moving

means by the photoelectric element for maintaining the line of separation of the opaque matter from the transparent liquid at a substantially constant height, and means to exhibit the relative movement of the line of separation in the vessel.

2,104,526
APPARATUS FOR TREATING MATERIAL INCLUDING SOLIDS AND VAPORIZABLE MATERIAL
William Raisch, New York, N. Y., assignor to Underpinning & Foundation Co., Inc., New York, N. Y., a corporation of New York
Application September 5, 1936, Serial No. 99,628
8 Claims. (Cl. 110—12)



2. In a multiple hearth furnace, a hearth dividing the furnace into an upper drying section and a lower burning section, an outlet for said hearth, a conveyor duct closely connected at one end with said outlet and having at its other end an outlet to discharge material passing to the burning section, a conveyor screw in said duct and means to vary the rate of rotation of said screw to keep the duct full of material.

2,104,527
IMPRESSION CONTROL FOR CUTTING AND CREASING PRESSES
Leonard F. Remington, Franklin, Mass., assignor to Thomson-National Press Co., Franklin, Mass., a corporation of Delaware
Application March 30, 1937, Serial No. 133,839
18 Claims. (Cl. 101—299)

1. In a cutting and creasing press having a rigid bed, a bridge, trunnions projecting therefrom, pitmans connecting the bridge with power means to oscillate the bridge relative to the bed, elements journaled on respective trunnions formed with hubs axially eccentric to the trunnions and constituting journals for respective

pitmans, means for rocking the elements relative to the trunnions to retract the face of the bridge relative to the axes of the hubs, comprising a bell crank swiveled to either side of the press; a pitman swiveled to each bell crank and to a treadle; corresponding rocker levers rotatably

mounted on the press, and having swiveled connections to the respective bell cranks, and the arms of the eccentric elements, whereby the elements will be rocked when the treadle is pressed, and said elements will be retained in impression relation to the bridge when the treadle is in normal position.

2,104,528

METHOD OF PROTECTING STEAM BOILERS AGAINST CAUSTIC EMBRITTLEMENT

Homer H. Richardson, Western Springs, Ill., assignor to National Aluminate Corporation, Chicago, Ill., a corporation of Delaware

No Drawing. Application October 8, 1934, Serial No. 747,400

2 Claims. (Cl. 87—27)

1. The process of preventing the caustic embrittlement of the metal of a steam boiler which comprises initially maintaining and heating therein, while the boiler is still new, water containing a sodium salt of an acid from the group consisting of sulphuric and phosphoric acids in an amount not substantially less than 10 grains thereof per gallon for a time sufficient to produce a film or deposit of said sodium salt in the seams and crevices of the boiler, thereby protecting the same against the effects of high caustic soda concentrations which the boiler might encounter during subsequent operation in service.

2,104,529

COOKY MACHINE

Samuel Rednick, New York, N. Y.

Application December 17, 1936, Serial No. 116,266

8 Claims. (Cl. 107—27)

7. In a machine of the type described, a bed, a trackway extending longitudinally of the bed on each side thereof, a dough hopper, means for supporting said dough hopper on said trackways for movement longitudinally of the bed in either direction, a shaft extending longitudinally of said hopper and having its ends extended beyond the end walls of the hopper, a dough discharging means carried by said shaft, a gear carried by each of the projected ends of said shaft, and means for rotating said gears to effect a rotation of the shaft and dough discharging means upon each movement of the dough hopper longitudinally of the bed, said last mentioned means including a rack bar extending longitudinally of the bed upon each side thereof in position for meshing engagement with the gears carried by the shaft upon which the dough discharging means is mounted.

2,104,530

ELECTRIC FURNACE PROCESS

Gilbert E. Seil, Cynwyd, Pa.

Application November 28, 1936, Serial No. 113,096

5 Claims. (Cl. 75—10)

1. The steps in a process of refining metal material comprising passing into a substantially horizontal hollow electrode of an electric furnace cores of a mixture capable of yielding metal and a metal oxide, meanwhile rotating the electrode.

2,104,531

NONOILY VITREOUS ENAMEL

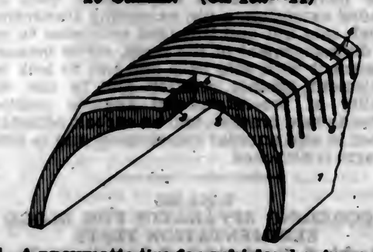
Frederick Shurley, Salt Lake City, Utah, assignor to Ceramic Machinery Distributors Limited, Windsor, Ontario, Canada, a corporation of Canada

No Drawing. Application Nov. 25, 1935, Serial No. 51,473

7 Claims. (Cl. 106—36.2)

1. A vitreous enamel composition comprising sodium silicate, ethylene glycol, glycerol and corn starch syrups.

2,104,532



NONSKID TIRE

Robert Sommer, Berlin, Germany, assignor of one-half to Walter S. Bleistein, New York, N. Y., and one-fourth to Bruno Cassalter, Feltre (Belluno), Italy

Application November 3, 1933, Serial No. 696,824

In Germany November 4, 1932

10 Claims. (Cl. 152—14)

1. A pneumatic tire for vehicles, having a tread with alternating substantially radial grooves and ribs parallel to one another, said grooves and ribs extending substantially at right angles to the central plane of the tire, and the relation of groove width to rib width being such that upon the tire rolling under load, the ribs will be deformed so that one edge of a rib closes the adjacent groove and supports the other rib adjacent said groove and the other edge is adapted to cut into the surface on which the tire is rolling.

2,104,533

METHOD AND MEANS FOR CONTROLLING GAS-FILLED TUBES

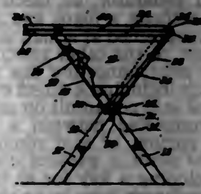
Leon Ladislaus von Kramolin, Berlin-Wilmersdorf, Germany

Application March 5, 1934, Serial No. 714,036

In Germany March 7, 1933

9 Claims. (Cl. 250—27)

2. An apparatus according to claim 1, in which the two control electrodes are connected with two control circuits carrying alternating currents out of phase with each other, and in which a regulating device affecting both circuits is provided in such a manner that an increase of the control voltage in one of said circuits will be accompanied by a decrease of the voltage in the other circuit, and vice versa.



2,104,534

CAMP GRILL

Saul K. Wolff, Long Beach, N. Y.

Application July 20, 1937, Serial No. 154,537

3 Claims. (Cl. 126—30)

1. A camp grill embodying therein two pairs of legs, the legs of each pair being pivotally connected intermediate their ends, side plates carried by the corresponding legs of each pair and extending to adjacent said pivotal connection, whereby when said grill is opened a firebox is formed, an arm pivotally connected with each pair of legs, and a pair of grids pivotally connected with each other and with the free end of said arms, whereby as said arms are shifted from one side to the other of said firebox, the position of said grids will be reversed.

2,104,535

METHOD OF AND PROCESS FOR FORMING PAPER CUPS

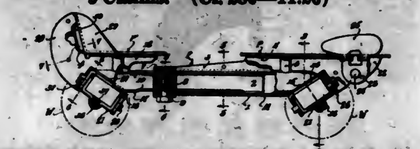
Cesare Barbieri, New York, N. Y., assignor to Dixie-Vortex Company, Chicago, Ill., a corporation of Delaware

Application May 9, 1936, Serial No. 78,813

7 Claims. (Cl. 93—36.2)

1. The method of forming a container of thermoplastic treated paper, including forming a blank of said paper into a container having substantially the shape of a true cone, contemporaneously applying heat to the mouth edge of the container and also to the apex thereof, shaping these parts, and removing the heat permit-

ting the thermoplastic to set and maintain the new shapes of the mouth edge and apex.



2,104,536

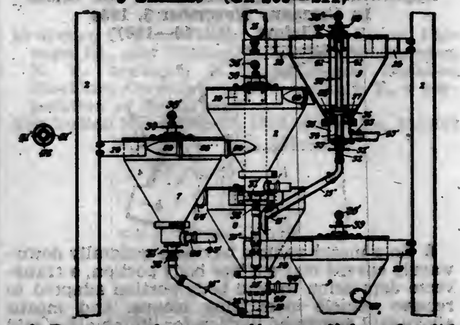
ROLLER SKATE

John S. Coldwell, Milwaukee, Wis., assignor, by mesne assignments, to Globe-Union Inc., Milwaukee, Wis., a corporation of Delaware

Application February 23, 1935, Serial No. 7,812

9 Claims. (Cl. 280—11.26)

1. A roller skate comprising a wheel truck bracket having a body portion and end plates, a split tube having end edges provided with outturned ears engaged with and secured to said body portion and having the upper edges of its split extended and also formed with outturned ears engaged with and fixedly secured to an end plate of said wheel truck bracket.



2,104,537

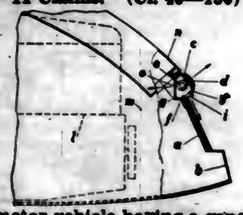
METHOD OF AND MEANS FOR SEPARATING PARTICLES OF SOLID MATERIAL BY FLOTATION

Russell Scott Ellis, Vineland, N. J.

Application February 12, 1937, Serial No. 125,411

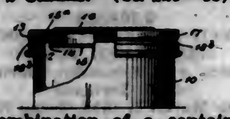
9 Claims. (Cl. 209—211)

1. In means for separating particles of solid material by flotation; the combination with a conical separator casing having its apex downward; of an inlet conduit for the material to be separated, extending tangentially into the side of said casing; an inlet conduit for the flotation fluid, extending upward into the bottom of said casing, in coaxial relation therewith and having a circular, horizontally disposed, flotation fluid jet spreader plate at the top thereof; screw means for vertically adjusting said spreader with



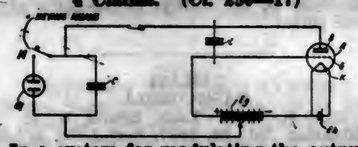
respect to said casing; a second spreader plate, axially opposed to said first plate; screw means for vertically adjusting said second spreader plate with respect to said first plate and thereby varying the area of the fluid passage between them; outlet means at the bottom of said casing, below said first plate; an outlet conduit extending tangentially from the upper part of said casing; means for injecting jets of flotation fluid into said casing from between said plates; whereby, comminuted material, inlet tangentially to said casing, is separated therein, part thereof gravitating to and through said bottom outlet and part thereof being discharged by flotation upwardly to and through said upper outlet.

2,104,538
KNITTED HAIR NET CONSTRUCTION
Henry F. Goldsmith, Longport, N. J.
Application February 23, 1937, Serial No. 127,231
20 Claims. (Cl. 66—171)



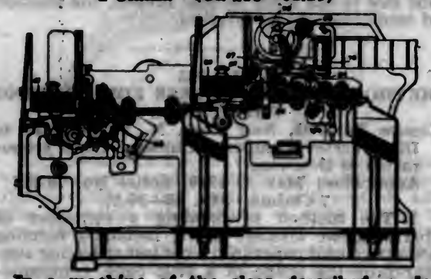
13. A hair net having an open-mesh deformable body formed of generally parallel longitudinal and separate chains of warp-knitted stitches, with each chain interconnected at intervals (spaced longitudinally) with the chain on each side thereof by the thread which forms the knitted loops of the chain;—said open-mesh deformable body being gathered at opposite ends into opposite knot-like formations and being secured in such knot-like formations.

2,104,539
MOTOR CAR
Walter Häcker, Sindelfingen, near Stuttgart, Germany, assignor to Daimler-Benz Aktiengesellschaft, Stuttgart-Unterturkheim, Germany
Application July 8, 1936, Serial No. 89,506
In Germany November 5, 1934
11 Claims. (Cl. 40—130)



8. In a motor vehicle having a generally downwardly curved rear surface body portion, a transverse depression in said body portion adapted to receive vehicle identifying means, and means above said depressed portion for illuminating said depressed portion and said vehicle identifying means, said illuminating means being so positioned within said body that its outer portion lies approximately flush with the contour of said rear body portion and includes a casing attached to said body portion and lying approximately flush with said body portion, said casing having light openings extending downwardly, inwardly, and rearwardly, and at least one lamp within said casing.

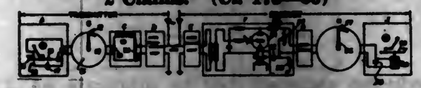
2,104,540
CLOSURE FOR CONTAINERS
Joseph C. Hoffman, Yonkers, N. Y.
Application January 9, 1935, Serial No. 996
2 Claims. (Cl. 229—43)



1. The combination of a container of nonmetallic material, a metallic fitting fixed upon said container at one end and projecting over the outer surface thereof in an axial direction, a closure including a continuous flange adapted to project over said container in outwardly spaced relation thereto, and inwardly directed means on said flange bridging the space between the latter and said container and adapted to removably secure said closure on said container.

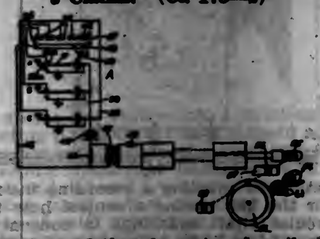
2,104,541
MODULATION SYSTEM
Hans Erich Hollmann, Berlin, Germany, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany, a corporation of Germany
Application February 1, 1935, Serial No. 4,586
In Germany January 31, 1934
4 Claims. (Cl. 250—17)

3. In a system for modulating the output of a retarding field generator, an electron discharge tube having a cathode, a plate, and an intermediate electrode maintained at a high positive potential with respect to the other electrodes, a resonant network interconnecting the electrodes of said tube, means including a direct current source for maintaining said potentials on said electrodes, a capacitor connected between a tap on said source and a portion of said resonant network leading to said plate, a gaseous discharge tube, and means including a key for at times causing said gaseous discharge tube to be shunted across said capacitor, thereby to modulate the output energy of said generator.



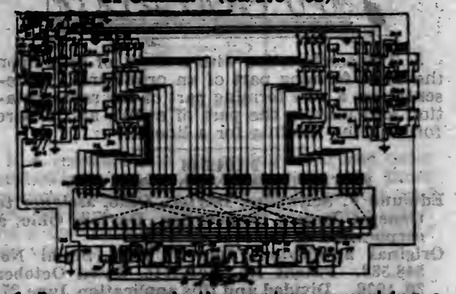
2,104,542
AUTOMATIC PUNCHING MACHINE
Clair D. Lake, Binghamton, N. Y., assignor to International Business Machines Corporation, New York, N. Y., a corporation of New York
Application October 9, 1934, Serial No. 747,524
1 Claim. (Cl. 235—61.16)

In a machine of the class described, a de-



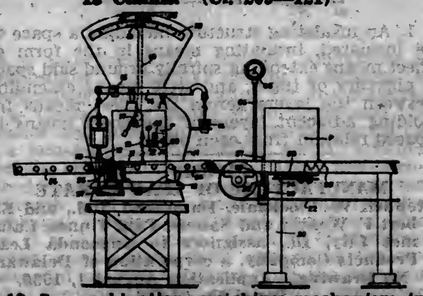
nominational order of an accumulator, a readout device controlled thereby including a plurality of stationary segments, one for each digit and a brush positionable by the accumulator order to contact the segment representing the digit standing in said order, punching mechanism operative to punch in the order 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, means to send an electrical impulse to each segment in succession in said order to cause completion of a circuit for controlling said punching mechanism through the segment at which said brush is positioned, and means for advancing said brush toward zero position after a circuit has been completed therethrough and before an impulse is sent to the next segment.

2,104,543
SIGNALING SYSTEM
Walter S. Lemmon, New York, N. Y., assignor to International Business Machines Corporation, New York, N. Y., a corporation of New York
Application June 16, 1934, Serial No. 730,906
2 Claims. (Cl. 178—23)



1. A system of the character described comprising, in combination, a transmitting station having means to transmit successive impulses, a receiving station having means to receive said impulses including a thermionic device having an input circuit including a grid element connected to be energized by the last mentioned impulses and an output circuit including an anode element, said output circuit operated each time the grid element is energized, a resistor and condenser connected in series included in the said output circuit, and means to charge the condenser during the intervals when the impulses are not impressed upon the grid element, said condenser adapted to be discharged through the output circuit each time the output circuit is operated by the impulses causing the output circuit to be energized for a timed interval less than the period of energization of the input circuit, a recording device, and a circuit connecting the recording device in shunt to said resistor so as to operate the recording device each time the said output circuit is energized.

2,104,544
IMAGE TRANSMISSION SYSTEM
Walter S. Lemmon, New York, N. Y., and Clyde J. Fitch, Jersey City, N. J., assignors to International Business Machines Corporation, New York, N. Y., a corporation of New York
Application March 19, 1935, Serial No. 11,784
8 Claims. (Cl. 178—2)



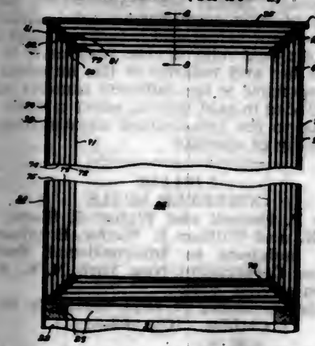
1. A system of the character described, comprising a character transmitting unit including a plurality of operating instrumentalities, means associated with the said instrumentalities adapted to be conditioned and maintain the selection of the selected and operated instrumentality, means controlled by the said conditioned means to initiate character impulses in accordance with the selection, means to transmit the character impulses, means to transmit periodic framing impulses, means to receive the transmitted impulses, a continuously rotating character wheel with character representations disposed thereon, means responsive to the framing impulses and character impulses and cooperating with the said character wheel to produce a frame image and character images respectively, and means whereby said character images are positioned within the said frame image.

2,104,545
COMMUNICATION SYSTEM
Austin E. Noll, New York, N. Y., assignor to International Business Machines Corporation, New York, N. Y., a corporation of New York
Application October 23, 1935, Serial No. 46,278
11 Claims. (Cl. 178—68)

1. In a communication system comprising a plurality of circuits corresponding to predetermined signals, means for transmitting signals consisting of code combinations of impulses of different current values and polarity, means comprising individual relay devices responsive to said current values and polarity of the impulses and means responsive to the different number of impulses included in said code to select circuits corresponding to the transmitted signals from the said plurality of circuits.

2,104,546
CONVEYER SCALE
Lawrence P. Pennell and Walter F. Stone, Chicago, Ill., and William E. Naylor, Binghamton, N. Y., assignors to International Business Machines Corporation, New York, N. Y., a corporation of New York
Application November 27, 1934, Serial No. 754,946
12 Claims. (Cl. 209—121)

12. In combination, weighing mechanism including a platform for receiving articles one at a time to be weighed, a stop for preventing eject movement of the article from the platform, and

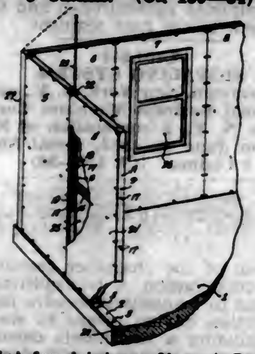


means for releasing said stop comprising an electrical device for removing said stop from the path of eject movement of the article, a circuit for said device, a photo cell for governing operation of the circuit, and a pointer operated by the weighing mechanism for controlling the photo cell according to whether the article is or is not of prescribed weights.

2,104,547
ORNAMENTATION WORK
Joseph G. Perseguiti, New York, N. Y.
Application October 6, 1934, Serial No. 747,123
6 Claims. (Cl. 41—34)

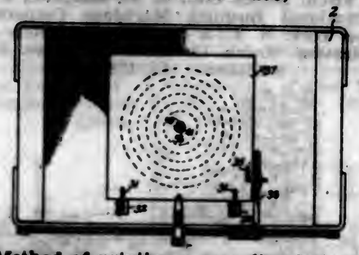
3. The combination with a sheet, of lines upon the sheet forming part of an ornamental representation, a wire forming part of the representation and playing the part of a line, and a wire forming the shading for a line.

2,104,548
REFRIGERATING APPARATUS
Edmund F. Schweller, Dayton, Ohio, assignor to General Motors Corporation, Dayton, Ohio, a corporation of Delaware
Original application July 3, 1931, Serial No. 548,583. Patent No. 2,057,746, dated October 20, 1936. Divided and this application June 27, 1936, Serial No. 87,769
12 Claims. (Cl. 20—4)



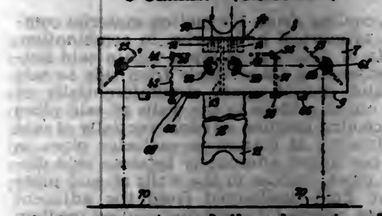
1. An insulating structure including a space to be insulated, insulating means in the form of sheet means extending spirally around said space a plurality of times, and strip means extending between the layers across the sheet means for holding adjacent layers of the sheet means in spaced relation from each other.

2,104,549
MANUFACTURE OF LEAD BORATE
Stephen W. Stockdale, Hammond, Ind., and Elbert F. Weaver and Samuel Paul Tinnes, Calumet City, Ill., assignors to Anaconda Lead Products Company, a corporation of Delaware
No Drawing. Application August 1, 1936, Serial No. 93,816
9 Claims. (Cl. 204—9)



1. The method of producing lead borate which comprises passing an electric current through a cell comprising a lead anode, an anolyte comprising an aqueous solution of sodium chlorate, a diaphragm, a catholyte comprising an aqueous solution of sodium tetraborate, and an insoluble cathode.

2,104,550
PANEL FASTENER
Jesse H. Bates, Wauwatosa, Wis., assignor to Harnischfeger Corporation, Milwaukee, Wis., a corporation of Wisconsin
Application April 12, 1937, Serial No. 136,628
5 Claims. (Cl. 189—34)

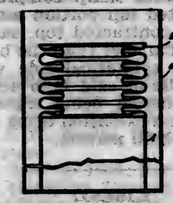


2. A joint for joining adjacent flat box panel units comprising a panel having projecting members along the margin thereof, a second panel having apertures registerable with said projecting members and accommodating the same therein, guiding means within said second panel in alignment with said apertures, an opening in the margin of said second panel for admission of a locking rod, and a locking rod introducible through said opening and passing through said guiding means and engaging said protruding members in the interior of said second panel.

2,104,551
METHOD OF AND APPARATUS FOR PRINTING INSTRUMENT CHARTS OR THE LIKE
Arthur G. Beal and Bernard Holmberg, Foxboro, Mass., assignors to The Foxboro Company, Foxboro, Mass., a corporation of Massachusetts
Application February 7, 1936, Serial No. 62,846
5 Claims. (Cl. 101—236)

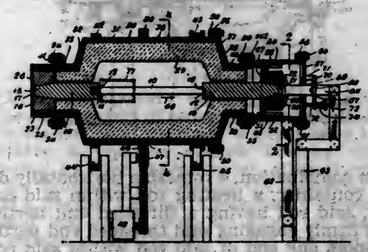
1. Method of printing a recording instrument chart or the like having a central hole therein and circular chart markings in concentric relation to said hole on both sides of said chart, which includes the steps of printing chart markings concentric with said hole on one side of a chart blank, moving said blank toward printing position with its opposite side exposed to receive concentric chart markings, said blank being then positioned to bring said chart markings to be printed on said opposite side only approximately concentric with said hole, and applying a blank adjusting device to edge portions of said hole to move said blank into the position where said opposite side thereof will receive said chart markings concentric with said hole.

2,104,553
OPTOMETRIC APPARATUS
Willis B. Blee, Rockville Centre, and Benjamin W. Kelly, New York, N. Y.
Application May 5, 1936, Serial No. 77,908
8 Claims. (Cl. 88—29)



1. An apparatus of the character described comprising a closed box, an observation unit therein having eye openings through which a person may look from the front of the box, a corneal reflection tube in each of said openings, a hood in front of the box for enclosing the eyes of a person looking through the eye openings, means for adjusting the interpupillary distance between the corneal tubes to accord with the interpupillary distance of the eyes of the said person, an electric lamp in each of said tubes and an opening in the back of the box for affording natural direct observation of the said person's eyes and the corneal reflexes therein while the person is looking through the said openings.

2,104,552
MEANS FOR REGISTERING PRINTING PLATES
Leslie W. Claybourn, Milwaukee, Wis., assignor to C. E. Cottrell & Sons Company, Westerly, R. I., a corporation of Delaware
Application April 22, 1935, Serial No. 17,673
21 Claims. (Cl. 33—184.5)

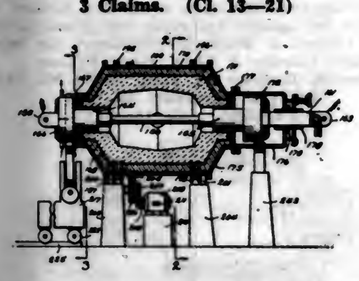


1. In means for registering a printing plate on a printing plate supporting surface of a printing press, the combination of a cross bar, releasable attaching means for releasably attaching the respective ends of said cross bar to the frame of the printing press so that said cross bar extends cross-wise of said supporting surface, an indicator frame pivoted bodily about the axis of said cross bar so as to overhang said supporting surface bracketwise and arranged to be oscillated bodily on its pivot toward and from said supporting surface, said indicator frame provided with an indicator for registering the printing plate, and a stop at said cross bar acting at the pivotal end of said indicator frame to stop pivotal movement of said indicator frame toward said supporting surface whereby to position said indicator frame in operative position spaced substantially the thickness of the printing plate from said printing plate supporting surface and thereby placing the indicator on said indicator frame in indicating relation with said printing plate.

2,104,554
LINE RESONATOR
James W. Conklin, Rocky Point, N. Y., assignor to Radio Corporation of America, a corporation of Delaware
Application September 21, 1935, Serial No. 41,579
8 Claims. (Cl. 178—44)

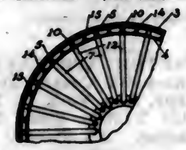
1. A resonant line comprising inner and outer substantially concentric conductors, said inner conductor comprising overlapping movable and fixed portions electrically coupled to each other, and a flexible connection electrically connecting said portions together.

2,104,555
ELECTRICAL FURNACE
Blaise Cousteix, Boulogne sur Seine, France, assignor to Societe Anonyme des Manufactures des Glaces & Produits Chimiques de Saint-Gobain, Chauny & Cirey, Paris, France
Application January 13, 1936, Serial No. 58,890
In France January 16, 1935
8 Claims. (Cl. 13—21)



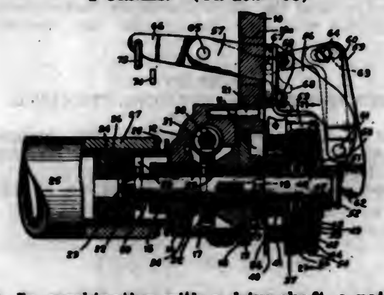
3. A rotary electrical furnace, comprising a substantially horizontal heating resistance, a substantially horizontal casing for the material to be treated, said casing surrounding said resistance and comprising an envelope consisting of a non-magnetic conducting metal, another metallic envelope surrounding the first-mentioned envelope and conductively connected therewith, and means interconnecting the two envelopes; means conductively connecting one end of said resistance to a source of electrical energy, means conductively connecting the opposite end of said resistance with the adjacent end of the casing, means conductively connecting the other end of the casing with said source of electrical energy, and insulated means engaging said casing for rotating it around said resistance.

2,104,556
INCANDESCENT LAMP
Daniel P. Gallagher, Hoboken, N. J.
Application January 3, 1936, Serial No. 57,339
2 Claims. (Cl. 176—16)



1. An incandescent lamp comprising a bulb having a contracted top portion and an extension closing said contracted top, said extension being of smaller diameter than the bulb, said extension having a cylindrical side wall and an end wall, the walls of said bulb and said contracted portion thereof being translucent, and the side wall of said extension being clear, a filament within said bulb portion.

2,104,557
ELECTRICAL HEATING MEANS
Henri George, Paris, and Gaston Delpech, Clamart, France, assignors to Société Anonyme des Manufactures des Glaces & Produits Chimiques de Saint-Gobain, Chauny & Cirey, Paris, France
Original application January 27, 1934, Serial No. 708,618. Divided and this application May 16, 1936, Serial No. 80,052. In France January 30, 1933
3 Claims. (Cl. 13—21)

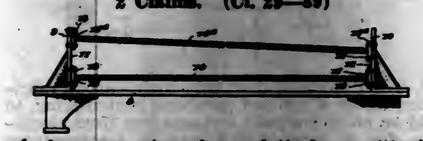


3. In combination, a rotatable horizontally disposed container, a heating rod within said container, said rod having a threaded end portion, means firmly engaging said threaded end portion to support one end of said rod within said container, said means extending through an opening formed in said container and constituting a closure for said opening, a terminal adapted to be connected to a source of electrical energy and connected with said means, a carriage supporting said means, means for adjusting the height of said carriage, means freely supporting the other end of said rod within said container, another terminal adapted to be connected to the source of electrical energy and connected with the third-mentioned means, means rotatable along with said container and supporting the third-mentioned means, the fourth-mentioned means being movable relatively to the third-mentioned means, and resilient means carried by the fourth-mentioned means and pressing the third-mentioned means against said other end of the heating rod.

2,104,558
COOLING DRUM
Max Marc Guggenheim, Saginaw, Mich., assignor to Baker Perkins Company, Inc., Saginaw, Mich., a corporation of New York
Application January 20, 1936, Serial No. 59,894
5 Claims. (Cl. 257—95)

1. In a cooling drum for molten material comprising a cylindrical hollow rim, in combination, a plurality of distributing pipes within said hollow rim extending transversely from side to side thereof and spaced apart circumferentially of said rim, outlet orifices in the walls of said pipes to direct cooling medium circumferentially of said rim, a plurality of transverse collector pipes in said rim positioned alternately between said distributing pipes, orifices in the walls of said pipes to receive fluid discharged from the adjacent outlet pipes, means for supplying cooling medium to said distributing pipes, and means for withdrawing spent cooling medium from said collector pipes.

2,104,559
CLUTCH MECHANISM FOR TYPEWRITING MACHINES
James L. Hillis, Rochester, N. Y., assignor to International Business Machines Corporation, New York, N. Y., a corporation of New York
Application September 19, 1936, Serial No. 101,531
4 Claims. (Cl. 192—68)



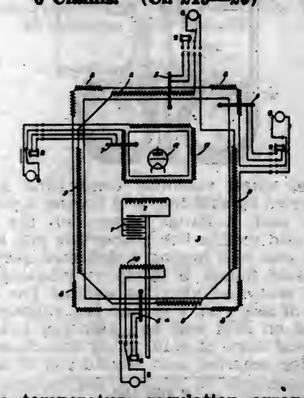
1. In combination with a drive shaft, a pair of driven elements on said shaft, a driving element on said shaft between said elements, means to key said driving element to said shaft adapted to permit movement of the driving element relative to said shaft, means to interconnect said driven elements whereby the latter rotate in unison, said interconnecting means permitting one of the driven elements to move toward the other axially of the shaft and during the course of said movement engage the driving element and force the latter into engagement with the second driven element, a sleeve for slidably mounting one of the driven elements on said shaft, said sleeve having a shoulder engaging a shoulder in the driven element mounted on said sleeve, resilient means for holding said shoulders in engagement, said resilient means being operative to permit the shoulders to disengage when one of the driven elements is moved toward the other to engage the driving element, and means for moving one of said driven elements toward the other.

2,104,560
HEALTH BELT
Lillian Horowitz, New York, N. Y.
Application January 14, 1937, Serial No. 120,521
1 Claim. (Cl. 2—236)

In combination with a garment of the type supported from the waist, a pad adapted to be positioned across the back of the garment, inside of the waist band, with the ends extending substantially to the hips; said pad comprising strands of horse hair longitudinally positioned therein, and containing a sufficient quantity of said horse hair to form a cushion, and layers of waterproof material on each side of the said horse hair cushion with the edges thereof suitably bound.

2,104,561
SUPPORTING APPARATUS FOR WELDING OPERATION
Grover A. Hughes, Youngstown, Ohio, assignor to Truscon Steel Company, Youngstown, Ohio, a corporation of Michigan
Application March 9, 1936, Serial No. 67,953
2 Claims. (Cl. 29—89)

1. An apparatus for relatively positioning spaced flanges and a rod extending between them and fixing the angles which the flanges and rod bear to one another, the said apparatus comprising a base, spaced supports upstanding rigidly from the base and having inner faces of extensively greater area than the area of the flanges, the said supports being fixed at a definite angle to each other, and a plurality of spaced holding devices mounted in fixed spaced relation upon the inner face of each of the supports for holding the flanges with their faces parallel to the respective inner faces of the supports and thereby fixing the angle that the flanges bear to each other, each holding device upon one of the supports being arranged to cooperate with a holding device upon the other support for fixing the angular relation between the flanges and the rod, and the holding devices being so spaced upon the supports that cooperating holding devices will hold flanges at an angle to a rod supported between them that is different from the angles between a rod and flanges supported between other cooperating holding devices.



2,104,562
LOCKING CATCH
Fritz R. Johnson, Providence, R. I., assignor to Hingeco Vanities Inc., Providence, R. I., a corporation of Rhode Island
Application January 30, 1937, Serial No. 123,306
11 Claims. (Cl. 292—228)

8. A mounting arrangement for a fastener adapted for attachment to a receptacle wall having a pair of outwardly directed prongs, including an element having slidable association with said prongs in one direction, a second element for attachment to said first element including a portion having engagement with said prongs when said first element is associated with the prongs, and means for securing said elements after said first element has been positioned in

association with said prongs, said securing means causing lateral displacement of said first element towards said second element whereby the first element is positively seated between said prongs and said wall and said second element portion engages said prongs to prevent removal of the fastener.

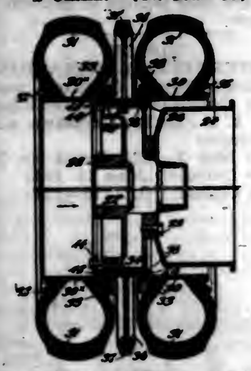
2,104,563
TEMPERATURE REGULATION
Georg Kuribaum, Berlin, Germany, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany, a corporation of Germany
Application May 7, 1934, Serial No. 724,267
In Germany June 14, 1933
6 Claims. (Cl. 219—20)

1. In a temperature regulation arrangement for the stabilization of temperature within a box-like container, a plurality of contact type thermometers, a separate electric heating circuit controlled by each thermometer, at least one of said thermometers controlling the electrical circuit of a heating element substantially surrounding said box and a separate group of heating coils located at each corner of said box-like container having its electrical circuit controlled by at least one other of said contact type thermometers.

2,104,564
PROCESS FOR THE SIMULTANEOUS PRODUCTION OF IRON AND PORTLAND CEMENT IN A BLAST FURNACE
Wilhelm Lennings, Oberhausen, and Ernst Karwat, Grosshesselohe, near Munich, Germany, assignors, by mesne assignments, to Union Carbide and Carbon Corporation, a corporation of New York
No Drawing. Application March 27, 1935, Serial No. 13,226. In Germany March 28, 1934
8 Claims. (Cl. 75—30)

8. Process for producing, in a blast furnace, pig iron together with a slag having the composi-

tion of Portland cement, wherein the charge is enriched with lime and the furnace blast is enriched with oxygen, characterized in that the oxygen concentration of the blast is kept above 30%, and the weight of slag is kept smaller than the produced weight of pig iron by using iron ores containing at least six times as much iron as silica, and the volume of coke in the charge and the temperature and oxygen concentration of the blast are so regulated that the slag, upon tapping, contains at least 1% calcium carbide, whereby free flow of the charge through the furnace is promoted.



2,104,565

SAFETY ATTACHMENT FOR TRUCK WHEELS

Herbert V. Ludwick, Dearborn, Mich.

Application November 22, 1934, Serial No. 754,206

1 Claim. (Cl. 301—39)

A dual wheel assembly comprising a hub, a felly carried by said hub and having a peripheral annular seat, a flange formed on the inboard side of said seat, a tire supporting rim mounted on said seat and having a deflected portion engaging said flange, a safety attachment carried by said seat and abutting against the inclined portion of said rim, a second tire supporting rim mounted on said seat and abutting against the juxtaposed edge of said safety attachment, and means for securing said second rim to said hub.

2,104,566

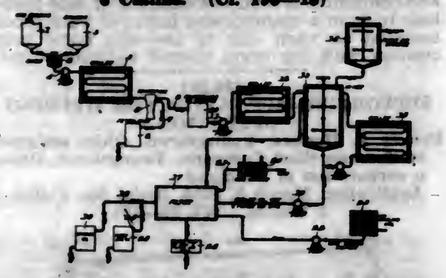
ELECTRON TUBE

Ieury G. Maleff, Philadelphia, Pa., assignor to Radio Corporation of America, a corporation of Delaware

Application March 21, 1934, Serial No. 716,684

10 Claims. (Cl. 250—27.5)

1. An electron tube comprising a source of cathode rays, a fluorescent screen upon which the cathode rays impinge to produce luminous effects, an apertured shield electrode interposed between the source of electrons and the screen to control the bounding area of the electron beam in its path from the source to the screen, a control element connected with the shield electrode and dividing the aperture in the shield electrode into two substantially equal portions, said control element being adapted to receive varying voltage to vary the electron density within the central section of the electron beam to control thereby the intensity of the luminous effect produced.



2,104,567

TREATING HYDROCARBON OIL

Robert E. Manley, Port Arthur, Tex., assignor to The Texas Company, New York, N. Y., a corporation of Delaware

Application June 27, 1936, Serial No. 486,231

6 Claims. (Cl. 196—18)

3. The process of dewaxing hydrocarbon lubricating oil by a method involving centrifuging, to yield an oil of low pour test and free from cloudiness due to precipitated wax at temperatures substantially above the temperature at which the oil will pour, which comprises chilling the oil to a temperature at which precipitation of the wax constituents occurs, centrifuging the chilled oil whereby the bulk of the wax constituents are separated from the oil, then subjecting the chilled partially dewaxed oil to filtration in the presence of a filter-aid material, whereby the comparatively small quantity of wax remaining in the oil after centrifuging is removed.

2,104,568

LOOSE LEAF BINDER

Arthur W. McClure, Syracuse, N. Y., assignor to McMillan Book Company, Syracuse, N. Y., a corporation of New York

Application May 25, 1933, Serial No. 672,844

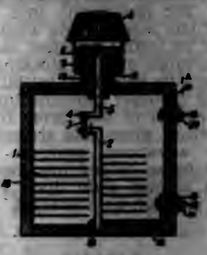
6 Claims. (Cl. 129—23)

1. In a loose leaf binder, a latch bar, holding means including a spring for yieldingly maintaining said bar in the latching position, a latch slide mounted adjacent said bar, and coacting means

associated with the bar and slide comprising a pin and cam slot adapted to cause said bar to be moved out of the latching position against the action of the spring by the movement of the slide.

2. In a loose leaf binder comprising a back member, upper and lower covers hinged to the back member, a plurality of impaling posts adapted to retain a quantity of paper, said impaling posts being normally secured to the back member at both ends, means for releasing one end of each of the impaling posts from the back member whereby one cover and the back member may be thrown back to enable insertion and removal of sheets of paper, means carried by the back member and engageable with the side edges of the paper for aligning the posts as the cover and back are brought toward closing position, and means for automatically engaging the posts to the back member when the cover is closed.

2,104,569



VARIABLE MECHANICAL MEANS FOR AN OSCILLATION CIRCUIT

Herbert Muth, Berlin, Germany, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany, a corporation of Germany

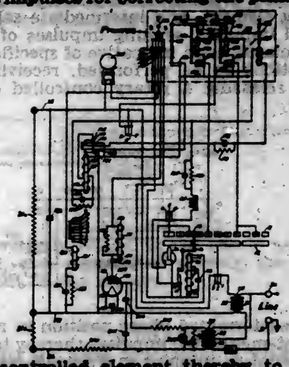
Application November 21, 1934, Serial No. 754,187

In Germany November 9, 1933

3 Claims. (Cl. 175—41.5)

1. A variable condenser whose capacity is varied from the outside comprising a metallic casing, fixed and movable electrode members within said casing, a shaft secured to said movable electrode members, a shaft passing through an external bushing on said casing, a crank arrangement within said casing and coupled between said first and second mentioned shafts, an operating knob secured to said second shaft, said external bushing having a screw thread located thereon, said operating knob having a depending threaded member cooperating with the thread on said external bushing for rotating said movable electrode members with respect to said fixed electrode members.

2,104,570



SYNCHRONOUS COMMUNICATION SYSTEM

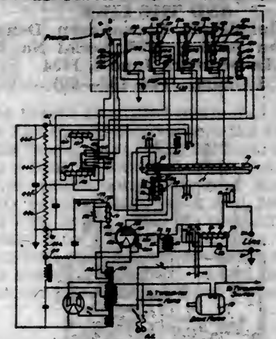
Harry J. Nichols, Dayton, Ohio, assignor to International Business Machines Corporation, New York, N. Y., a corporation of New York

Application May 22, 1933, Serial No. 672,161

64 Claims. (Cl. 178—23)

1. A system for synchronizing remotely situated periodic elements, which comprises instrumentalities for producing timed single impulses of definite periodicity, and means whereby said timed impulses are utilized to release the controlled element from a definite phase position thereby to establish synchronism with the periodic impulses, and corrector means actuated by the periodic impulses for correcting the phase position

of the controlled element thereby to maintain synchronism.



2,104,571

COMMUNICATION SYSTEM

Harry J. Nichols, Dayton, Ohio, assignor to International Business Machines Corporation, New York, N. Y., a corporation of New York

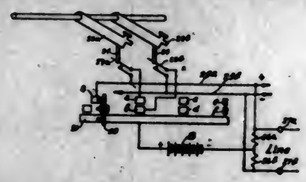
Application January 29, 1934, Serial No. 708,767

18 Claims. (Cl. 178—23)

15. In printer key boards, in combination, a plurality of printer actuating levers, auxiliary switching means operable upon the depression of any one of the actuating levers, lever latch means adapted to latch down a depressed actuating lever and simultaneously to latch up the other actuating levers, electromagnetic latch operating means, relay control means for said latch operating means, and electrical connections between said auxiliary switching means, said latch operating means and said relay control means, the electrical connections being adapted to cause said latch operating means to be energized upon operation of the auxiliary switching means, and to be de-energized upon operation of the relay control means.

2,104,572

SYNCHRONOUS COMMUNICATION SYSTEM



Harry J. Nichols and Henry L. Theisdrup, Dayton, Ohio, assignors, by direct and mesne assignments, to International Business Machines Corporation, New York, N. Y., a corporation of New York

Application August 7, 1934, Serial No. 739,838

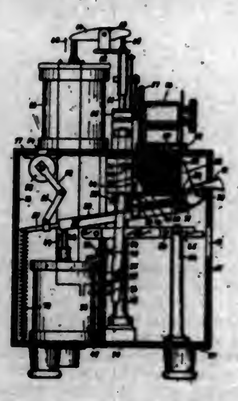
25 Claims. (Cl. 178—23)

1. In a synchronous printing telegraph system, the method of signalling which consists in the

steps of sending impulses of uniform polarity indicative of a predetermined phase position of a controlling element, and intermediate said first-mentioned impulses, sending impulses of one or another polarity each indicative of specific printing operations to be performed, receiving said impulses, releasing a rotary controlled element

from a predetermined phase position in response to said first-mentioned impulses thereby to establish synchronism, utilizing said second-mentioned impulses to perform specific printing operations in accordance with the characteristics of said impulses, and controlling the phase position of said controlled element responsively to said first-mentioned impulses to maintain synchronism.

2,104,573



APPARATUS FOR STAMPING OF TICKETS AND THE LIKE

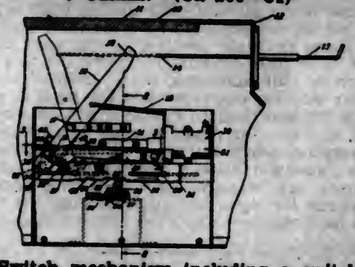
Hans Reinhaldtsen, Copenhagen, Denmark

Application June 8, 1935, Serial No. 25,661

In Denmark June 8, 1934

1 Claim. (Cl. 101—69)

A device for the stamping of tickets and the like, comprising means forming a plurality of slot-like apertures, each of said apertures corresponding to a certain price class, a printing block in each of said apertures, a printing pad situated opposite said block, an arm adapted to be moved by the insertion of a ticket, means for closing an electrical circuit upon the movement of said arm, means actuated by the last-mentioned means for moving said printing pad toward said printing block to stamp a ticket introduced between said pad and said printing block, a horizontal bar carrying said arm, flaps carried by said arm and having incisions formed therein to catch the front edge of the ticket during the stamping, and fixed stops preventing the ticket from moving said arm upon return of said pad to the normal position.



2,104,574

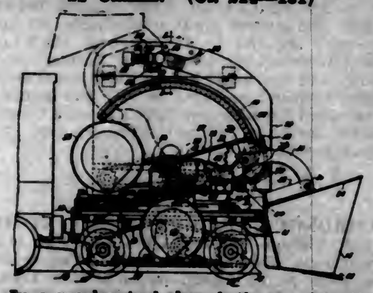
GAME APPARATUS

David C. Rockola, Chicago, Ill., assignor to Rock-Ola Manufacturing Corporation, Chicago, Ill., a corporation of Delaware

Application December 12, 1935, Serial No. 54,238

8 Claims. (Cl. 200—34)

2. Switch mechanism including a switch, an operating pawl therefor, an actuating slide, a lever pivotable from an initial to an advanced position by said slide, a second and reciprocable slide movable by said lever from an initial to an advanced position for operative engagement with said pawl, said slide being adapted to drive said pawl upon return movement to initial position and thereby actuate said switch, means normally urging said second slide into initial position, together with latch means including a stop member released for movement into block return movement of the second slide when said lever is moved out of its initial position, said stop member being movable out of blocking position by said lever upon its return to initial position, and a second stop member movable into position to prevent the return of said lever from advanced to initial position when said second slide is in a substantially advanced position, said second stop member being moved into ineffective position by said second slide upon return to the latter initial position as aforesaid.



2,104,575

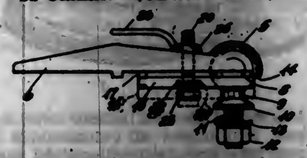
MECHANICAL SHOVELING MACHINE

Charles E. Stoltz, Chicago, Ill., assignor to Mancha Storage Battery Locomotive Company, Chicago, Ill., a corporation of Illinois

Application August 6, 1936, Serial No. 94,552

11 Claims. (Cl. 214—131)

1. In a mechanical shovel, the combination of a frame, a beam horizontally pivoted on said frame, a scoop pivoted on said beam, and means for controlling movement of said scoop upon swinging movement of said beam and pivotally moving the forward end of said scoop forwardly and upwardly with respect to said frame and supporting said scoop in a loaded condition as it moves rearwardly over the top of said frame to a discharge point beyond the rear end of said frame including a guide cam extending along said frame, and a controlling arm rigid with respect to said scoop and having a free end extending rearwardly from the side of said scoop which is pivotally connected to said beam, said arm being adapted to have slidable engagement with said cam at a point spaced from said scoop for pivotally moving said scoop in an upward direction and supporting said scoop in a loaded position during movement over the top of said frame.



2,104,576

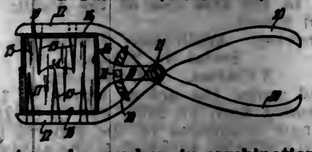
TRAILER COUPLING

Frank Zagelmeyer, Bay City, Mich., assignor to Zagelmeyer Auto Camp Company, Bay City, Mich., a corporation of Michigan

Continuation of application Serial No. 697,547, November 11, 1933. This application January 12, 1935, Serial No. 1,523

11 Claims. (Cl. 280—33.15)

1. A trailer coupling of the class described and comprising a two-part socket member, a ball member journaled therein, a bolt for securing the parts in assembled relation, a toothed nut on the bolt, and a pivotally mounted resilient clip mounted on the socket member and shaped to simultaneously engage the teeth and bottom face of the nut for preventing the unscrewing thereof or the accidental displacement of the clip.



2,104,577

ICE CUBE CRUSHER

Alois Adamczyk, Bethlehem, Pa.

Application June 11, 1937, Serial No. 147,657

1 Claim. (Cl. 83—63)

In an ice cube crusher, in combination, a pair of pivoted arms forming a handle, ends on the arms constituting crushing jaws, a cup between the jaws having side openings therein, an extension on the cup attached to the pivotal connection of said arms, a spring for normally retaining said jaws open, a pin connecting said extension with the mid-section of said spring whereby the cup is maintained centrally between said jaws, ice picks on the opposing faces of the jaws arranged to pass through the cup openings to crush an ice cube in the cup and one side of the cup being open for reception and discharge of ice.

2,104,578

FLAT SHEET DELIVERY FOR WEB PRINTING ROTARY PRESSES

Howard M. Barber, Pawcatuck, Conn., assignor to C. B. Cottrell & Sons Company, Westerly, R. I., a corporation of Delaware

Application May 20, 1936, Serial No. 80,667

6 Claims. (Cl. 271—79)

1. In a sheet delivery mechanism for printing presses, means for advancing the sheets, means for releasing the sheets at their delivery point, coacting rotary and oscillating nippers for depressing the tail ends of the sheets and there-

after positively retarding the sheets as they are released, and means for varying the speed of movement of the nippers.

2,104,579

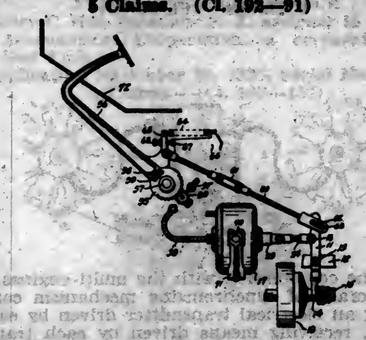
METHOD OF AND APPARATUS FOR MINING COAL AND THE LIKE

George L. Bennett, Terre Haute, Ind.

Application April 17, 1935, Serial No. 16,792

16 Claims. (Cl. 262—4)

1. The herein described method of mining coal and the like embodying therein the steps of boring a hole into a seam of the material to be mined, forming a narrow counterbore at the end of said bore, said counterbore being of a diameter substantially equal to the width and height of the mass of coal to be removed, plugging the outer end of said bore, and delivering fluid under pressure through said bore to said counterbore, whereby the expansive force of said fluid pressure will separate the material from the seam.



2,104,580

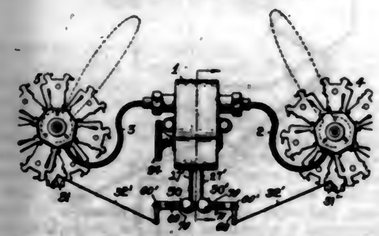
MOTOR VEHICLE CONTROL MECHANISM

Charles A. Brewer, Newtown Heights, Conn., assignor of one-half to Philip J. Kury, Arverne, N. Y.

Application November 9, 1929, Serial No. 406,619

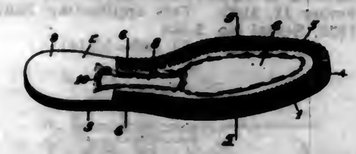
5 Claims. (Cl. 192—91)

1. In a control mechanism for motor vehicles, a fluid operated power device including a movable element connected to the control mechanism



for operating it, a connection from the space at one side of said element to a source of suction, a separate connection from said space to the atmosphere, a control valve means comprising a rotary member having a passage for controlling each of said connections, said passages being tapered in opposite directions and arranged so that as the member rotates to gradually open one connection it simultaneously gradually closes the other, and manual means for operating said rotary member.

2,104,581
REPEATING FIREARM
Val A. Browning, Liege, Belgium, assignor to J. M. and M. S. Browning Company, Ogden, Utah, a corporation of Utah
Original application May 3, 1933, Serial No. 669,184. Divided and this application May 21, 1934, Serial No. 726,675
3 Claims. (Cl. 42—25)



1. In a firearm of the character described, a barrel having a barrel extension mounted for reciprocation, a breech bolt cooperating therewith, an extractor on said breech bolt, and an ejector on said barrel extension adapted to cooperate with said extractor to eject a cartridge from the barrel extension, said ejector having limited lengthwise movement with respect to said barrel extension, a flexible portion on the ejector frictionally engaged with said barrel extension to retard said lengthwise movement, the frictional drag between said barrel extension and ejector being such that the ejector will engage and eject a cartridge before the ejector is moved to its rearmost position with respect to the barrel extension and as soon as the forward end of the cartridge clears the firing chamber.

2,104,582
AIRPLANE ENGINE SYNCHRONIZER
Bert G. Carlson, Queens Village, N. Y., assignor to Sperry Gyroscope Company, Inc., Brooklyn, N. Y., a corporation of New York
Application October 19, 1933, Serial No. 694,382
6 Claims. (Cl. 60—97)

1. The combination with the multi-engines of an aircraft, of synchronizing mechanism comprising an electrical transmitter driven by each engine, receiving means driven by each transmitter, differential means actuated by said receiving means, motion transmitting means, a plurality of engine throttles differentially actuated from said differential means through said motion transmitting means to speed up a slower and retard a faster engine and means providing for simultaneous manual operation of said engine throttles, said synchronizing mechanism serving, upon the manual operation of any one of said throttles, to effect a corresponding operation of the remaining throttles.

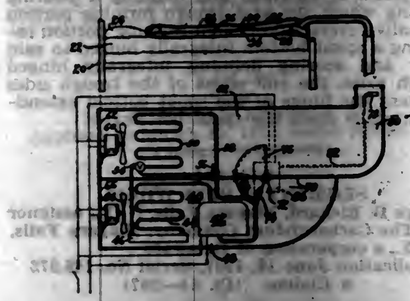
2,104,583
RUBBER SOLE
Charles Leo Daly, Belmont, Mass., assignor to Daly Bros. Shoe Company, Inc., Boston, Mass., a corporation of Massachusetts
Application August 23, 1934, Serial No. 741,101
2 Claims. (Cl. 36—32)

2. A laminated molded rubber sole, consisting of at least two layers of vulcanizable material of different characteristic vulcanized together to present at their zone of juncture a sharp, regular, well defined line of demarcation, a portion of the marginal area of the sole being of greater thickness than the area included by said marginal area, the included area being of different thickness in different areas thereof, and one of the thinner regions of said included area constituting a pocket for a stiffener element.

2,104,584
DOUBLE SALTS OF COPPER ARSENITE AND A COPPER SALT OF A HIGHER UNSATURATED FATTY ACID
Frederick E. Dearborn, Washington, D. C., dedicated to the free use of the Public in the United States
No Drawing. Application October 15, 1934, Serial No. 748,265
3 Claims. (Cl. 260—12)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. A new compound of the general formula $3CuAs_2O_4.CuOR$, in which R is the anhydride of linolic acid.

2,104,585
CONSTRUCTION BLOCK
Alden B. Dow and Robert Goodall, Midland, Mich.; said Goodall assignor to said Dow
Application November 21, 1935, Serial No. 50,847
4 Claims. (Cl. 72—41)



1. A wall structure having broken vertical joints comprising successive horizontal courses of blocks, the bases of said blocks being congruent, oblique parallelograms which have supplementary angles of substantially 45° and 135° and a ratio between the altitude of either of said parallelograms to the length of the longer side thereof of approximately 1 to 2, said blocks being arranged in each course so that the acute angles of the bases of a block lie adjacent the obtuse angles of the bases of each of the adjacent blocks in the same horizontal course, said acute angles being also in superimposed relationship to the obtuse angles of the bases of blocks in the course immediately therebelow, whereby the wall structure presents on each side the appearance of having unbroken vertical joints.

2,104,586
METHOD OF FINGERPRINTING
Mendel E. Frendenheim, New York, N. Y., assignor to Louis Rubin, New York, N. Y.
No Drawing. Application April 9, 1937, Serial No. 135,911
3 Claims. (Cl. 41—41)

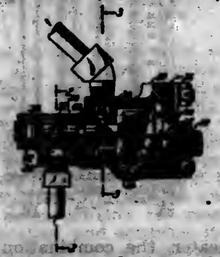
3. A method of fingerprinting which consists in applying to a sheet of porous paper or the like an invisible film of iron soap by a finger impression, the iron soap being capable of development into a visible compound and then applying a tannic acid developing solution to the underside of the paper where the impression is located.

2,104,587
REFRIGERATING APPARATUS
Richard S. Gaugler, Dayton, Ohio, assignor to General Motors Corporation, Dayton, Ohio, a corporation of Delaware
Application March 30, 1935, Serial No. 13,831
4 Claims. (Cl. 257—3)

1. A temperature regulating means including a refrigerating system comprising liquefying means for dissipating heat and an evaporating means for absorbing heat, means operable coincidentally with said refrigerating system for circulating a fluid separately into heat exchange relation with said liquefying means and said evaporating means to provide heated and cooled fluid, a discharge duct means, a waste discharge, and mixing means for conducting any desired mixture of said heated and cooled fluid to said discharge duct and for conducting the remainder of the circulated fluid to said waste discharge to prevent the obstructing of the circulation of said fluid.

2,104,588
CASH REGISTER
Charles W. Green, Ilion, N. Y., assignor, by mesne assignments, to The National Cash Register Company, Dayton, Ohio, a corporation of Maryland
Application September 19, 1931, Serial No. 563,757
21 Claims. (Cl. 235—130)

21. In a cash register, a totalizer, a resetting lever and a printer for the totalizer, a lock for limiting movement of the lever, means on the lever for setting the lock in effective position, and means operated by the printer, after the lock



has been set, for moving the lock to an ineffective position.

2,104,589
REFRIGERATING APPARATUS
Frank W. Hartman, Detroit, Mich.
Application February 23, 1934, Serial No. 712,633
11 Claims. (Cl. 128—191)

1. Oxygen administering apparatus including a tent for enclosing at least the head of the patient, a closed evaporating member in heat exchange relation with the atmosphere in the tent and means for circulating the atmosphere within the tent over the closed evaporating member, a refrigerant liquefying apparatus separate from the tent, flexible tubular connections connecting the refrigerant liquefying apparatus with the closed evaporating member for supplying liquid refrigerant to and for withdrawing evaporated refrigerant from the closed evaporating member to cool the circulating atmosphere within the tent, and means for supplying oxygen to the tent.

2,104,590
FLUID METERING DEVICE
Henry C. Hill, Paterson, N. J., assignor to Wright Aeronautical Corporation, a corporation of New York
Application November 29, 1935, Serial No. 52,043
6 Claims. (Cl. 103—157)

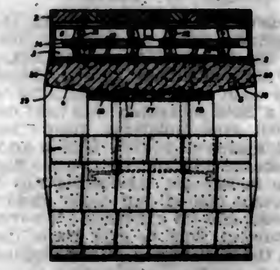
1. A metering pump including a closed end cylinder having axially spaced inlet and delivery

ports, a plunger having valving openings cooperating with said ports and communicating with said closed end, and means to rotate and reciprocate said plunger said plunger including a head having an oblique face, and a radially adjustable abutment engaged with said face.

2,104,591
RAILWAY TRACK CIRCUIT APPARATUS
Paul N. Martin, Swissvale, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a corporation of Pennsylvania
Application May 31, 1933, Serial No. 673,605
18 Claims. (Cl. 246—41)

11. In combination with a section of railway track and a source of current connected across the rails of said section, a primary relay and a secondary relay, a pickup circuit for said primary relay connected across the rails of said section and including a back contact of said secondary relay as well as the entire operating winding of the primary relay, a constantly closed shunt path around said back contact and a portion of said operating winding and including an impedance whereby a holding circuit for said primary relay becomes effective when said secondary relay is energized and said back contact is open, said holding circuit excluding said winding portion and including said impedance, and a circuit for energizing said secondary relay including a front contact of said primary relay.

2,104,592
HEATER
John Jungers, Grafton, Wis., assignor to Jungers Stove and Range Company, Grafton, Wis., a corporation of Wisconsin
Application November 1, 1935, Serial No. 47,880
8 Claims. (Cl. 126—93)



2. In a heater, the combination of a casing having a top wall, a liquid fuel burner in said casing, and an air pipe extending downwardly from said top wall to be heated by gases of combustion in said casing and having its lower end adjacent the level of the burner and spaced laterally of the burner for supplying preheated combustion air to the burner to avoid cooling of the burner notwithstanding variable draft conditions.

2,104,593
RECEPTACLE CLOSURE
Charles G. Nathe, Jr., St. Cloud, Minn.
Application May 7, 1932, Serial No. 609,966
17 Claims. (Cl. 215—5)

17. A receptacle cover formed of a sheet of cleavage material having scoring extending inwardly from its outer face to the plane of cleavage and defining a trough forming portion capable of being split from the cover, and having additional scoring extending from its inner face to said plane of cleavage and defining a pouring opening which the said trough forming portion normally covers, said trough forming portion including a spout bottom integrally hinged to said cover and scoring defining integrally hinged trough sides, the end edges of the trough sides adjacent the hinge of the spout bottom extending laterally from the spout bottom.

2,104,594
SEGMENTAL PULP WHEEL
George B. Rickard, Niagara Falls, N. Y., assignor to The Carborundum Company, Niagara Falls, N. Y., a corporation of Delaware
Application June 18, 1937, Serial No. 148,972
6 Claims. (Cl. 51—207)

1. In a segmental abrasive wheel means for clamping the abrasive segments to a rotatable support, said means comprising for each segment a clamping member in contact with one or more shoulders of said abrasive segment, a second clamping member in contact with one or more shoulders in a recess in the adjacent portion of the rotatable support, manually operable means for drawing said two clamping members toward each other to clamp the abrasive segment firmly to the rotatable support, and automatic means for pressing said clamping plates toward each other when the temperature of the wheel rises.

2,104,595
MANUFACTURE OF SUBSTANTIVE DYESTUFFS
Erik Schirm, Dessau-in-Anhalt, Germany, assignor, by mesne assignments, to General Aniline Works, Inc., New York, N. Y., a corporation of Delaware
No Drawing. Application January 25, 1933, Serial No. 653,488. In Germany January 29, 1932
14 Claims. (Cl. 260—1)

1. In the manufacture of azo, azine, oxazine, thiazine, acridine, triphenylmethane, nitro and anthraquinone dyestuffs, the step which comprises condensing an intermediate product having a movable hydrogen atom, said product being suitable for the production of these dyestuffs and finally constituting part of the dyestuff molecules, with a compound corresponding to the general formula R—CO—X wherein R represents a member of the group consisting of hydrogen, halogen, and hydroxyl, alkoxyl groups and the radical of a hydrocarbon joined through a carbon atom thereof, and wherein X represents a member of the group consisting of the radicals —CH=CHR¹, in which R¹ represents a member of the group consisting of aryl and heterocyclic radicals and aralkyl radicals the aliphatic radical of which is unsaturated, and the said radicals of heterocyclic compounds containing a double bond at the carbon atoms attached to the CO groups, by elimination of water formed from the double bonded oxygen atom and a movable hydrogen atom of the said dyestuff intermediate, said condensation being such as to leave an active group adapted to cause or permit reaction for the formation of the said dyestuffs.

2,104,596
SLIP
Max C. Schrank, Bridgeton, N. J.
Application March 13, 1936, Serial No. 68,578
1 Claim. (Cl. 2—73)

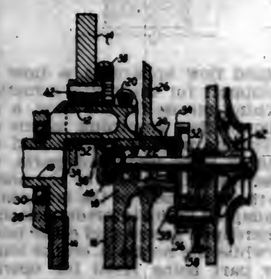
A slip having back and front portions, the back portion consisting of a single panel and the front portion being composed of three panels, the center of said panels having an inverted V-shaped top and being slightly wider than the two side panels, said side panels having angular tops with the longer edge on their outer sides, and diamond-shaped inserts to connect the angular sides of the front and side panels, one of said side panels being stitched throughout the length thereof to the rear panel and the other side panel being stitched throughout the upper portion thereof to the rear panel, and a shadow-proof portion stitched to one of the side panels at the open side and at its top to the underside of the front panels and extending across the slip.

2,104,597
LIQUID DELIVERY APPARATUS
George W. Stodwell, Brooklyn, N. Y., assignor to Keystone Controls, Inc., New York, N. Y., a corporation of New York
Original application September 17, 1936, Serial No. 101,410. Divided and this application May 24, 1935, Serial No. 23,127
8 Claims. (Cl. 221—96)

1. In liquid flow apparatus, a hose having a nozzle, a support for the nozzle structure, liquid flow governing means for the hose, a controller for said liquid flow governing means and push button actuating mechanism for said controller and including inter-connected parts, one positioned to be shifted and held by the nozzle structure upon the placement of the latter on the support and adapted by its interconnection with the other to thereupon secure said other part against operation while the nozzle is on the support and said other part being freed for operating the controller when the nozzle structure is removed from the support.

2,104,598
FOOTWEAR
Seymour Trey, New York, N. Y.
Application August 13, 1936, Serial No. 95,767
1 Claim. (Cl. 36—57)

A low shoe of the pump style, comprising a sole portion, and an upper portion having an opening adjacent the top to permit of the insertion and removal of the foot of the wearer, the edge of the upper portion around the opening being skived and being folded inwardly upon itself to form a smooth, finished edge around the opening, means including a strip of tape secured to the skived folded-over portion and to the inside of the upper portion for reenforcing the folded-over portion and securing it in position, a strip of material folded longitudinally upon itself and secured to the inside of the upper por-



tion adjacent the opening so as to form piping extending around the opening, the piping being positioned adjacent to and at the same level as the folded-over edge of the upper portion, the piping and folded-over edge being of contrasting colors, one of the longitudinal edges of the strip of material formed into piping being positioned to abut the strip of tape and the other longitudinal edge being in overlapping relation with the strip of tape, a second strip of tape secured to the inner surface of the piping material and to the inside of the upper portion, lining material inside the upper portion extending to adjacent the top thereof and overlying the strips of tape, and the piping material, and a line of stitching extending around the opening, through the lining material, piping material, the folded-over edge of the upper portion and the second piece of tape, so as to aid in securing the parts in assembled relation.

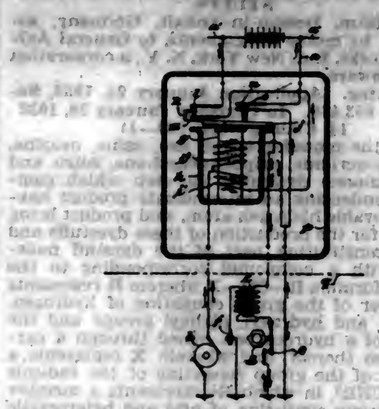
2,104,599

GEARED CONNECTING ROD

Paul G. Wellenkamp, Radburn, N. J., assignor to Wright Aeronautical Corporation, a corporation of New York

Application August 6, 1936, Serial No. 94,506
4 Claims. (Cl. 121—120)

1. The combination with an engine crankshaft having a crank pin and a journal, of a connecting rod bearing member rotatable on said pin, rods articulated to said member, a gear rigid with said member, a shaft mounted for rotation in said journal, a pinion on said shaft engaging said bearing gear with a ratio designated "R", and gears drivably connecting said crankshaft and the last said shaft and giving a ratio of "R—1" of reverse rotation relative said crankshaft.



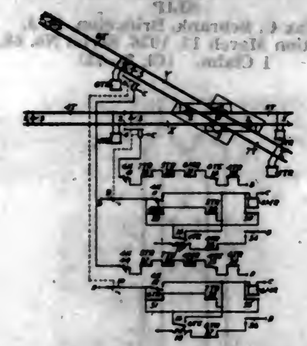
2,104,600

SYSTEM OF IGNITION FOR INTERNAL COMBUSTION ENGINES FOR AIRCRAFT

Harold Edward William West, Derby, England, assignor to Rolls-Royce Limited, Derby, England

Application April 24, 1936, Serial No. 76,233
In Great Britain October 2, 1934
3 Claims. (Cl. 123—148)

1. A coil ignition system for an aircraft engine which comprises plugs, a coil to supply current to the plugs, a battery which supplies current to the coil for starting purposes, an electrical ignition generator driven by the engine which is in circuit with and supplies current to the coil during the normal running of the engine and automatic electro-magnetic means dependent on the amount of current given by the generator for connecting the generator to the coil and simultaneously disconnecting the battery from the coil, and for disconnecting the generator from the coil and simultaneously connecting the battery, the



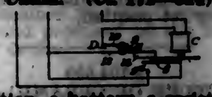
circuit of the generator being wholly independent of connection with the battery.

2,104,601

RAILWAY TRAFFIC CONTROLLING APPARATUS

Henry S. Young, Wilkinsburg, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a corporation of Pennsylvania

Application August 14, 1935, Serial No. 36,167
10 Claims. (Cl. 246—114)



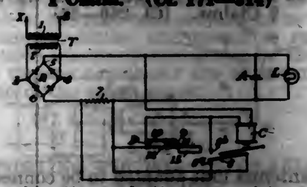
1. In combination, a stretch of railway track having an approach section, a traffic controlling device for said stretch having a normal condition but operable to a different condition, means for at times automatically causing said traffic controlling device to assume such different condition when a train enters said approach section, a normally energized approach locking relay, means for deenergizing said approach locking relay when said traffic controlling device is in such different condition, a timing device, means for initiating the operation of said timing device when the train leaves said approach section effective if said approach locking relay is then deenergized, means for energizing said approach locking relay when said timing device completes its operation, and another traffic controlling device rendered inoperative as long as said approach locking relay is deenergized.

2,104,602

ELECTRICAL RELAY

Norman F. Agnew, Swissvale, and Benjamin Mihalovich, Pittsburgh, Pa., assignors to The Union Switch & Signal Company, Swissvale, Pa., a corporation of Pennsylvania

Application September 19, 1935, Serial No. 40,726
1 Claim. (Cl. 171—314)



In combination, a battery, a resistance, means for charging said battery connected with said battery through said resistance, a relay adapted to pick up on a potential which is equal to the fully charged potential of said battery, a contact which is designed to vibrate open in response to shocks, means for connecting said relay with said battery over said contact, means for preventing said contact from vibrating open when said relay is picked up, and a back contact on said relay connected in multiple with said resistor.

2,104,603

ELECTRICAL RELAY

Norman F. Agnew, Penn Township, Allegheny County, and Benjamin Mihalovich, Pittsburgh, Pa., assignors to The Union Switch & Signal Company, Swissvale, Pa., a corporation of Pennsylvania

Original application September 19, 1935, Serial No. 40,726. Divided and this application April 1, 1937, Serial No. 134,576
1 Claim. (Cl. 171—314)

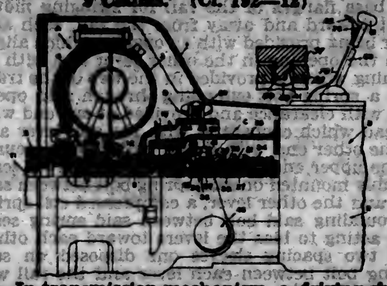
In combination, a battery, a resistance, means for charging said battery connected with said battery through said resistance, a contact which is designed to vibrate open when subjected to shocks, and a relay designed to pick up on a potential equal to the fully charged potential of said battery connected with said battery over said contact, said relay being provided with a back contact which is connected in multiple with said resistance and with a front contact which is connected in multiple with said first mentioned contact.

2,104,604

CUTTER CLAMPING MECHANISM

John E. Bartek, Rochester, N. Y., assignor to Consolidated Machine Tool Corporation, Rochester, N. Y., a corporation of Delaware

Application November 23, 1936, Serial No. 112,714
4 Claims. (Cl. 29—105)



1. The combination with a cutter head having a slot therein defined by endwise tapering side walls, said slot being of sufficient width throughout its depth to accommodate a cutter body and wedge and to permit lateral movement of the cutter body when positioning the same, and a locking abutment projecting above the bottom of the slot, of a cutter body positionable by a movement laterally of the bottom of said slot against one side wall of the slot in locking engagement with said abutment to prevent endwise movement of the cutter body, a wedge member tapering endwise in thickness, said wedge member being widest at its front end and narrowest at its rear end and movable endwise of the slot into clamping position by movement from the cutting end of said cutter body toward the rear end thereof and positionable on the bottom of said slot between the cutter body and the other side wall of the slot to prevent lateral movement of the cutter body, and locking means on the head engaging the wedge member and cutter body and acting to prevent movement thereof in a direction outwardly away from the bottom of the slot, the wedge member being engaged with the cutter body and with a side wall of the slot throughout the depth of said slot.

2,104,605

POWER TRANSMISSION CONTROL MECHANISM

Werner F. Beldt, St. Louis, Mo., assignor to Wagner Electric Corporation, St. Louis, Mo., a corporation of Delaware

Application August 19, 1936, Serial No. 96,718
9 Claims. (Cl. 192—12)

1. In transmission mechanism, a driving shaft, a driven shaft, a hydraulic power transmitter of the kinetic type interposed between the shafts and comprising an impeller element and a turbine element, a brake associated with the power transmitter, a third shaft, a clutch comprising relatively movable elements for connecting and disconnecting said third shaft from the driven shaft, means for applying the brake, means operable by the brake applying means for disengaging the clutch prior to application of the brake, and means, operable upon initial release of said brake applying means for disconnecting the clutch disengaging means from the brake applying means, to permit the clutch to assume a position permitting engagement upon occurrence of substantial synchronism of its elements.

2,104,606

RAILWAY BRAKING APPARATUS

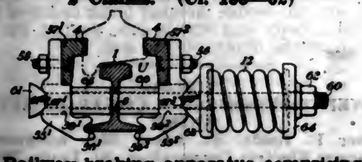
Herbert L. Bone, Pittsburgh, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a corporation of Pennsylvania

Application June 1, 1936, Serial No. 82,771
25 Claims. (Cl. 188—62)

1. Railway braking apparatus comprising a lever provided at its lower end with a recess which receives one flange of a track rail in such manner that the lever is free to rotate about said one flange as a fulcrum, a brake shoe secured to the

upper end of said lever, and means for biasing said lever to a position in which said brake shoe

will frictionally engage the wheels of a car traversing said track rail.



2,104,607

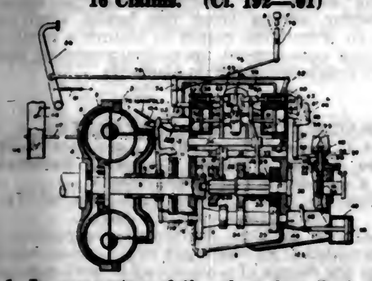
RAILWAY BRAKING APPARATUS

Herbert L. Bone, Forest Hills, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a corporation of Pennsylvania

Original application June 1, 1936, Serial No. 82,771. Divided and this application April 16, 1937, Serial No. 137,296

2 Claims. (Cl. 188—62)

1. Railway braking apparatus comprising two levers disposed on opposite sides of a track rail and pivotally supported at their lower ends on the base flanges of the rail for swinging movement toward and away from the rail, each said lever being provided with an opening which aligns with the opening in the other lever and with an opening which is provided in the web of the track rail, a spring bolt extending through said openings with clearance and provided at one end with a head which cooperates with the one lever and at the other end with a nut, brake shoes secured to the upper ends of said levers, two spring seats slidably mounted on said spring bolt between said nut and the other lever, a compressed coil spring surrounding said bolt between said spring seats and acting to bias the levers toward each other, and two spacing sleeves one disposed on said spring bolt between each lever and the rail web for limiting the movement of the levers toward each other due to said spring to predetermined positions.



2,104,608

CHANGE SPEED TRANSMISSION SYSTEM

John C. Cox and George Harry Thomas, St. Louis, Mo.; said Cox assignor to Wagner Electric Corporation, St. Louis, Mo., a corporation of Delaware, and said Thomas assignor to Piero Mariano Salerni, London, England

Application January 21, 1935, Serial No. 2,616

16 Claims. (Cl. 192—.01)

1. In apparatus of the class described, a driving shaft, a driven shaft, change speed gearing interposed therebetween, power-operated means for changing the speed ratio of said gearing, manually settable means for causing said power-operated means to place the gearing in high speed ratio, and a combined manually settable means and speed controlled means for causing said power means to place the gearing in a lower speed ratio while said first named manual means remains in its set position.

2,104,609

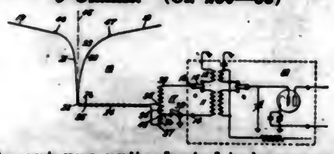
MANUFACTURE OF CERAMIC ARTICLES

Peter de Leeuw, Niagara Falls, N. Y., assignor, by mesne assignments, to The Carborundum Company, Niagara Falls, N. Y., a corporation of Delaware

No Drawing. Application February 9, 1935, Serial No. 5,843

4 Claims. (Cl. 51—278)

1. The method of making a porous abrasive article, which comprises forming a slip comprising abrasive grain and bond, incorporating in the slip granular combustible material and gas evolving material, placing the slip in a mold to permit the gas evolving material to decompose, drying the article and burning it in a kiln to vitrify the bond and burn out the granular combustible material.



2,104,610

ANTENNA AND COUPLER SYSTEM

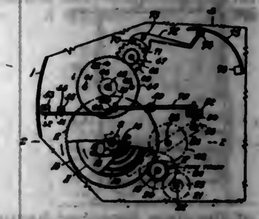
Robert B. Deane, Bridgeport, Conn., assignor to General Electric Company, a corporation of New York

Application December 24, 1934, Serial No. 758,917

9 Claims. (Cl. 250—33)

1. An antenna unit adapted to be connected to a radio receiver of the all-wave type comprising an antenna system including a pair of conductors arranged in converging relation to form a non-uniform transmission line connected at its outer end to a pair of oppositely disposed doublet wires spaced apart a substantial distance in the direction of their lengths, said conductors being connected to a lead-in constituted by a pair of conductors arranged closely adjacent each other throughout their length, said transmission line being of sufficient length to cause the surge impedance of said system to be gradually lowered from a relatively high value at the connection of said line to said doublet wires to a relatively low value at the connection of said line to said lead-in, means to couple said lead-in to said radio receiver, and means connected to said coupling means whereby said antenna system is caused to operate as a doublet system over a high frequency band of radio signals and whereby said antenna system is caused to operate as a simple antenna over a low frequency band of radio signals.

2,104,611



ALARM CLOCK

John J. Drabin, New York, N. Y.

Application September 14, 1936, Serial No. 100,642

9 Claims. (Cl. 58—16)

4. An alarm clock comprising a clock mechanism, means to operate the clock mechanism, an alarm mechanism, means to operate the alarm mechanism, the alarm mechanism comprising a hammer and a sounding member adapted to be actuated by the hammer, a dampening member interposed between the hammer and the sounding member and being of different effectiveness along its length, and means operated by the clock mechanism for gradually withdrawing the dampening member thereby increasing the intensity of sound produced by the hammer with the sounding device.

7. An alarm clock comprising a spring, a clock mechanism operatively connected with the spring, an alarm mechanism operatively connected with the spring and comprising a train of gears, projections on an intermediate gear in said train, a locking device adapted to releasably engage one of the projections thereby preventing the alarm gears from rotation, means to release the alarm gears at a predetermined time of day by the clock mechanism, means to manually adjust the time of release, means to limit the rotation of the gear with projections to not more than one revolution, and means to render the projections selectively engageable by the locking device thereby controlling the length of time of rotation of the alarm gears.

2,104,612

SUPPORTING PIN FOR EYEGLASSES AND THE LIKE

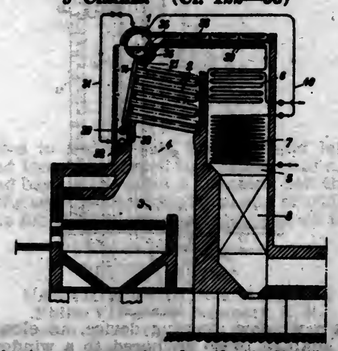
Henry E. Drell, Rowena, Tex.

Application July 14, 1937, Serial No. 153,657

1 Claim. (Cl. 24—3)

A pin support of the class described comprising a pair of duplicate pins having one end blunt and their opposite ends pointed and embodying shank portions bent intermediate their ends to provide a pair of U-shaped supporting members adjacent the blunt end of the pin and having the leg portions thereof disposed in spaced parallel relation with respect to the shanks of the respective pins and joined to the shank adjacent the pointed end of the pin by a return bend and a bar member having its ends secured within the bend forming the junction between the shank and U-shaped member of the respective pins to secure said pins and said U-shaped members in spaced parallel relation.

2,104,613



APPARATUS FOR GENERATING STEAM

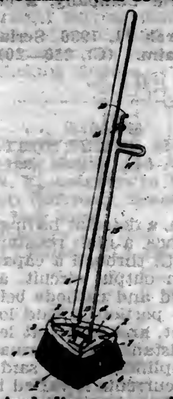
Otto Engler, Cassel-Wilhelmshohe, Germany, assignor to Schmidt'sche Heissdampf-Gesellschaft m. b. H., Cassel-Wilhelmshohe, Germany

Application June 25, 1935, Serial No. 28,366

In Germany June 28, 1934

9 Claims. (Cl. 122—33)

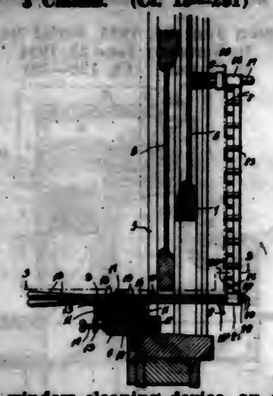
9. A steam generator for the indirect generation of steam consisting of a steam drum, a plurality of double-walled tubes forming substantially the whole of the steam generating means, means to conduct water to the inner spaces of said tubes, means to conduct steam generated in the inner spaces to said drum, means to conduct steam to the outer spaces of said tubes, and means to heat said tubes.



2,104,614

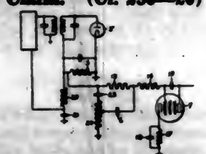
SELF-SHAKING DUST MOP

John C. Finfrock, Kansas City, Mo.



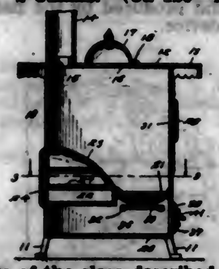
Application March 5, 1937, Serial No. 129,273

1 Claim. (Cl. 15—147)



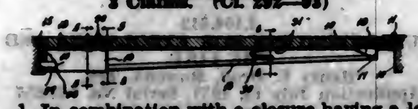
A dust mop including a normally approximately horizontal plate adapted to carry a fibrous mop head, a mop handle pivotally connected at one end with said plate at the upper face thereof and provided with a guide, and an operating rod also pivotally connected with the plate at a point spaced from the pivotal connection of the mop handle and extending through the guide of the same and provided in advance of the guide with a projecting loop forming a hand grip, said operating rod being bent in rear of the guide to form a stop lug.

2,104,615
WINDOW CLEANING DEVICE
Angelo B. Frada, Orange, N. J.
Application August 25, 1936, Serial No. 97,866
3 Claims. (Cl. 15—251)



1. In a window cleaning device, an elongated casing adapted to be anchored to a window sill at the inner side of the window and having a slotted opening extending longitudinally of its upper wall, a rectangular block longitudinally slidable in the casing transversely of the window, a pin rising from the block through the casing slot, a lazy-tong arrangement including operating means carrying the same and supported on the pin and projecting through the window opening and a window cleaning member carried by the lazy-tong arrangement.

2,104,616
HIGH FREQUENCY RECEIVER
George W. Fyler, Stratford, Conn., assignor to General Electric Company, a corporation of New York
Application March 11, 1936, Serial No. 68,181
1 Claim. (Cl. 250—20)

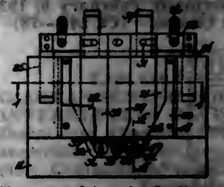


In combination, a detector having a direct current load resistance, a high resistance connected in shunt therewith through a capacitor, an amplifier having an output circuit, a grid, and a cathode, said grid and cathode being connected across at least a portion of said load resistance for direct current, and across at least a portion of said high resistance for alternating currents whereby the amplification of said amplifier to said alternating currents is varied in accordance with the unidirectional potential on said load resistance, means whereby the capacity between said grid and cathode varies with variation in said unidirectional potential, a high impedance in series between said high resistance and said grid, said impedance being proportioned relative to changes in capacity between said grid and cathode produced by said unidirectional potential to produce desired attenuation of high frequency signal currents during periods when the amplification of said amplifier is largest and said impedance being sufficiently high that said attenuation is not appreciably affected by the portion of the whole of said high resistance across which said grid and cathode is connected.

2,104,617
HEATING COOK STOVE
Laura Gilbert, Chicago, Ill.
Application April 8, 1937, Serial No. 135,190
2 Claims. (Cl. 126—4)

2. A stove of the class described having a casing, an oven in the casing extending partly across the same, and a grate extending across the remainder of the casing, the wall of the oven being positioned to partly support the fuel bed, the top wall of the oven extending upwardly and away from the grate, the wall of the casing extending above the grate and said wall of the oven and enclosing a single space to contain fuel supported on the grate and on said wall of the oven, a fuel door for the casing, a door for the oven, said doors being located at different sides of the casing, an ash pit beneath the grate and oven and a door leading to the ash pit.

2,104,618
RIOT LOCK
William Hasenfuss, Amsterdam, N. Y.
Application April 1, 1936, Serial No. 72,195
3 Claims. (Cl. 292—93)



1. In combination with a closure having a lock on one face thereof provided with a shield and a retractile bolt, an exposed elongated lever means pivoted to the said face of the closure, a flexible connection means between the lever and the bolt substantially in line with both of them and extending into the shield through the rear end and connected to the bolt, a casing in line with said lock secured to said face into which the free end of the lever means extends and is held against outward displacement, means urging the lever means outwardly at its free end into contact with the casing, said bolt being slidable in a path substantially in line with the lever means, and a roller within the casing contacted by one of said means.

2,104,619
NONCAKING SMOKED SALT AND METHOD OF MAKING THE SAME
Rudolf Lohmann, Philadelphia, Pa., assignor to Pennsylvania Salt Manufacturing Company, Philadelphia, Pa., a corporation of Pennsylvania
No Drawing. Application July 2, 1936, Serial No. 88,606
4 Claims. (Cl. 99—163)

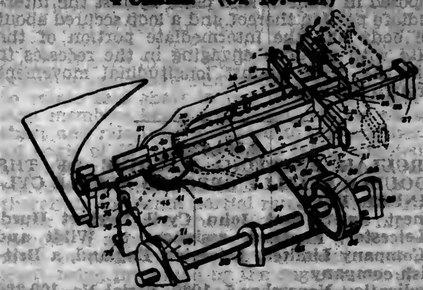
1. A smoked salt characterized by its non-caking qualities due to the incorporation therewith of a relatively small amount of a substantially non-toxic, deliquescent alkaline earth chloride, in addition to the deliquescent materials normally present in smoked salt.

2,104,620
MACHINE FOR TESTING GRAIN GAUGES
George A. Long, Hartford, Conn., assignor to The Gray Telephone Pay Station Company, Hartford, Conn., a corporation of Connecticut
Application May 27, 1935, Serial No. 23,724
6 Claims. (Cl. 33—36)

5. A casting machine including mold members separably mounted, a slide carried by a mold member and having a recess, said mold members and said slide cooperating to form a casting cavity between them, said recess having an inclined wall, a laterally movable plunger mounted for movement with the one of said mold members carrying the slide and having an inclined end corresponding to the inclined wall of said recess to effect lateral movement of said plunger by contact with said inclined wall, and means for withdrawing said plunger from said cavity, said recess being of a width to permit said lateral movement of the plunger as it is withdrawn from the inclined opening in said casting.

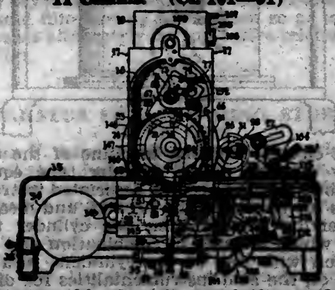
2,104,621
MATCH BOOK
Thomas J. McKinnon, Jr., Mission, Tex.
Application July 22, 1936, Serial No. 91,077
1 Claim. (Cl. 206—39)

A match book of the character described comprising an elongated strip of material, a match group, one end of the strip being bent backwardly and secured to the match group, the other end of the strip being bent backwardly to provide a cover flap, said cover flap being provided with a slot therein, an internal flap having a striking surface thereon registerable with the slot when the internal flap is pressed against the match group, said internal flap consisting of an extension of the cover flap bent backwardly against the inside of the cover flap.



2,104,622
CLAMP AND SCAFFOLD FOR WELDING OPERATIONS
Anthony Joseph Mandina, Houston, Tex.
Application May 5, 1936, Serial No. 78,021
6 Claims. (Cl. 189—36)

1. A temporary clamp and scaffold support for tank plates or the like, including an angle member adapted to have one of its arms welded to a plate adjacent an edge thereof and having its other arm located in a plane parallel to the plane of the plate, the first-mentioned arm provided with an aperture, a bracket having a tongue



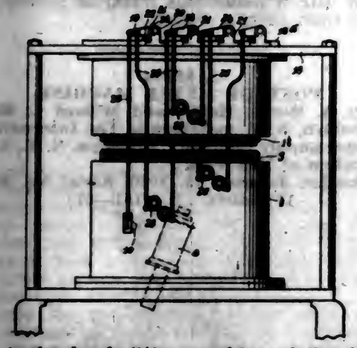
adapted to seat in said aperture and laterally-spaced tongues adapted to straddle said arm and extend beyond the same, a clamping bolt threaded into the second-mentioned arm and provided with means for engaging the laterally spaced tongues.

2,104,623
CARAMEL CUTTING MACHINE
Philip F. Putney, Newport, N. Y.
Application June 12, 1936, Serial No. 85,254
4 Claims. (Cl. 107—61)

2. In a caramel cutting machine, knives for cutting the strip of candy and said knives being plated with a nonferrous metal to prevent the candy from sticking thereto.

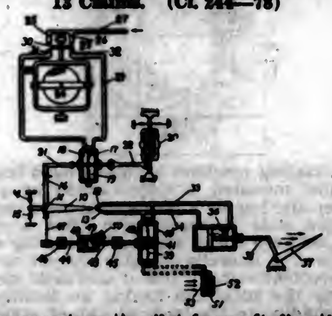
2,104,624
POSTAGE METER MACHINE
Albert A. Reyer, Hollis, and Millard L. Reyer, Brooklyn, N. Y., assignors to The International Postal Supply Company, Brooklyn, N. Y., a corporation of New York
Application January 15, 1936, Serial No. 59,298
11 Claims. (Cl. 101—91)

1. In a combined postage printing and registering machine, a die carrier; a die on said carrier; a rotatable impression roll; means for rotating said carrier and roll in timed relation;



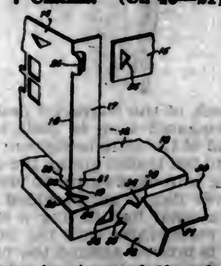
means for moving said roll into cooperative relation with the die to print postage on mail matter; and means associated with said roll moving means for varying the effective pressure exerted by the roll on the mail matter during the printing operation.

2,104,625
BOW NECKTIE
Sol Sherman, New York, N. Y.
Application April 17, 1937, Serial No. 137,390
4 Claims. (Cl. 2—154)



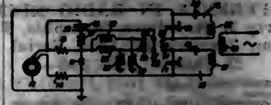
1. The combination with a mounting for a made-up tie comprising a plate adapted to be secured to the material of a tie and being formed intermediate its length with opposed upper and lower marginal recesses defining wide-portions connected by a narrow neck, the wide portions having substantially smooth edges merging into edges of the neck, and collar-engaging clasps at ends of said wide portions; of a tie having a body disposed in front of said plate against the intermediate portion thereof and a loop secured about the body and the intermediate portion of the plate with portions engaging in the recesses to hold the plate against longitudinal movement through the loop.

2,104,626
CIRCULAR KNITTING MACHINE OF THE DOUBLE AXIALLY OPPOSED NEEDLE CYLINDER TYPE
Ernest Spiers and John Cyril Herbert Hurd, Leicester, England, assignors to Wildt and Company Limited, Leicester, England, a British company
Application November 5, 1936, Serial No. 109,380
In Great Britain November 14, 1935
14 Claims. (Cl. 66—14)



1. A circular knitting machine of the double axially opposed needle cylinder type equipped with double ended needles, associated instrumentalities for operating the needles, and means for transferring needles from one cylinder to the other, which includes in combination and in association with one of the cylinders, means for action on the said instrumentalities for dividing the same and causing prearranged needles to take up a tucking position and the remainder to take up a non-knitting position, and periodically operated means for action on the needle-operating instrumentalities whereby after division of the needles, those which take up a tucking position, as well as those which take up the non-knitting position, are caused to clear and knit.

2,104,627
STEERING DEVICE
Gert Zeuge von Manteuffel, Berlin-Dahlem, Germany, assignor to Askania-Werke A. G. vormals Centralwerkstatt Dessau und Carl Bamberg-Friedenau, a corporation of Germany
Application February 8, 1937, Serial No. 124,683
In Germany February 6, 1936
13 Claims. (Cl. 244—78)

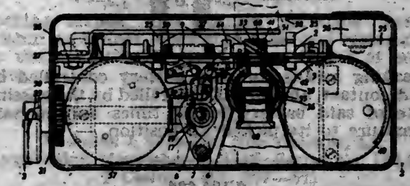


2. In an automatic pilot for craft direction responsive means; a relay connected to be actuated by impulses from said direction responsive means; a control surface connected to be actuated by said relay; means responsive to the force exerted on the control surface and connected to act on said relay; and means for biasing said force responsive means toward its neutral position, whereby a restoring impulse is exerted on the relay which is a function of the force exerted on the control surface.

2,104,628
TOY GARAGE AND THE LIKE
Donald M. Warren, West Lafayette, Ind.
Application August 16, 1934, Serial No. 740,102
7 Claims. (Cl. 46—21)

1. In a toy structure of the class described, the combination of a paper board box section comprising a top wall constituting a floor member and downwardly folded side flanges for supporting the floor member at an elevation from a ground surface on which the structure is set up, said side flanges being folded downwardly relative to the floor member along fold lines formed by cutting through part only of the thickness of the paper board whereby there is formed a peripheral ledge around and spaced downwardly from the top surface of the floor member, an apron for facilitating movement of toy vehicles from said ground surface to said floor member, said apron having a driveway portion and triangular side portions adapted to be folded downwardly, and means for anchoring the apron to the base with the driveway portion in inclined position forming an inclined connecting surface between said floor member and said ground surface, said triangular side portions forming end closures for the space between said driveway portion and said ground surface and the rear edges of said triangular portions being adapted to abut a side flange of the base, and said driveway portion having a lip extending beyond the plane of the rear edges of said triangular portions and adapted to rest on a portion of said peripheral ledge to prevent collapsing of said driveway portion.

2,104,629
TESTING ARRANGEMENT FOR CIRCUIT-INTERRUPTING DEVICES
Raoul Wilhelm and Gerhard Frithauf, Berlin-Oberschöneweide, Germany, assignors to General Electric Company, a corporation of New York
Application July 8, 1937, Serial No. 152,586
In Germany August 21, 1936
5 Claims. (Cl. 175—183)

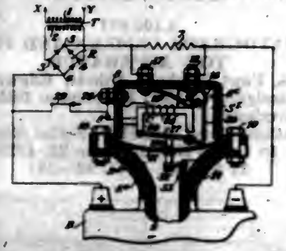


1. Apparatus for testing circuit-interrupting devices comprising in combination a supply circuit for current to be interrupted by an interrupting device under test, an inductive impedance included in said circuit, a condenser and a resistor connected in series across said inductive impedance, a surge generator, and connections including a three-electrode spark gap between said generator and said circuit, said gap having its middle electrode connected to the common point of said condenser and said resistor.

2,104,630
SEPARATOR FOR CANCELING MACHINES
Lawrence J. Zahn, Long Island City, N. Y., assignor to The International Postal Supply Company, Brooklyn, N. Y., a corporation of New York
Application April 20, 1937, Serial No. 138,037
5 Claims. (Cl. 271—39)

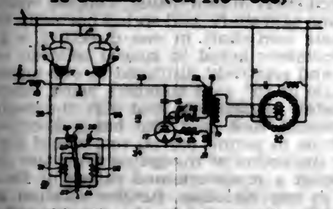
1. In a separating mechanism of the class described, a feed roll, a separator roll opposite said feed roll the periphery of said separator roll having a frictional wearable surface, a guard member, an arm pivotally connected to said member and carrying said separator roll, said separator roll being adapted to project beyond the face of said member in the direction of the feed roll, means on said guard engageable with said peripheral surface to limit movement of the separator roll with respect to said member in the direction of said feed roll, and means normally urging said arm in said direction whereby a fixed relation is maintained between the periphery of the separator roll and the face of said member.

2,104,631
CINEMATOGRAPH CAMERA AND PROJECTOR APPARATUS
Frederick Fant Michael Abbott, Edgware, England, assignor to Neal Pemberton Billing, London, England
Application March 29, 1937, Serial No. 133,738
In Great Britain June 25, 1935
12 Claims. (Cl. 88—16)



1. In apparatus for the purpose specified the combination including a casing, a shutter, means for actuating said shutter, means for moving a film through said casing behind said shutter, and an optical system for focusing successive images upon successive portions of said film, a rotatably mounted shaft in said casing, a spring operatively engaging said shaft, said spring normally tending to rotate said shaft in one direction, a pair of stop members keyed in spaced relation on said shaft and relatively displaced to one another by an angle of 45°, said members being adapted to alternately engage with said film, the member in engagement with said film being disengageable therefrom to permit partial rotation of the shaft under the action of the spring after the film has completed a predetermined extent of its movement in one direction, further rotation of said shaft being prevented by the engagement of the film by the other member to permit a partial rotation of the shaft in the same direction as before when the film has completed a predetermined length of its movement in the opposite direction, a skew gear carried by said shaft, an optical system, a skew gear on said optical system, said skew gear engaging with the first mentioned skew gear and serving to produce movement of said optical system during each partial rotation of said shaft, film feeding mechanism including a pair of feed pawls, one of said feed pawls engaging the film for movement in one direction, the other pawl engaging said film for movement thereof in the opposite direction, and a cam keyed to said shaft, said cam co-operating with said film feeding mechanism so as to bring said pawls alternately into operative relation with said film.

2,104,632
APPARATUS FOR CHARGING STORAGE BATTERIES
Norman F. Agnew, Wilkinsburg, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a corporation of Pennsylvania
Application January 14, 1936, Serial No. 59,035
6 Claims. (Cl. 171—314)



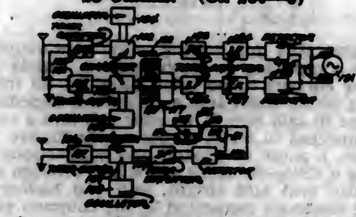
5. In combination, a storage battery, a switch, a relay provided with a winding which is connected with the terminals of said battery over said switch and with an armature which controls a contact in such manner that said contact will be closed or open according as said armature is released or picked up, the parts being so pro-

portioned that the current supplied to said winding will be insufficient to pick up said armature but will be sufficient to hold said armature picked up once it is moved to its picked up position,

charging means for said battery controlled by said contact, and means controlled by the gassing rate of said battery for at times moving said armature to its picked up position.

2,104,633
ELECTRIC VALVE CIRCUITS
Ernst F. W. Alexanderson, Schenectady, N. Y., assignor to General Electric Company, a corporation of New York
Application April 15, 1936, Serial No. 74,462
16 Claims. (Cl. 175—363)

1. In combination, a supply circuit, a load circuit, an electric translating circuit interconnecting said circuits including a plurality of parallel-connected electric circuits, a plurality of similarly disposed arc discharge paths associated with said parallel-connected circuits and each including a plurality of electrodes, said parallel-connected electric circuits being connected in said translating circuit so that the potentials impressed on corresponding electrodes of said arc discharge paths are substantially in phase, and means for causing said arc paths to conduct current in a predetermined order.



2,104,634
MACHINE FOR PRODUCING SPACED GROUPS OF TUFTS ON FABRIC
Robert H. Bradwell, Sumter, S. C., assignor to Pelly Prenties, Inc., Sumter, S. C., a corporation of South Carolina
Application June 3, 1936, Serial No. 83,460
11 Claims. (Cl. 112—79)

1. In a machine for producing tufts upon a fabric, a reciprocating needle bar, a needle carried thereby to force the thread through the fabric and produce loops, a looper movable across the path of travel of the needle bar to receive the loops thereon, means to cut the loops upon the looper, a spring to move the needle bar downwardly, a sleeve slidably mounted upon the needle bar and serving to raise the needle bar, means to reciprocate the sleeve, a holding element connected with the needle bar, a rotatable disk for coaction with the holding element and having a part to engage with the holding element for retaining the needle bar raised and a cut away part

to permit of the downward movement of the needle, means to rotate the disk, and work feeding means to advance the fabric.

2,104,635
MEANS AND METHOD FOR SUPPRESSING INTERFERENCE IN RADIO RECEPTION
Harry B. Broadbeve, Memphis, Tenn.
Application January 16, 1936, Serial No. 59,342
23 Claims. (Cl. 250—6)

1. Apparatus for receiving signals at radio frequency, said apparatus including means for receiving and finally detecting the energy of two differing radio frequency channels and removing the carrier frequencies thereof, and means for impressing the intensity output of the said final detecting means of one said channel, substantially free from any carrier frequency, on the other said channel in advance of the said final detecting means thereof.

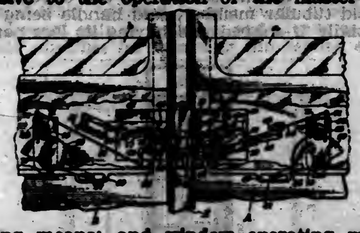
2,104,636
ADVERTISING DEVICE
James Russell Burchams, Newcastle, Ind.
Application August 27, 1937, Serial No. 161,326
3 Claims. (Cl. 40—28)

1. A device of the character described, comprising, a spherical body, a shaft within said body extending coaxially with the horizontal axis of said body, bearings connecting said shaft to said body whereby to permit said body to rotate

relative to said shaft, a source of power connected to said shaft and engaging the inner periphery of said body to rotate the same and equipped with means engaging said periphery whereby to steer the same, and a simulated source of power engaging the outer periphery of said body and maintained in horizontal relationship with said first source of power whereby to simulate the appearance of rotating said body.

2,104,637
METHOD OF COATING
Kenneth E. Crocin, Williamsport, Pa.
No Drawing. Application July 19, 1935, Serial No. 32,202
1 Claim. (Cl. 91—68)

A method of coating wood products consisting in initially applying to a dry product a coating of waterproof penetrating liquid composition containing as one of its constituents China-wood oil, drying said product to gelatinize the China-wood oil to form a rough surface on the surface of the product and in the pores of the product and finally coating said product with a composition having as one of its essential constituents a wax containing a solvent, a drier and coloring matter, said wax having an affinity for China-wood oil to form a homogeneous coating for the product.



2,104,638
FOUNTAIN PEN
William R. Cuthbert, Fort Madison, Iowa, assignor to W. A. Sheaffer Pen Company, Fort Madison, Iowa, a corporation of Delaware
Application May 18, 1936, Serial No. 80,226
7 Claims. (Cl. 120—45)

1. In a fountain pen including a cap for enclosing the writing point end of the barrel, a feed bar, an apertured metallic shell enclosing one end of the feed bar and having longitudinally slidable movement in the bore of the barrel and a passage for conducting writing fluid from a reservoir in the barrel to a pen nib mounted on said feed bar, an apertured seat in the barrel against which the inner end of said shell engages in a retracted position thereof, a compression spring for moving said slidable shell and feed bar in one direction, means for limiting such movement to an extended position when the cap is removed to permit flow of the writing fluid from the reservoir to said passage, and means in engagement with said cap for moving said shell and slidable feed bar in the other direction to said retracted position against the compression of said spring to prevent flow of writing fluid when said cap is disposed on the barrel.

2,104,639
DOOR LOCKING AND WINDOW OPERATING DEVICE FOR AUTOMOBILES AND THE LIKE
Edward D. Dall, Cleveland, Ohio, assignor to Walter F. Wright, Shaker Heights, Ohio
Original application February 4, 1933, Serial No. 655,198. Divided and this application May 5, 1934, Serial No. 724,161
20 Claims. (Cl. 292—36)

1. The combination with an automobile body and the like, its doors, and windows in said doors, of locking means for a master-door; locking means for another door associated with and responsive to the operation of the master-door

locking means; and window operating means within each door associated with and responsive to the operation of the locking means of such door.

2,104,640
FAUCET
Nicholas J. Gendall, New Orleans, La.
Application November 2, 1936, Serial No. 109,020
1 Claim. (Cl. 277—67)

A faucet comprising a water chamber having an inlet, an inclined spout, a partition having a thickened intermediate portion and an auxiliary vertical chamber of greater length than its width in the thickened portion, the partition being inclined at an angle to the horizontal and forming part of the inclined wall of said spout, said auxiliary chamber forming a communication between the water chamber and the spout, a main valve seat on the inclined partition at the upper end of the auxiliary chamber, a main valve controlling the flow of water from the auxiliary chamber to the spout, a valve seat ground in partition at the lower end of the auxiliary chamber, an auxiliary valve engaging the auxiliary seat for cutting off water from the water chamber to the auxiliary chamber, the upper end of said auxiliary chamber being flared.

2,104,641
LUBRICATING PREPARATION
Hugh Francis Green, York, England
No Drawing. Application August 5, 1935, Serial No. 34,842. In Great Britain December 5, 1934
3 Claims. (Cl. 87—9)

1. A lubricating preparation comprising a lubricating oil, a salt of a bile acid and a liquid lactate of an aliphatic alcohol having more than four carbon atoms.

2,104,642
MEASURING DEVICE
Gertrude L. Greene, Corona, Calif.
Application July 22, 1935, Serial No. 32,632
2 Claims. (Cl. 21—11)

1. In a measuring device, the combination with

a tubular member open at both ends, a cross wire extending across one end of said tubular member, and a handle secured to the opposite end of said tubular member, said handle being substantially U-shaped and having its legs parallel

to the sides of said tubular member, the length of said handle being greater than the length of said tubular member, whereby a sliding gauge may pass between the legs of said handle and enter the open end of said tubular member.

2,104,643

METHOD OF TESTING AND APPARATUS THEREFOR

Grover R. Greenslade, Scott Township, Allegheny County, Pa., assignor to Pittsburgh Dry Stencil Company, a corporation of Pennsylvania

Application December 13, 1934, Serial No. 757,379

6 Claims. (Cl. 175—183)

1. Apparatus for testing telltale staybolts, which apparatus comprises exploring means adapted to be inserted in a telltale hole of a telltale staybolt and adapted to be moved along the said telltale hole, means associated with the said exploring means for determining the condition of the bolt in every breakable part that renders the bolt effective as a stay for the plates of a boiler, and additional electrical means associated with the said second means for indicating when the free end of the said exploring means is in relatively close proximity to the original closed end of the said telltale hole and yet electrically insulated therefrom.

2,104,644

METHODS OF TESTING AND APPARATUS THEREFOR

Grover R. Greenslade, Scott Township, Allegheny County, Pa., assignor to Pittsburgh Dry Stencil Company, a corporation of Pennsylvania

Application May 31, 1935, Serial No. 24,463

32 Claims. (Cl. 175—183)

1. Apparatus for testing the condition of a metal object having a passage-way into the body thereof, the said passage-way having an inner closed end, which apparatus comprises a testing implement adapted for insertion into the passage-way, means associated with said implement for indicating the presence or absence of fractures in said metal object while moving the said testing implement along the axis of said passage-way, and means associated with said implement for indicating whether it has reached the original closed end of said passage-way.

2,104,645

MEANS FOR TESTING BOILER STAYBOLTS

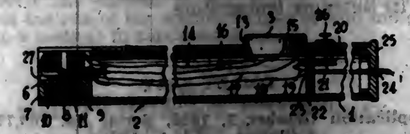
Grover R. Greenslade, Scott Township, Allegheny County, Pa., assignor to Pittsburgh Dry Stencil Company, a corporation of Pennsylvania

Application June 20, 1935, Serial No. 27,587

6 Claims. (Cl. 175—183)

1. Apparatus for testing telltale staybolts which apparatus comprises spaced contact elements adapted to be inserted in the telltale hole of a telltale staybolt and adapted for movement therein to touch the original closed end of said telltale hole, means combined with the said contact elements for determining the presence or absence of fractures in the bolt while moving the contact elements along the telltale hole, and means for indicating contact of the said elements with the said end of said telltale hole.

2,104,646



MEANS FOR TESTING

Grover R. Greenslade, Scott Township, Allegheny County, Pa., assignor to Pittsburgh Dry Stencil Company, a corporation of Pennsylvania

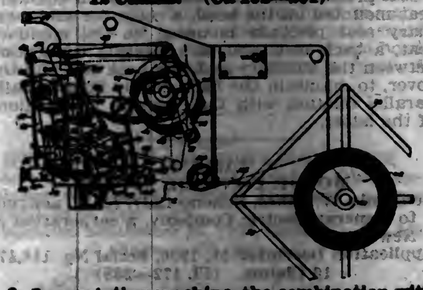
Application June 20, 1935, Serial No. 27,588

Renewed October 20, 1937

3 Claims. (Cl. 175—183)

1. Apparatus for testing magnetizable metal objects comprising a core member of magnetic metal mounted on the end of a rod member provided with a handle, an alternating current meter mounted on the said handle, grooves provided in the said core member, a pair of inductive windings in each groove each pair being oppositely wound and the windings in each pair being connected in opposite sides of a Wheatstone bridge circuit.

2,104,647



TICKET PRINTING MACHINE

George W. Henry, Jr., Philadelphia, Pa., assignor to Seabar Company, Philadelphia, Pa., a corporation of Pennsylvania

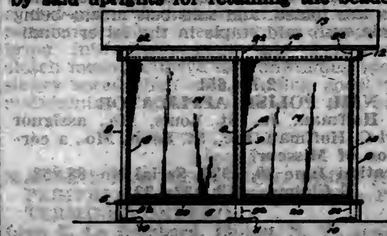
Application June 3, 1933, Serial No. 674,692

Renewed June 4, 1937

12 Claims. (Cl. 101—231)

3. In a printing machine, the combination with a printing platen, of means for feeding a strip transversely across the face of said platen, an inking device at one side of said platen, a shear blade cooperating with the opposite side edge of the platen to shear the strip, a printing element, mechanism for successively moving said element into contact with the inking pad and with the platen, and mechanism for actuating said blade in synchronism with the movement of said printing element to shear the strip during the periods when the printing member is withdrawn from the platen in the direction of the inking device.

2,104,648



CAMP HOUSE

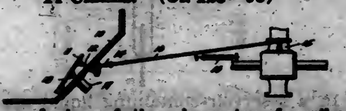
Lawrence Hickey, Coffeyville, Kans.

Application August 27, 1936, Serial No. 98,249

5 Claims. (Cl. 20—8)

1. In a building, the combination of a frame work open at its sides and ends and including spaced corner and intermediate uprights formed along opposite sides with longitudinal guide grooves, waterproof rolling curtains covering the open spaces of said sides and ends, spring rollers for said curtains journaled between the upper ends of each adjacent pair of said uprights, each curtain having beaded longitudinal edges slidably engaged in the guide grooves of the adjacent pair of uprights, and means carried by said uprights for retaining the beaded edges

within said grooves of the uprights, said last-named means comprising retaining strips secured to each upright at opposite sides of each guide groove thereof and having spaced adjacent rolled edges engaging the associated curtain inwardly of its adjacent beaded edge.



2,104,649

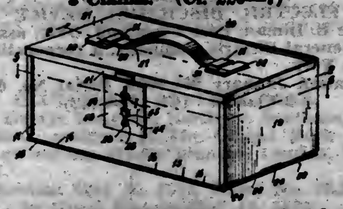
ACCELERATOR GOVERNOR

Edward Martin Hinton, Drexel Hill, Pa.

Application June 13, 1936, Serial No. 85,179

14 Claims. (Cl. 123—98)

1. In a device of the character described, a cylinder having a cam groove formed in the wall thereof, a piston comprising a non-rotatable member provided with apertures therethrough and a rotary member having portions adapted to cover said apertures and having a cam follower adapted to engage in said cam groove, and a piston rod, means associated with said piston and operable by the initial movement of said piston rod to retard the advance of said piston.



2,104,650

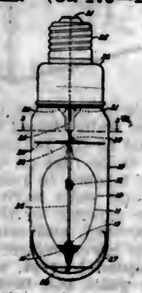
DINNER PAIL AND EGG CRATE

Henry W. Heeseman, Gibsonburg, Ohio

Application April 15, 1937, Serial No. 137,132

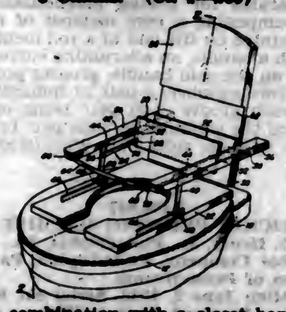
2 Claims. (Cl. 220—7)

1. A receptacle of the class described having a bottom wall, side walls hinged to the bottom wall, end walls hinged to the bottom wall, latches on certain of said walls, lugs on other of said walls engaged by the latches to hold the walls in receptacle form, end walls having angular flanges overlapping the exterior of the side walls, said latches being pivoted, and said lugs having extensions at their lower extremities on which the latches are adapted to rest, a cover pivoted to one of the side walls, bolt means carried by the cover, fastening means engageable by the bolt



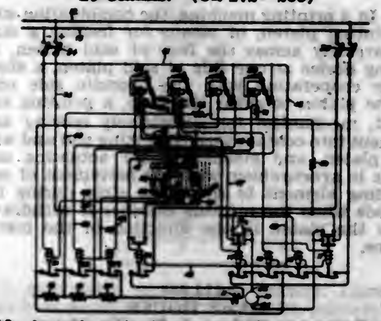
means to secure the cover in closed position, said cover having a depending staple on is under surface, said side walls, bottom wall and cover being foldable in superposed relation, and said side walls and bottom wall having openings therethrough through which said staple passes when the walls are folded, and said bolt means being engageable with said staple in the latter condition.

2,104,651
NAIL POLISH APPLICATOR
Carl C. Heffman, Jr., St. Louis, Mo., assignor to Carl C. Heffman, Inc., St. Louis, Mo., a corporation of Missouri
Application June 30, 1936, Serial No. 88,253
6 Claims. (Cl. 132—73)



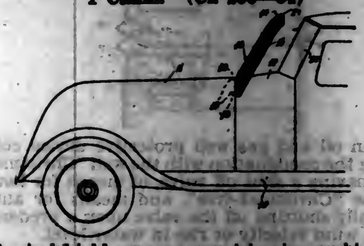
1. In a reservoir-containing liquid applicator, a tubular portion of rigid material closed at one end and provided with a hollow cap portion at its other end, said cap portion being of flexible material and having a restricted outlet, said cap portion extending a substantial distance beyond said last named end of said tubular portion, applicator means carried by said cap portion closely adjacent said outlet, and extending outwardly from said cap portion, and combined drip-preventing and guide means for said liquid, including a baffle extending from the exterior surface of said cap portion adjacent said outlet, and with said outlet between said baffle and said applicator means, said baffle extending toward said applicator means.

2,104,652
ELECTRIC DISCHARGE DEVICE
George E. Inman, East Cleveland, Ohio, assignor to General Electric Company, a corporation of New York
Application January 25, 1936, Serial No. 60,848
9 Claims. (Cl. 176—122)



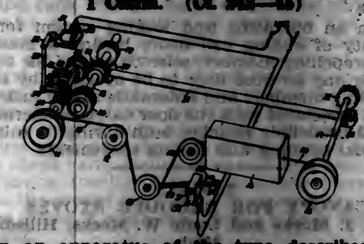
1. The combination of an electric discharge lamp comprising a bulb having a pair of electrodes therein, and an outer envelope enclosing said bulb, with a gas content in said outer envelope at a pressure in excess of half an atmosphere, providing enhanced cooling for the inner bulb, as compared with that afforded by direct atmospheric exposure thereof, so that the lamp may operate on higher current and with higher pressure without heating up the inner bulb wall to its softening temperature.

2,104,653
TOILET SEAT
Nels Johnson, Chicago, Ill.
Application October 2, 1936, Serial No. 103,777
8 Claims. (Cl. 4—239)



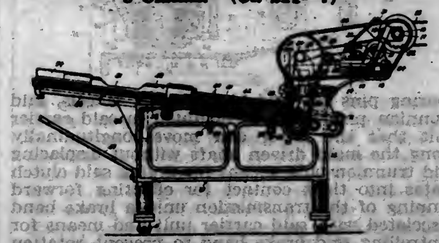
1. The combination with a closet bowl having a seat pivotally mounted thereon, of an auxiliary seat mounted on the bowl, a cover for said auxiliary seat pivotally mounted on the auxiliary seat, a back rest, and an operating connection between the auxiliary seat, the back rest and the cover, to maintain the back rest in substantially parallel relation with the cover in all positions of the latter.

2,104,654
MOTOR CONTROL SYSTEM
Benjamin W. Jones, Schenectady, N. Y., assignor to General Electric Company, a corporation of New York
Application December 31, 1936, Serial No. 118,479
10 Claims. (Cl. 172—288)



10. A motor starter comprising an accelerating resistor and a plugging resistor connected between said accelerating resistor and a terminal of the motor armature, a plurality of contactors, one for shunting each of said resistors, a reversing type master switch for actuating one of said contactors to shunt said plugging resistor, means for actuating another of said contactors to shunt said accelerating resistor after an interval of time comprising an inductive time delay relay having an operating coil and connections including a resistor between said coil and plugging resistor whereby said relay responds to the voltage drop across said plugging resistor and means for diminishing said time interval in accordance with the rate of acceleration of said motor comprising a connection from the opposite terminal of said armature to said coil thereby to reverse the current in said coil in accordance with the rise of the countervoltage of said motor and a resistor in said connection.

2,104,655
INSECT SHIELD FOR AUTOMOBILES
Louis B. Jones, Pelo, Ill.
Application July 28, 1936, Serial No. 92,058
1 Claim. (Cl. 296—84)

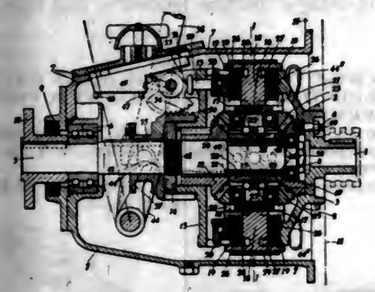


A windshield screen comprising in combination with the cowl and hood of a vehicle, a pair of frames provided with studs extending from the base thereof, mesh screen fabric secured to said frames, spring clips adapted to connect the adjacent portions of said frames, and said studs adapted to be engaged between the cowl and hood of the vehicle to support the screen in front of the windshield.

2,104,656
WIRE TENSION CONTROLLING DEVICE
Robert F. Krejci, Cleveland Heights, Ohio, assignor to General Electric Company, a corporation of New York
Application September 28, 1934, Serial No. 745,862
1 Claim. (Cl. 242—45)

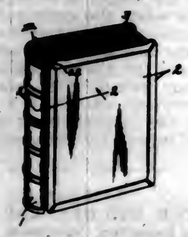
In an apparatus of the type described, the combination of an unwinding spool adapted to hold wire and a winding spool adapted to receive said wire, means for driving said winding spool, clutch means for driving said unwinding spool at a slower speed than said winding spool, another clutch means for driving said unwinding spool at a higher speed than said winding spool, a sheave engaging said wire between said spools and movable in a substantially vertical plane for taking up the slack in said wire, electro-magnetic means engaging said second-mentioned clutch means, an electric circuit including said electro-magnetic means and a switch means adapted to be closed by the upward movement of said sheave to actuate said electro-magnetic means and bring into engagement said second-mentioned clutch means to drive said unwinding spool at a higher speed than said winding spool, and said switch means being adapted to be opened by the downward movement of said sheave to actuate said electro-magnetic means and cause said second-mentioned clutch means to be disengaged and bring into engagement said first-mentioned clutch means to drive said unwinding spool at a slower speed than said winding spool thereby maintaining a uniform tension in said wire.

2,104,657
MACHINE FOR ARRANGING DISKS HAVING PERIPHERAL PROJECTIONS IN A PREDETERMINED ORDER
Leon E. La Bombard, Fulton, N. Y., assignor to Oswego Falls Corporation, Fulton, N. Y., a corporation of New York
Application July 29, 1935, Serial No. 32,453
5 Claims. (Cl. 214—7)



1. A machine for arranging disks having peripheral projections, with the projection of each disk arranged in the same radial plane, said machine comprising a suitable frame, a pair of conveyor members, each consisting of a core portion, the periphery of which is formed elliptical and being provided with a helical thread, said members being rotatably mounted and arranged in spaced apart parallel relationship to receive and convey the disks axially along said members during rotation thereof, with the periphery of the disk riding on the elliptical core portions, a guide bar located between the conveyor members and arranged to engage the projections on the disks while the same are being conveyed along said members, means for discharging the disks in the threads of said members in one end thereof, means for receiving the disks as they are discharged from the opposite ends of the conveyor members, and means for rotating said members.

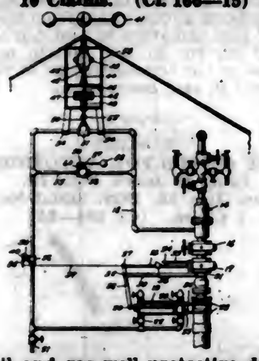
2,104,658
CLUTCH AND REVERSE GEAR
Alfred George Langdon, Northam, Southampton, England, assignor to The Climax Rock Drill & Engineering Works Limited, London, England
Application May 12, 1936, Serial No. 79,368
In Great Britain May 16, 1935
4 Claims. (Cl. 74—297)



1. A clutch and reverse gear transmission unit comprising a main driving assembly including a main driving shaft, a main driving plate fast with said shaft and a main driving bevel wheel secured to said main driving plate, a main driven assembly including a main driven shaft having a bearing in said main driving bevel wheel, a main driven bevel wheel keyed to said main driven shaft and spaced from said main driving wheel, a main driven plate slidably keyed to the hub of said

main driven bevel wheel, a carrier unit slidably mounted on said main driven shaft between said main driving and main driven plates and bevel wheels, a series of clutch plates non-rotatably fitted to said carrier and cooperating with complementary friction plates non-rotatably fitted to said main driving plate and main driven plate respectively, a series of planet bevel wheels engaging with said main driving and main driven bevel wheels, trunnion pins radially disposed with respect to said main driving shaft and serving as

bearing pins for said planet bevel wheels, said trunnion pins being so mounted in said carrier unit that the latter can move longitudinally along the main driven shaft without displacing said trunnion pins, means for urging said clutch plates into tight contact for effecting forward running of the transmission unit, a brake band associated with said carrier unit and means for controlling said brake band to prevent rotation of said carrier unit at will and thereby effect astern running of said transmission unit.



2,104,659
LOOSE LEAF BINDER
Harold C. Lenhart, Syracuse, N. Y., assignor to McMillan Book Company, Syracuse, N. Y., a corporation of New York
Application May 27, 1932, Serial No. 613,905
26 Claims. (Cl. 129—24)

1. A loose leaf binder comprising a back member, a cover hingedly connected to the back member, a plurality of posts, fastening means adapted to secure the posts to said back member, releasable means for maintaining the fastening means in the inoperative position and separate means for automatically moving the fastening means when released into holding engagement with the posts.

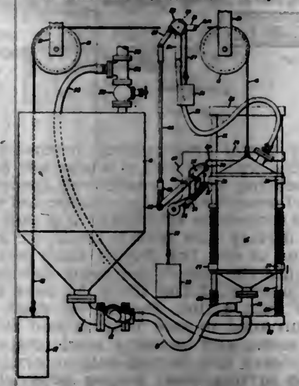
11. A loose leaf binder comprising a back member, a cover connected to the back member, a plurality of leaf-impaling posts, means moved into position by closing of the cover for aligning the adjacent ends of the posts, and means for automatically securing the posts to the back member during the closing of the cover.

2,104,660
OIL AND GAS WELL PROTECTIVE DEVICE
Alfred B. Long and Louis E. Stagg, Jr., Beaumont, Tex.
Application May 10, 1937, Serial No. 141,849
10 Claims. (Cl. 166—15)

1. An oil and gas well protective device comprising the combination with the well "Christmas-tree" having a shut off valve, of means for housing the "Christmas-tree", and means for automatically shutting off the valve upon a predetermined wind velocity or rise in water level.

2,104,661
SAFETY LOCKING AND OPERATING SYSTEM FOR CELL DOORS
Howard P. Manly, Dalton, Ga., assignor to Manly Jail Works, Dalton, Ga., a partnership composed of Frank Manly, Howard P. Manly, and W. Judson Manly
Application March 24, 1937, Serial No. 132,852
14 Claims. (Cl. 189—7)

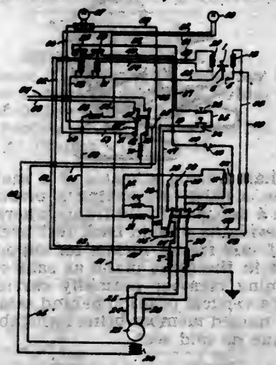
1. In an operating and locking system for a plurality of sliding cell doors having a master door propelling member, selector means for connecting any selected door to be operated by said propelling member; and automatic safety locking means associated with the door carriage operated by said propelling member both during its initial and final opening and closing movements.



2,104,662
CANOPY FOR BROODER STOVES
Ansen J. Meeks and Louie W. Meeks, Hillsdale, Mich.
Application December 5, 1936, Serial No. 114,476
3 Claims. (Cl. 119—33)

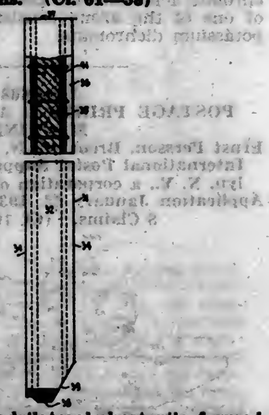
1. A canopy for brooder stoves comprising upper and lower substantially horizontal screen

wire sections disposed in overlapping relationship adjacent to the lower edge of a conventional brooder stove canopy and forming a hover extending several inches therebeyond, supporting legs for certain of the sections, and blankets for covering the sections, each blanket having a hang adapted to hang down over the outer end of the respective section.



2,104,663
APPARATUS FOR PUMPING AND MIXING LIQUIDS
Francis C. Metzger, Cleveland Heights, Ohio, assignor to General Electric Company, a corporation of New York
Application March 16, 1936, Serial No. 68,994
3 Claims. (Cl. 103—243)

1. An apparatus for pumping and mixing liquids comprising a tank having openings at the top and bottom therein, a second tank mounted above and adjacent to the first tank and having top and bottom openings therein, a pipe connecting the bottom openings of said tanks, a two-way valve connected to the top opening in the first tank, to a supply of compressed air and to the atmosphere, means mounted adjacent the first tank operated by the combined weight of said first tank and the liquid therein for turning said valve to one position so that the first tank is opened to the atmosphere and the liquid flows by gravity from the second tank and into the first tank and to a second position so that the compressed air is admitted to said first tank and the liquid is forced out the bottom opening therein, a second pipe connecting the bottom of the first tank and the top of the second tank and a check valve connected in said first pipe for preventing the liquid from returning therethrough to the second tank and for causing the liquid to be forced through said second pipe to said second tank.



2,104,664
SLIP FREQUENCY RELAY
Frank H. Millikan, Mansfield, Ohio, assignor to The Ideal Electric and Manufacturing Company, Mansfield, Ohio, a corporation of Ohio
Application November 15, 1934, Serial No. 753,213
6 Claims. (Cl. 172—239)

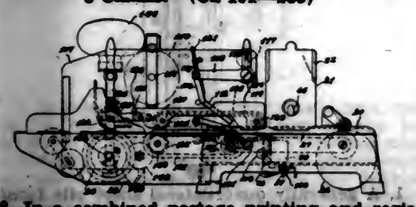
2. In a system for starting synchronous motors having a stator armature and a rotor winding, a main switch for connecting the stator of the motor to a source of alternating current, a remote control for said switch, a switch for connecting the rotor winding to a source of direct current, a relay for controlling the actuation of the direct current connecting switch, said relay comprising a contactor, a spring tending to close said contactor, a rock shaft, means on said rock shaft for engaging said contactor to open the same, an armature on said rock shaft, a first coil for exerting a torque on said armature tending to open said contactor, a second armature

on said rock shaft, a second coil for exerting a torque on said second armature in opposition to the torque exerted by said first coil on the first armature to permit the spring to close said contactor, means connecting the second coil across the source of alternating current, a transformer having its primary connected in series with said stator, and means connecting the secondary of the transformer to the first coil of said relay.

2,104,665
SHEET PILING
Eric O. Molke, Montreal, Quebec, Canada
Application March 7, 1935, Serial No. 9,862
In Canada June 2, 1934
13 Claims. (Cl. 61—53)

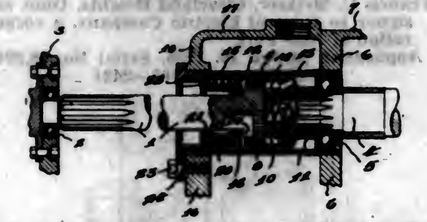
1. A generally quadrilateral sheet pile formed with a longitudinal channel in one of its sides and including means located at intervals in the length of the channel extending from side to side of said channel and outwardly of the bottom thereof, said means being adapted for embedment in a grouting poured in the channel after the pile is driven and interlocking with an adjoining pile whereby said first mentioned pile is held against movement in its longitudinal direction relatively to the adjoining pile.

2,104,666
EASY CHAIR OR THE LIKE CONVERTIBLE INTO COUCH, DIVAN, BED, OR THE LIKE
Sándor Molnár, Budapest, Hungary
Application May 1, 1936, Serial No. 77,440
In Hungary March 3, 1936
5 Claims. (Cl. 155—45)



4. A chair having a seat and a seat supporting frame, a back rest having a pivotal connection with a portion of said frame whereby to permit the swinging of said back rest over and forwardly of said frame, means for supporting said back rest in the same plane as said seat, and a rest forming member normally carried by said frame in a vertical position behind said back rest, said last named member being swingable into the same plane as said seat.

2,104,667
TREATMENT OF RUSTLESS IRON
James N. Ostrofsky, Baltimore, Md., assignor, by mesne assignments, to Rustless Iron and Steel Corporation, Baltimore, Md., a corporation of Delaware
No Drawing. Application April 15, 1933, Serial No. 666,290
5 Claims. (Cl. 148—6.5)

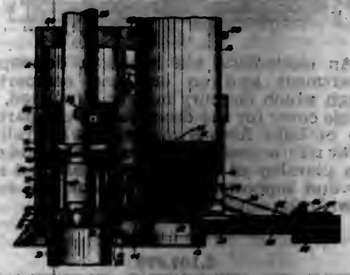


1. The art of passivating rustless iron and steel without etching the surface of the metal, which includes subjecting said iron and steel to the action of a solution of 0.1 per cent to 4.0 per cent of one of the group consisting of nitric and chromic acids and 0.1 per cent to 4.0 per cent of one of the group consisting of sodium and potassium dichromate.

2,104,668
POSTAGE PRINTING AND METERING MACHINE
Ernst Persson, Brooklyn, N. Y., assignor to The International Postal Supply Company, Brooklyn, N. Y., a corporation of New York
Application January 22, 1936, Serial No. 60,493
8 Claims. (Cl. 101—235)

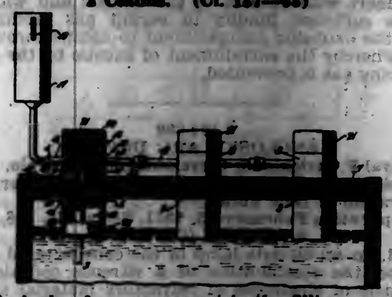
8. In a combined postage printing and registering machine, rotatable printing means, a base therefor, a frame mounted on said base, tape carrying means on said frame, an arm pivoted on said frame, a tape guiding member carried by said arm and comprising a pair of plates, one of said plates being pivotally and yieldably secured to the other of said plates, and cooperating means on the frame and said arm for holding said arm in either of two positions, the arm in one position holding the tape guiding member in spaced relation to said printing means and in another position holding said member in contiguous relation to the printing means whereby the tape carried by said member may be printed.

2,104,669
FLEXIBLE CLUTCH SHAFT CONSTRUCTION FOR AUTOMOTIVE POWER PLANTS
Carl D. Petersen, Toledo, Ohio
Application October 17, 1935, Serial No. 45,463
2 Claims. (Cl. 64—9)



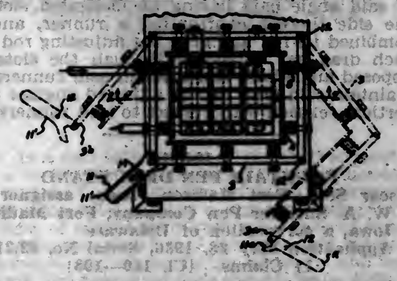
1. In a power transmitting mechanism, the combination with the wall of a gear box having a journal bearing and a second wall spaced apart from the former wall, a sleeve supported between said walls concentric with the axis of said journal bearing, driving and driven shaft sections arranged end to end, the driving shaft section extending into the sleeve and being journalled at one end outside of the sleeve to have a slight universal joint action, the driven shaft section being journalled in said bearing and extending into the sleeve and having a head rotatably fitting the sleeve and formed with internal clutch teeth, the driving shaft having external clutch teeth meshing with the internal clutch teeth, the driving shaft section, which is journalled at one end to have a universal joint action, being supported at its other end solely by the engagement of the external clutch teeth with the internal clutch teeth of the head supported within the sleeve.

2,104,670
DENTAL SYRINGE
Alphonse F. Pieper, Rochester, N. Y.
Application January 17, 1935, Serial No. 2,208
13 Claims. (Cl. 128—257)



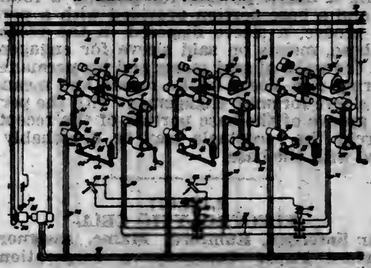
1. A syringe comprising a body portion provided with a valve chamber having fluid inlet and outlet passages, a nozzle connected with said body portion and communicating with said outlet passage, a valve in said chamber for closing said outlet passage including a tapered extension movable within the outlet passage when opening the valve whereby to provide for a gradual increase in the flow of the fluid through the outlet passage to the nozzle, operating means for the valve, and means adjustable on said body portion for cooperation with said operating means to vary the extent of movement of the valve operated thereby whereby to vary the rate of discharge of the fluid to the nozzle under different operating conditions.

2,104,671
CAPPING HEAD FOR APPLYING CLOSURES TO MILK BOTTLES AND THE LIKE
Lee D. Pierce, Fulton, N. Y., assignor to Oswego Falls Corporation, Fulton, N. Y., a corporation of New York
Application October 25, 1935, Serial No. 46,762
9 Claims. (Cl. 226—86)



3. A machine for applying closures to milk bottles and the like comprising a body formed with a passage to receive the upper end of the bottle, a magazine arranged to receive a plurality of paper disks in stack formation, a reciprocating slide member operable to transfer said disks successively from the magazine into said passage with the peripheral margin of the disk overlying the top edge of the bottle, means for pressing said marginal portion of the disk against the top edge of the bottle and during such pressing action to force the central portion of the disk into the mouth of the bottle and subsequently expand that portion of the disk contiguous the central portion into contact with the mouth of the bottle.

2,104,672
AUTOMATIC LIQUID FEED FOR STORAGE BATTERIES
Osborne S. Ralmer, Montgomery, Ala.
Application February 8, 1937, Serial No. 124,758
2 Claims. (Cl. 137—63)



3. A plug for engagement in the filling opening of a battery cell, said plug having a bore, means to supply liquid to said bore, a valve in said bore to govern the flow of liquid therethrough, a float carried by said plug, said plug having spaced openings, arms carried by said float and slidable in said openings, and means operable when one of said arms has reached a predetermined position in its opening to operate said valve.

2,104,673
SHRINK FIXTURE
Oliver O. Rieser, Oak Park, Ill., assignor to The Richardson Company, Lockland, Ohio, a corporation of Ohio
Application September 16, 1935, Serial No. 40,630
15 Claims. (Cl. 18—2)

1. In a shrink fixture, the combination of a cooling mandrel and a resilient jacket encircling the same.

2,104,674
CONTROL SYSTEM
Frederic M. Roberts, Schenectady, and Earl H. Sills, Scotia, N. Y., assignors to General Electric Company, a corporation of New York
Application July 29, 1936, Serial No. 93,244
2 Claims. (Cl. 172—293)

2. A control system for apparatus having a succession of sections each having an element for operating on a moving length of material comprising an individual electric motor for driving each of said sections, an individual speed regulating device for each of said motors, each of said speed regulating devices having a device for varying the speed setting thereof comprising an electrical motion transmitting device, an electrical motion receiving device, and electrical connections between said transmitting and receiving devices, and selector switching mechanism for connecting the transmitting device associated with a selected section of the machine to the receiving devices associated only with the succeeding sections in the direction of travel of said material whereby when the speed of the motor for said selected section is changed the speeds of the succeeding motors in the direction of travel of the material are simultaneously changed.

2,104,675
COMBINED SCRAPER AND GRADER
George Ruff, Kane, Wyo.
Application April 22, 1936, Serial No. 75,803
2 Claims. (Cl. 37—148)

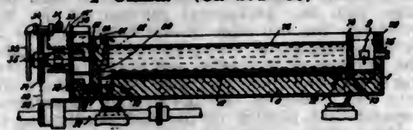
1. A drag comprising a pair of parallel spaced apart runners, a pair of transversely extending parallel drag bars disposed between said runners, angle bars secured to the ends of said bars, each of said angle bars having an elongated slot in the side thereof confronting a runner, and a combined tie rod and drag bar adjusting rod for each drag bar extending through the slots of opposed angle bars and through said runners to maintain said drag bars in adjusted angular and vertical relation with respect to said runners.

2,104,676
FOUNTAIN PEN DESK STAND
Oscar Senf, Fort Madison, Iowa, assignor to W. A. Sheaffer Pen Company, Fort Madison, Iowa, a corporation of Delaware
Application May 28, 1936, Serial No. 82,213
11 Claims. (Cl. 120—108)

1. In a fountain pen desk stand including a base having a recess therein and a receptacle having a barrel portion for holding a fountain pen and a base portion provided with a peripheral groove, a sleeve disposed in the recess of the base, means on said sleeve for engagement with the walls of said recess and for permanently securing said sleeve in the recess, and means on said sleeve for snap engagement with the peripheral groove of the base portion of the receptacle whereby the receptacle may be detachably engaged with the base.

2,104,677
ELECTROLYTIC CELL
Einar Sorensen, Rumford, Maine, assignor to Oxford Paper Company, a corporation of Maine
Application October 1, 1935, Serial No. 43,027
15 Claims. (Cl. 204—58)

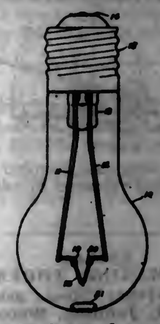
1. An electrolytic cell having a decomposing compartment and an oxidizing compartment through which mercury may be circulated, a mercury pump for lifting the mercury from the oxidizing compartment to the decomposing compartment and a water feeding device discharging into the well of the mercury pump.



5. An electrolytic cell having a decomposing compartment and an oxidizing compartment through which mercury may be circulated and means for causing flow of the mercury through the decomposing compartment in a tortuous path in one undivided continuous stream, the floor of the decomposing compartment being provided with a plurality of drops over which the mercury is caused to flow during its travel in said tortuous path.

2,104,678
ELECTROLYTIC CELL
Einar Sorensen, Rumford, Maine, assignor to Oxford Paper Company, a corporation of Maine
Original application October 1, 1935, Serial No. 43,027. Divided and this application May 23, 1936, Serial No. 81,344
4 Claims. (Cl. 204—58)

1. An electrolytic cell having a decomposing compartment and an oxidising compartment through which mercury may be circulated, a removable cover for the decomposing compartment made of light fibrous material, a plurality of metallic reinforcing bars strengthening said cover, and a plurality of anodes rigidly secured to the cover and supported solely thereby and removable with the cover as a unit.

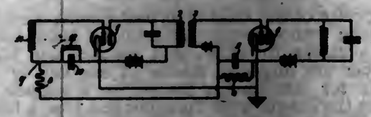


2,104,679
METHOD OF OPERATING ELECTROLYTIC CELLS
Einar Sorensen, Rumford, Maine, assignor to Oxford Paper Company, a corporation of Maine
Application June 23, 1936, Serial No. 86,725
1 Claim. (Cl. 204—58)

The method of operating an electrolytic cell of the type which has a decomposing compartment and an oxidizing compartment through which mercury may be circulated, which comprises producing and maintaining a body of caustic solution in the oxidising compartment, and maintaining on the surface of the caustic solution a layer of hydrocarbon mineral oil which is inert with respect to the caustic and which has sufficient fluidity to permit gas produced in the oxidizing compartment to escape through it whereby the entrainment of caustic by the escaping gas is prevented.

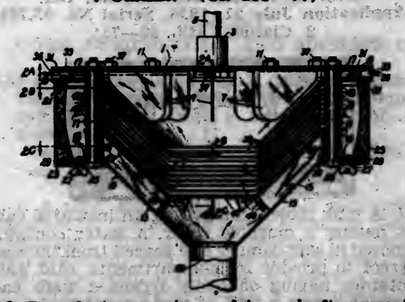
2,104,680
ENCLOSED ARC DEVICE
Royal F. Strickland, Cleveland Heights, Ohio, assignor to General Electric Company, a corporation of New York
Application February 25, 1931, Serial No. 518,146
4 Claims. (Cl. 176—1)

1. In an electric lamp of the concentrated arc type, the combination of a vitreous container, a pair of electrodes of refractory material supported within said container and having leads connected thereto, and a coiled filament, said filament extending out of line with and being in multiple relation to said arc gap and having end portions thereof each extending through



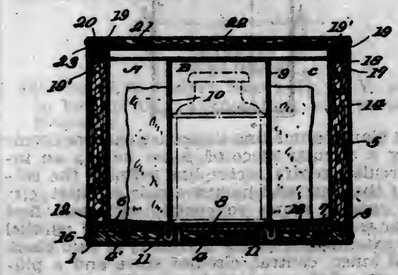
one of said electrodes and connected to the adjacent lead whereby an arc first starts between portions of said filament and then travels to its final position between said electrodes.

2,104,681
METHOD OF IRRADIATION
George C. Supplee, Bainbridge, N. Y., assignor of one-half to The Borden Company, a corporation of New Jersey, and one-half to National Carbon Company, Inc., a corporation of New York
Application September 21, 1933, Serial No. 690,410
13 Claims. (Cl. 99—13)



1. Method for irradiating milk with ultra-violet energy which comprises impinging ultra-violet energy upon the surface of the milk in such a manner that the angles of incidence of most of the rays of energy impinging on the milk are between 30° to 50° from parallel, and none of them impinge normally thereon.

2,104,682
AMPLIFIER CONTROL CIRCUITS
Bernardus Dominicus Hubertus Tellegen, Eindhoven, Netherlands, assignor to Radio Corporation of America, a corporation of Delaware
Application September 24, 1930, Serial No. 484,005
In the Netherlands October 2, 1929
12 Claims. (Cl. 179—171)



1. In combination, a plurality of successive electron discharge tubes, and means associated with the input circuit of a succeeding tube, and connected with the input circuit of a preceding tube to vary the grid voltage of the latter in a negative sense in accordance with grid current variation in the succeeding tube, and means for normally maintaining said preceding tube biased to at least cut-off.

2,104,683
DUST SEPARATOR
Hugo Van Rosen, Newton Center, Mass., and Grover W. Lapp, Le Roy, N. Y.; said Lapp assignor to said Van Rosen, now by judicial change of name Hugo Van Roosen
Application July 6, 1933, Serial No. 679,222
7 Claims. (Cl. 183—77)

6. In a dust separator, a driven shaft supported on a vertical axis, a shrouded impeller mounted on said shaft, said impeller having a downwardly protruding inlet mouth, a separator comprising a series of spaced truncated cones, nested under the inlet mouth of said impeller, for rotation therewith, said cones flaring upwardly and outwardly, the truncated ends thereof being open to form an axial space communicating with said mouth, the bottom cone being closed, and a dust collector casing surrounding said separator and mounted upon the impeller, for rotation therewith.

2,104,684
SANITARY STEEL MILK COOLING CABINET
John E. Wilson, Jr., Smyrna, Del.
Application October 11, 1934, Serial No. 747,862
Renewed March 10, 1937
1 Claim. (Cl. 62—79)

As a new article of manufacture, a milk cooling cabinet comprising an oblong shaped outer container having bottom portions at each end inclined downwardly towards the center and terminating at a central flat portion, an oblong shaped inner container arranged transversely within the outer container on said flat portion, the arrangement forming a water compartment with an ice compartment at each end thereof, the bottom of said inner container having an area equal to the area of the centrally disposed flat portion and said container being constructed to provide vertical walls against which the ice is adapted to be maintained by gravity sliding on the inclined end portions, said water compartment being provided with an overflow adjacent its upper end extending laterally through one wall thereof and communicating with one of the

end compartments, a drain for each of said ice compartments provided with a trap and a cover for closing the outer compartment.

2,104,685
STORAGE MILK COOLER
John E. Wilson, Jr., Smyrna, Del.
Application July 31, 1936, Serial No. 93,703
2 Claims. (Cl. 62—75)

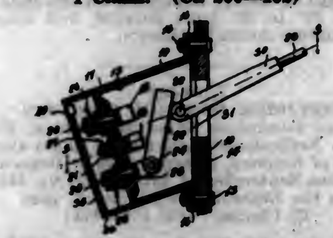
2. A milk cooler, comprising an insulated cabinet having a movable cover, a water container disposed in said cabinet and spaced from the walls thereof to provide ice compartments, said water container having obliquely arranged walls each of which forms a wall of said ice compartments, the bottom of said ice compartments inclined towards the obliquely disposed walls of the water container whereby the ice compartment bottoms and the obliquely disposed water container walls are arranged at substantially right angles to one another for the purpose described, and said water container having an opening adjacent said movable cabinet cover to allow milk containers to be inserted into and removed from said water container.

2,104,686
GARBAGE CAN LINER
Elsie E. Weed, Whittier, Calif.
Application March 16, 1936, Serial No. 69,116
4 Claims. (Cl. 220—65)

1. A blank for making a garbage can liner comprising a circular piece of paper having an inner circular, central, score line defining the bottom of the liner and having a pair of outer, circular, spaced, scores concentric with said first circular score and a plurality of pairs of parallel scores extending from the periphery of said blank to said inner, central, circular score and a plurality of radial scores each extending from the juncture of one of said parallel scores and the circular, central score to the inner one of the pair of outer circular scores and a pair of diverging scores extending outwardly from the intersection of each of said radial scores and said inner one of the pair of outer circular scores.

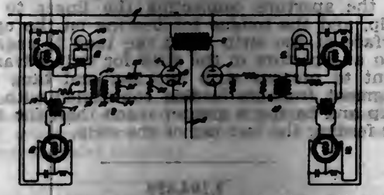
2,104,687
ANIMAL TRAP
Joseph D. Cahn, Lititz, Pa., assignor to Animal Trap Company of America, Lititz, Pa., a corporation of Pennsylvania
Application May 17, 1935, Serial No. 21,934
25 Claims. (Cl. 43—88)

1. In an animal trap having animal restraining means including a movable member, and trigger controlled means for holding it in set position, a yielding retraction element comprising a body of elastic rubber operatively connected with said



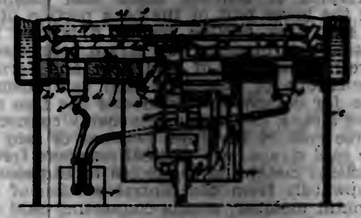
member for returning said member to normal released position when released by said trigger controlled means.

2,104,688
METHOD OF MAKING THREADED TUBES
John A. Adell, Orange, Mass., assignor of one-half to Alvin L. Johnson, Worcester, Mass.
Application October 1, 1934, Serial No. 746,323
3 Claims. (Cl. 29—156)



1. The method of making an internally threaded tube which consists in rolling a blank of steel to the desired shape and simultaneously rolling upon it a thickened portion, cutting the blank to a form in which the thickened portion is shorter than the main portion of the blank, forming the blank into a complete cylinder, welding the two edges of the cylinder together, and providing an internal screw thread in the thickened portion.

2,104,689
AUTOMOBILE SAFETY SWITCH
John Abner Barker, Roseboro, and Robert Lee Dew, Clinton, N. C.
Application August 6, 1936, Serial No. 94,714
1 Claim. (Cl. 200—162)



A device of the class described having a switch provided with a contact and with a blade member, a casing in which said contact and blade member are disposed, means at one end of the casing for attachment thereof to a support to mount the casing with the other end free, a tubular casing of insulation surrounding the first mentioned casing and extending beyond the latter end of the first mentioned casing, a block of insulation carried by the first mentioned casing mounting said contact and blade, a door closing one end of the tubular casing accessible at the free end of the first mentioned casing, lock means normally securing said door closed, said door being on the extended portion of the casing, a support engaged by said means, a sheet of insulation between the said first mentioned casing and support, said sheet and support having slots therein and operating means engaging the blade member and extending through said slots.

2,104,690
ELECTRIC VALVE CIRCUITS
Burnice D. Bedford, Schenectady, N. Y., assignor to General Electric Company, a corporation of New York
Application April 25, 1936, Serial No. 76,450
21 Claims. (Cl. 175—363)

1. In combination, a source of alternating potential, an impedance element, an inductive device having a core member, a unidirectional magnetizing element and a winding connected in series with said impedance element across said source, and means responsive to an electrical condition of said impedance element for supplying a periodic electrical quantity having positive portions of substantially shorter duration than the negative portions.

2,104,691
LIQUID FUEL BURNING APPARATUS
Frank O. Cole, Detroit, Mich., assignor to The Timken-Detroit Axle Company, Detroit, Mich., a corporation of Ohio
Application December 26, 1935, Serial No. 56,283
8 Claims. (Cl. 158—4)

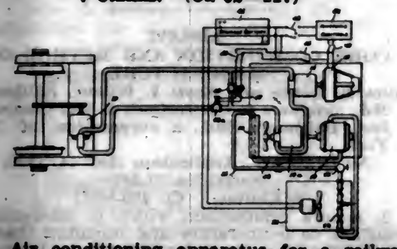
1. In a liquid fuel burning apparatus of the wall flame type, having a substantially horizontal hearth surrounded by a wall to be heated, a substantially endless carbureting member located above the hearth and adjacent said wall, said member having a fuel impact surface facing toward the center of the hearth, a distributor head projecting upwardly through said hearth center and spaced from said carbureting member; said head having means for delivering a disc-like blast of air outwardly along the hearth toward said carbureting member, said head further comprising means for projecting liquid fuel toward said impact wall in unatomized condition from the head, said carbureting member embodying a surface operable to deflect said blast of air into proximity to said impact wall, and an intermixing device mounted in a predetermined position on said carbureting member and operable to intimately intermix oil vapors and air currents rising above said carbureting member, said intermixing device being movable into a second predetermined position on said carbureting member, said intermixing device when in said second position having an inter-mixing power that is considerably different from that when it is disposed in said first-named position.

2,104,692
CORK COMPOSITION AND METHOD OF MANUFACTURE
Giles B. Cooke and Scott I. Wilbur, Baltimore, Md., assignors to Crown Cork & Seal Company, Inc., Baltimore, Md., a corporation of New York
No Drawing. Application May 14, 1935, Serial No. 21,482
9 Claims. (Cl. 106—22)

1. A cork composition which is substantially resistant to temperature and humidity changes comprising cork granules present in predominating amount, and a binder therefor comprising a synthetic resin, a glutinous adhesive, a polyhydric alcohol plasticizer which is hygroscopic, and a fatty drying oil in gelled condition, said gelled oil being formed by first reacting the said ungelled oil with an organic amine and then reacting this product in the presence of heat with a polycarboxylic acid anhydride.

2,104,693
WELDROD
Anthony G. de Golyer, New York, N. Y., assignor to Vulcan Alloy Corporation, a corporation of Delaware
No Drawing. Application August 17, 1936, Serial No. 96,463
1 Claim. (Cl. 219—8)

A weld rod comprising a metallic composition containing manganese 1% to 6%, boron 0.50% to 2.25%, carbon 0.10% to 0.60%, silicon not exceeding a maximum of 0.70%, and the remainder substantially iron.



2,104,694
WELDROD
Anthony G. de Golyer, New York, N. Y., assignor to Vulcan Alloy Corporation, a corporation of Delaware
No Drawing. Application March 12, 1937, Serial No. 130,494
1 Claim. (Cl. 219—8)

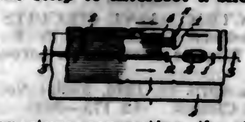
A weld rod comprising a metallic composition containing manganese 1% to 6%, boron 0.25% to 2.50%, nickel 0.50% to 5%, carbon up to a maximum of 0.60% and the balance substantially iron.

2,104,695
MANUFACTURE OF HALOGENATED DERIVATIVES OF METHANE
Wilfrid Wilson Groave, Widnes, England, assignor to Imperial Chemical Industries Limited, a corporation of Great Britain
No Drawing. Application October 6, 1936, Serial No. 104,333. In Great Britain October 8, 1935
19 Claims. (Cl. 260—166)

1. The process of preparing completely halogenated fluoromethanes containing halogen other than fluorine which comprises passing a gaseous mixture of carbon disulphide, hydrogen fluoride, and a halogen other than fluorine over a halide of a metal of the group consisting of iron, cobalt, nickel, copper, barium, strontium, chromium and zinc.

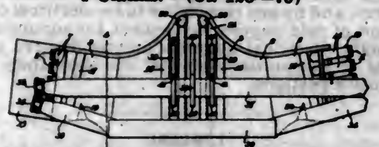
2,104,696
REFRIGERATION DRIVE
Milton E. Hansen, Collingswood, N. J., assignor to B. F. Sturtevant Company, Inc., Hyde Park, Boston, Mass.
Application February 26, 1935, Serial No. 8,261
7 Claims. (Cl. 62—117)

1. Air conditioning apparatus for a railway passenger car, comprising an air conditioning compartment, air cooling means in said compartment, a fan for passing the air to be conditioned through said compartment and for discharging it into the passenger space, an electric motor for driving said fan, a refrigerant compressor for providing a cooling effect for said means, an electric generator for supplying current to said motor, hydraulic means for driving said compressor and generator, and a hydraulic pump driven through the movement of said car for energizing said hydraulic means.



2,104,697
ELECTRIC LAMP
Ernst E. W. Kassner, London, England, assignor to Universal Inventions Limited, London, England, a British company
Application July 8, 1936, Serial No. 89,489
In Germany July 9, 1935
7 Claims. (Cl. 176—122)

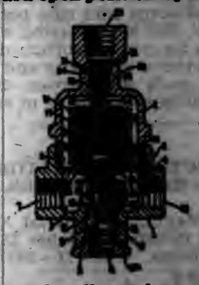
1. An electric lamp comprising a double-walled vessel, two electrodes arranged in said vessel, said vessel being shaped so as to form a restricted discharge path between said electrodes, a gaseous body in said vessel, the pressure of said body being chosen so as to set up electrical ultra-short oscillations in said body whenever a discharge between said electrodes is started, a resonant system arranged in the central portion of said double-walled vessel and tuned to the frequency of the ultra-short oscillations set up in said body, means for coupling said system to said body and means for superimposing the oscillations excited in said system on the discharge started between said electrodes.



2,104,698
PRICE TAG
Frederick Kohnle, Dayton, Ohio, assignor to The Monarch Marking System Company, Dayton, Ohio, a corporation of Ohio
Application October 29, 1934, Serial No. 750,435
Renewed October 5, 1937
2 Claims. (Cl. 271—2.5)

1. A device for feeding a tag strip, the strip having spaced apertures relatively in alignment longitudinally of the strip, comprising a table for sustaining the strip, a finger sustained over the table and reciprocable longitudinally of the strip having its forward end bifurcated, providing a tang and a tongue relatively adjacently disposed, the tang for engagement into an aperture of the strip to intersect a shoulder formed

by the aperture connecting the finger to the strip, and the tongue for bearing on the upper surface of the strip when the tang is engaged into an aperture in the strip for strip advancement to prevent strip buckling and tang dislodgment from its feeding connection with the strip and having a greater reach than the tang for feeding the last tag of the strip.

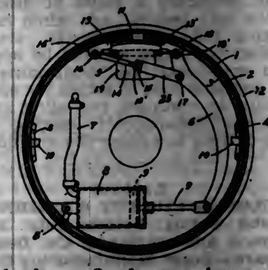


2,104,699
SURGICAL APPLIANCE
Leonard R. O'Dell, Adams Center, N. Y., assignor to N. Avery Jenkins, Adams Center, N. Y.
Application August 3, 1936, Serial No. 93,951
4 Claims. (Cl. 128—78)

4. In a surgical appliance, the combination of a wide body belt comprising a centrally disposed back portion and two front portions joined to the respective ends of the back portion and forming continuations thereof, a horizontal member formed of resilient metal and extending along the lower part of the back portion of the belt, said back portion having a bottom hem enclosing said member, two straps connected to the respective ends of said hem and forming continuations of said hem and said member, means for detachably connecting the free ends of said straps, means for detachably connecting the free ends of the front portions of said belt above said straps, two vertical members formed of resilient metal and connected to and extending upwardly from the central portion of said horizontal member, means connecting said vertical members to the back portion of the belt above said hem, the last named means maintaining the vertical members in lateral spaced relation, a pressure belt outwardly of said vertical members and the body belt and narrower than the latter and provided with front portions having means for detachably connecting them, and means to retain the pressure belt in spaced relation to the ends of the vertical members.

2,104,700
PRESSURE REGULATING DEVICE
Philip S. Russel, Detroit, Mich., assignor to Detroit Lubricator Company, Detroit, Mich., a corporation of Michigan
Application April 5, 1937, Serial No. 135,045
10 Claims. (Cl. 137—153)

1. In a fluid pressure regulating device, a casing having an inlet and a pair of outlets, a valve member controlling flow from each of said outlets, a hollow body member in said casing and having movable end walls operatively engaging said valve members, said valve members being movable toward open position upon inward move-

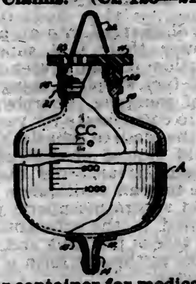


ment of said end walls, and means to cause inward movement of one of said walls prior to such inward movement of the other of said walls as will open its valve member.

2,104,701
PROCESS OF MAKING VANILLIN
Lloyd T. Sandborn, Wausau, Wis., assignor to Marathon Paper Mills Company, Rothschild, Wis., a corporation of Wisconsin, and Guy C. Howard Company, Rothschild, Wis., a corporation of Washington, jointly
No Drawing. Application March 1, 1937, Serial No. 128,553
16 Claims. (Cl. 260—137)

1. A process for making vanillin which comprises cooking under pressure with water and an alkali-metal hydroxide, a material selected from the group consisting of ligno-cellulose, crude lignin extract, and a lignin-sulfonic acid compound to produce an alkaline vanillin-containing liquor, extracting vanillin from said liquor with a substantially water-immiscible alcohol, separating the alcohol from the said liquor, recovering crude vanillin from said alcohol and treating said crude vanillin to secure pure vanillin.

2,104,702
BRAKE MECHANISM
Charles O. Bowers and Andrew C. Williams, Lansing, Mich., assignors of one-third to Samuel H. Davis, Lansing, Mich.
Application December 21, 1936, Serial No. 117,090
6 Claims. (Cl. 188—78)

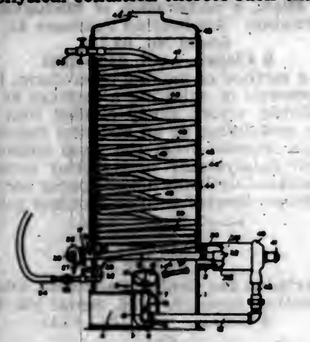


1. In a brake, a fixed support, an anchor on said support, a rotatable brake drum associated with said support, a floating circular friction band mounted on said support and having separable adjacent ends, power actuating means carried by said friction band and positioned substantially diametrically opposite said separable ends, a relatively long lever extending across said drum and pivoted at one end to said band adjacent one end thereof and pivoted at its other end to said actuating means, a sleeve pivoted to said lever adjacent the connection thereof to said band, and a member telescopically engaging said sleeve and pivoted to the other end of said band.

2,104,703
METHOD FOR THE MANUFACTURE OF CHLOROFORM
Gerald H. Coleman, Bartholdt C. Hadler, and Edward C. Zuckermandel, Midland, Mich., assignors to The Dow Chemical Company, Midland, Mich., a corporation of Michigan
No Drawing. Application February 13, 1936, Serial No. 63,734
9 Claims. (Cl. 260—165)

9. In a method of making chloroform, the step which consists in agitating a mixture of carbon tetrachloride, water, finely divided iron, and a catalyst containing, as an essential ingredient, a substance selected from the class consisting of lead and catalytically active lead compounds, copper and catalytically active copper compounds and mixtures thereof with ammonium salts.

2,104,704
FLASK
Christian Lee Graber, Lakewood, Ohio
Application June 20, 1936, Serial No. 86,378
4 Claims. (Cl. 128—214)



4. A flask or container for medical solution used in intravenous therapy, comprising a transparent body portion, a reduced extension or neck at the lower end of said body portion adapted to have a rubber tube or the like attached thereto, and an elastic cap-like member positioned over said extension or neck, said elastic cap-like member having an annular flange about the open end thereof adapted to engage the body portion of said flask adjacent said reduced extension or neck and adapted to be grasped so that the closure member can be removed from said extension or neck by having at least a portion thereof rolled or pulled back over itself without the operator coming in contact with said extension or neck.

2,104,705
APPARATUS AND METHOD FOR TREATMENT OF LIQUIDS
Walter B. Kerrick, Los Angeles, Calif., assignor, by mesne assignments, to Clayton Manufacturing Company, Alhambra, Calif., a corporation of California
Continuation of application Serial No. 495,636, November 14, 1930. This application October 9, 1934, Serial No. 747,654
13 Claims. (Cl. 299—84)

10. The method of forming a heated spray of constant character containing water vapor and

at least one other material, which comprises, producing a mixture of water and at least one other material by adding one material to the other, pumping said mixture in the form of a stream under superatmospheric pressure and at a substantially constant uniform predetermined rate through an elongated heating zone, said pressure being sufficiently high to overcome any frictional resistance to the flow of said stream and to impart thereto a velocity sufficient to maintain one of said materials dispersed in the other during flow through said elongated heating zone, supplying fuel for progressively heating said stream during said flow to impart a desired predetermined physical condition thereto such that when

the mixture is discharged into an atmosphere at a pressure lower than said superatmospheric pressure a portion of said water will vaporize, the volume of fuel supplied being independent of said rate of pumping, whereby said volume may be varied to compensate for variations in the stream from the desired physical condition to thus obtain said desired predetermined physical condition of said stream, and discharging the heated mixture into an atmosphere at a pressure lower than said superatmospheric pressure at a rate so correlated to the substantially constant predetermined rate of pumping and desired physical condition as to thereby form a spray of said constant character.

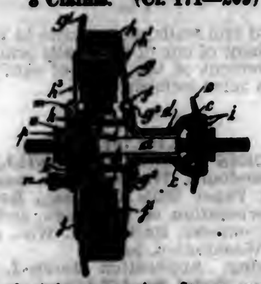
2,104,706

FUEL DISTRIBUTING APPARATUS

Nathan M. Lewer, Tuckahoe, N. Y., assignor, by mesne assignments, to The Standard Stoker Company, Inc., (1922), New York, N. Y., a corporation of Delaware

Original application February 13, 1929, Serial No. 339,544. Divided and this application December 20, 1932, Serial No. 703,197

16 Claims. (Cl. 110—101)



10. In combination, a stoker conduit, a chambered jet member at the delivery end of said conduit including an upstanding wall extending transversely thereof and having a central portion and side portions facing outwardly and disposed angularly with respect to the central portion, a distributor plate extending forwardly from said jet member, said plate having a substantially horizontally disposed central portion immediately forward of the central portion of said upstanding wall and downwardly sloping side portions adjacent said side portions of the upstanding wall, the latter having a plurality of jet openings in its central portion directed over the central portion of said plate and at least one jet opening in each side portion directed over a respective sloping side portion of said plate.

2,104,707

ELECTRIC GENERATOR

George William Rawlings, Park Hill, Kenilworth, England

Application May 1, 1937, Serial No. 140,161
In Great Britain November 26, 1935
8 Claims. (Cl. 171—209)

1. An electric generator for a cycle comprising an annular member fixed to the cycle wheel hub and having a plurality of inwardly directed permanently magnetised poles and a wound multi-polar armature within the annular member and fixed to the cycle wheel spindle.

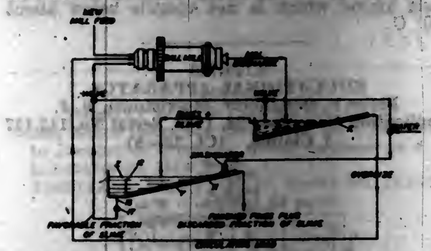
2,104,708

METHOD OF FORMING DIAMOND TOOLS

Rutherford H. Taylor, Millburn, N. J., assignor to J. K. Smit & Sons, Inc., New York, N. Y., a corporation of New York

Application December 14, 1936, Serial No. 115,735
1 Claim. (Cl. 76—101)

The method of forming a diamond tool which consists in providing a series of disks of hard alloy which will become soft when heated, the disks having holes therethrough, stacking the disks so that the holes will not be opposite and will form cells each cell containing a single diamond, applying heat to soften the alloy, applying pressure to compact the alloy around the diamonds, and subsequently cutting away one end of the setting to expose the end diamonds.



2,104,709

CLOSED CIRCUIT GRINDING

Arthur John Weinig, Golden, Colo., assignor to The Mine & Smelter Supply Co., Denver, Colo., The Stearns-Roger Manufacturing Co., Denver, Colo., and The Dorr Company, Inc., New York, N. Y.

Application April 9, 1932, Serial No. 604,151
Renewed July 18, 1936
12 Claims. (Cl. 83—94)

1. The process of closed circuit grinding wherein a mill is used comprising adding to the mill feed slime having therein a preponderance in number of solids whose size is less than that

of a suspensoid, and rejecting from the circuit slimes having therein larger sized solids.

2,104,710

PROCESS FOR THE PRESERVATION OF LIQUIDS

Frederick C. Blanck, Washington, D. C., Theodore L. Swenson, Chevy Chase, Md., Hugh H. Mottern, Pullman, Wash., and Harry E. Gerseline, Silver Spring, and Elmathan K. Nelson, Silge Park Hills, Md., dedicated to the free use of the People of the United States of America

No Drawing. Application May 19, 1937, Serial No. 143,538
2 Claims. (Cl. 99—155)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. The process of preserving liquids subject to deterioration by gas and bacterial spoilage, which comprises reducing the liquids to a thin film, subjecting said thin film to a vacuum and for a length of time, sufficient to remove a substantial amount of any gas present, and immediately reducing the liquid to a continuously moving thin ribbon, bringing the liquid in ribbon form to a pasteurizing temperature within a period of 6 to 8 seconds, immediately cooling the liquid to 170° to 180° F., filling into containers at this temperature, sealing said containers and immediately cooling.

2,104,711

REFRIGERATING APPARATUS

Philip M. Bratton, Fort Worth, Tex., assignor to General Motors Corporation, Dayton, Ohio, a corporation of Delaware

Application March 17, 1936, Serial No. 69,352
2 Claims. (Cl. 211—153)

1. A shelf adapted to be supported in a food storage compartment of a refrigerator cabinet comprising, a rim member, a plurality of spaced apart members disposed in the same plane and extending from one side to the opposite side of said rim member to form a substantially flat food supporting surface for said shelf, certain of said spaced apart members being bent downwardly of certain other of said members adjacent said rim member and forming a pocket for the reception of a temperature indicating means below said food supporting surface, and the certain other of said members adjacent said pocket forming stop means for preventing movement of the temperature indicating means adapted to be positioned in said pocket.

2,104,713

FEEDING MECHANISM FOR ROCK DRILLS

John C. Curtis, Garfield Heights, Ohio, assignor to The Cleveland Rock Drill Company, Cleveland, Ohio, a corporation of Ohio

Application August 12, 1935, Serial No. 35,717
30 Claims. (Cl. 121—9)

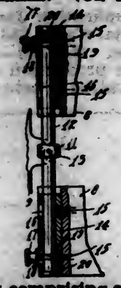
1. In a feeding device for a rock drill, the combination with a support and a drilling motor slidable thereon, a feeding mechanism associated with said motor for imparting forward and backward feeding motion thereto, said mechanism comprising a duality of tooth elements longitudinally of the support, a member carried by said motor capable of operative engagement with the teeth of one or the other of said elements, power actuated means associated with said member for imparting movement thereto relative to said motor, and operable means for selectively moving said member in operative engagement with the teeth of one or the other of said elements for causing forward or backward feeding motion of said motor due to the movement of said member relative to said motor.

2,104,712

METHOD OF MAKING A COILED METALLIC STRAND

John W. Gottschalk and Sylvester W. Grater, Philadelphia, Pa.; said Grater assignor to said Gottschalk, Annie Gottschalk administratrix of said John W. Gottschalk, deceased

Application September 6, 1935, Serial No. 39,473
12 Claims. (Cl. 140—71)



1. The method of forming a metallic abrading strand, which consists in subjecting the strand to a forming operation to provide at least two abrading edges, subjecting a metallic strand while under tension to a coiling operation to impart to it an inherent tendency to form a helical coil, and subjecting the strand while under tension to a deforming operation to increase the abrading surfaces of the strand.

2,104,714

TOILET SEAT

Francis J. Meere, Minneapolis, Minn.

Application August 12, 1936, Serial No. 95,900
8 Claims. (Cl. 4—249)

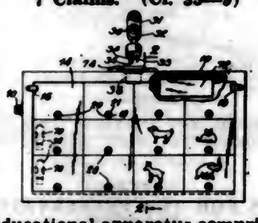
1. A toilet seat comprising an anchoring bracket, a hinge-rod rigidly secured to and projecting

transversely in opposite directions therefrom, seat sections having grooved ends, sleeves seated in said grooves and rigidly secured to the respective seat sections, said sleeves being telescoped onto the ends of said hinge-rod for pivotal and sliding movements thereon.

2,104,715
DENTAL X-RAY FILM PACKAGE
Jacob A. Saffir, Rockford, Ill., assignor to Jacob William Frankel, Chicago, Ill.
Application August 14, 1936, Serial No. 95,965
7 Claims. (Cl. 250—34)

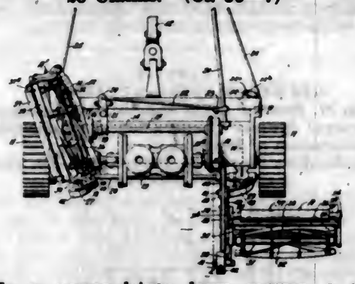
1. An X-ray film package comprising at least two superimposed upwrapped X-ray sensitive films with X-ray opaque material between them, and a light-opaque X-ray-transparent enclosure for the films.

2,104,716
METHOD OF AND APPARATUS FOR PHOTOGRAPHICALLY RECORDING SOUND WAVES
Joseph Underhill, Finchley, London, England
Application June 28, 1935, Serial No. 28,869
In Great Britain July 11, 1934
11 Claims. (Cl. 179—100.3)



1. The method of recording sound comprising the steps of directing a beam of light on a sound-track area, dividing said beam into two similar parts, moving the inner boundaries of said parts in accordance with one characteristic of the sound to be recorded, and moving the outer boundaries of said parts in accordance with a different characteristic of the sound to be recorded.

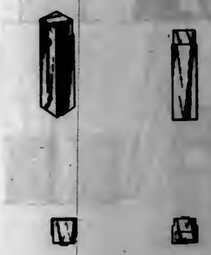
2,104,717
PRODUCTION OF OLEFINE ETHERS
Henry C. Chitwood and Granville A. Perkins, Charleston, W. Va., assignors to Carbide and Carbon Chemicals Corporation, a corporation of New York
No Drawing. Application January 7, 1936, Serial No. 57,886
7 Claims. (Cl. 260—151)



1. Process for the production of olefine ethers which comprises treating a beta-chlorinated aliphatic ether with a strong alkali in the presence of a catalyst essentially composed of a strongly basic amine which is not volatile below about 150° C.

2,104,718
EDUCATIONAL APPARATUS
Pryor E. Dougherty, Morristown, N. J.
Application November 28, 1936, Serial No. 113,127
7 Claims. (Cl. 35—9)

1. An educational apparatus comprising means for supporting a card, said card bearing educational matter in separate sections thereof, a pair of signal devices, manually operable control means adjacent each of said sections, means normally arranged to actuate one of said signals in response to the operation of each control means, and selector means settable at will to cause the operation of the other signal instead of that first mentioned when the selected control means is operated.



2,104,719
POWER LAWN MOWER WITH SIDE CUTTER UNITS
John B. Pol, La Porte, Ind., and William F. Krenske, Racine, Wis., assignors to Jacobsen Manufacturing Company, Racine, Wis., a corporation of Wisconsin
Application March 12, 1936, Serial No. 68,364
28 Claims. (Cl. 56—7)

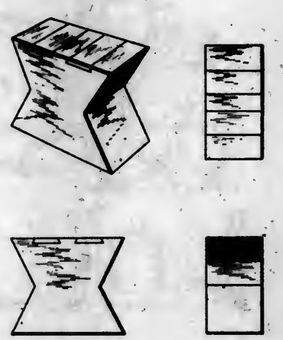
1. In a power-driven lawn mower, a main frame, an engine thereon, a main cutter rotatably carried thereby, a side cutter unit pivotally carried by the main frame, and means for selectively driving the side cutter from the engine while the mower is in motion.

DESIGNS
JANUARY 4, 1938

107,738
DESIGN FOR A COSMETIC CASE
Adam Baker Barnhart, New York, N. Y., assignor to Jacqueline Cochran, doing business as J. C. Laboratories, Roselle, N. J.
Application August 9, 1937, Serial No. 70,949
Term of patent 14 years

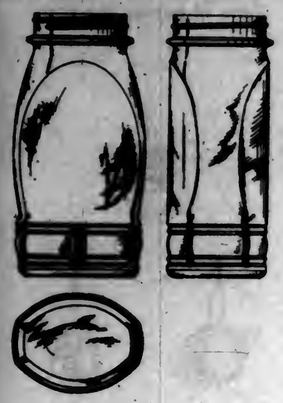
The ornamental design for a cosmetic case as shown.

107,739
DESIGN FOR A STEMMED GOBLET OR SIMILAR ARTICLE
Elmer Bell, Mt. Pleasant, Pa., assignor to Bryce Brothers Company, Mt. Pleasant, Pa., a corporation of Pennsylvania
Application November 20, 1937, Serial No. 73,052
Term of patent 14 years



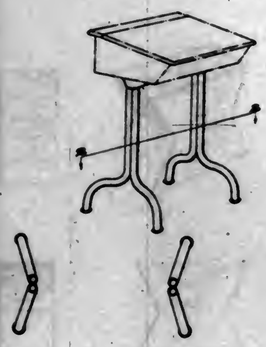
The ornamental design for a stemmed goblet or similar article substantially as shown and described.

107,740
DESIGN FOR A BADGE
Adoree E. Berry, Oakland, Calif.
Application May 29, 1937, Serial No. 69,621
Term of patent 3½ years



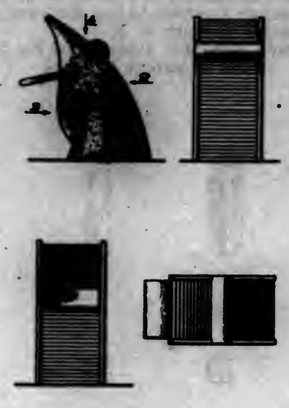
The ornamental design for a badge substantially as shown.

107,741
DESIGN FOR A COMBINATION SALT AND PEPPER SHAKER
James Bissell, Baltimore, Md.
Application November 12, 1937, Serial No. 72,824
Term of patent 14 years



The ornamental design for a combination salt and pepper shaker, as shown.

107,742
DESIGN FOR A JAR
Darrell E. Briner, Winchester, Ind., assignor to Ohean Glass Company, Ohean, N. Y., a corporation of New York
Application November 18, 1937, Serial No. 72,987
Term of patent 7 years

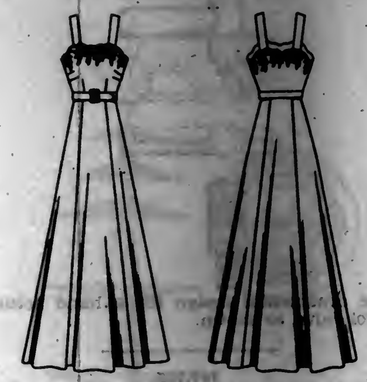


The ornamental design for a jar as shown.

107,743
DESIGN FOR A DESK OR SIMILAR ARTICLE
Herman E. Buchholz, Cambridge, Mass., assignor to Heywood-Wakefield Company, Gardner, Mass., a corporation of Massachusetts
Application March 4, 1937, Serial No. 63,002
Term of patent 3½ years

The ornamental design for a desk or similar article, as shown and described.

107,744
DESIGN FOR A GAME DEVICE
Lorenzo E. Centerbar, Natick, Mass.
Application October 25, 1937, Serial No. 72,412
Term of patent 14 years

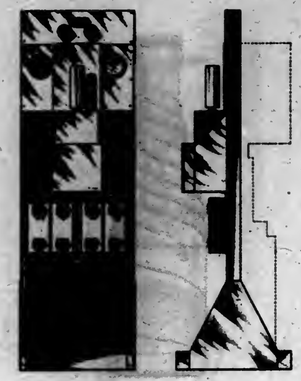


The ornamental design for a game device as shown.

107,745
DESIGN FOR A PENCIL TIP
Isidor Chanler, Oceanport, N. J., assignor to Eagle Pencil Company, New York, N. Y., a corporation of Delaware
Application October 30, 1937, Serial No. 72,532
Term of patent 14 years

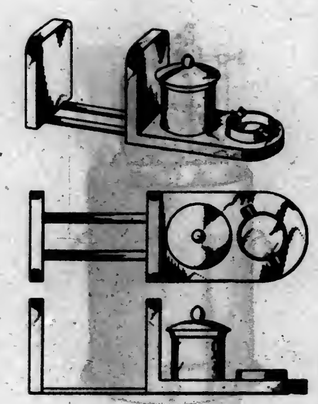
The ornamental design for a pencil tip substantially as shown.

107,746
DESIGN FOR A DRESS
Sylvia Connolly, New York, N. Y.
Application November 27, 1937, Serial No. 73,322
Term of patent 3½ years



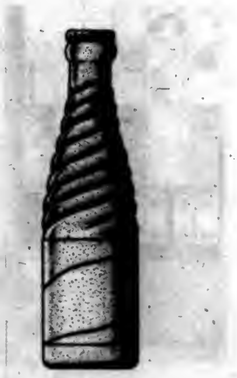
The ornamental design for a dress, substantially as shown, and described.

107,747
DESIGN FOR AN AIR CONDITIONING CABINET
Arthur W. Conley, Shaker Heights, Ohio
Application March 16, 1936, Serial No. 61,647
Term of patent 7 years



The ornamental design for an air conditioning cabinet substantially as shown.

107,748
DESIGN FOR A TELEPHOTO RECORDER
Austin G. Cooley, Rutherford, N. J.
Application June 10, 1937, Serial No. 69,780
Term of patent 14 years

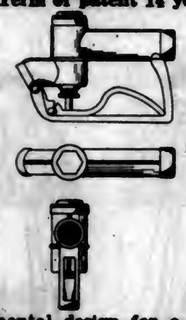


The ornamental design for a telephoto recorder substantially as shown.

107,749
DESIGN FOR A COMBINATION BOOKEND, HUMIDOR, AND ASHTRAY
Hamilton O. Cornwall, New York, N. Y.
Application August 31, 1937, Serial No. 71,403
Term of patent 3½ years

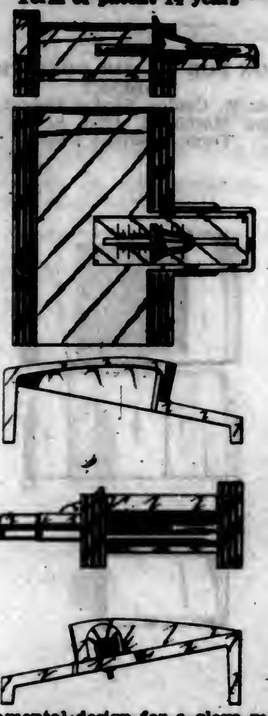
The ornamental design for a combination bookend, humidor, and ashtray, as shown.

107,750
DESIGN FOR A BOTTLE
Salvator D'Addario, New York, N. Y., assignor to Krueger Beverage Company, Newark, N. J., a corporation of New Jersey
Application October 12, 1937, Serial No. 72,134
Term of patent 14 years



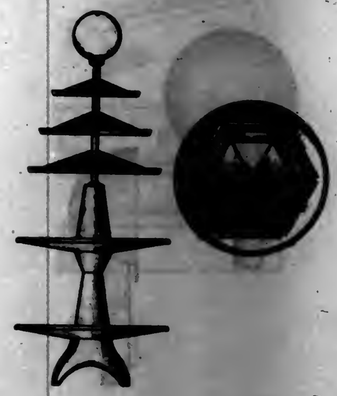
The ornamental design for a bottle as shown and described.

107,751
DESIGN FOR AN ACETYLENE GENERATOR
Maurice P. De Motte, Indianapolis, Ind., assignor to The Prest-O-Lite Company, Inc., a corporation of New York
Application April 24, 1937, Serial No. 68,960
Term of patent 14 years



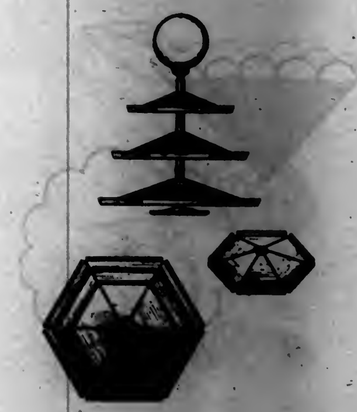
The ornamental design for an acetylene generator, substantially as shown and described.

107,752
DESIGN FOR A HAND ACTUATED CONTROL VALVE
Chesley Dean, Hamilton County, Ohio, assignor to The Wm. Powell Company, Cincinnati, Ohio, a corporation of Ohio
Application October 29, 1937, Serial No. 72,521
Term of patent 14 years



The ornamental design for a hand actuated control valve, as shown.

107,753
DESIGN FOR A GLOVE MEASURING DEVICE
Robert M. Eisendrath, Chicago, Ill., assignor to The Eisendrath Glove Company, Chicago, Ill., a corporation of Illinois
Application November 10, 1937, Serial No. 72,764
Term of patent 14 years

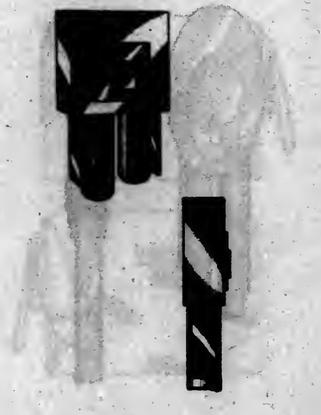


The ornamental design for a glove measuring device, as shown.

107,754
DESIGN FOR A DISPLAY RACK FOR BREAD, PASTRY, OR THE LIKE
Ernest R. Erickson, Des Moines, Iowa, assignor to C. E. Erickson Company, Inc., Des Moines, Iowa, a corporation of Iowa
Application October 18, 1937, Serial No. 72,278
Term of patent 7 years

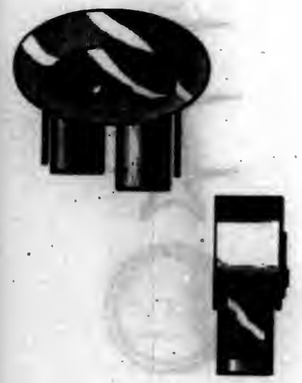
The ornamental design for a display rack for bread, pastry, or the like substantially as shown.

107,755
DESIGN FOR A DISPLAY RACK FOR PASTRIES OR THE LIKE
Ernest R. Erickson, Des Moines, Iowa, assignor to C. E. Erickson Company, Inc., Des Moines, Iowa, a corporation of Iowa
Application October 18, 1937, Serial No. 72,279
Term of patent 7 years



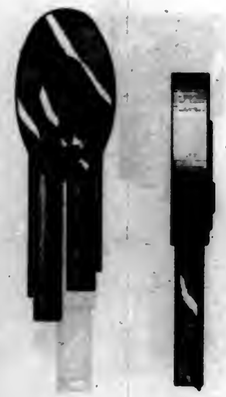
The ornamental design for a display rack for pastries or the like substantially as shown.

107,756
DESIGN FOR A DISPLAY RACK FOR BOTTLED BEVERAGES OR THE LIKE
Ernest R. Erickson, Des Moines, Iowa, assignor to C. E. Erickson Company, Inc., Des Moines, Iowa, a corporation of Iowa
Application October 18, 1937, Serial No. 72,280
Term of patent 7 years



The ornamental design for a display rack for bottled beverages or the like substantially as shown.

107,757
DESIGN FOR A MUSICAL CHIME
Evan G. Evans, Cincinnati, Ohio, assignor to Nu-tone Chimes Inc., New York, N. Y., a corporation of New York
Application October 7, 1937, Serial No. 72,044
Term of patent 3½ years

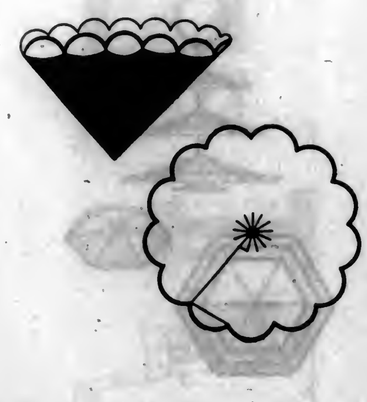


The ornamental design for a musical chime as shown.

107,758
DESIGN FOR A MUSICAL CHIME
Evan G. Evans, Cincinnati, Ohio, assignor to Nutone Chimes Inc., New York, N. Y., a corporation of New York
Application October 7, 1937, Serial No. 72,645
Term of patent 3½ years

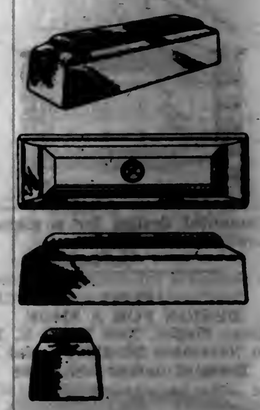
The ornamental design for a musical chime as shown.

107,759
DESIGN FOR A MUSICAL CHIME
Evan G. Evans, Cincinnati, Ohio, assignor to Nutone Chimes Inc., New York, N. Y., a corporation of New York
Application October 7, 1937, Serial No. 72,646
Term of patent 3½ years



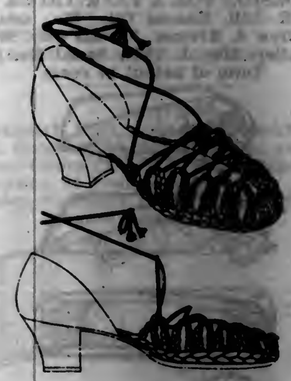
The ornamental design for a musical chime as shown.

107,760
DESIGN FOR A MUSICAL CHIME
Evan G. Evans, Cincinnati, Ohio, assignor to Nutone Chimes Inc., New York, N. Y., a corporation of New York
Application October 7, 1937, Serial No. 72,647
Term of patent 3½ years



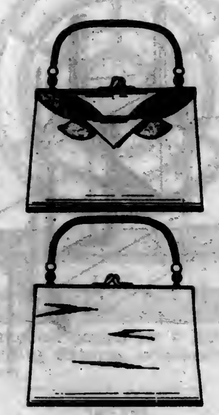
The ornamental design for a musical chime as shown.

107,761
DESIGN FOR A DRIP CATCHER FOR ICE CREAM CONES AND THE LIKE
William George Fair, Hyannis, Mass.
Application August 3, 1937, Serial No. 70,823
Term of patent 14 years



The ornamental design for a drip catcher for ice cream cones and the like as shown.

107,762
DESIGN FOR A RUBBING BLOCK
Lucchesi J. Feild, Detroit, Mich.
Application October 19, 1937, Serial No. 72,313
Term of patent 14 years

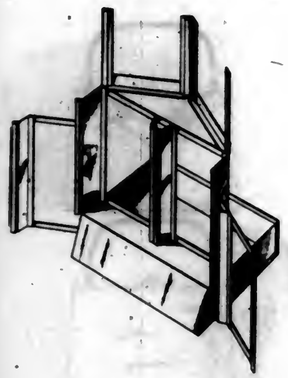


The ornamental design for a rubbing block as shown.

107,763
DESIGN FOR A SHOE OR SIMILAR ARTICLE
Bernard Feldman, Newton Center, Mass., assignor to Banner Shoemakers, Inc., Dover, N. H., a corporation of Massachusetts
Application December 15, 1936, Serial No. 66,528
Term of patent 3½ years

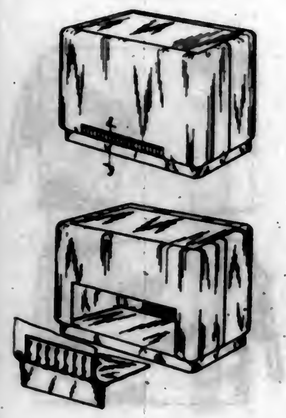
The ornamental design for a shoe or similar article substantially as shown.

107,764
DESIGN FOR A HANDBAG
Henri Felmann, Chicago, Ill.
Application November 16, 1937, Serial No. 72,919
Term of patent 3½ years



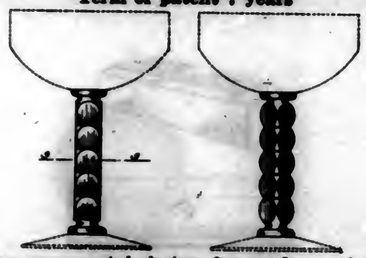
The ornamental design for a handbag, substantially as shown and described.

107,765
DESIGN FOR A HANDBAG
Henri Felmann, Chicago, Ill.
Application November 20, 1937, Serial No. 73,041
Term of patent 3½ years



The ornamental design for a handbag, substantially as shown and described.

107,766
DESIGN FOR A DISPLAY STAND
Charles H. Foster, New York, N. Y.
Application November 6, 1937, Serial No. 72,640
Term of patent 7 years

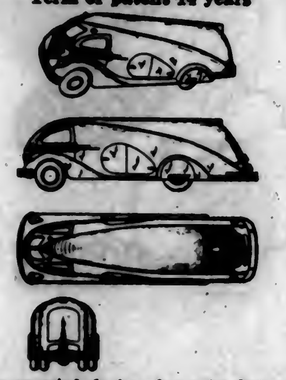


The ornamental design for a display stand, as shown.

107,767
DESIGN FOR A REFRIGERATOR CABINET
Chester A. Frick, Muncie, Ind., assignor to Glascock Brothers Mfg. Co., Muncie, Ind., a corporation of Indiana
Application March 31, 1937, Serial No. 68,495
Term of patent 7 years

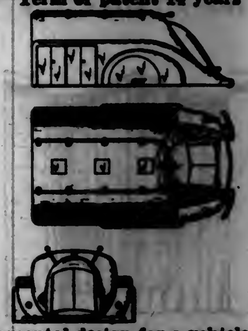
The ornamental design for a refrigerator cabinet, as shown.

107,768
DESIGN FOR A GLASS
Edwin W. Fuerst, Toledo, Ohio, assignor to Libbey Glass Company, Toledo, Ohio, a corporation of Ohio
Application November 30, 1937, Serial No. 73,257
Term of patent 7 years



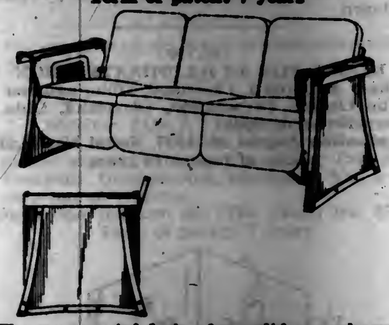
The ornamental design for a glass substantially as shown and described.

107,769
DESIGN FOR A SHOE
Harry Geller, New York, N. Y.
Application November 26, 1937, Serial No. 73,200
Term of patent 3½ years



The ornamental design for a shoe, as shown.

107,770
DESIGN FOR A TANK TRUCK
Edward H. Gill, Kansas City, Mo., assignor to Andrew A. Kramer, Kansas City, Mo.
Application May 1, 1937, Serial No. 69,099
Term of patent 14 years



The ornamental design for a tank truck, substantially as shown.

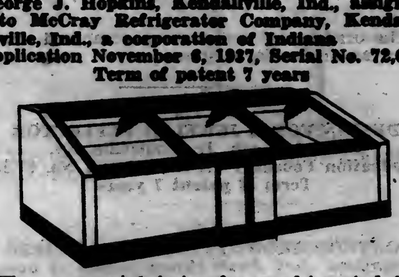
107,771
DESIGN FOR A VEHICLE TANK BODY
Edward H. Gill, Kansas City, Mo., assignor to Andrew A. Kramer, Kansas City, Mo.
Application May 1, 1937, Serial No. 69,100
Term of patent 14 years

The ornamental design for a vehicle tank body, substantially as shown and described.

107,772
DESIGN FOR A GLIDER
Aaron S. Goldberg, Philadelphia, Pa., assignor to Bunting Glider Company, Philadelphia, Pa., a corporation of Pennsylvania
Application November 19, 1937, Serial No. 73,013
Term of patent 7 years

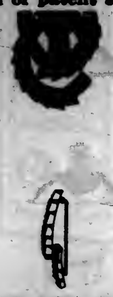
The ornamental design for a glider, as shown.

107,773
DESIGN FOR A GLIDER FRAME
Aaron S. Goldberg, Philadelphia, Pa., assignor to Bunting Glider Company, Philadelphia, Pa., a corporation of Pennsylvania
Application November 19, 1937, Serial No. 73,014
Term of patent 7 years



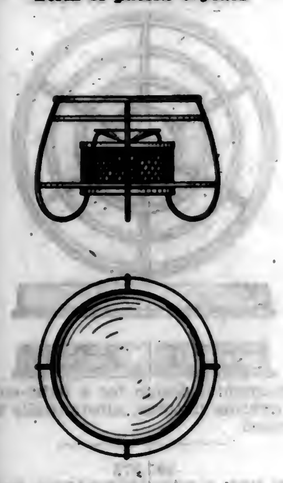
The ornamental design for a glider frame, as shown.

107,774
DESIGN FOR A LIGHT CONTROLLING PLATE FOR LIGHTING FIXTURES
Edwin F. Guth, Webster Groves, Mo.
Application November 12, 1937, Serial No. 72,985
Term of patent 14 years



The ornamental design for a light-controlling plate for lighting fixtures, substantially as shown and described.

107,775
DESIGN FOR A REFRIGERATED DISPLAY CASE
George J. Hopkins, Kendallville, Ind., assignor to McCray Refrigerator Company, Kendallville, Ind., a corporation of Indiana
Application November 6, 1937, Serial No. 72,659
Term of patent 7 years

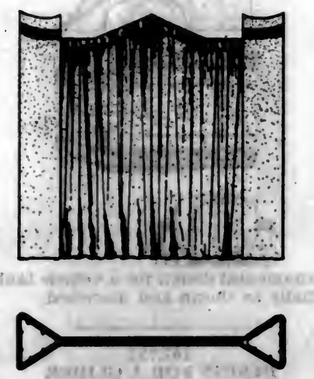


The ornamental design for a refrigerated display case, as shown and described.

107,776
DESIGN FOR A CLIP OR SIMILAR ARTICLE
Adolph Katz, New York, N. Y.
Application October 14, 1937, Serial No. 72,164
Term of patent 3½ years

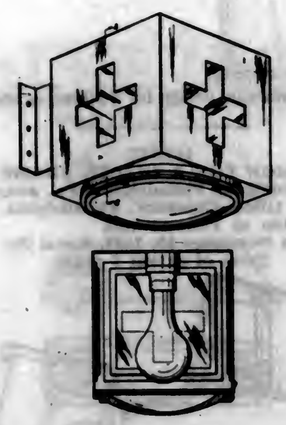
The ornamental design for a clip or similar article, substantially as shown.

107,777
DESIGN FOR A COMBINED CIRCULATOR FAN AND TABLE
William L. Kisling, St. Louis, Mo.
Application October 18, 1937, Serial No. 72,291
Term of patent 7 years



The ornamental design for a combined circulator fan and table, as shown.

107,778
DESIGN FOR A JEWELED REFLECTOR
Louis A. Koch, Jr., Louisville, Ky.
Application February 27, 1937, Serial No. 67,882
Term of patent 7 years

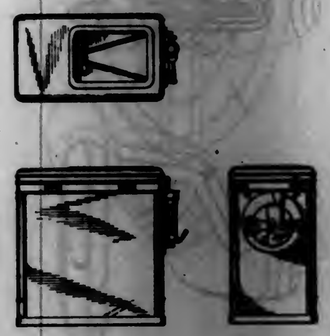


The ornamental design for a jeweled reflector; as shown and described.

107,779
DESIGN FOR A DRAPED PARTITION
Morris Lange, Cleveland Heights, Ohio
Application January 11, 1937, Serial No. 67,000
Term of patent 7 years

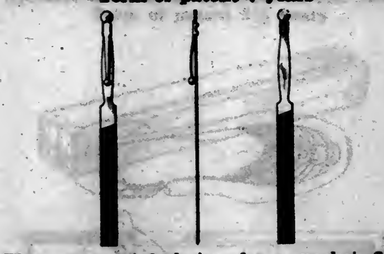
The ornamental design for a draped partition, as shown.

107,780
DESIGN FOR AN ILLUMINATED SIGN
William A. Lintern, Cleveland, Ohio, assignor to The Lintern Corporation, Cleveland, Ohio, a corporation of Ohio
Application August 20, 1937, Serial No. 71,218
Term of patent 14 years



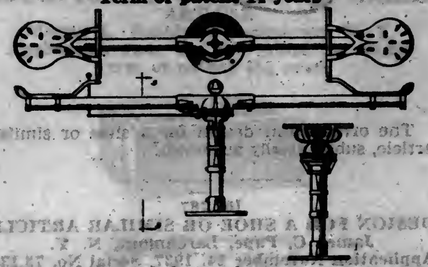
The ornamental design for an illuminated sign, as shown.

107,781
DESIGN FOR A GLASS
William E. Machelfresh, Jr., Chicago, Ill., assignor to Owens-Illinois Glass Company, Toledo, Ohio, a corporation of Ohio
Application June 9, 1937, Serial No. 69,767
Term of patent 14 years



The ornamental design for a glass substantially as shown.

107,782
DESIGN FOR A FREEZING UNIT
Morris E. Miller, Canton, Ohio, assignor, by mesne assignments, to The Miller Industries Company, Incorporated, Richmond, Va., a corporation of Virginia
Application October 10, 1936, Serial No. 65,252
Term of patent 7 years



The ornamental design for a freezing unit, as shown and described.

107,783
DESIGN FOR A POCKET FILE
Leon B. Miller, Brooklyn, N. Y.
Application October 19, 1937, Serial No. 72,304
Term of patent 7 years

The ornamental design for a pocket file as shown and described.

107,784
DESIGN FOR A SEESAW APPARATUS
John K. Milton and Curley Young, Chicago, Ill.; said Young assignor to said Milton
Application November 9, 1937, Serial No. 72,735
Term of patent 14 years

The ornamental design for a see-saw apparatus, as shown.

107,785
DESIGN FOR A MICROPHONE CONTROL
Aston L. Moore, South Bend, Ind., assignor to Cin-Rad Corporation, Chicago, Ill.
Application April 9, 1937, Serial No. 68,646
Term of patent 7 years

The ornamental design for a microphone control, substantially as shown and described.

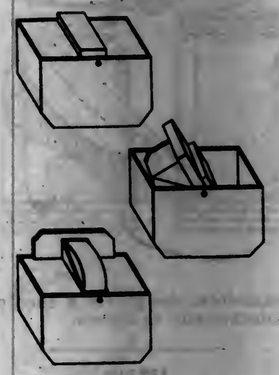
107,786
DESIGN FOR A SHOE OR SIMILAR ARTICLE
James C. Pape, Larchmont, N. Y.
Application November 24, 1937, Serial No. 73,138
Term of patent 3½ years

The ornamental design for a shoe or similar article, substantially as shown.

107,787
DESIGN FOR A SHOE OR SIMILAR ARTICLE
James C. Pape, Larchmont, N. Y.
Application November 24, 1937, Serial No. 73,139
Term of patent 3½ years

The ornamental design for a shoe or similar article, substantially as shown.

107,788
DESIGN FOR A SHOE OR SIMILAR ARTICLE
James C. Pape, Larchmont, N. Y.
Application November 24, 1937, Serial No. 73,140
Term of patent 3½ years

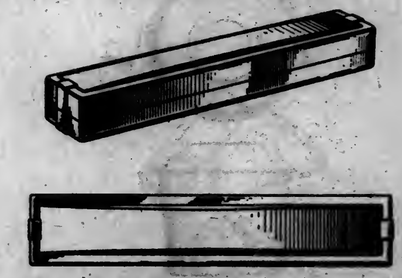


The ornamental design for a shoe or similar article, substantially as shown.

107,789
DESIGN FOR A SHOE OR SIMILAR ARTICLE
James C. Pape, Larchmont, N. Y.
Application November 24, 1937, Serial No. 73,141
Term of patent 3½ years

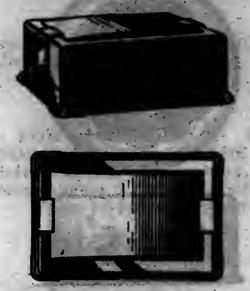
The ornamental design for a shoe or similar article, substantially as shown.

107,790
DESIGN FOR A COMBINATION JEWELRY DISPLAY BOX
Reuben Parmon, Brooklyn, and Sam Sweet, Bronx, N. Y.
Application March 9, 1937, Serial No. 68,088
Term of patent 3½ years



The ornamental design for a combination jewelry display box, as shown and described.

107,791
DESIGN FOR AN ELECTRIC FAN GUARD
Lorenz Duane Petee, Crestline, Ohio, assignor to Dominion Electrical Manufacturing Company, a corporation of Ohio
Application July 26, 1937, Serial No. 70,666
Term of patent 7 years



The ornamental design for an electric fan guard, substantially as shown.

107,792
DESIGN FOR A JEWELRY BOX OR SIMILAR ARTICLE
Merrill L. Rathbun, Jamestown, N. Y.
Application June 6, 1936, Serial No. 63,078
Term of patent 3½ years

The ornamental design for a jewelry box or similar article, as shown.

107,793
DESIGN FOR A JEWELRY BOX OR SIMILAR ARTICLE
Merrill L. Rathbun, Jamestown, N. Y.
Application June 6, 1936, Serial No. 63,079
Term of patent 3½ years

The ornamental design for a jewelry box or similar article as shown.

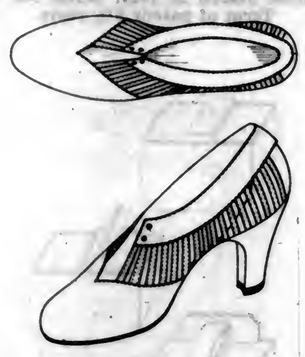
107,794
DESIGN FOR A JEWELRY BOX OR SIMILAR ARTICLE
Merrill L. Rathbun, Jamestown, N. Y.
Application June 6, 1936, Serial No. 63,080
Term of patent 3½ years

The ornamental design for a jewelry box or similar article, as shown.

107,795
DESIGN FOR A CHAMPAGNE BUCKET
Harry Robinson, New York, N. Y.
Application November 15, 1937, Serial No. 72,866
Term of patent 3½ years

The ornamental design for a champagne bucket, substantially as shown.

107,796
DESIGN FOR A FACE POWDER BOX
Elsa Schiaparelli, Paris, France
Application November 17, 1937, Serial No. 72,951
Term of patent 14 years

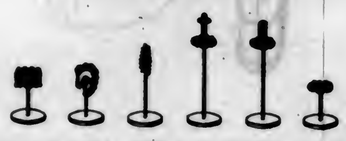


The ornamental design for a face powder box, as shown.

107,797
DESIGN FOR A DRESS
Jack Shane, New York, N. Y.
Application November 24, 1937, Serial No. 73,158
Term of patent 3½ years

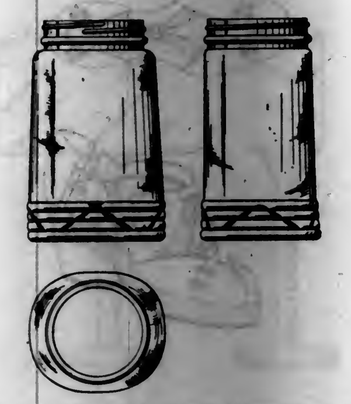
The ornamental design for a dress as shown.

107,798
DESIGN FOR A SHOE OR SIMILAR ARTICLE
Leo Sholtz, New York, N. Y.
Application November 24, 1937, Serial No. 73,143
Term of patent 3½ years



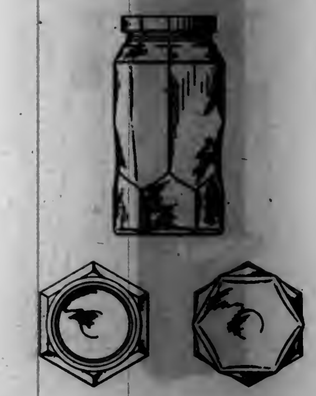
The ornamental design for a shoe or similar article, substantially as shown.

107,799
DESIGN FOR A SHOE OR SIMILAR ARTICLE
Leo Sholtz, New York, N. Y.
Application November 24, 1937, Serial No. 73,144
Term of patent 3½ years



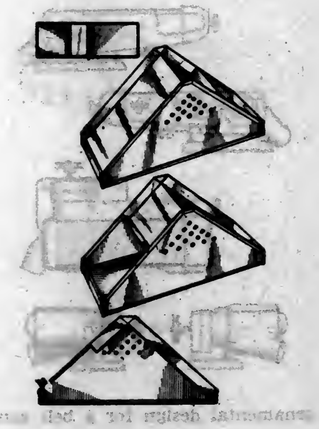
The ornamental design for a shoe or similar article, substantially as shown.

107,800
DESIGN FOR CHESSMEN
George W. Slater, East Akron, Ohio
Application May 4, 1937, Serial No. 69,145
Term of patent 7 years



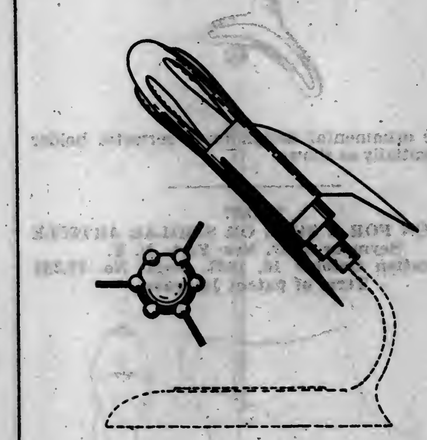
The ornamental design for chessmen as shown.

107,801
DESIGN FOR A PACKER JAR
George Smith, Jr., Olean, N. Y., assignor to Olean Glass Company, Olean, N. Y., a corporation of New York
Application November 11, 1937, Serial No. 72,798
Term of patent 7 years



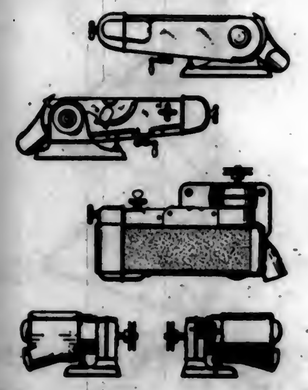
The ornamental design for a packer jar as shown and described.

107,802
DESIGN FOR A PACKER JAR
George Smith, Jr., Olean, N. Y., assignor to Olean Glass Company, Olean, N. Y., a corporation of New York
Application November 11, 1937, Serial No. 72,799
Term of patent 7 years



The ornamental design for a packer jar as shown.

107,803
DESIGN FOR A DISPLAY STAND FOR FRUIT OR THE LIKE
Arthur Smith, West McHenry, Ill.
Application July 29, 1937, Serial No. 70,710
Term of patent 3½ years

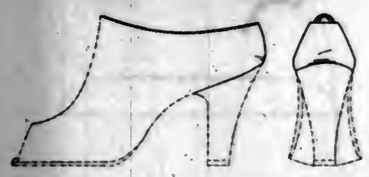


The ornamental design for a display stand for fruit or the like as shown.

107,804
DESIGN FOR A COMBINED LAMP AND SMOKING STAND OR THE LIKE
Victor Stansel, Schulenburg, Tex.
Application August 2, 1937, Serial No. 70,781
Term of patent 7 years

The ornamental design for a combined lamp and smoking stand or the like as shown and described.

107,805
DESIGN FOR A BELT SANDER
Herbert E. Tautz, Milwaukee, Wis., assignor to The Delta Manufacturing Company, Milwaukee, Wis., a corporation of Wisconsin
Application November 11, 1937, Serial No. 72,807
Term of patent 7 years



The ornamental design for a belt sander, as shown.

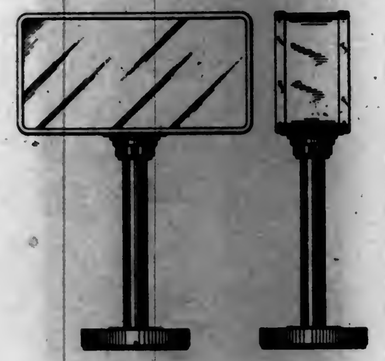
107,806
DESIGN FOR A SERVIETTE HOLDER
Rose M. Thamm, Berkeley, Calif.
Application October 27, 1937, Serial No. 72,468
Term of patent 14 years

The ornamental design for a serviette holder substantially as shown.

107,807
DESIGN FOR A SHOE OR SIMILAR ARTICLE
Seymour Troy, New York, N. Y.
Application October 16, 1937, Serial No. 72,235
Term of patent 14 years

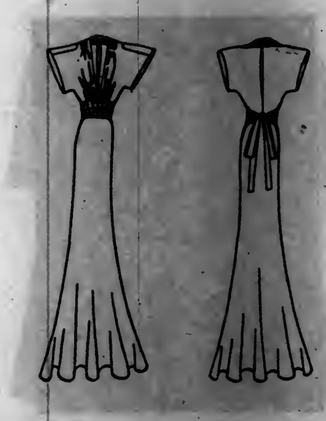
The ornamental design for a shoe or similar article, substantially as shown and described.

107,808
DESIGN FOR A SHOE OR SIMILAR ARTICLE
Seymour Troy, New York, N. Y.
Application November 20, 1937, Serial No. 73,059
Term of patent 3½ years



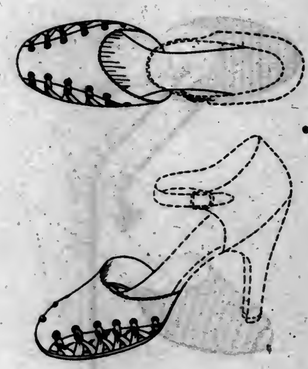
The ornamental design for a shoe or similar article, substantially as shown.

107,809
DESIGN FOR A CONTROL UNIT FOR ELECTRICAL APPARATUS
John Vassos, New Canaan, Conn., assignor to Radio Corporation of America, a corporation of Delaware
Application May 11, 1937, Serial No. 69,290
Term of patent 7 years



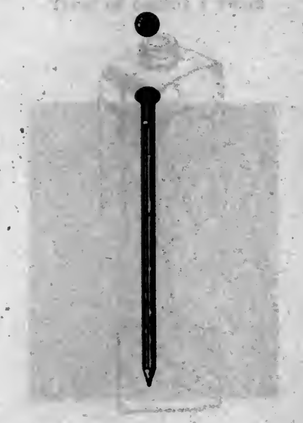
The ornamental design for a control unit for electrical apparatus substantially as shown.

107,810
DESIGN FOR A LAMP
Victor Weidner, Port Washington, and Fenick A. Vogel, New York, N. Y.
Application June 5, 1937, Serial No. 69,704
Term of patent 14 years



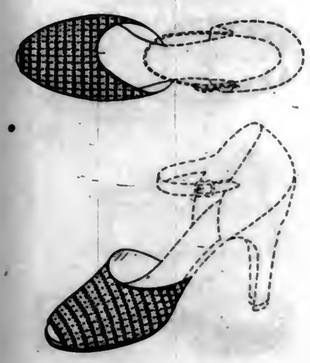
The ornamental design for a lamp, as shown.

107,811
DESIGN FOR A DRESS
Irene Welch, New York, N. Y.
Application October 19, 1937, Serial No. 72,302
Term of patent 3½ years



The ornamental design for a dress, substantially as shown.

107,812
DESIGN FOR A SHOE OR SIMILAR ARTICLE
Adolph Wertheim, New York, N. Y.
Application November 24, 1937, Serial No. 73,146
Term of patent 3½ years



The ornamental design for a shoe or similar article, substantially as shown.

107,813
DESIGN FOR A PENCIL
Raymond A. Weissenborn, Montclair, N. J.
Application October 8, 1936, Serial No. 65,200
Term of patent 3½ years

The ornamental design for a pencil, as shown and described.

107,814
DESIGN FOR A SHOE OR SIMILAR ARTICLE
Walter Zellweger, Flushing, N. Y.
Application November 24, 1937, Serial No. 73,147
Term of patent 3½ years

The ornamental design for a shoe or similar article, substantially as shown.

107,815
DESIGN FOR A BOTTLE
Adam Baker Barnhart, New York, N. Y., assignor to Jacqueline Cochran, doing business as J. C. Laboratories, Roselle, N. J.
Application August 9, 1937, Serial No. 70,944
Term of patent 14 years

The ornamental design for a bottle as shown.

107,816
DESIGN FOR A BOX OR SIMILAR COSMETIC CONTAINER
Adam Baker Barnhart, New York, N. Y., assignor to Jacqueline Cochran, doing business as J. C. Laboratories, Roselle, N. J.
Application August 9, 1937, Serial No. 70,951
Term of patent 14 years

The ornamental design for a box or similar cosmetic container as shown.

107,817
DESIGN FOR A TEXTILE FABRIC
Bere Berden, New York, N. Y.
Application November 20, 1937, Serial No. 73,037
Term of patent 3½ years

The ornamental design for a textile fabric, substantially as shown.

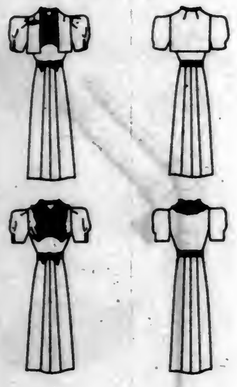
107,818
DESIGN FOR A LACE
George M. Boyson, Philadelphia, Pa.
Application December 14, 1937, Serial No. 73,605
Term of patent 3½ years

The ornamental design for a lace substantially as shown and described.

107,819
DESIGN FOR A NEGLIGEE
Mollye M. Cohen, New York, N. Y.
Application December 8, 1937, Serial No. 73,446
Term of patent 3½ years

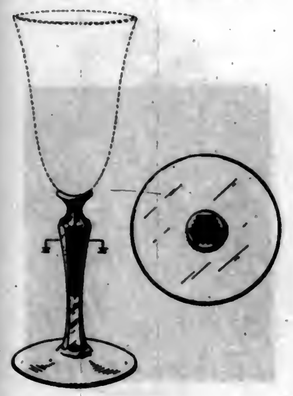
The ornamental design for a negligee, substantially as shown.

107,820
DESIGN FOR A BLOWPIPE
Leon M. Farnum, Chicago, Ill., and Clarence K. Teamer, Mount Airy, Pa., assignors to The S. S. White Dental Manufacturing Company, a corporation of Pennsylvania
Application November 19, 1936, Serial No. 66,020
Term of patent 14 years



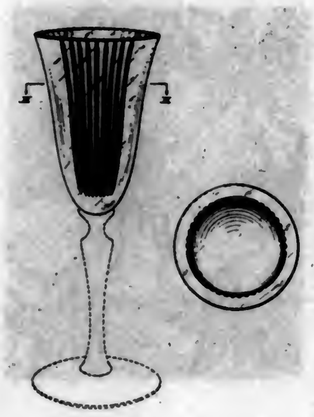
The ornamental design for a blowpipe as shown and described.

107,821
DESIGN FOR A TEXTILE FABRIC
Margit Fellegi, Los Angeles, Calif., assignor to West Coast-Manchester Mills Inc., Los Angeles, Calif., a corporation of California
Application October 30, 1937, Serial No. 72,536
Term of patent 7 years



The ornamental design for a textile fabric, as shown.

107,822
DESIGN FOR A DRESS ENSEMBLE
Albert Kaplan, New York, N. Y.
Application November 30, 1937, Serial No. 73,275
Term of patent 3½ years



The ornamental design for a dress ensemble, substantially as shown.

107,823
DESIGN FOR A GOBLET OR SIMILAR ARTICLE
Robert A. Kelly, East Pittsburgh, Pa., assignor to United States Glass Company, Pittsburgh, Pa., a corporation of Pennsylvania
Application October 18, 1937, Serial No. 72,288
Term of patent 7 years

The ornamental design for a goblet or similar article, substantially as shown.

107,824
DESIGN FOR A GOBLET OR SIMILAR ARTICLE
Robert A. Kelly, East Pittsburgh, Pa., assignor to United States Glass Company, Pittsburgh, Pa., a corporation of Pennsylvania
Application October 18, 1937, Serial No. 72,289
Term of patent 7 years

The ornamental design for a goblet or similar article, substantially as shown.

107,825
DESIGN FOR LACE
Gilbert Merton King, Pawtucket, R. I.
Application December 8, 1937, Serial No. 73,441
Term of patent 3½ years

The ornamental design for lace, substantially as shown.

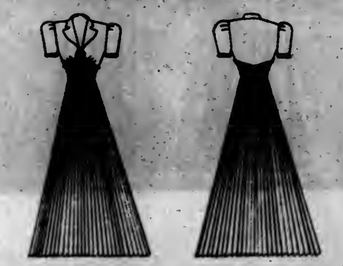
107,826
DESIGN FOR LACE
Gilbert Merton King, Pawtucket, R. I.
Application December 8, 1937, Serial No. 73,443
Term of patent 3½ years

The ornamental design for lace, substantially as shown.

107,827
DESIGN FOR LACE
Gilbert Merton King, Pawtucket, R. I.
Application December 8, 1937, Serial No. 73,442
Term of patent 3½ years

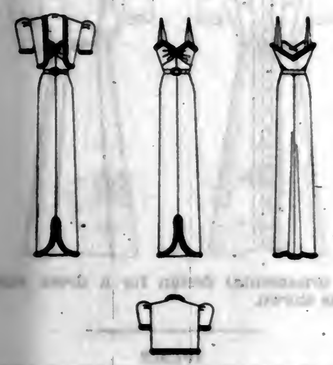
The ornamental design for lace, substantially as shown.

107,828
DESIGN FOR A DRESS
Ruth Kronman, New York, N. Y., assignor to Gross-Sydney Inc., New York, N. Y., a corporation of New York
Application November 20, 1937, Serial No. 73,074
Term of patent 3½ years



The ornamental design for a dress, substantially as shown.

107,829
DESIGN FOR A DRESS OR SIMILAR ARTICLE
Abraham H. Morris, New York, N. Y.
Application November 18, 1937, Serial No. 72,997
Term of patent 3½ years



The ornamental design for a dress or similar article substantially as shown.

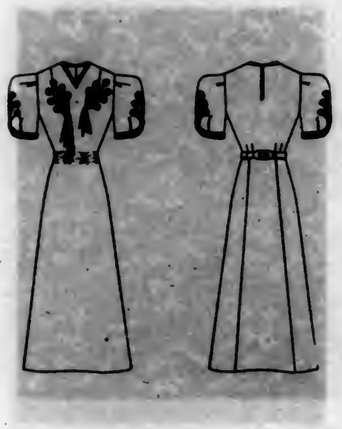
107,830
DESIGN FOR A DRESS OR SIMILAR ARTICLE
Abraham H. Morris, New York, N. Y.
Application November 18, 1937, Serial No. 72,998
Term of patent 3½ years

The ornamental design for a dress or similar article substantially as shown.

107,231
DESIGN FOR A DRESS ENSEMBLE OR SIMILAR ARTICLE
Abraham H. Morris, New York, N. Y.
Application November 18, 1937, Serial No. 73,000
Term of patent 3½ years

The ornamental design for a dress ensemble or similar article substantially as shown.

107,232
DESIGN FOR A DRESS
William G. Steinman, New York, N. Y.
Application December 8, 1937, Serial No. 73,480
Term of patent 3½ years



The ornamental design for a dress substantially as shown.

107,233
DESIGN FOR A LACE TABLECLOTH
James Waterfield, Philadelphia, Pa.
Application December 11, 1937, Serial No. 73,537
Term of patent 3½ years

The ornamental design for a lace tablecloth substantially as shown and described.

107,234
DESIGN FOR A DRESS
Samuel Zahn, New York, N. Y.
Application November 30, 1937, Serial No. 73,267
Term of patent 3½ years

The ornamental design for a dress, substantially as shown, and described.

107,235
DESIGN FOR A TEXTILE FABRIC
Robert E. Fatherley, New York, N. Y.
Application November 27, 1937, Serial No. 73,214
Term of patent 3½ years

The ornamental design for a textile fabric substantially as shown and described.

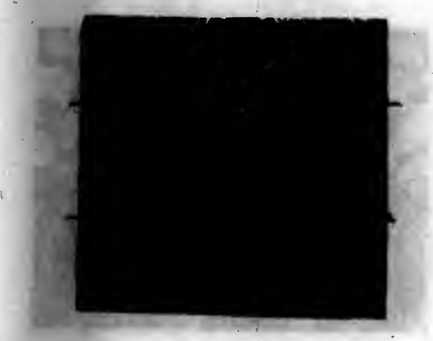
107,236
DESIGN FOR A BEAUTY HELMET
Rose Markley Newton, Mass.
Application November 19, 1932, Serial No. 72,762
Term of patent 14 years

The ornamental design for a beauty helmet, substantially as shown.

107,237
DESIGN FOR A TEXTILE FABRIC
Jean Guy Dumollon, Jackson Heights, N. Y., assignor to Tissus Haute Couture, Inc., New York, N. Y., a corporation of New York
Application December 1, 1937, Serial No. 73,293
Term of patent 3½ years

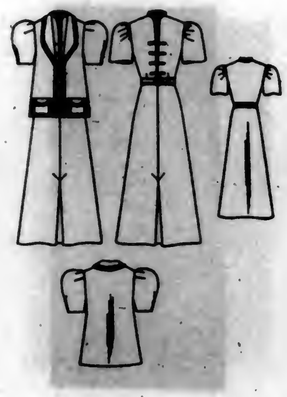
The ornamental design for a textile fabric substantially as shown and described.

107,238
DESIGN FOR A PRINTED TEXTILE FABRIC OR SIMILAR ARTICLE
Marion R. Hamra, Brooklyn, N. Y.
Application December 14, 1937, Serial No. 73,597
Term of patent 3½ years



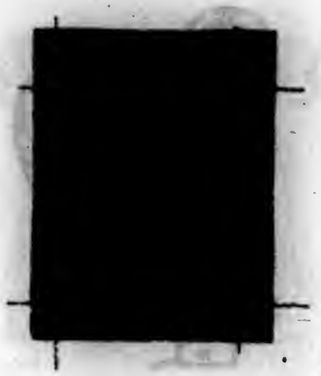
The ornamental design for a printed textile fabric or similar article as shown and described.

107,839
DESIGN FOR A PRINTED TEXTILE FABRIC OR SIMILAR ARTICLE
Marion R. Hamre, Brooklyn, N. Y.
Application December 14, 1937, Serial No. 73,599
Term of patent 3½ years



The ornamental design for a printed textile fabric or similar article as shown and described.

107,840
DESIGN FOR A PRINTED TEXTILE FABRIC OR SIMILAR ARTICLE
Marion R. Hamre, Brooklyn, N. Y.
Application December 14, 1937, Serial No. 73,600
Term of patent 3½ years



The ornamental design for a printed textile fabric or similar article as shown and described.

107,841
DESIGN FOR A DRESS ENSEMBLE
Jack Kirschner, New York, N. Y.
Application July 30, 1937, Serial No. 70,733
Term of patent 3½ years

The ornamental design for a dress ensemble, substantially as shown.

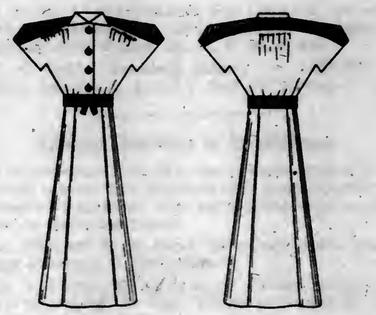
107,842
DESIGN FOR A TEXTILE FABRIC OR SIMILAR ARTICLE
Willard D. Roberson, New York, N. Y., assignor to Yale Fabrics Corp., New York, N. Y.
Application December 6, 1937, Serial No. 73,398
Term of patent 3½ years

The ornamental design for a textile fabric or similar article as shown and described.

107,843
DESIGN FOR A TEXTILE FABRIC OR SIMILAR ARTICLE
Willard D. Roberson, New York, N. Y., assignor to Yale Fabrics Corp., New York, N. Y.
Application December 6, 1937, Serial No. 73,399
Term of patent 3½ years

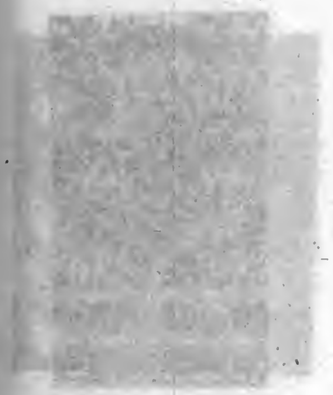
The ornamental design for a textile fabric or similar article as shown and described.

107,844
DESIGN FOR A TEXTILE FABRIC
William Rosenberg, New York, N. Y.
Application December 11, 1937, Serial No. 73,527
Term of patent 3½ years

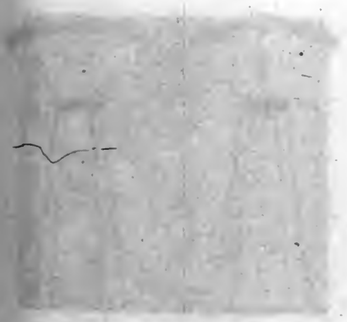


The ornamental design for a textile fabric substantially as shown and described.

107,845
DESIGN FOR A TEXTILE FABRIC
Walter Ross, New York, N. Y.
Application December 11, 1937, Serial No. 73,526
Term of patent 3½ years



The ornamental design for a textile fabric substantially as shown and described.



107,846
DESIGN FOR A DRESS
Ruth Kronman, New York, N. Y., assignor to Gross-Sydney Inc., New York, N. Y., a corporation of New York
Application November 26, 1937, Serial No. 73,196
Term of patent 3½ years

The ornamental design for a dress substantially as shown.

Patents Nos. 2,104,720 to 2,105,460

THE OFFICIAL GAZETTE

OF THE

United States Patent Office

Vol. 486—No. 2 TUESDAY, JANUARY 11, 1938 Price—$16 per year

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscription, $6.00 per annum, including annual index; $10.75; single numbers, 25 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter address the Commissioner of Patents, Washington, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

Rule 72

RULE 72. After the completion of the application the Office will not return the specification for any purpose whatever. If applicants have not preserved copies of the paper which they wish to amend, the Office will furnish them on the usual terms.

The drawing may be withdrawn only for such corrections as may be made by the Office; but a drawing cannot be withdrawn unless a photographic copy has been filed and approved by the Examiner as a part of the application. Photographic copies of the application shown in any drawing may be made only by the Office and after an approved photographic copy has been filed. Sketches filed to show proposed changes in construction must be in permanent ink. (See Rule 88.) Substitute drawings will not be admitted in any case unless required by the Office.

Notice Regarding Payment of Fees

All fees must be paid in advance. Payment of money required for Office fees must be made in specie, Treasury notes, national-bank notes, postage or fractional currency, or certified checks. Remittances should be made payable to the "Commissioner of Patents." Money sent by mail to the Patent Office will be at the risk of the sender. (See Rule 104.)

Certified checks, bank drafts, express and foreign money orders must be immediately negotiable in this country and for the full amount of the fee required by the Patent Office. No allowance can be made by this Office for any charge for their collection or exchange. Postage stamps will not be accepted. Failure to comply with the above instructions will cause delay.

Renewal of Forfeited Cases

A petition for the renewal of a forfeited application need not be signed by the inventor or assignee, but may be signed by the attorney.

A power of attorney in the original application authorizing an attorney to transact all business in the Patent Office in connection with the application construed to be of sufficient scope to include the signing of a petition for renewal and the subsequent prosecution of the application. (*Ex parte Apee*, 101 O. G., 1609.)

Adjudicated Patents

(C. C. A. Pa.) Loomis and Lewis patent, No. 1,746,198, for vacuum distillation and rectification of paraffin distillate, claims 1–4 *Held* invalid and not infringed. *Standard Oil Development Co.* v. *James B. Berry Sons Co.*, 92 F.(2d) 388.

(C. C. A. Pa.) Loomis patent, No. 1,756,032, for art of continuous distillation, claims 10, 11, and 12 *Held* invalid and not infringed. *Id.*

(D. C. Del.) Nagel patent, No. 1,809,758, for armor reenforced concrete slab, *Held* invalid. *Rosenberg* v. *Shakeproof Lock Washer Co.*, 20 F. Supp. 959.

(D. C. Del.) Rosenberg patent, No. 1,827,615, for fastener, claims 1, 2, 4, and 5 *Held* not infringed. *Id.*

Adverse Decisions in Interference

In interferences involving the indicated claims of the following patents final decisions have been rendered that the respective patentees were not the first inventors with respect to the claims listed:

Pat. 1,940,838, H. H. Bates, View transmission system, decided November 2, 1937, claim 5.

Pat. 2,037,802, R. A. Leonard, Roofing granule and process of making the same, decided December 17, 1937, claims 1, 2, 3, 6, and 7.

Pat. 2,076,012, M. P. Youker, Combined stabilizing and gas conversion process, decided December 13, 1937, claims 1, 2, 3, and 4.

Pat. 2,080,997, Abraham Beckelman, Knock-down display device, decided December 17, 1937, claims 1, 8, 14, and 17.

Condition of Applications Under Examination at Close of Business December 23, 1937

(Total number of applications awaiting action, excluding Trade-Mark Division, 42,851; Trade-Mark Division, 1,710. Oldest new case, June 10, 1937; oldest amended, May 20, 1937.)

DECISIONS IN PATENT AND TRADE-MARK CASES

Commissioner's Decision

Ex Parte Parker, Olley, Burton, and Stahlhuth

Decided August 19, 1937

Application—Prosecution Not Reopened by Interference Declared After Final Rejection.

An application prosecuted to final rejection as to certain claims which were thereafter canceled is not reopened to further ex parte prosecution by reason of a subsequently declared interference that terminated favorably to the applicant; and an amendment presenting claims copied from the application of the losing party to the subject matter of the canceled claims was properly denied admission.

On Petition.

Blackmore, Spencer & Flint for Parker et al.

Macklin, *First Assistant Commissioner:*

This is a petition seeking the entry of the amendment filed July 28, 1937 presenting three new claims.

The case, now in issue, was prosecuted to a final rejection of certain of the original claims. After the cancellation of the finally rejected claims the application was involved in an interference which terminated favorably to the applicant. Following the termination of the interference the amendment in question was presented, but was denied admission by the Examiner in accordance with the present approved practice of refusing to reopen the prosecution of a case under a like state of facts.

There appears to be no reason for making an exception to this practice in the instant case. The new claims, which were copied from the application of the unsuccessful party to the interference, appear to be directed to substantially the same subject matter as that to which finally rejected claim 1 was drawn. The applicant had his opportunity to prosecute an appeal on the finally rejected claims. Having chosen to forego such appeal, he is in no position now to request the reopening of the case for further prosecution before the Primary Examiner, or for the purpose of prosecuting a belated appeal.

Petitioner's right to present claims dominating the interference is not denied, but that is not the question here involved. If the claims in question were clearly patentable, the amendment would have been admitted and the claims allowed. But the case having once been closed to further ex parte prosecution by final rejection, and no new issue having developed during the interference proceeding, since petitioner was allowed all of the counts therein involved, the ex parte prosecution of the case may not now be reopened. Further, petitioner has his remedy by way of forfeiture and renewal if he desires further to prosecute this application.

The petition is denied.

Patent Suits

[Notices under sec. 4921, R. S., as amended Feb. 18, 1922]

1,262,860, S. B. Smith, Incubator, D. C. Oreg. (Portland), Doc. E 9528, *S. B. Smith* v. *G. Avery et al.* Dismissed on stipulation Oct. 11, 1937. Doc. E 9530, *S. B. Smith* v. *U. J. Kirk.* Dismissed on stipulation Oct. 11, 1937, in both cases.

1,281,884, M. J. Trumble, Process for converting petroleum oils, D. C. Dela., Doc. E 755, *Universal Oil Products Co.* v. *South Texas Gas Co. et al.* Consent decree dismissing bill Oct. 6, 1937.

1,301,029, I. M. Bean, Bath cabinet, D. C., E. D. Va., Doc. E 281, *American Metallic Shower Bath Co.* v. *Richmond Engineering Co., Inc.* Dismissed (notice Oct. 26, 1937).

1,335,695, E. L. Oliver, Rotary filter table; 1,685,084, J. T. Hoyt, Apparatus for separating liquid from pulp fibers; 1,685,085, same, Dewatering apparatus; 1,685,118, R. C. Campbell, Process for recovering sugar values, D. C. Hawaii (Honolulu), Doc. E 717, *Oliver United Filters, Inc.*, v. *C. Brewer & Co., Ltd., et al.* Claims 8 and 9 of 1,335,695, claims 3 and 5 of 1,685,084, claims 1, 2, 3, 13, 16, 17, 18, and 19 of 1,685,085, and all claims of 1,685,118 held valid, and infringed by all defendants excepting Goslin-Birmingham Mfg. Co., Inc.; injunction Sept. 1, 1937.

1,357,020. (See Re. 18,742.)

1,422,614, F. H. Page, Means for balancing and regulating the lift of aircraft, filed Oct. 25, 1937, D. C., S. D. N. Y., Doc. E 85/401, *Handley Page, Ltd.*, v. *Leech Aircraft, Inc.*

TRADE-MARKS

OFFICIAL GAZETTE, JANUARY 11, 1938

[VOL. 486. No. 2]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

Marks applied for "under the ten-year proviso" are registrable under the provision in clause (b) of section 5 of said act as amended February 18, 1911.

As provided by section 1 of said act, a fee of ten dollars must accompany each notice of opposition.

CLASS 1

Raw or Partly Prepared Materials

Ser. No. 398,737. RED BLOCK COAL COMPANY, Columbus, Ohio. Filed Oct. 20, 1937.

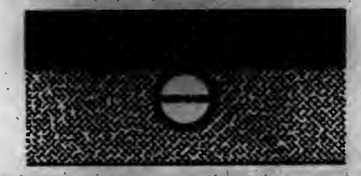
DELUXE

For Coal.
Claims use since Nov. 1, 1936.

Ser. No. 399,284. HARRY T. CAMPBELL SONS' CO., Towson, Md. Filed Nov. 3, 1937.

For Mined Calcium Stone, a Crude Mineral.
Claims use since Oct. 16, 1937.

CLASS 2



Receptacles

Ser. No. 384,717. REEFER-GALLER INC., New York, N. Y. Filed Oct. 23, 1936.

REEFER-GALLER

For Containers and Dispensers for Containing and Dispensing Solid Refills of Insect Exterminating and Preventative Substance.
Claims use since Feb. 4, 1936.

Ser. No. 384,718. REEFER-GALLER INC., New York, N. Y. Filed Oct. 23, 1936.

The drawing is lined for orange.
For Containers and Dispensers for Insecticides and Insect Exterminators, Repellents, Deterrents, and Preventives.
Claims use since Feb. 4, 1936.

Ser. No. 389,753. SHOE-FORM CO., INC., Auburn, N. Y. Filed Mar. 6, 1937.

NON-FLAM

For Boxes Made of Plastic Cellulose Derivative.
Claims use since Feb. 16, 1937.

CLASS 5

Adhesives

Ser. No. 398,217. SEARS, ROEBUCK AND CO., Chicago, Ill. Filed Oct. 6, 1937.

FLOOR-O-LEUM

For Linoleum Paste and Linoleum Cement.
Claims use since July 24, 1937.

CLASS 6

Chemicals, Medicines, and Pharmaceutical Preparations

Ser. No. 377,766. GERALD WALLACE, doing business as Four Aids Co., Stockton, Calif. Filed Apr. 28, 1936.

The words "4 Aids", "Foot", "Foot-Aid", "Gym", "Home", and "Travel" are disclaimed apart from the mark.
For Cream Ointment for the Treatment of the Feet.
Claims use since Mar. 1, 1935.

Ser. No. 384,716. REEFER-GALLER INC., New York, N. Y. Filed Oct. 23, 1936.

The drawing is lined for orange.
For Insecticides, Insect Exterminators, Repellents, Deterrents, and Preventives.
Claims use since Feb. 4, 1936.

Ser. No. 391,898. CHARLES A. BALLMAN, doing business as Remo Laboratory, Cranford, N. J. Filed Apr. 27, 1937.

Velskin

For Cosmetics and Toilet Preparations—Namely, Astringents, Skin Creams, Cleansing Creams, and Hand Creams.
Claims use since Aug. 25, 1936.

Ser. No. 398,372. SALVO CHEMICAL CORPORATION, Rothschild, Wis. Filed Oct. 11, 1937.

ZIMCO

For Vanillin.
Claims use since May 21, 1937.

Ser. No. 399,025. AMERICAN ANILINE PRODUCTS, INC., New York, N. Y. Filed Oct. 28, 1937.

AQUAFOE

For Waterproofing and Water-Repelling Agents for Textiles and Fabrics.
Claims use since Oct. 12, 1937.

Ser. No. 399,082. THE HARROWER LABORATORY, INC., Glendale, Calif. Filed Oct. 29, 1937.

Galocrin

For Medicinal Compound, in Tablet Form, for the Treatment of Galactagogue and Postpartum Involutant.
Claims use since Oct. 10, 1937.

Ser. No. 399,083. THE HARROWER LABORATORY, INC., Glendale, Calif. Filed Oct. 29, 1937.

Gerantin

For Medicinal Preparation for Treatment of Hypogonadism, Impotence, and Asexualism.
Claims use since Oct. 10, 1937.

Ser. No. 399,084. THE HARROWER LABORATORY, INC., Glendale, Calif. Filed Oct. 29, 1937.

Govarin

For Medicinal Preparation for Treatment of Hypovarism, Menopausal Disorders, and Menstrual Irregularities.
Claims use since Oct. 10, 1937.

Ser. No. 399,085. THE HARROWER LABORATORY, INC., Glendale, Calif. Filed Oct. 29, 1937.

Isocrin

For Medicinal Preparation for Treatment of Intestinal Stasis and Toxemia, and Defective Detoxication.
Claims use since Oct. 10, 1937.

Ser. No. 399,086. THE HARROWER LABORATORY, INC., Glendale, Calif. Filed Oct. 29, 1937.

Mathocrin

For Medicinal Compound in Tablet Form for the Treatment of Dysovarism and Menorrhagia.
Claims used since Oct. 10, 1937.

Ser. No. 399,087. THE HARROWER LABORATORY, INC., Glendale, Calif. Filed Oct. 29, 1937.

Planocrin

For Medicinal Preparation for Treatment of Toxemias and Other Disorders Incident to Pregnancy.
Claims use since Oct. 10, 1937.

Ser. No. 399,088. THE HARROWER LABORATORY, INC., Glendale, Calif. Filed Oct. 29, 1937.

Prolydin

For Medicinal Preparation for Treatment of Prostatic Hypertrophy and Prostatic Neurasthenia.
Claims use since Oct. 10, 1937.

Ser. No. 399,089. THE HARROWER LABORATORY, INC., Glendale, Calif. Filed Oct. 29, 1937.

TESTOCRIN

For Gonadotropic, Active Principle from the Male Sex Glands, for Treatment of Hypogonadism, Infantilism, and Functional Gonad Insufficiencies.
Claims use since Oct. 10, 1937.

Ser. No. 399,156. THE M. STEIN COSMETIC CO., New York, N. Y. Filed Oct. 30, 1937.

Blemiscover

For Preparation for Use in All Skin Blemishes.
Claims use since August, 1937.

Ser. No. 399,212. VICK CHEMICAL COMPANY, New York, N. Y. Filed Nov. 1, 1937.

NEUTROX

For Dentifrice and Mouth Wash.
Claims use since Sept. 1, 1936.

Ser. No. 399,215. JOHN WYETH AND BROTHER, INCORPORATED, Philadelphia, Pa. Filed Nov. 1, 1937.

BEWONAL

For Medicinal Preparation Containing Vitamin B_1 for Use as a Tonic and an Appetite Stimulator.
Claims use since Oct. 18, 1937.

Ser. No. 399,239. MAISON JOUBERT, INC., New York, N. Y. Filed Nov. 2, 1937.

EXPECTATION

For Astringents, Astringent Cerates, Bleach Creams, Beauty Creams, Cold Creams, Cleansing Creams, Obesity Creams, Refreshing Creams, Obesity Astringents, Dry Rouges, Liquid and Cream Rouges, Face Bleaches, Face Packs, Skin Whitener in Liquid, Cream and Solid Form, Eyebrow and Eyelash Grower, Eyebrow Pencils, Chemical Preparations Suitable for the Darkening of Eyebrows and Eyelashes, Hand Lotions, Skin Lotions, After-Shaving Lotions, Pomades, Face Powders, Talcum Powders, Body Powders, Sachets, Hair Elixirs, Dandruff Preparations, Hair Tonics, Hair Oils, Shampoos, Hair Dyes, Bath Salts, Smelling Salts, Lip Sticks, Incense, Tooth Pastes, Nail Creams, Nail Bleaches, Nail Powders, Nail Polishes, Witch-Hazel, Peroxide, Petroleum Jellies, Witch-Hazel Salve, Camphor Creams, Foot Powders, Corn Salves, Deodorants, Disinfectants, Bay Rum, Perfumes, and Toilet Waters.
Claims use since Oct. 22, 1937.

Ser. No. 399,240. MAISON JOUBERT, INC., New York, N. Y. Filed Nov. 2, 1937.

IMAGINATION

For Astringents, Astringent Cerates, Bleach Creams, Beauty Creams, Cold Creams, Cleansing Creams, Obesity Creams, Refreshing Creams, Obesity Astringents, Dry Rouges, Liquid and Cream Rouges, Face Bleaches, Face Packs, Skin Whitener in Liquid, Cream and Solid Form, Eyebrow and Eyelash Grower, Eyebrow Pencils, Chemical Preparations Suitable for the Darkening of Eyebrows and Eyelashes, Hand Lotions, Skin Lotions, After-Shaving Lotions, Pomades, Face Powders, Talcum Powders, Body Powders, Sachets, Hair Elixirs, Dandruff Preparations, Hair Tonics, Hair Oils, Shampoos, Hair Dyes, Bath Salts, Smelling Salts, Lip Sticks, Incense, Tooth Pastes, Nail Creams, Nail Bleaches, Nail Powders, Nail Polishes, Witch-Hazel, Peroxide, Petroleum Jellies, Witch-Hazel Salve, Camphor Creams, Foot Powders, Corn Salves, Deodorants, Disinfectants, Bay Rum, Perfumes, and Toilet Waters.
Claims use since Oct. 22, 1937.

Ser. No. 399,241. THOMAS MOORE, doing business as The Vosemar Co., Bury, England. Filed Nov. 2, 1937.

VOSEMAR

For Perfumery Products—Namely, Perfumes, Toilet Waters, Tooth Paste and Powders, Hair Tonics and Lotions, Face Creams, Face Lotions, and Face Powders.
Claims use since April, 1936.

Ser. No. 399,242. THOMAS MOORE, doing business as The Vosemar Co., Bury, England. Filed Nov. 2, 1937.

Curly Top

The portrait is fictitious. Applicant disclaims the words "Curly Top" except as shown.
For Perfumery Products—Namely, Perfumes, Toilet Waters, Tooth Paste and Powders, Hair Tonics and Lotions, Face Creams, Face Lotions, and Face Powders.
Claims use since April, 1936.
